CTGDJB501I Rule *rule name* triggered. . . . 4
CTGDJB502E Unable to create Action Manager Thread for [AM_ID]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 5
CTGDJB503E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 5
CTGDJB504E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 5
CTGDJB505E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register an AssemblyLine terminate listener. 6
CTGDJB506I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine* 6
CTGDJB507I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 6
CTGDJB508I AssemblyLine *AssemblyLine name* has not run since *time* seconds. Starting execution of associated actions. 6
CTGDJB509I Rule *rule name* has already been triggered earlier. Awaiting the next run of AssemblyLine *AssemblyLine name*. 7
CTGDJB510I Rule *rule name* terminated. . . . 7
CTGDJB511I Action Manager initialization completed. 7
CTGDJB512I Started Health AssemblyLine Manager. 7
CTGDJB513I Action Manager initialization started. 7
CTGDJB514E Property *property name* is not set. 8
CTGDJB515E Unable to load the am_config.properties file. Check the value of action.manager.prop.file property. Current value is: *file path* 8
CTGDJB516E Unable to load the amc.properties file. Current value of com.ibm.di.amc.properties.file.location property is: *file path* 8
CTGDJB517I SSL Trust Store: *trust store path* 8
CTGDJB518I SSL Key Store: *key store path* . . 9
CTGDJB519I Initializing connection to database. 9
CTGDJB520E Unable to initialize database. . 9
CTGDJB521W Action Manager was unable to read property com.ibm.di.amc.am.healthAL.interval.time. Health AssemblyLine triggering interval set to a default value of 30 minutes. 10
CTGDJB522I Creating Action Manager threads. 10
CTGDJB523E Unable to obtain connection to database. 10
CTGDJB524I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On termination of AssemblyLine. 11
CTGDJB525I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On receiving Event. 11
CTGDJB526I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On specific property value. 11
CTGDJB527I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On query of AssemblyLine result. 12
CTGDJB528I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On server API failure. 12
CTGDJB529I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On elapsed time interval since last execution of AssemblyLine. 12
CTGDJB530E Exception while constructing Action Manager threads. 12
CTGDJB531I Action Manager threads created. 13
CTGDJB532I Database modification listener started. 13

© Copyright IBM Corp. 2006, 2014

CTGDJB533I Checking for any Action Manager rule updates. 13
CTGDJB534E Error occurred while running Database modification listener. 13
CTGDJB535E Error occurred while trying to delete data from the AM_UPDATE_DETAILS table. 13
CTGDJB536I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On termination of AssemblyLine. 14
CTGDJB537I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On receiving Event. 14
CTGDJB538I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On specific property value. 14
CTGDJB539I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On query of AssemblyLine result. 14
CTGDJB540I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On server API failure. 15
CTGDJB541I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On elapsed time interval since last execution of AssemblyLine. 15
CTGDJB542E Error occurred while constructing Action Manager thread for rule: *rule name* 15
CTGDJB543E Error occurred while trying to insert data into the AM_UPDATE_DETAILS table. 15
CTGDJB544E Error occurred while trying to delete all data from the AM_UPDATE_DETAILS table. 16
CTGDJB545I Rule *rule name* triggered. . . . 16
CTGDJB546I Created Action Manager thread for [Config]: *Config instance* 16
CTGDJB547I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 16
CTGDJB548I Rule *rule name* terminated. . . . 17
CTGDJB549I Rule *rule name* triggered. . . . 17
CTGDJB550E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 17
CTGDJB551E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 17
CTGDJB552E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 18
CTGDJB553E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine terminate listener. 18
CTGDJB554I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine* 18
CTGDJB555I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 18
CTGDJB556I Rule *rule name* terminated. . . . 19
CTGDJB557I DBConnectionFactory instance created. 19
CTGDJB558I Derby network server already running. 19
CTGDJB559I Unable to ping Derby network server. Attempting to start. 19
CTGDJB560I Started Derby network server. . 19
CTGDJB561E Unable to start Derby network server. Database unavailable. 20
CTGDJB561W Error while closing database Statement. 20
CTGDJB562W Error while closing database ResultSet. 20
CTGDJB563W Error while closing database Connection. 21
CTGDJB564I Rule *rule name* not triggered since event data did not match. 21
CTGDJB565I Rule *rule name* not triggered since event source did not match. 21
CTGDJB566I Rule *rule name* triggered. . . . 21
CTGDJB567E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 21
CTGDJB568E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 22
CTGDJB569E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 22
CTGDJB570E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register specified Event listener. 22
CTGDJB571I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine* 23

CTGDJB572I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 23
