

IBM Information Infrastructure

Innovative, Integrated, Available Today

Manage information more effectively and **mitigate information risks** with a **dynamic infrastructure** that efficiently and securely stores, protects and optimizes access to information

Protect, manage and **gain insight** from your information with IBM's leading-edge storage and data management products, services and integrated solutions; supported by world-class expertise and proven experience

Information Compliance

Mitigate information risks

Information Availability

Deliver continuous access to trusted information

Information Retention

Support information retention policies

Information Security

Securely share information

Agenda

- **Companies' Data Explosion**
- **Dieting - people to databases/Impact**
- **Solutions To Data Growth**
 - Common approaches to managing data growth
 - Enterprise data management alternatives
 - Capabilities of a comprehensive solution
- **IBM Optim™**
- **Client successes**
- **Q/A**

The Data Growth Phenomenon

Scenario - Growth is great ... or is it?

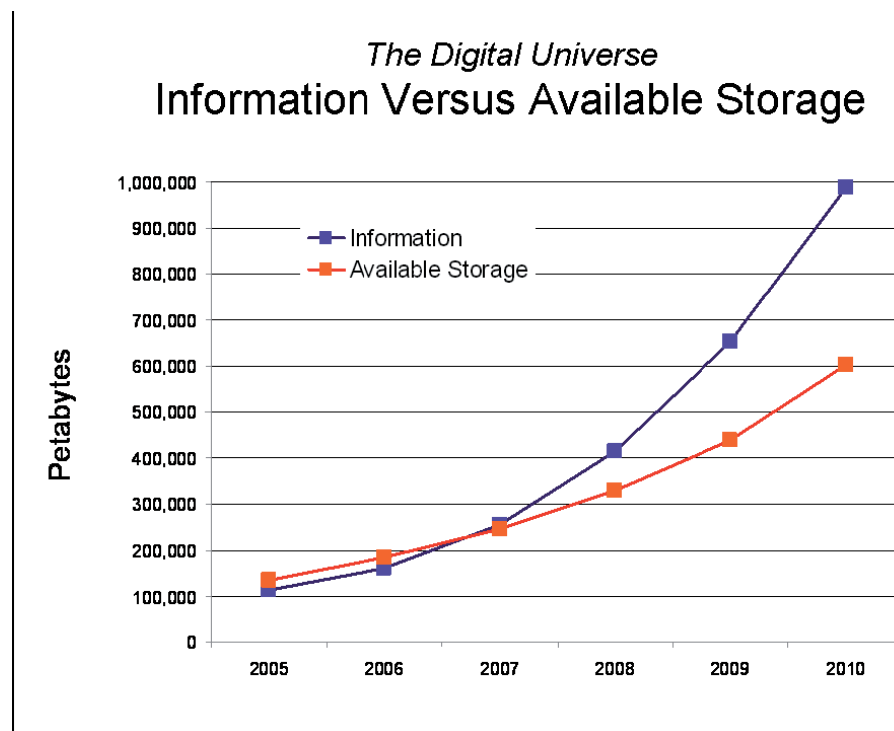

- **Increase in Revenue**
- **Sales Book is full**
- **New branches added every month**

But then reality sets in ...

- **Additional disk storage capacity purchased 3 months ago is full AGAIN**
- **CRM data grew by 65% last year**
- **Hold times are up 50%**
- **Call center reps complain that it takes too long to resolve customer inquiries**

Your Data is growing and cannot be stopped!

- **Between 2006 and 2010, the information added from 161 exabytes to 988 exabytes. (6X) ***
 - 1 exabyte = 1,000 PB or 1,000,000 TB or 1,000,000,000 GB
- **In 2007, the amount of information created > storage capacity available ***

* Source: IDC 2007

The Data Explosion?

- **Mergers & acquisitions**
- **Organic business growth**
 - eCommerce
 - ERP/CRM
- **Records retention**
 - HIPAA
 - SOX
- **Data multiplier effect**

According to industry analysts, annual compound growth rates for databases will exceed 125%

Structured Data Growth Research

FIGURE 4: Projected Growth in Storage Needs (Changes over the next 12 months)

| | Structured(1) | Unstructured(2) |
|----------------------------|---------------|-----------------|
| Increase by more than 100% | 8% | 5% |
| Increase by 50-100% | 12% | 12% |
| Increase by 25-50% | 26% | 17% |
| Increase by 10-25% | 28% | 20% |
| Increase by 5-10% | 13% | 10% |
| Increase by 1-5% | 5% | 7% |
| Stay the same | 3% | 7% |
| Decrease | 0.3% | 0.5% |
| Don't know/unsure | 3% | 19% |

(1) Traditional relational database files (2) Email, images, video, other unstructured data

According to a survey recently conducted by the Independent Oracle Users Group (IOUG):

Structured Data Growth Research

- **Structured Data need for storage > unstructured data**
- **46% of participants said: to increase storage capacity by at least 25% over the next 12 months**
- **8% of participants said: to increase storage capacity by 100% over the next 12 months!!**

According to a survey recently conducted by the Independent Oracle Users Group (IOUG):

Why Data Growth?

