

**V03 IBM DDS Generation 5? A New View to a Proven Technology
by Steve Eiland, Certance**

One of IBM's newest product offerings is the Next Generation in DDS Generation 5. The IBM DDS Generation 5 drive provides the highest drive capacity and fastest performance in DDS technology and design enhancements that increase a proven history of reliability. At this session you will receive a free BauerOptics binocular with carrying case and will learn how IBM DDS Generation 5 products are aligned with the xSeries server product line. You will also discover how its design enhancements provide the IBM customer unparalleled reliability and data recovery capabilities along with the most cost-effective solution in data protection.