CTGDJB573I Rule *rule name* terminated. . . . 23
CTGDJB574W Unable to get list of running AssemblyLines for Solution View: *Solution View*. Ignoring Health AssemblyLine for this Solution view. 23
CTGDJB575W Unable to obtain Config Instance associated with the Solution View: *Solution View*. Ignoring Health AssemblyLine for this Solution view. 24
CTGDJB576E Unable to obtain list of Health AssemblyLines for Solution Views. 24
CTGDJB577I Updating Health AssemblyLine status in database for Solution view *Solution View ID*. [HealthAL Result]: *result*. [HealthAL Status]: *status_description*. 24
CTGDJB578E Error updating Health AssemblyLine status in database for Solution view *Solution View ID*. [HealthAL Result]: *result*. [HealthAL Status]: *status_description*. 24
CTGDJB579I Creating Health AssemblyLine Listener thread for [Solution View]: *Solution View ID*. [Config]: *Config instance*. [AssemblyLine]: *AssemblyLine name*. 25
CTGDJB580W Unable to obtain session with remote Security Directory Integrator server for Health AssemblyLine: *AssemblyLine name*. . 25
CTGDJB581E Unable to create base listener for Health AssemblyLine: *AssemblyLine name*. . 25
CTGDJB582E Unable to register stop AssemblyLine listener for Health AssemblyLine: *AssemblyLine name*. 25
CTGDJB583E Unable to start Health AssemblyLine:*AssemblyLine name* 26
CTGDJB584E Result work entry is null in Health AssemblyLine: *AssemblyLine name*. No Health status update will be done in database. 26
CTGDJB585I In Health AssemblyLine *AssemblyLine name* healthAL.result attribute value is: *attribute_value*. 26
CTGDJB586I In Health AssemblyLine *AssemblyLine name* healthAL.status attribute value is: *attribute_value*. 26
CTGDJB587I Terminating Health AssemblyLine thread for [Solution View]: *Solution View ID* [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name* 27
CTGDJB588W Unable to remove event listener registered for AssemblyLine terminate events for [Solution View]: *Solution View ID* [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name* 27
CTGDJB588E Unable to obtain handle to AssemblyLine object for Health AssemblyLine: *AssemblyLine name* 27
CTGDJB589I Rule *rule name* triggered. . . . 27
CTGDJB590E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 28
CTGDJB591E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 28
CTGDJB592E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to obtain Config Instance: *Config Instance*. 28
CTGDJB593E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. [Config Instance]: *Config Instance*. Unable to obtain handle to Security Directory Integrator Properties object. 28
CTGDJB594I Created Action Manager thread for [Config]: *Config instance* 29
CTGDJB595I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 29
CTGDJB596E Error in [Rule]: *rule name* [Solution View]: *Solution View name* The property values cannot be compared since one of the property is not a valid integer. [Key]: *property name* [Current Value]: *property value* [Compared to value]: *value* . 29
CTGDJB597E Error in [Rule]: *rule name* [Solution View]: *Solution View name* Unable to determine triggering condition. 29
CTGDJB598I Rule *rule name* terminated. . . . 30
CTGDJB599I Rule *rule name* triggered. . . . 30
CTGDJB600E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 30
CTGDJB601E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 30
CTGDJB602I The Config instance *Config instance* is not running. Will obtain handle to AssemblyLine later. 31
CTGDJB603E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 31

CTGDJB604E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine listener. 31
CTGDJB605I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine* 31
CTGDJB606I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 32
CTGDJB607I Rule *rule name* terminated. . . . 32
CTGDJB608W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name* 32
CTGDJB609E Result work entry is null in AssemblyLine: *AssemblyLine name*. Rule will not be triggered. 32
CTGDJB610E No value found for attribute *attribute name*. in result work entry. Rule will not be triggered. 32
CTGDJB611I Attribute *attribute name* value is *attribute value*. 33
CTGDJB612E Error in [Rule]: *rule name* [Solution View]: *Solution View name* The attribute values cannot be compared since one of the values is not a valid integer. [Attribute]: *Attribute name* [Current Value]: *Attribute value* [Compared to value]: *value* . 33
CTGDJB613W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name* Cannot obtain result work entry. 33
CTGDJB614E An error occurred while executing an action. [Solution View]: *Solution View name* [Rule]: *Rule name* [Action Order]: *sequence order* [Action Type]: *action type* 33
CTGDJB615I Action successfully executed. [Solution View]: *Solution View name* [Rule]: *Rule Name* [Action Order]: *sequence_order* [Action Type]: *action_type* 34
CTGDJB616E An error occurred while executing an action. [Solution View]: *Solution View name* [Rule]: *Rule Name* . . . 34
CTGDJB617E Unable to insert/commit into AM_RUN_HISTORY table. 34
CTGDJB618E Unable to obtain rule information from AM_ACTION_DETAILS_RULE table. 34
CTGDJB619E Unable to obtain rule information from AM_RULES_MASTER table. . . 34
CTGDJB620I Triggering rule *rule name* of Solution view *Solution View*. 35
CTGDJB621E Unable to obtain log information from AM_ACTION_DETAILS_WRITE_LOG table. . . 35
CTGDJB622I [Message]: *log message* [Description]: *log description* 35
CTGDJB623E Unable to write log information to AM_LOGS table. 35
