

MAKING IT SIMPLE I.T. that takes care of itself

IBM Lotus software

Lotus Foundations Start is a small business appliance that provides you with the essential software your business needs to focus on running the business and not managing computer systems. The solution offers powerful features to enhance the execution of e-mails, calendars, office productivity, file management, backup and recovery, network security, remote access, applications, and more. All bundled in a single package at an affordable price.

Power Features

- **Data security** - LFS has a reliable disk-based backup technology that backs up data as often as every 15 minutes. Information is restored in minutes by inserting backup drive into a new server. LFS also integrates firewall, anti-virus and anti-spam technology designed to stop threats before they reach your network.
- **E-mail, calendars and contacts** - LFS comes complete with IBM Lotus Notes e-mail software to schedule meetings and manage contacts within a modern and intuitive interface that is compatible with Microsoft Outlook and is Web accessible remotely.
- **Web server** - LFS can function as a Web server which allows you to create and publish your own Web pages and host your own professional e-mail domain.

Freedom from the high proprietary cost of office productivity software. What's more, with the included Lotus Symphony software, you get the functionality needed to create, edit and share business documents, spreadsheets and presentations. Intuitive and easy to use, it's a fully featured office productivity suite. It lets you import, edit and save a variety of other file formats including Microsoft Office files. You can even convert and export your documents, spreadsheets and presentations using Adobe Portable Document Format (PDF) files.

With such a complete and comprehensive tool available to cut costs and run your business effectively and efficiently, there is no reason to delay your implementation.

FOR JUST **RM 16,771** YOU GET **LOTUS FOUNDATIONS**