- **Banks – Customer Transactions, Service Calls, AML, Basel II**
- **Telcos – CDRs, CRM**
- **Governments – Constituents Case Management**
- **FMCG/Durables- Customer, Logistics, Procurement Transactions**

Why Data Growth?

FIGURE 6: What's Driving Demand for Increased Storage?

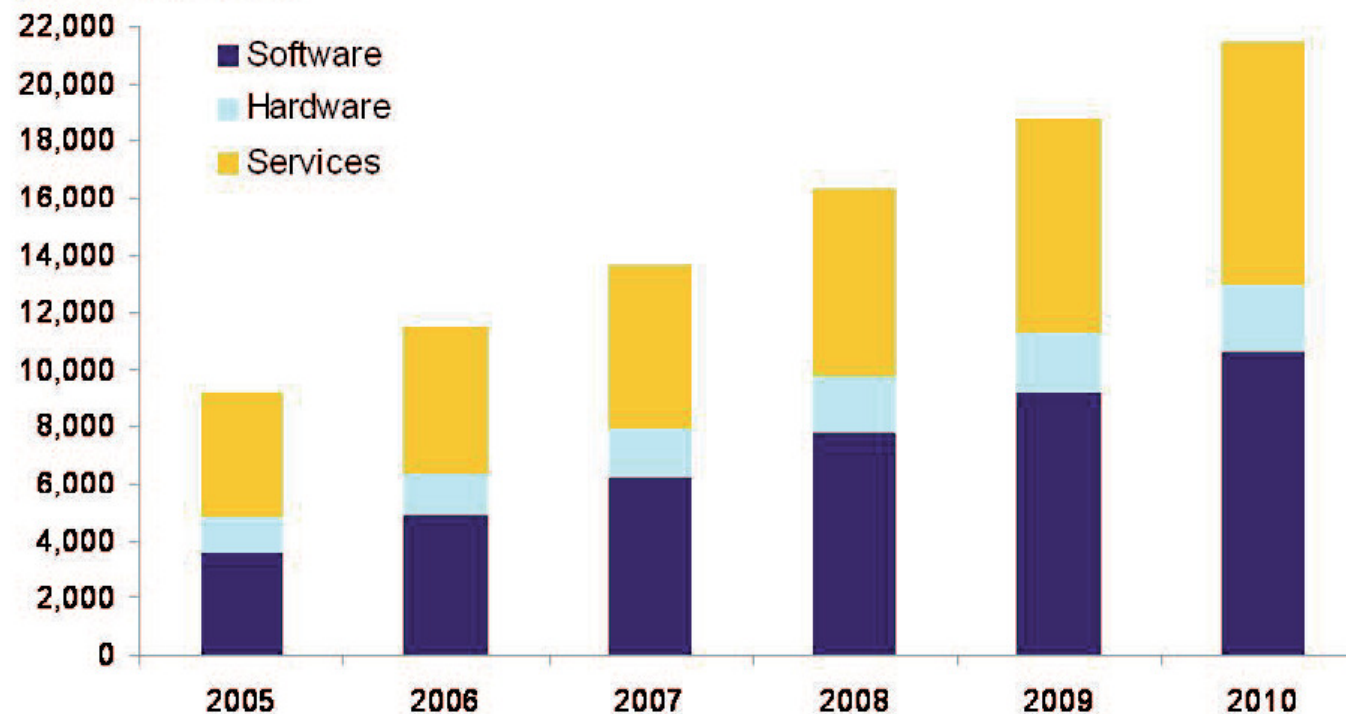

According to a survey recently conducted by the Independent Oracle Users Group (IOUG):

Information Compliance

The Digital Universe The Information “Compliance” Market

(Spending on Infrastructure to Support Regulatory Compliance Initiatives)

\$ Millions Worldwide

* Source: IDC 2007

Data Growth Impact

Impact Of Data Growth

- **Increased Costs**
- **Poor Data Governance**

**Means Poor Leverage of Data as
an Enterprise Asset and Issues**

.....IT Complexity

.....Compliance

.....Business Intelligence

.....Alignment of IT and Business

Impact Of Data Growth - Banking

- **Compliance with Regulations like Basel II, AML**
- **Risk Portfolio Management**
- **Fraud Patterns Detection/Management**

Impact Of Data Growth - Telco

- **Analysis of Customer Data like CDR**
 - **Customer retention, Segmentation, Cross Sell/Up sell**
 - **Planning of News Products and services**
-ARPU. AMPU, CPGA reporting, monitoring and Analysis**
-Customer Care**
-Regulatory Compliance**
-Payments/Revenue Leaks**

Growth for People and Databases – Similarities? Issues?