CTGDJB624E Unable to read action information from AM_ACTION_DETAILS_COPY_PROPERTY table. . . . 36
CTGDJB625E Unable to obtain Config instance for Config: *Config instance*. 36
CTGDJB626E Unable to copy properties. . . 36
CTGDJB627E Unable to obtain property information. 36
CTGDJB628E Unable to obtain Config instance for Config: *Config instance*. 36
CTGDJB629E Unable to modify property to new value: *value*. 37
CTGDJB630E Unable to obtain Event information. 37
CTGDJB631E Unable to send Event notification. 37
CTGDJB632E Unable to enable rule. 37
CTGDJB633E Unable to disable rule. 37
CTGDJB634E Unable to enable rule *rule name* 38
CTGDJB635E Unable to disable rule *rule name* 38
CTGDJB636E Unable to enable rule. 38
CTGDJB637E Unable to disable rule. 38
CTGDJB638E Unable to obtain AssemblyLine information. 38
CTGDJB639E Unable to obtain session for stopping AssemblyLine *AssemblyLine name* with remote Security Directory Integrator server. 39
CTGDJB640E Config *Config instance* is not loaded on the remote server. 39
CTGDJB641E Unable to stop AssemblyLine: *AssemblyLine name*. 39
CTGDJB642E AssemblyLine: *AssemblyLine name* is not running on the Config instance: *Config instance* 39
CTGDJB643E Unable to obtain AssemblyLine information. 39
CTGDJB644E Unable to obtain session for starting AssemblyLine *AssemblyLine name* with remote Security Directory Integrator server. 40
CTGDJB645I Config *Config instance* is not loaded on the remote server. Attempting to load it now. 40
CTGDJB646E Unable to start Config instance *Config instance* 40
CTGDJB647E Unable to start AssemblyLine *AssemblyLine name* 40
CTGDJB648I Security Directory Integrator Session Generator Created. 41
CTGDJB649I Trying to establish connection to: *server* : *port*. 41
CTGDJB650I Custom Authentication with username: *username*. 41
CTGDJB651E Unable to obtain session with remote Security Directory Integrator Server: *server* : *port*. 41
CTGDJB652I Started Action Manager Status Update thread. 41
CTGDJB653E Unable to update status of Action Manager. 42
CTGDJB654I ServerConfigHandler created. . . 42

CTGDJB655E ServerStatusListener thread unable to update server status. 42
CTGDJB656E Unable to create ConfigLoadReloadListener thread for [SERVER_ID]: *Server ID*. Unable to create base listener. 42
CTGDJB657E Unable to create ConfigLoadReload Thread for [SERVER_ID]: *Server ID*. Unable to register ConfigLoadReloadListener. 43
CTGDJB658E Unable to remove EventListener for [SERVER_ID]: *Server ID*. Unable to remove event listener. 43
CTGDJB659I Started AMCServerModificationListener thread. . . . 43
CTGDJB660E Unable to create ServerStatusListener threads. 43
CTGDJB661I Checking for any Administration and Monitoring Console Server updates. . . . 43
CTGDJB662E Unable to obtain connection to the Administration and Monitoring Console database. 44
CTGDJB663E Unable to obtain connection to the Administration and Monitoring Console database. 44
CTGDJB664E Exception while constructing Action Manager threads. 45
CTGDJB665I ServerStatusListener thread started for server [SERVER_NAME]: *Server Name*. 45
CTGDJB666I ConfigLoadReloadListener thread started for server [SERVER_NAME]: *Server Name*. 45
CTGDJB667E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 46
CTGDJB668E ServerStatusListener unable to check server restart status. 46
CTGDJB669I [SERVER_NAME]: *Server Name* has been restarted in polling interval. Rule threads will be terminated and re-created. . 46
CTGDJB670E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 46
CTGDJB671E Action Manager was unable to create Action Manager Thread for the following rule: [Rule]: *rule name* [Reason]: Unable to connect to server *Server Name*. . . 47
CTGDJB672E Error occurred while trying to delete data from the AM_SERVER_UPDATE_DETAILS table. 47
CTGDJB673E Config *Config instance* is not loaded on the remote server so ActionManager cannot query the AssemblyLine result. . . . 47
CTGDJB674E Unable to start AssemblyLine *AssemblyLine name* 47
CTGDJB675I Rule *rule name* triggered. . . . 48
CTGDJB676E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 48
CTGDJB677E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 48
CTGDJB678I The Config instance *Config instance* is not running. Will obtain handle to AssemblyLine later. 48
CTGDJB679E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 49
CTGDJB680E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine listener. 49
CTGDJB681I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name* 49
CTGDJB682I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 49
CTGDJB683I Rule *rule name* terminated. . . . 50
CTGDJB684W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name* 50
CTGDJB685E Result work entry is null in AssemblyLine: *AssemblyLine name*. Rule will not be triggered. 50
CTGDJB686E No value found for attribute *attribute name*. in result work entry. Rule will not be triggered. 50
CTGDJB687I Attribute *attribute name* value is *attribute value*. 50
CTGDJB688E Error in [Rule]: *rule name* [Solution View]: *Solution View name* The attribute values cannot be compared since one of the values is not a valid integer. [Attribute]: *Attribute name* [Current Value]: *Attribute value* [Compared to value]: *value* . 51
CTGDJB689W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name* Cannot obtain result work entry. 51
CTGDJB690I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: Inspect AssemblyLine Exit code. 51

CTGDJB691I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On AssemblyLine start 51
CTGDJB692I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On config load 52
