

Lunch with an ISV Sponsor

Netkey helps retailers to get to market faster with revenue-generating kiosk and digital merchandising applications including gift registry, credit application and authorization, product information and configuration, inventory extension, customer loyalty, and more. Netkey's highly scalable, enterprise-class software improves the performance and reliability of customer and employee-facing kiosk and digital signage systems while reducing IT burden and lowering the total cost of operation. Netkey has achieved Ready for Retail Store Innovations validation for IBM kiosk solutions.