- **People:** Without proper dieting, people tend to perform more slowly.
- **Databases:** Without consistency controls on your database **PERFORMANCE**
- **People:** Weight growth requires unnecessary new wardrobes.
- **Databases:** Database growth **COSTS** unnecessary purchase of new storage.
- **People:** Weight growth can lead to Risks - Health
- **Databases:** Data Growth can lead to **RISKS** recovery and Compliance

Data Growth Solutions

Common Solutions to Data Growth

- **Back up the database**

but ...

- *No Direct Access*
- *Media Rot*
- *Version Compatibility*

RESULT: BUSINESS RISKS!!!

Common Solutions to Data Growth

- **Tune or partition the database**
- **Add capacity**
 - Processors, storage
- **Purge data**

Temporary Solution but ...

- *High Operational Costs*
- *High Information Risks*
- *No Data Visibility*

What is a Comprehensive Solution for Data Growth?

E Organize and retain business records generated from enterprise applications

- Definition of **D** **S**ervice levels

- Secure and Cost-effective **D** **S**tore

Access to information by decision makers, when and how they need it

- Segment and manage data at the complete business **O**bject level

- Apply **P**olicies to manage data at each point of its lifecycle

P A S S E O

Optim, the Leader in Enterprise Data Management

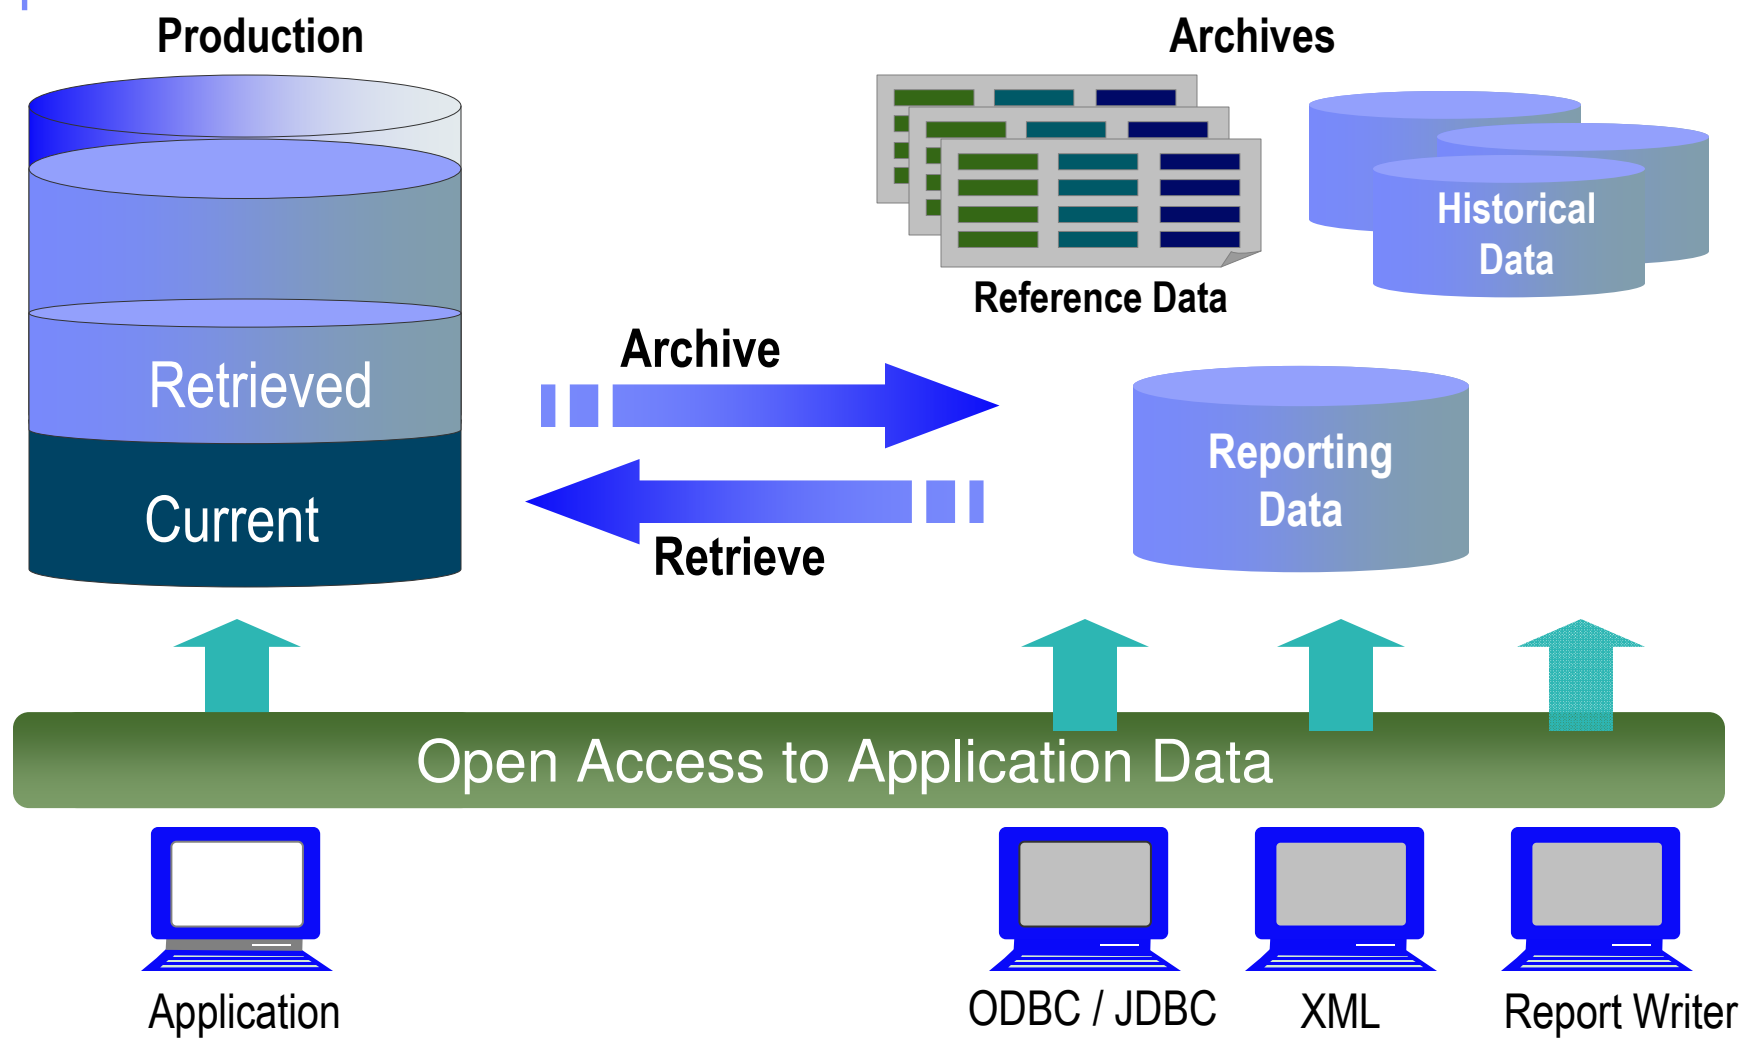

LEADERSHIP

IBM Optim Solutions: Policy-Driven Archiving

- **Manage data throughout the information lifecycle**
- **Apply business rules to archive and access data**
- **A single enterprise solution**
- **Optimize the business value of your IT infrastructure**

Optim: Universal Access

Optim – Defining Data Service Levels

- **Segregate historical from current data**
- **Safely archive**
 - Retain convenient access
- **Convenient Access by service level**
 - Active data, reporting data and reference data
- **Tiered storage strategies**