CTGDJB693I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On config unload 52
CTGDJB694I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: Timer . . 52
CTGDJB695E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 52
CTGDJB696E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 53
CTGDJB697E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 53
CTGDJB698E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine start listener. 53
CTGDJB699I Rule *rule name* terminated. . . . 53
CTGDJB700I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 54
CTGDJB701E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 54
CTGDJB702E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 54
CTGDJB703E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 55
CTGDJB704E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register config load listener. 55
CTGDJB705I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine* 55
CTGDJB706I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine* 55
CTGDJB707I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 56
CTGDJB708E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 56
CTGDJB709E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server. 56
CTGDJB710E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener. 56
CTGDJB711E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register config unload listener. 57
CTGDJB712I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name* 57
CTGDJB713I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 57
CTGDJB714E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 57
CTGDJB715I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 58
CTGDJB716I Rule *rule name* triggered. . . . 58
CTGDJB717I Rule *rule name* triggered. . . . 58
CTGDJB718I Rule *rule name* triggered. . . . 58
CTGDJB719W The Action manager RMI Registry is starting on default port *port* 59
CTGDJB720I The Action Manager RMI registry is started on port *port*. 59
CTGDJB721E An exception occured while starting the Action Manager RMI Registry: *exception* 59
CTGDJB722W The client information provided *data value* is not sufficient for extracting the client name and client version. 59
CTGDJB723I The System Security Manager is null. Using the Action Manager custom security manager instead. 59

CTGDJB724I The Action manager is resetting the System Security Manager to null. . . . 60
CTGDJB725I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On local variable. 60
CTGDJB726E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. 60
CTGDJB727I Rule *rule name* triggered. . . . 60
CTGDJB728E Unable to modify local variable to new value: *value* 61
CTGDJB729E An exception occurred while getting *rule name* details: *exception* . . . 61
CTGDJB730E An exception occurred while executing rule *rule name*: *exception* 61
CTGDJB731I The rule *rule name* has no actions to be backed up. 61
CTGDJB732E An exception occurred while backing up the original values for rule *rule name*: *exception* 61
CTGDJB733I The client info *client info* used for connecting with Action Manager is invalid. 62
CTGDJB734I The table AM_ACTION_DETAILS_WRITE_LOG is empty. . . . 62
CTGDJB735E The API Listener is not able to create the Action Manager thread because of the exception: *exception*. 62
CTGDJB736E Action Manager was unable to obtain the Action Manager logs to be attached with the email. 62
CTGDJB737E Action Manager was unable to obtain the host and port information of the SMTP server. 62
CTGDJB738E Action Manager was unable to create and send an email message. 63
CTGDJB739E Action Manager was unable to obtain the host and port information of the SMTP server from the Action Manager config file. 63
CTGDJB740E Property java.util.logging.config.file is not set in startAM.bat(sh). 63
CTGDJB741E Unable to load the am_logging.properties file. Check the value of java.util.logging.config.file property in the startAM.bat(sh). The current value is set to *file path*. 63
CTGDJB742I The target computer is the same as the Action Manager host. 64
CTGDJB743W The user name or keystore is set to *property value* and the password or keystore password is set to *property value*. . 64
CTGDJB744E Failed to connect to the target computer using protocol *protocol*. 64
CTGDJB745I Failed to connect to the target computer using any of the supported protocols. Action Manager is assuming that command *command* is to be executed on localhost. 64
CTGDJB746E An error *error* occurred while executing the command *command* on action manager host *hostname*. 65
CTGDJB747I The command *command* is executed successfully on host *hostname*. 65
CTGDJB748E The command *command* execution failed on host *hostname* with exit code *Integer*. 65
CTGDJB749E An error occurred while executing the command *command* on host *hostname*: *error* 65
CTGDJB750E The command *command* is not executed. 65
CTGDJB751E An error was encountered while retrieving data from the database: *error*. . 66
CTGDJB752E Failed to establish a connection with the target computer. 66
CTGDJB753E An error occurred while executing the command *command*. 66
CTGDJB754W Cannot rollback the properties changes because the config instance id is null. 66
CTGDJB755E An error occurred while rolling back the properties: *error message* 66
CTGDJB756E An error occurred while rolling back the database changes: *error message* . . 67
CTGDJB757E An error occurred while backing up the property: *error message* 67
CTGDJB758E No command specified in the execute command action. 67
CTGDJB759E Action Manager was unable to obtain local variable *variable name*. . . . 67
