About IBM®

- See <http://www.ibm.com/ibm/us/en/>

Agenda

- General information
- Running the Apache Cordova Showcase sample for Android
- Running the Apache Cordova Showcase sample for iOS

About this task

- The Apache Cordova Showcase delivers a sample that demonstrates how the Cordova APIs are used and how Cordova can be combined with Dojo to produce effective applications
- It is similar to the test application that is shipped as part of Cordova, but includes an improved look and feel which uses Dojo Mobile, resulting in an application with a layout similar to the Dojo Showcase
- The code is available within this release as an Eclipse project for Android and as an Xcode project for iOS

About this task

- The Apache Cordova Showcase works in two modes:
 - Single-column - for devices with small screens
 - Two-column - for devices with relatively large screens
- For Android:

About this task

- For iOS:

Generic workflow

- The Android and iOS versions of the Apache Cordova Showcase have the same structure
- The following workflow is common to both versions when running the demo:
 - Load the Apache Cordova Showcase
 - The scrollable demo menu is displayed
 - Switched to the demo view in single-column mode
 - Displayed in the right column in two-column mode
 - Scroll the demo menu and click the demo item
 - The demo is loaded
 - Run the demo
 - Follow the instructions that are provided in **Explore the demos**

Generic workflow

- Click **Source** to display the source view
 - Click the HTML tab to see the HTML template of the demo

```
id="info" dojoType="dojox.mobile.View"
Platform:      id="platform"
Version:       id="version"
UUID:         id="uuid"
Name:         id="name"
width:        id="width"
Height:       id="height"
Depth:       id="colorDepth"
```

```
<div id="info"
dojoType="dojox.mobile.View">
  <h4>Platform: <span
id="platform"> </span></h4>
  <h4>Version: <span
id="version"> </span></h4>
  <h4>UUID: <span id="uuid">
</span></h4>
  <h4>Name: <span
id="name"> </span></h4>
  <h4>Width: <span id="width">
</span>, Height: <span id="height">
</span>, Color Depth: <span
id="colorDepth"></span></h4>
</div>
```

Generic workflow

- Click the JavaScript tab to see the corresponding JavaScript code for the demo
- Note that not all demos have JavaScript code

The screenshot shows a mobile application interface with a status bar at the top displaying the time as 8:56 AM. Below the status bar is a navigation bar with 'Back', 'Info', and 'Demo' buttons. Underneath is a sub-navigation bar with 'HTML' and 'JavaScript' tabs, where 'JavaScript' is selected. The main content area displays the following JavaScript code:

```

 */
define(["dojo/dom"],
function(dom) {
    return {
        init: function() {
            console.log("initializeInfo()");
        }
    };
});

```

Generic workflow

- Click **Demo** to return to the demo view
 - In single-column mode, you can also click **Back**
- Select another demo from the demo menu
 - In single-column mode, click **Back** to return to the demo menu and pick other demos
 - In two-column mode, you can directly click items in the demo menu to jump to different demos

Agenda

- General information
- Running the Apache Cordova Showcase sample for Android
- Running the Apache Cordova Showcase sample for iOS

Before you begin

- See the following modules for how to build and deploy the Showcase:
 - Setting up your Worklight development environment
 - Setting up your Android development environment

Known limitations

There are some known limitations in this Showcase. The following instructions describe how to implement workarounds to these limitations:

- Zooming on Android tablets

- On Android 3.0+ tablets, the Showcase is automatically zoomed which gives a poor user experience
- To disable zooming, perform the following steps to set the SDK version to 11 or above:
 - Right-click the generated Android project and then **Properties**

- Click **Android** in the properties list
- Change **Project Build Target** to Android 3.0 or above and click **OK**
- Edit AndroidManifest.xml in the root of the generated project
 - Set android:minSdkVersion to the API level of the **Project Build Target**

```

</application>
<uses-sdk android:minSdkVersion="15" />
</manifest>

```

Known limitations

- Enable Showcase features
 - Edit AndroidManifest.xml in the root of the generated project
 - Add the following permission elements:

<uses-permission android:name="android.permission.CAMERA" />	Allows access to the camera device
<uses-permission android:name="android.permission.VIBRATE" />	Allows access to the device vibrator
<uses-permission android:name="android.permission.ACCESS_COARSE_LOCATION" />	Allows access to a coarse location such as Cell-ID or WiFi
<uses-permission android:name="android.permission.ACCESS_FINE_LOCATION" />	Allows access to a fine location such as GPS
<uses-permission android:name="android.permission.ACCESS_LOCATION_EXTRA_COMMANDS" />	Allows access to extra location provider commands
<uses-permission android:name="android.permission.READ_PHONE_STATE" />	Allows read only access to phone state
<uses-permission android:name="android.permission.INTERNET" />	Allows network sockets to be opened
<uses-permission android:name="android.permission.RECEIVE_SMS" />	Allows incoming SMS messages to be monitored, recorded, or processed
<uses-permission android:name="android.permission.RECORD_AUDIO" />	Allows audio to be recorded
<uses-permission android:name="android.permission.MODIFY_AUDIO_SETTINGS" />	Allows global audio settings to be modified
<uses-permission android:name="android.permission.READ_CONTACTS" />	Allows user's contacts data to be read
<uses-permission android:name="android.permission.WRITE_CONTACTS" />	Allows user's contacts data to be written (but not read)
<uses-permission android:name="android.permission.WRITE_EXTERNAL_STORAGE" />	Allows external storage to be written to
<uses-permission android:name="android.permission.ACCESS_NETWORK_STATE" />	Allows access to network information
<uses-permission android:name="android.permission.ACCESS_WIFI_STATE" />	Allows access to Wi-Fi network information

- Please also check the product Release Notes for information about known defects

Explore the demos

- Run a demo by selecting any entry in the demo menu

Explore the demos

- Info
 - Check that the information displayed is similar to what is shown on the right

Explore the demos

- Accelerometer
 - Click **Get Acceleration** to populate the X, Y, and Z attributes
 - Actual values depend on whether the device was moving when the button was pressed
 - Click **Start Watching Accelerometer**
 - Status set to Running
 - X, Y, and Z values continuously update
 - Click **Stop Watching Accelerometer**
 - Status set to Stopped
 - X, Y, and Z values stop updating

Explore the demos

- Audio Play/Record
 - Internet Audio
 - Click **Play/Unpause Internet Audio** to hear music play*
 - Click **Pause Playing Audio** to pause the music
 - Click **Play/Unpause Internet Audio** again to resume play*
 - Click **Stop Playing Audio** to stop play
 - Local Audio
 - Click **Play/Unpause Local Audio** to hear speech play
 - Click **Pause Playing Audio** to pause the speech
 - Click **Play/Unpause Local Audio** again to resume play
 - Click **Stop Playing Audio** to stop play

* Assumes a working network connection

Explore the demos

- Audio Play/Record
 - Recorded Audio
 - Click **Record Audio for 10 seconds** to start recording
 - Notification beep may be heard
 - Status set to Running
 - Talk into the microphone for 10 seconds
 - Notification beep sounds again
 - Status set to Stopped
 - Click **Play/Unpause Recorded Audio** to play back recorded audio
 - Click **Pause Playing Audio** to pause playback
 - Click **Play/Unpause Local Audio** again to resume play

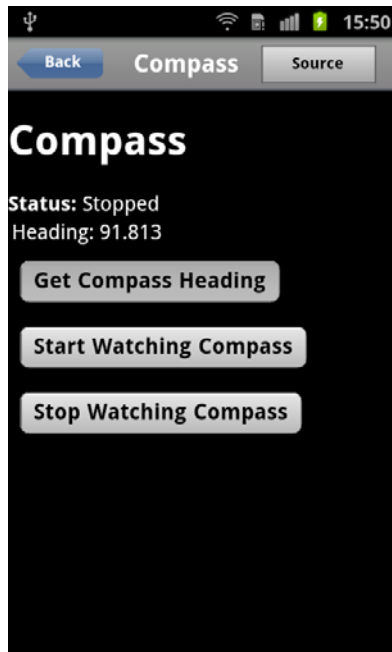

Explore the demos

- Camera
 - Click **Take Picture** to switch to your camera application
 - Take and save a picture
 - Control returns to the demo
 - Picture image is displayed
 - Status set to Success
 - Click **Select Image from Library** to switch to your image library application
 - Select an image
 - Control returns to the demo
 - Selected image is displayed
 - Status set to Success

Explore the demos

- Compass
 - Click **Get Compass Heading** to populate **Heading** attribute with current compass heading
 - Click **Start Watching Compass**
 - Status set to Watching
 - **Heading** value continuously updates as device changes direction
 - Click **Stop Watching Compass**
 - Status set to Stopped
 - **Heading** value stops updating

Explore the demos

- Contacts
 - Click **Get phone's contacts** to display a list of contacts in your device

Explore the demos

- Contacts
 - Click **Add new contact 'Dooney'** to add a contact to your device
 - An error message is displayed if contact exists
 - Click **Get phone's contacts** again to verify that the list of contacts now includes the new entry for Dooney

