CATIA Add-on / Shareable Products

CATIA is packaged to make selecting the solution best suited to usage profiles and process requirements easy. Predefined configurations lie at the heart of this model, and include product selections that are targeted at specific tasks or processes. To further tailor the solution, products can be added to these configurations to address broader or more specialist requirements, either as products that can be shared or added-on. Products can be ordered in three ways:

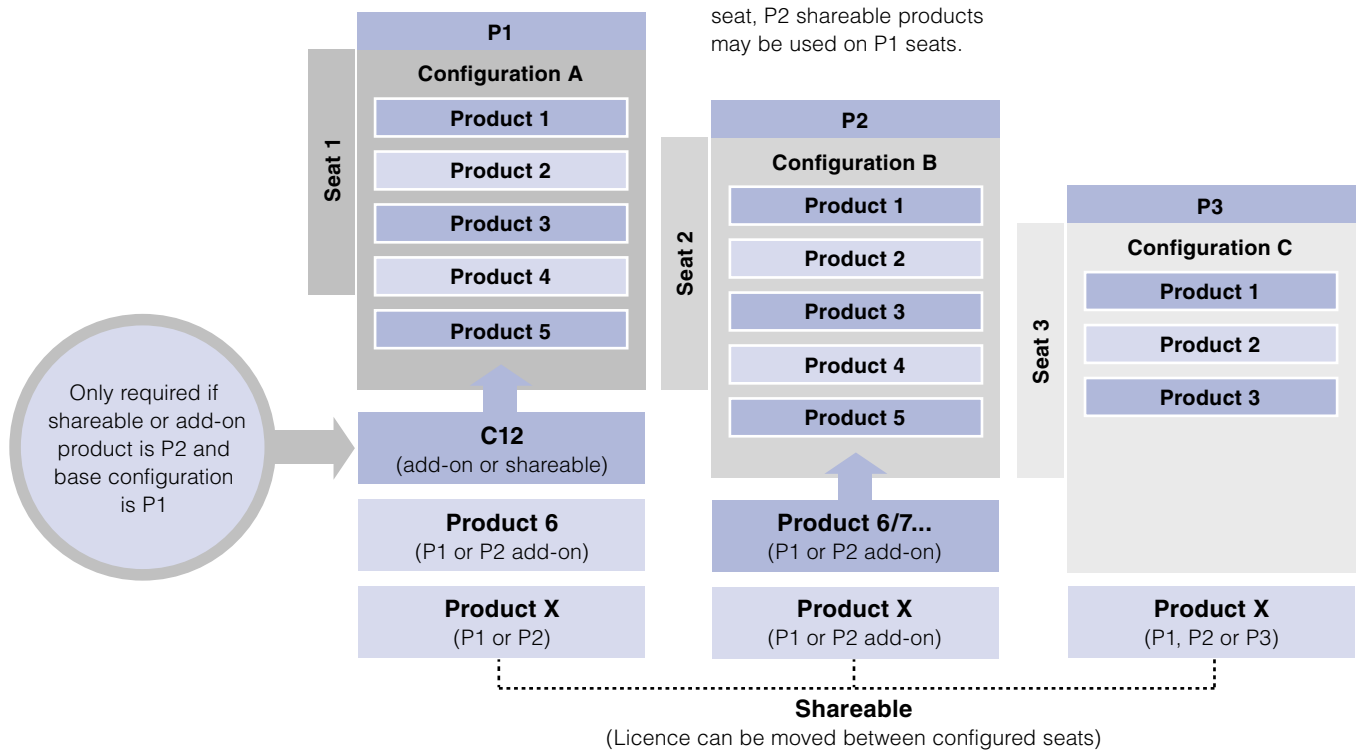

- As an integral part of a standard configuration
- As an add-on to a configuration
- As a licence that can be shared by moving between configurations.

Flexible packaging

P1 shareable products are limited to those with no P2 equivalent.

Shareable products can be used with any seat within their own platform or any higher platform. In addition with the C12 product added to a P1 seat, P2 shareable products may be used on P1 seats.

All P1/P2/P3 products are now available as add-on products for P3 configurations.

		Add-on / Shareable
	Mechanical Design Products	
AS1	CATIA - Assembly Design 1	A
FM1	CATIA - Functional Molded Part 1	A/S
FR1	CATIA - Part Design Feature Recognition 1	A/S
FT1	CATIA - 3D Functional Tolerancing & Annotation 1	A