CTGDJB760E Unable to obtain local variable information. 67

CTGDJK213E Error processing mapping file: *exception*. 221
CTGDIA001E The perform method of the Function Component was not passed an object of type com.ibm.di.entry.Entry. This object is not a valid parameter to pass to perform method. 221
CTGDIA002E Error occurred while converting the Data Objects to XML: *exception* 222
CTGDIA003E Required Function Component parameter ''*parameter name*'' is not set. . 222
CTGDIA004E Invalid prefix to namespace URI mapping on line ''*line number*''. 222
CTGDIA005E An error occurred while processing the XML Schema file ''*file name*'': *exception* 222
CTGDIA006E There is no feature representing the XML element or attribute with name ''*attribute name*''. 222
CTGDIA007E There are siblings from the same namespace with case-insensitive equality in names: ''*feature name*''. . . . 223
CTGDIA008E There are siblings from different namespaces with case-insensitive equality in names, and the names are not namespace prefixed: ''*feature name*''. . . . 223
CTGDIA009E The ''*feature name*'' XML element or attribute is invalid according to the XML Schema. 223
CTGDIA010E The Entry Attribute ''*attribute name*'' specifies an XML element or attribute with ancestor ''*feature name*'' that has a sibling with the same name. 223
CTGDIA011E The XML Schema does not define a root element. 224
CTGDIA012I The XML Schema has been successfully parsed and an Ecore model has been created. 224
CTGDIA013I The Entry Attributes have been successfully applied to the data structure. 224
CTGDIA014I The parameter ''*parameter name*'' initialized with a value of ''*parameter value*''. 224
CTGDIA015E An error occurred while processing the XML Schema file ''*file name*'': ''*diagnostic message*''. 224
CTGDIA016E An error occurred while processing the XML Schema file ''*file name*''. 225
CTGDIA017E An error occurred while processing the XML Schema file ''*file name*'': *exception* 225
CTGDIA018I The XML that results from conversion from the DOM Element to XML is: *xml data*. 225
CTGDIA019E Invalid value encountered in attribute ''*attribute name*'' ''*attribute value*''. 225
CTGDIB001E The perform method of the Function Component was not passed an object of type com.ibm.di.entry.Entry. This object is not a valid parameter to pass to perform method. 226
CTGDIB002E The Entry Attribute ''*attribute name*'' is not present in the Entry. . . . 226
CTGDIB003E Error occurred while processing the XML document: *exception* 226
CTGDIB004E The required Function Component parameter ''*parameter name*'' is not set. . 226
CTGDIB005E Invalid prefix to namespace URI mapping on line ''*line number*''. 227
CTGDIB006E An error occurred while processing the XML Schema file ''*file name*'': *exception* 227
CTGDIB007E There are siblings from the same namespace with case-insensitive equality in names: ''*feature name*''. . . . 227
CTGDIB008E There are siblings from different namespaces with case-insensitive equality in names, and the names are not namespace prefixed: ''*feature name*''. . . . 227
CTGDIB009I The parameter ''*parameter name*'' initialized with a value of ''*parameter value*''. 227
CTGDIB010I The XML parsing has been completed. Data Objects have been successfully created. 228
CTGDIB011I The Entry Attributes have been successfully created. 228
CTGDIB012I The XML Schema has been successfully parsed and an Ecore model has been created. 228
CTGDIB013I The Ecore model has been successfully checked for conformity. . . . 228
CTGDIB014E An error occurred while processing the XML Schema file ''*file name*'': ''*diagnostic message*''. 229

CTGDIB015E An error occurred while processing the XML Schema file ''*file name*''. 229
CTGDIB016E An error occurred while processing the XML Schema file ''*file name*'': ''*diagnostic message*''. 229
CTGDIB017E The Entry Attribute ''*attribute name*'' is not present in the Entry. . . . 229
CTGDIB018I The XML resulting from the converion from DOM Element is: *xml data*. . 229
CTGDIT001E The 'filePath' parameter must be set to use the File Connector. 230
CTGDIT002I File Connector waiting for data. On attempt ''*attempt count*'' and will timeout after attempt ''*maximum number of attempts*''. 230
CTGDIT003E The 'filePath' parameter must be set to use the File Connector to a open file for reading. 230
CTGDIT004E The 'filePath' parameter must be set to use the File Connector to a open file for writing. 230
CTGDIT008E File Connector timed out while waiting for lock on file. 231
CTGDIT010I Open input: *path*. 231
CTGDIT011I Open output: *path*. 231
CTGDIT051E The starting directory path is not specified. 231
CTGDIT052E The depth parameter can not be negative. 231
CTGDIT053E The glob pattern '*glob pattern*' is invalid. 231
CTGDIT054I No permission to read '*directory*' directory. 232
CTGDIT055I '*file*' does not exist. 232
CTGDIT056I Full Path '*full path*' criteria is used. Connector will skip Lookup and use the specified file or directory directly. . 232
CTGDIT057I Read only file '*file*' is deleted. 232
CTGDIT058E File '*file*' is read-only. . . 232
CTGDIT059I Non-empty directory '*directory*' is deleted. 233
CTGDIT060E Directory '*directory*' is not empty. 233
CTGDIT061E Deleting '*file*' failed. . . . 233
CTGDIT062E '*file*' is not a directory. . . 233
CTGDIT063E The name of the file or directory is not specified. At least the 'fullPath' or 'name' attribute must be provided in the Output Map. 233
CTGDIT064E '*file*' already exists. . . . 234
