

**TOC****INDEX****VIEW****V01 SteelEye Technology's High Availability Clustering, Data Replication and Disaster Recovery Solutions.****by Dwain Sims, Steeleye**

This session presents SteelEye Technology's High Availability Clustering, Data Replication and Disaster Recovery solutions. The presentation begins with an overview of high availability clustering covering "The Availability Equation" and "The HA Clustering Checklist". Next, an in-depth look at SteelEye LifeKeeper covers architecture, products and possible configurations. The session ends with a look at how you build and configure a LifeKeeper cluster.
