The Vitality of Business Continuity

Put POWER in Your Business

Is your data protected and secure? Will you sleep soundly tonight?

Trust eBU and eDR for continuous data protection in your servers

eBu and eDR for SME work across the Windows environment. Gadgetware-Technology (GWT), a technology enabler, will help the company to fast forward such implementation plan by providing eBU and eDR on-demand services. GWT will utilize its experience and infrastructure to help any organization avail their IT services in the shortest time.

With GWT eBU and eDR for SME, companies do not need to worry about missing data or backup failure due to unforeseen circumstances any longer. And Continuous Data Protection (CDP) for the Windows environment will be deployed and changes will be protected instantly from any point.

Key Benefits

- Continuous Data Protection (CDP) for windows
- Recover to different hardware through Bare Metal Restore
- Access to Exchange recovers data on-the-fly with Exchange agent
- Implementation experience

- Best practice methodologies
- Customized solutions based on requirement
- Monthly reporting
- Subscription based (OPEX)
- Minimize professionals in daily backup routine job

About Gadget Wearable Tech

gadget **wearable**
The Vitality of Business Continuity

Gadget Wearable Tech offers 2 cutting-edge flagship solutions – eBU and eDR – that aim to provide today's enterprises reliable and robust methods to retrieve business-critical information, back up critical data, recover data comprehensively, recover and restore services in an encrypted and secure environment to ensure business continuity. This will allow customers to focus on their business objectives instead of just managing their IT infrastructure. To top that all off, the solutions are powered and hosted by an ISO certified company and BS799 compliance data center.