CTGDIT065E Directory '*directory*' could not be created. 234
CTGDIT066E File '*file*' could not be created. 234
CTGDIT067E '*file*' could not be made Read-Only. 234
CTGDIT068E Dates must use format: *date format* 234
CTGDIT069E Copying '*from file*' to '*to file*' failed. 234
CTGDIT070E Moving '*from file*' to '*to file*' failed. 235
CTGDIT071E Boolean attributes expect values true or false. 235
CTGDJZ801I The parameter *param name* was initialized with the value: '*value*'. . . . 235
CTGDJZ802E Parameter '*param name*' is not provided. 235
CTGDJZ803I File Transfer Function Component will work FTP file transfer mode set to: '*value*'. 235
CTGDJZ804I File Transfer Function Component will work 'Convert source file to character set of target system' option set to: '*value*'. 236
CTGDJZ805I File Transfer Function Component will work 'Enable SSL for AS400 connection' option set to: '*value*'. . . . 236
CTGDJZ806I File Transfer Function Component will use '*value*' for AS400 connections. 236
CTGDJZ807I The parameter *param name* is not specified. Default connection protocol '*value*' will be used. 236
CTGDJZ808I The value of Source parameter *param name*is set with the value: '*value*'. . 236
CTGDJZ809I The value of Target parameter *param name*is set with the value: '*value*'. . 237
CTGDJZ810I The direction of the file transfer is: '*value*' 237
CTGDJZ811E Unable to determinde the direction of the file transfer. 237
CTGDJZ812I File Transfer Function Component is establising connection to the host: '*value* 237
CTGDJZ813I File Transfer Function Component has successfully established a connection to the host: '*value* 238
CTGDJZ814E File Transfer Function Component could not establish a connection to the host: '*value* 238
CTGDJZ815E File Transfer Function Component could not establish a connection to the target machine. 238
CTGDJZ816E Parameter '*param name*' is not provided. 238
CTGDJZ817E File Transfer Function Component accepts only a IBM Security Directory Integrator Entry as input. . . . 238
CTGDJZ818I The value of configuration parameter '*param*' set in configuration GUI has been overridden to '*value*'. 239
CTGDJZ819E An invalid connection type has been specified. The valid values for the 'connectionType' parameter are: 'RSH', 'SSH', 'REXEC', 'AS400', 'WIN' and 'FTP'. . 239

CTGDJZ820E Not all parameters have been provided. Ensure you have provided a hostname and username. For an REXEC, FTP and Windows connection you will also need to provide a password. For an SSH connection you have the option of providing a password OR a keystore (with associated passphrase if applicable). 239
CTGDJZ821E Parameter '*param name*' is not provided. 240
CTGDJZ822E Unable to delete temporary file '*param name*'. 240
CTGDJZ823E Target file path '*param name*' is same as Source file path, unable to transfer file. 240
CTGDJZ824E Source file path '*param name*' not found. 240
CTGDJZ825E Target file '*param name*' might be in use or read-only or target path does not exist. 240
CTGDJZ826E File Transfer Function Component could not establish a connection to the target machine using given parameters in Configuration Editor. File Transfer Function Component will continue, if any attribute mapping provided in runtime. . . 241

CTGDIV018I Lotus Notes Connector's local Notes thread started. 438
CTGDIV019I Lotus Notes Connector's local Notes thread terminated. 438
CTGDIV020E Unable to create local Notes thread because the lotus.domino.NotesThread class was not found in the classpath of the program. Exception occurred: *exception* . . 439
CTGDIV021E Lotus Notes Connector was unable to modify the entry because the entry was not found on the Domino Server. . . . 439
CTGDIV022E Lotus Notes Connector was unable to delete the entry because the entry was not found on the Domino Server. . . . 439
CTGDIV023I Adding attribute to entry: *attribute name*. 439
CTGDIV024I Attribute value added was null. 440
CTGDIV025I Attribute value added was ''*attribute value*''. 440
CTGDIV026I Attempting to build an entry in the Lotus Notes Connector. 440
CTGDIV027I Successfully built an entry in the Lotus Notes Connector. 440
CTGDIV028I Database search view is set to *search view*. 440
CTGDIV029I FTSearch filter on search view: *filter*. 441
CTGDIV030I FTSearch return code was *return code*. 441
CTGDIV031W Reverting to basic search because FTSearch on database view failed: *filter*. NotesException occurred: Error=*error*, Error Text=*error text* 441
CTGDIV032I FTSearch filter on database: *filter*. 441
CTGDIV033I Formula Search filter on database: *filter*. 441
CTGDIV034I No documents found. 442
CTGDIV035I Found *number of documents* documents. 442
CTGDIV036I Get document with Notes ID ''*Notes ID*''. 442
CTGDIV037I Document with Notes ID ''*Notes ID*'' not found. 442
CTGDIV038W Unable to get document with Notes ID: *Notes ID*. NotesException occurred: Error=*error*, Error Text=*error text* 442
CTGDIV039I Will update *number of attributes* attributes in document. 443

CTGDIV040E Lotus Notes Connector was unable to save the document it was trying to modify. 443
CTGDIV041E Lotus Notes Connector was unable to save the document it was trying to modify. Exception occurred: *exception* . . . 443
CTGDIV042I Attribute ''*attribute name*'' will be updated with value ''*attribute value*''. 443
CTGDIV043I Attribute ''*attribute name*'' will be updated with value ''*attribute value*'' which is of class type ''*class name*''. 443
CTGDIV044W Lotus Notes Connector could not terminate the local Notes thread. Exception occurred: *exception* 444