Optim – Cost Effective Data Growth

Reverse Multiplier

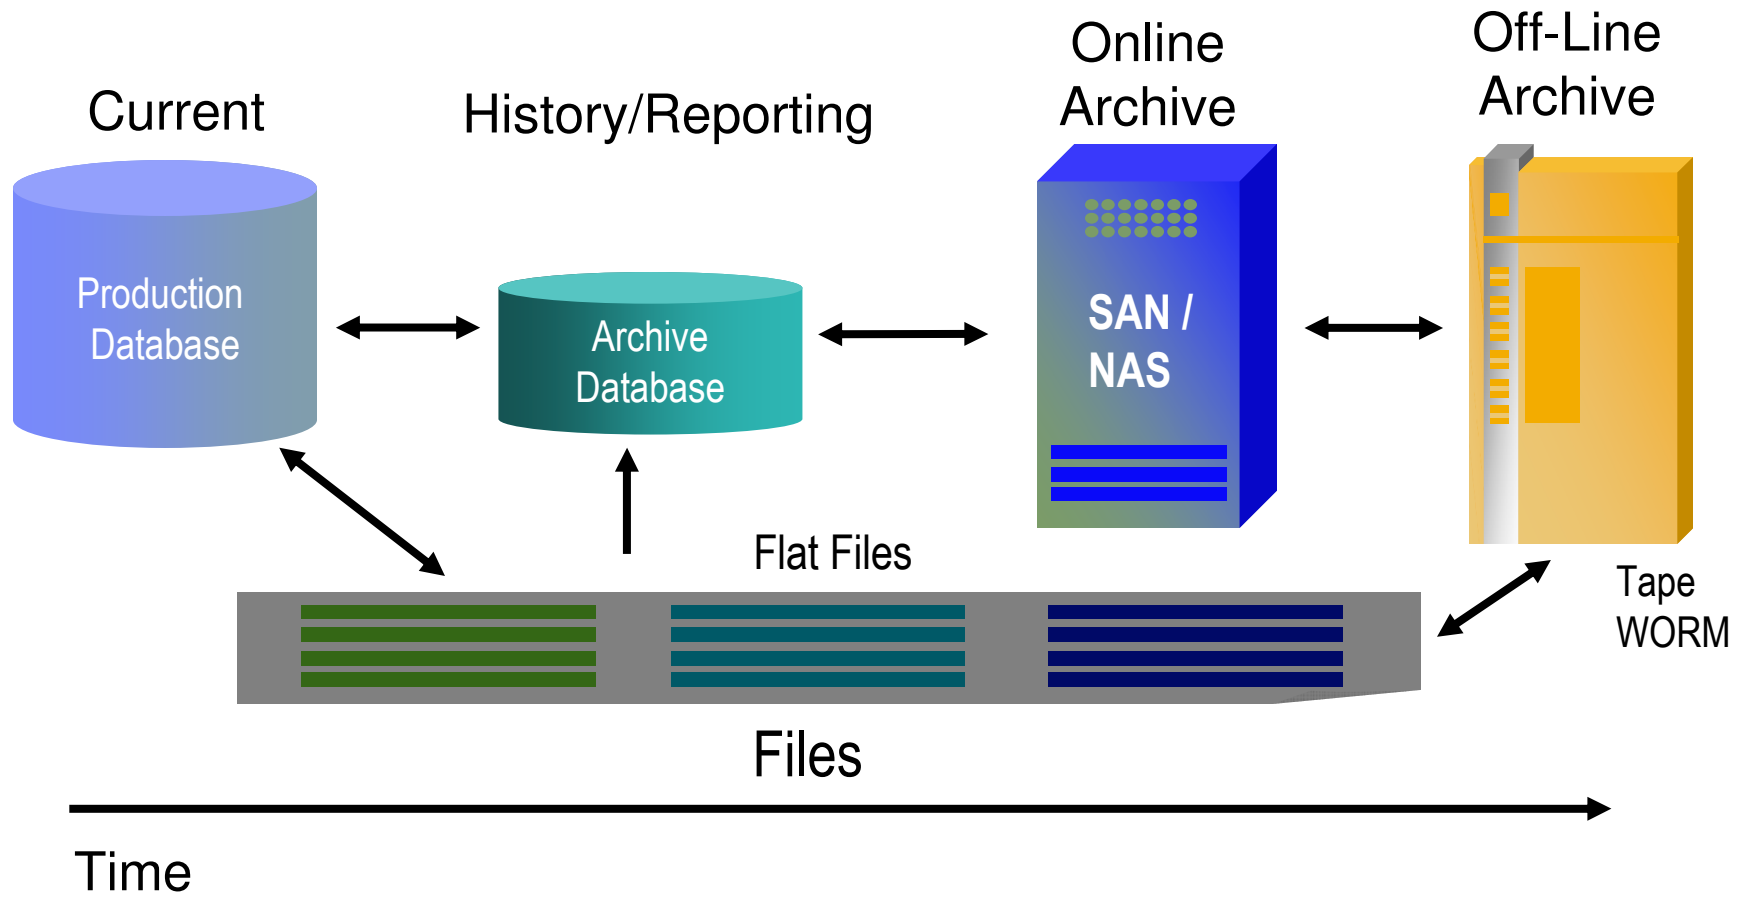

80 GB Archive
X 6 Environments

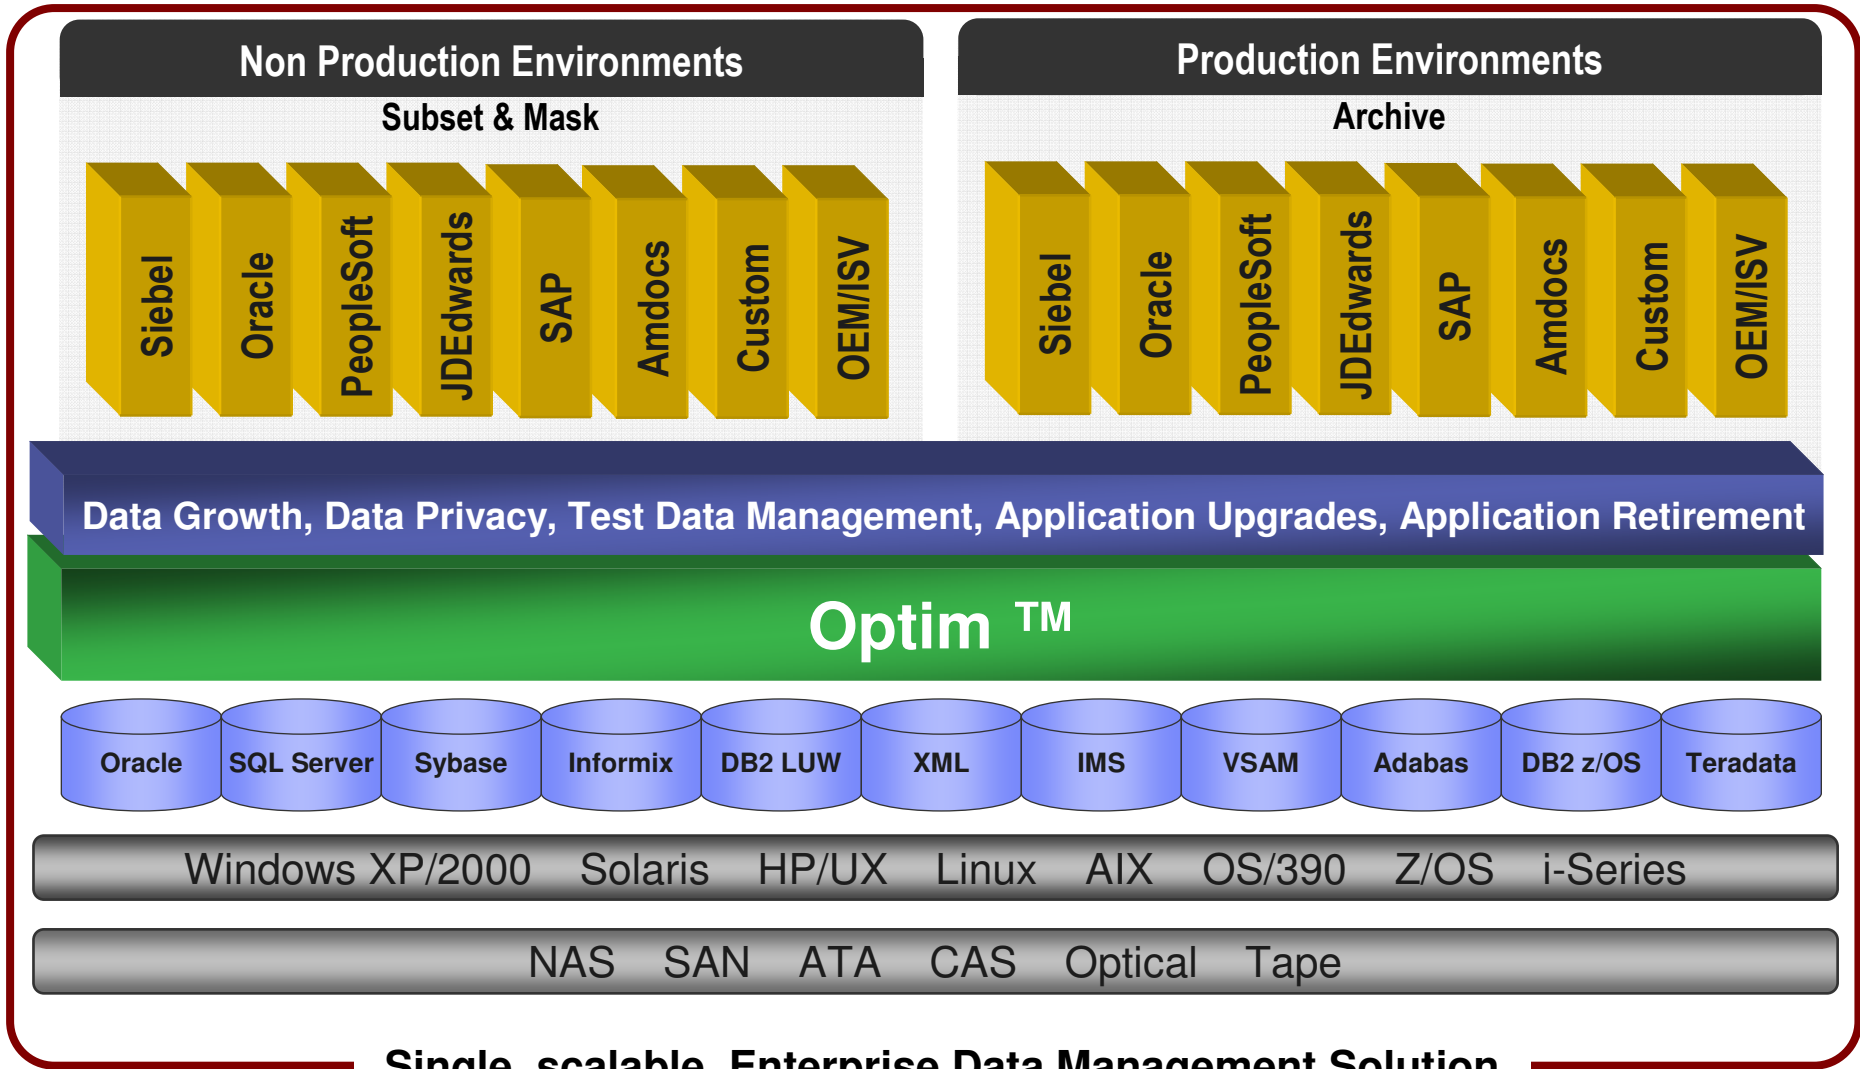

480 GB Reclaimed

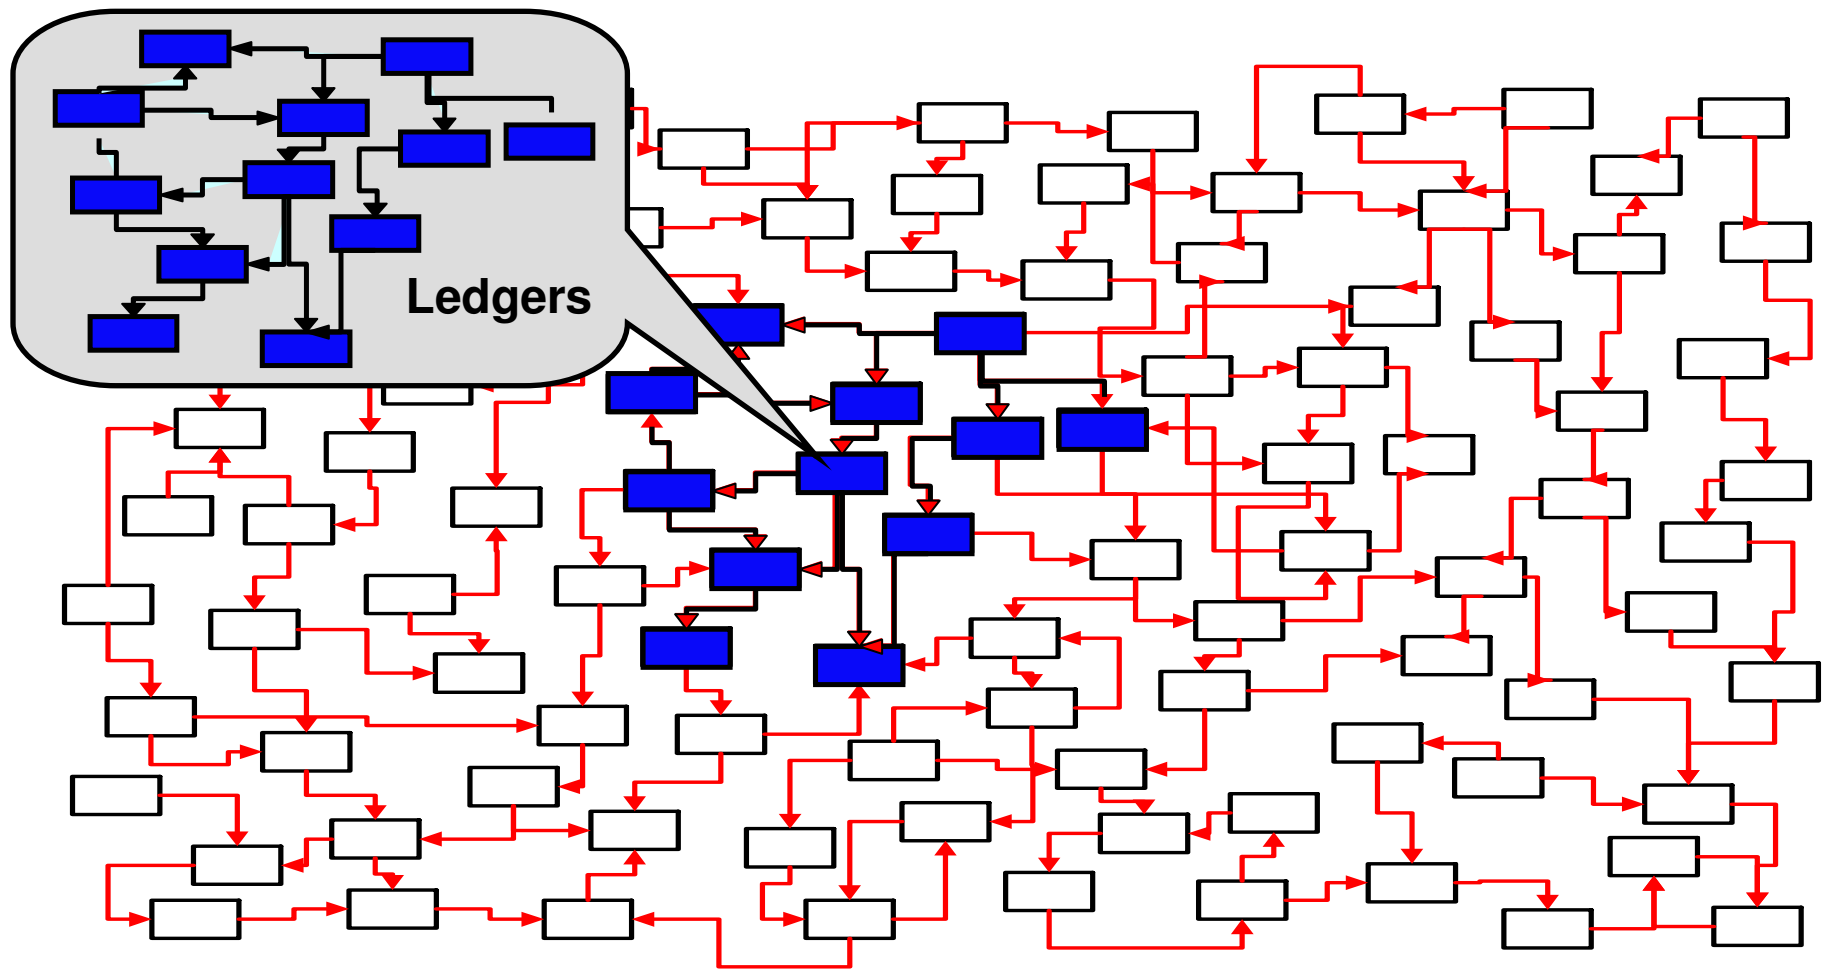

Data Store - Cost-Effective Tiered Storage

OPTIM at Enterprise Platform

Archiving a Complete Business Object

Success: Data Growth Management

- **Finlay Fine Jewelry, \$900mm fine jewelry retailer**
