License Key Management

Use this page to manage the Server License and Client Access Licenses for this Jazz Team Server. You can install new license keys, modify license key purchase counts, remove license keys, or connect to a Floating License Server. For help with installing and managing license keys, see the Rational Common Licensing Information Center. If you need to purchase license keys, visit Passport Advantage. To download license keys you have already purchased, see the Rational License Support page.

Server Information   Edit...

Property	Value	Actions
Product	Rational Jazz Team Server	
Description	Rational Jazz Team Server Enterprise is designed for enterprise teams, and has no predefined limit on the number of users, except when used with Derby databases, where it is limited to 10 users with counted licenses.	
Maximum Users	-	
Users with Counted Licenses	22 (0 Assigned, 22 Acquired Floating)	
Floating License Server	This server is connected to license server at This server is a Floating License Server (6 Floating License types installed).	
Default Client Access License Key	Rational Quality Manager - Quality Professional-Floating (Unlocked)	

Client Access License Types   Add... | Edit...

Users on this server can be issued access to the following types of Client Access Licenses. A user that has been assigned a Floating license type participates in a pool of users sharing the available Floating licenses of the same type that are installed on the license server.

Product	Version	Type	Variant	Total	Assigned	Available	Status	Expires On	Actions
	3.0.1	Data Collector	Internal	1	1	0	✓ Active		
	3.0.1	LPA Application-Internal	Internal	1	1	0	✓ Active

	3.0	RM Application-Internal	Internal	1	1	0	✓ Active		

Floating License Server   Add... | Edit...

Once Floating or Token type Client Access License Activation keys are installed, this server acts as a floating license server. Floating and Token Client Access Licenses can be shared by multiple users on this server and/or other servers and acquired when needed if a copy of that license is available or the required tokens can be acquired on behalf of the user by the floating license server. Servers can gain access to these Floating and Token licenses by specifying this server using the Edit action on the Floating License Server row in the Server Information section. Users must be assigned access to one of the installed Floating or Token license types in order to participate in the pool of users sharing the available licenses of that type.

Product	Version	Type	Variant	Total	Issued	Status	Actions
Rational Quality Manager	3.0.1	Contributor-Floating	Unlocked	5	View Issued	✓ Active	
Rational Quality Manager	3.0.1	Quality Professional-Floating	Unlocked	50	View Issued	✓ Active	
Rational Requirements Composer	3.0.1	Analyst-Floating	Unlocked	25	View Issued	✓ Active	
Rational Requirements Composer	3.0.1	Contributor-Floating	Unlocked	3	View Issued	✓ Active	
Rational Team Concert	3.0.1	Contributor-Floating	Unlocked	3	View Issued	✓ Active	
Rational Team Concert	3.0.1	Developer-Floating	Unlocked	25	View Issued	✓ Active	

In order to enable this floating license server to serve Token type Client Access Licenses, you must configure a license token service provider. The selected provider will be contacted to acquire tokens when the floating license server is asked for a Token type license.

	Name	Description	Status	Actions
⦿	None			
○	IBM Rational Common Licensing Token Service	This service uses the IBM Rational License Key Server to manage token licensing.	⚠ Not Configured	✎