Explore the demos

- Events
 - Click **Intercept 'back' button** to intercept **Back** button clicks, then click **Back** on your device
 - Message 'Back button intercepted' is displayed
 - Click **Stop intercepting 'back' button** to switch intercept off
 - Click **Intercept 'menu' button** to intercept **Menu** button clicks, then click **Menu** on your device
 - Message 'Menu button intercepted' is displayed
 - Click **Stop intercepting 'menu'** to switch intercept off

Explore the demos

- Events
 - Click **Intercept 'search' button** to intercept **Search** button clicks, then click **Search** on your device
 - Message 'Search button intercepted' is displayed
 - Click **Stop intercepting 'search'** to switch intercept off

Explore the demos

- Location*
 - Click **Get Location** to populate **Latitude** and **Longitude** attributes with current location
 - Click **Start Watching Location**
 - Status set to Watching
 - **Latitude** and **Longitude** values continuously update as device moves
 - Click **Stop Watching Location**
 - Status set to Stopped
 - **Latitude** and **Longitude** values stop updating

* Assumes a working GPS or wireless-based location

Explore the demos

- Local Storage
 - Note the value of the counter that is displayed in the message
 - Exit the Showcase, restart it, and reselect **Local Storage**
 - Check that the counter is incremented by one
 - The counter does not increment simply by leaving this view and coming back; you must exit the Showcase

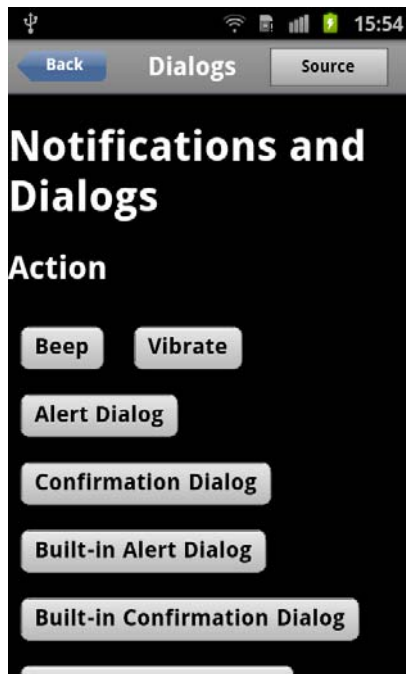

Explore the demos

- Miscellaneous content
 - Click **Call 911** to initiate a call to 911 (emergency assistance in the US and Canada)
 - If your device is not call-enabled, an error message is displayed
 - Click **Send Mail** to switch to your mail application
 - To:, Subject:, and Body fields are pre-populated with test data
 - Click **Send SMS** to switch to your SMS application
 - Click **Load Web Page** to switch to your browser application
 - Click **Map IBM HQ** to switch to Google Maps and locate IBM HQ
 - Click **Search Android Market** to switch to the Android Market application
 - Click **View Image App** to switch to your image viewing and manipulation application
 - **Note:** This feature is not supported on Android 3.x devices

Explore the demos

- Notification/Dialogs
 - Click **Beep** to cause your device to beep
 - Click **Vibrate** to cause your device to vibrate, if the device is capable
 - Click **Alert Dialog**
 - An alert window with **Continue** pops up
 - Click **Confirmation Dialog**
 - A confirmation window with **Yes**, **No**, and **Maybe** pops up
 - Click one of those buttons to pop up another alert indicating which button was pressed
 - Click **Built-in Alert Dialog**
 - An alert window with **OK** pops up
 - Click **Built-in Confirmation Dialog**
 - A confirmation window with **OK** and **Cancel** pops up

Explore the demos

- Notification/Dialogs
 - Click **Built-in Prompt Dialog**
 - A prompt window with an input field and **OK** and **Cancel** pops up
 - Click in the input field to get a keyboard widget
 - Change the text and click either button

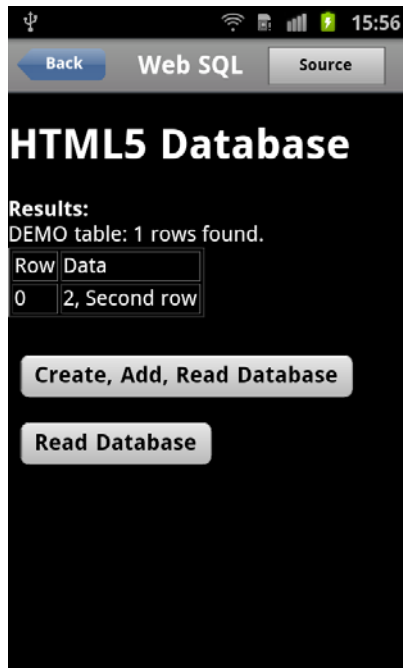

Explore the demos

- Web SQL
 - Click **Create, Add, Read Database**
 - Results show:
 - Database opened
 - Data written to DEMO table
 - SQL search results