CTGDIV045I IIOP Session with specified IOR string is created. SSL is on. 444
CTGDIV046I IIOP Session with specified IOR string is created. SSL is off. 444
CTGDIV047I IIOP Session is created. SSL is on. 444
CTGDIV048I IIOP Session is created. SSL is off. 444
CTGDIV049I Session to Domino Server is created. 445
CTGDIV050I The specified port: ''*port*'' is bigger than 65535. The default port 80 will be used. 445
CTGDIV051I No port is specified. The default port 80 will be used. 445
CTGDIV052E The specified match operation for the UNID or NoteID in the Link Criteria is not correct. 445
CTGDIV053E Document with the specified UNID/NoteID was not found. 446
CTGDIV054E Connector already initialized. You must terminate it before initializing again. 446
CTGDIV055W Error occured while executing the command ''SET_CURRENT''. Exception thrown: *exception* 446
CTGDIV056W Exception occurred while terminating: *exception* 446
CTGDIV057E The Notes thread is not alive. Lotus Notes Connector cannot execute the required command against the Domino Server without an active Notes Thread. 446
CTGDIV058E Fatal Error while executing command against Domino Server: *exception* . 447
CTGDIV059I Did not find view *view name* in database *database name*: Database.getView returned NULL. 447
CTGDJN001E Required Connector parameter 'mailServer' is not set. 447
CTGDJN002E Required Connector parameter 'mailUser' is not set. 447
CTGDJN003E Required Connector parameter 'mailFolder' is not set. 447
CTGDJN004E The 'pollInterval' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead. 448
CTGDJN005E The 'pollInterval' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead. 448
CTGDJN006E The port specified as part of the 'mailServer' parameter must be a numeric value. Exception encountered while try to parse out port: *parameter value* 448
CTGDJN007I Opened mail folder ''*folder name*'' in read and write mode. 448
CTGDJN008E Unable to initialize Mailbox Connector. The mail folder ''*folder name*'' does not exist on the mail server. 449
CTGDJN009I Initializing SSL settings. . . 449
CTGDJN010I Disconnecting from mail server but exception was encountered while closing the mailbox: *exception* 449
CTGDJN011W Mail message at index ''*index number*'' could have been deleted from the mail server and could not be retrieved. Error encountered while creating an Entry from a javax.mail.Message object: *exception* 449
CTGDJN012E The findEntry method could not process request because it was passed a search criteria one or more attributes it does not support. 449
CTGDJN013E Unable to delete entry because more than one entry found to potentially remove. 450
CTGDJN014E Unable to delete entry because the specified entry to delete could not be found. 450
CTGDJN015E Unable to delete entry because the specified entry does not have the required property 'mail.message'. 450
CTGDJN016I Folder does not support the expunge method. 450
CTGDJN017W Mail message at index ''*index number*'' could have been deleted from the mail server and could not be deleted. Error encountered while creating an Entry from a javax.mail.Message object: *exception* . . . 451
CTGDJN018E POP3 protocol does not support appending of messages. 451
CTGDJN019I Mail Folder is automatically set to ''INBOX'' for POP3 protocol. . . . 451
CTGDJN020E Mail Folder ''*folder name*'' does not exist on the mail server and parameter 'createFolder' is set to false. . 451
CTGDJN021I The mail folder ''*folder name*'' did not exist on mail server and was automatically created. 451
CTGDJN022I The mail folder ''*folder name*'' was searched for messages, but none were found. 452

CTGDJN022E The Mailbox Connector cannot find mail matching the specified Link Criteria. 452
CTGDJN023E No Entry is supplied in the output map for 'update' or 'add' operation. 452
CTGDJN024E Message in Attribute '*message*' is not in appropriate format. 452
CTGDJN025E An Error occurred when appending the message to the specified folder:'*Exception*'. 453
CTGDJN026I The supplied messages were successfully added to the folder:'*folder name*'. 453
CTGDJN027E Unable to update entry, because the specified entry to update could not be found. 453
CTGDJN028E Unable to update entry, because the specified entry to update does not contain the message. 453
CTGDJN029I Searching folder: '*folder name*' for subfolders. 453
CTGDJN030I No subfolders were found in folder: '*folder name*'. 454
CTGDJN031I The folder: '*folder name*' does not exist on the store. 454
CTGDJN032I The folder: '*folder name*' cannot be opened. 454
CTGDJN033I Serching folders in namespaces: '*folder name*'. 454
CTGDJN034E The folder:'*folder name*' cannot be created successfully. 454
CTGDJN035E The value for flag:'*flag name*' was not updated due to the following error: '*Exception*'. 455
CTGDJN036I POP3 Messages do not support 'Flags.Flag.RECENT', therefore the Flag is not updated. 455
CTGDJN037E Unable to initialize Mailbox Connector. The Mailbox Connector supports only the 'INBOX' folder when the POP3 protocol is chosen. 455
CTGDIQ201I The 'watermark' parameter is set to *parameter value*. 455
CTGDIQ202E Queue with name *name* does not exist. 456
CTGDIQ001E The Memory Stream Connector cannot add the entry because it has no Parser to write to. 456
CTGDIQ101E Required Connector parameter 'queueName' is not set. 456
CTGDIQ102E Required Connector parameter 'jdbcTable' is not set. 456
CTGDIQ103E Unable to get next entry because a non-entry object was received from queue: ''*object info*''. 456
CTGDIQ104E Queue with name *name* does not exist. 457
CTGDIC001I Delete selected items? 457
