SurePOS ACE programming – New course from GRSE

Do you need to add a SurePOS™ ACE personalization option, collect customer information, or create a new report?

Education on programming SurePOS ACE extensions is now downloadable from the Global Retail Store Education (GRSE) Web site: www.ibm.com/education/retail.

RE2200 - SurePOS ACE Programming includes examples of typical SurePOS ACE extensions and the information required to better understand Terminal Sales, Checkout Support, Personalization, Item Record, and Bob Report extensions.

This course is for anyone meeting the course prerequisites and responsible for implementing extensions to SurePOS ACE.

Upon completion of this course students should be able to design extensions using course examples as a guide.

IBMers, Business Partners, and customers can review the course description and enroll in this course on the GRSE Web site. Once enrolled, students will receive instructions for downloading the course.

If you are responsible for designing or implementing extensions to SurePOS ACE, take advantage of this course today.