Explore the demos

- Web SQL
 - Click **Read Database**
 - Results show a different SQL search result set
 - Note
 - If the database has not been created since your last install of the Showcase, clicking **Read Database** before **Create, Add, Read Database** displays an error message
 - The database persists until the Showcase is reinstalled

Related information

- For more information about Dojo Mobile widgets, including views, see the following link: <http://docs.dojocampus.org/dojox/mobile>

Agenda

- General information
- Running the Apache Cordova Showcase sample for Android
- Running the Apache Cordova Showcase sample for iOS

Before you begin

- See the following modules for how to build and deploy the Showcase:
 - Setting up your Worklight development environment
 - Setting up your iOS development environment

Known limitations

There are some known limitations in this Showcase. The following instructions describe how to implement workarounds to these limitations:

- Importing a Worklight® project
 - The import window does not close when importing an existing project into the workspace for the first time
 - This behavior is a known Eclipse defect
 - https://bugs.eclipse.org/bugs/show_bug.cgi?id=337913
 - To resolve this situation, perform the following steps:
 - Exit the Worklight Studio
 - Right-click the Eclipse icon and then **Close**
 - Restart the Worklight Studio
 - Delete the partially imported project from the workspace
 - Import the project again
 - The project is successfully imported

Known limitations

- Screen rotation
 - Apache Cordova disables screen rotation by default
 - To enable free rotation, perform the following step:
 - Edit CDVMainViewController.m
 - Update method **shouldAutorotateToInterfaceOrientation** to always return **YES** in the generated native Xcode project

```
- (BOOL)shouldAutorotateToInterfaceOrientation:(UIInterfaceOrientation)interfaceOrientation
{
    // Return YES for supported orientations
    return (interfaceOrientation == YES);
}
```

- Please also check the product Release Notes for information about known defects

Privacy Policy Considerations

- IBM Software products, including software as a service solutions, ("Software Offerings") may use cookies or other technologies to collect product usage information, to help improve the end user experience, to tailor interactions with the end user or for other purposes. In many cases no personally identifiable information is collected by the Software Offerings. Some of our Software Offerings can help enable you to collect personally identifiable information. If this Software Offering uses cookies to collect personally identifiable information, specific information about this offering's use of cookies is set forth below.
- Depending upon the configurations deployed, this Software Offering may use session cookies that collect session information (generated by the application server). These cookies contain no personally identifiable information and are required for session management. Additionally, persistent cookies may be randomly generated to recognize and manage anonymous users. These cookies also contain no personally identifiable information and are required.
- If the configurations deployed for this Software Offering provide you as customer the ability to collect personally identifiable information from end users via cookies and other technologies, you should seek your own legal advice about any laws applicable to such data collection, including any requirements for notice and consent. For more information about the use of various technologies, including cookies, for these purposes, see IBM's Privacy Policy at <http://www.ibm.com/privacy>; and IBM's Online Privacy Statement at <http://www.ibm.com/privacy/details>; the sections entitled "Cookies, Web Beacons and Other Technologies" and the "IBM Software Products and Software-as-a-Service Privacy Statement" at <http://www.ibm.com/software/info/product-privacy>.

Support and comments

- For the entire IBM Worklight documentation set, training material and online forums where you can post questions, see the IBM website at:
 - <http://www.ibm.com/mobile-docs>
- **Support**
 - Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at:
 - <http://www.ibm.com/software/passportadvantage>
 - If you have a Software Subscription and Support in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. For additional details, consult your IBM Software Support Handbook at:
 - <http://www.ibm.com/support/handbook>
- **Comments**
 - We appreciate your comments about this publication. Please comment on specific errors or omissions, accuracy, organization, subject matter, or completeness of this document. The comments you send should pertain to only the information in this manual or product and the way in which the information is presented.
 - For technical questions and information about products and prices, please contact your IBM branch office, your IBM business partner, or your authorized remarketer.
 - When you send comments to IBM, you grant IBM a nonexclusive right to use or distribute your comments in any way it believes appropriate without incurring any obligation to you. IBM or any other organizations will only use the personal information that you supply to contact you about the issues that you state.
 - Thank you for your support.
 - Submit your comments in the IBM Worklight Developer Edition support community at:
 - <https://www.ibm.com/developerworks/mobile/worklight/connect.html>
 - If you would like a response from IBM, please provide the following information:
 - Name
 - Address
 - Company or Organization
 - Phone No.
 - Email address

Thank You
