

IBM Program usage and installation report instructions

Rational HATS Help Guide

Please see below the additional help in collecting deployment information for your IBM Software. (You may need to zoom in to more easily view the screenshots.)

1. For each HACP Server, provide a screenshot(s) showing all Groups and Users in the Administration Notebook.

Sample Output:

2. Screenshots from the HATS Administrative Console showing the User Management and License Management screens.

See HATS Administrative Console sample output on next page

IBM Program usage and installation report instructions

HATS Administrative Console

The screenshot shows the HATS Administrative Console interface. The left sidebar contains a navigation menu with the following items: Getting Started, Management Scope, Connection Management, User Management, License Management, License Usage, License Settings, and Troubleshooting. The main content area displays a table of application usage statistics. The table has four columns: Application Name, Active Sessions, Max Sessions (Life), and Max Sessions (Hour). The table contains 10 rows of data. Above the table, the scope is set to 'Host' and the port is '2809'. The total number of sessions is 17, and 10 are displayed.

Application Name	Active Sessions	Max Sessions (Life)	Max Sessions (Hour)
	0	4	0
	0	0	0
	17	34	20
	2	11	4
	1	5	2
	7	19	15
	9	16	11
	36	61	49
	8	13	10
