## Rational Help Guide

Please see below the additional help in collecting deployment information for your IBM Software. (You may need to zoom in to more easily view the screenshots.)

1. For all Unix servers running FLEXLM, please run 'lmstat -a'. For Windows, take a screenshot of the rational license key server or run 'lmutil lmstat -a'
2. For all Unix server running clearlicense, please run 'clearlicense'. For Windows, take a screenshot of the Rational ClearCase licensing server.
