

Changes to RE9000 course

February 2004

The name of the course was changed from *Selling e-business on demand for Retail Solutions* to *Selling Retail on demand Solutions*.

Modules 1, 2, and 3 were modified to reflect the name change from “e-business on demand for Retail” to “Retail on demand”. If you have previously downloaded modules 1, 2, or 3 of RE9000, you should download the updated module files, but you do not need to retake the modules.

Two new course modules are available: “Store Integration Framework overview” and “Selling Store Integration Framework”.

The course repository has been updated. All users should download the new repository file.

June 2005

Modules 2, 4, and 5 were modified to add information on SIF components and to reflect the availability of Data Integration Facility and Store Integrator technical education. If you have previously downloaded modules 2, 4, or 5, you should download and review the updated modules.

The course repository has been updated. All users should download the new repository.
