

IBM Program usage and installation report instructions

Netezza Growth on Demand Help Guide

Please see below the additional help in collecting deployment information for your IBM Software. (You may need to zoom in to more easily view the screenshots.)

Option One:

Please run the `nz_storage_stats` command from the Netezza utilities and provide the output in a text file.

To install the Netezza Utility, please visit IBM's Fix Central Site: <http://www-933.ibm.com/support/fixcentral/>

Sample Output:

```
Total Storage
  Available (TB) 48.0
  Used (TB) 15.420
  Used (%) 32.2
  Remaining (TB) 32.580
  Remaining (%) 67.8
```

Option Two:

Please run the following script and provide the output in a .txt file:

Script Command:

```
SELECT now() as "As Of", (sum (ds_size)) / 1024 as "Total Storage (TB)", (sum (ds_used)) / 1099511627776 as "Space Used (TB)", "Total Storage (TB)" - "Space Used (TB)" as "Space Available (TB)" FROM _V_DSLICE;
```

Sample Output:

As Of	Total Storage (TB)	Space Used (TB)	Space Available (TB)
2013-05-03 11:05:57	48.00	15.420	32.580

Please run the following script and provide the output in a .txt file:

Script Command:

```
select GROUPNAME, RSGMAXPERCENT as "Resource Maximum" from _v_group
where GRORSGPERCENT > 0
union all
select '**TOTAL FOR ALL GROUPS**', sum (RSGMAXPERCENT) from _v_group
where GRORSGPERCENT > 0 order by 2;
```

Sample Output:

GROUPNAME	Resource Maximum
RESOURCE_GROUP_10	15
RESOURCE_GROUP_20	15
RESOURCE_GROUP_30	10
PUBLIC	10
TOTAL FOR ALL GROUPS	50
(5 rows)
