Chapter 1. New documentation

With the release of IBM Tivoli Directory Integrator 6.1, two new guides are available. These are:

IBM Tivoli Directory Integrator 6.1 Problem Determination Guide
Provides information about IBM Tivoli Directory Integrator 6.1 tools, resources, and techniques that can aid in the identification and resolution of problems.

IBM Tivoli Directory Integrator 6.1 Messages Guide
Provides a list of all informational, warning and error messages associated with the IBM Tivoli Directory Integrator 6.1.

Chapter 2. Last-minute changes, limitations and errata

This section will attempt to list problems and limitations in either the documentation or the actual product that have been uncovered within the IBM Tivoli Directory Integrator (TDI) product after it was released to Manufacturing but before General Availability.

These issues will be addressed in future versions of TDI, either by means of a Fixpack or in a new version of the product.

This section was current as per the date this document was formatted, September 28, 2006.

Config Editor (CE) issues

Table 1. Config Editor issues

Component	Issue
Performance logging	If you run an AssemblyLine with performance logging enabled, an exception is thrown and no performance information is logged.
CE Usage	If you add a Case to a Switch in an AssemblyLine, an error occurs when you attempt to edit the Case expression. The Case expression edit box and Editor toolbar disappear and the field becomes read-only.
CE Usage	If your PATH ends with a backslash (\), any attempt to run an AssemblyLine from the CE fails.
CE Usage	Help links for the following topics do not work: • The AssemblyLine **Description** tab • The AssemblyLine **Operations** tab • The **Config** item in the Config Browser • All EventHandler tabs

Any performance data contained herein was determined in a controlled environment. Therefore, the results obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurement may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.