- **55% data growth**
 - Slow response time for inventory replenishment; threatened sales during peak periods
 - DBA resources intensive tuning; increasing storage capacity
- **Optim Results**
 - 60% response time improvements
 - Increased “open for business” hours ensured inventory stocking levels, supported sales during holiday shopping season
 - Reclaimed 100 GB storage capacity at first pass; \$1.8mm 5-year savings

Support that Scales the Enterprise

- **Custom & packaged applications**
- **ERP & CRM applications**
 - Oracle® E-Business Suite
 - PeopleSoft® Enterprise
 - JD Edwards® EnterpriseOne
 - Siebel®
 - Amdocs® CRM
 - SAP®
- **Databases: DB2, Oracle, Sybase, SQL Server, Informix, Adabas, VSAM, IMS, Teradata, XML**
- **Platforms: Windows, Unix, Linux, z/OS**
- **All storage environments**

Summary

- **The time to put your database on a diet is now**
- **Understand what data you have, why you have it, and make plans to do something with it.**
- **Look for a database archiving solution that works across your enterprise**
- **Optim solves data growth pains**
 - Archive historical records
 - Implement cost-effective tiered storage strategies
 - Improve performance and availability
 - Consistently achieve performance targets
 - Maintain ongoing access to audit-ready archived business objects

THANK
YOU
