

Changes to RE9000 course

February 2004

1. The name of the course was changed from *Selling e-business on demand for Retail Solutions* to *Selling Retail on demand Solutions*.
2. Modules 1, 2, and 3 were modified to reflect the name change from “e-business on demand for Retail” to “Retail on demand”. If you have previously downloaded modules 1, 2, or 3 of RE9000, you should download the updated module files, but you do not need to retake the modules.
3. Two new course modules are available: “Store Integration Framework overview” and “Selling Store Integration Framework”.
4. The course repository has been updated. All users should download the new repository file.