CTGDIC002E Cannot load a Connector with configuration type: *class*. 457
CTGDIC003W Delete table *table name*? . . 457
CTGDIC004I Table *table name* deleted. . . . 457
CTGDIC005I Server says it supports the Paged Search control. 458
CTGDIC006W Unable to determine whether the LDAP Server supports paged searches. Verify the LDAP Server supports paged searches. 458
CTGDIC007W Unable to perform paged search. This LDAP server does not support paged search. 458
CTGDIC008W Unable to lookup changelog information. The LDAP server does not provide server information. 458
CTGDIC009W Unable to lookup changelog information. The Context attribute ''firstchangenumber'' does not exist on the LDAP Server. 458
CTGDIC010I The First Change number is set to *first number*. The Last Change number is set to *last number*. 459
CTGDIC011W Unable to retrieve Changelog base name. The ''changelog'' attribute does not exist in the LDAP server info entry. . 459
CTGDIC012I LDAP Server changelog base name: '*changelog*'. 459
CTGDIC013W Delete table *table name*? . . 459
CTGDIC014W Unable to query schema until the Connector is configured. 459
CTGDIC015W Unable to lookup change number information. The LDAP server does not provide server information. 460
CTGDIC016E Enter the WSDL URL first. . . 460
CTGDIC017E No services were found in the specified WSDL file. 460
CTGDIC018E Enter a service name first. . . 460
CTGDIC019E No endpoints were found in the specified WSDL file. 460
CTGDIC020E No operations were found in the specified WSDL file. 461
CTGDIC022E The attribute '*attribute name*' is already mapped. 461
CTGDIC023E Exception encountered while creating component of type '*component type*': '*error message*'. 461
CTGDIC024W Unable to update component. The referenced component no longer exists: *file name*. 461
CTGDIC025E Exception encountered while updating an external component. 461
CTGDIC026E The remote Config *Config file* cannot be found on server *server name*. . . 462
CTGDIC027E Connection to server *server name* cannot be obtained. 462
CTGDIC028E No server configured. 462
CTGDIC029I The application will not function properly without the IBM Security Directory Integrator install directory. Specify the IBM Security Directory Integrator install directory. 462

CTGDIC030E Installation directory specified is not valid. A local IBM Security Directory Integrator installation is required for the application to run. . . . 463
CTGDIC031E Exception encountered while loading the Config file: '*file name*'. . . . 463
CTGDIC032W Exception encountered while loading the Config file: '*file name*'. . . . 463
CTGDIC033E Unable to load Config file. Cannot determine folder for referenced Config file: '*file name*'. 463
CTGDIC034E Unable to save file because an exception was encountered. 464
CTGDIC035E Unable to load BaseEditor because there is no quick-edit object. . . 464
CTGDIC036E Exception occurred while downloading properties. 464
CTGDIC037I Update completed succesfully. 464
CTGDIC038E Exception occurred while upload properties. 464
CTGDIC039I The connector did not return any schema information. Do you want to open the connection and read one entry? 465
CTGDIC040I Do you want to clear the current schema before updating? 465
CTGDIC041I Do you want to clear the current schema before updating? 465
CTGDIC043I The Component returned an empty entry. 465
CTGDIC044I No schema information returned. Would you like to read an entry? 465
CTGDIC045I Solution directory updated. . . 466
CTGDIC046E The folder already exists: '*folder name*'. 466
CTGDIC047E Attribute already assigned to attribute '*attribute name*'. 466
CTGDIC048E Error: '*error message*' . . . 466
CTGDIC049E Exception encountered while opening the configuration file: '*error message*' 466
CTGDIC050E Uanble to open the configuration file. An exception occurred: '*error message*' 467
CTGDIC051I Solution directory created. . . 467
CTGDIC052I Unable to build configuration file. An exception occurred: '*error message*' 467
CTGDIC053I Unable to create folder '*name*'. An exception occurred: '*error message*' . . 467
CTGDIC054E Target folder '*folder name*' is not a folder. 467
CTGDIC055E Unable to remove object from configuration file. An exception occurred: '*error message* 468
CTGDIC056E Cannot determine folder for object '*object name*'. 468
CTGDIC057W Cannot find cached configuration for file '*file name*'. . . . 468
CTGDIC058W Using cached version of file '*file name*'. 468
CTGDIC059E An unsupported action was encountered. You can only open configuration files that exist in your workspace. . . . 468
CTGDIC060E Cannot create the specified directory: '*directory name*'. 469
CTGDIC061E The specified solution directory '*name*' is a file. 469
CTGDIC062E Created the file '*file name*'. 469
CTGDIC063I Do you want to stop the local server running on '*server address*'? . . . 469
CTGDIC064I The server is being started... 469
CTGDIC065I This will clear the current object(s) and restore the value to the inherited one. 470
CTGDIC066I When the Skip Lookup option is selected, no 'Before/After Lookup' and 'On Multiple Entries' hooks are invoked. Also, no add is done in Update mode if an entry is not found to match the criteria. 470
CTGDIC067I The Schema item '*schema name*' already exists. 470
CTGDIC068I The file has been changed on the file system. Do you want to reload the editor? 470
CTGDIC069I Referenced component no longer exists: '*file name*'. 471
CTGDIC070I Unknown class encountered. Unable to reattach to the class '*class name*'. 471
CTGDIC071I The parent is not a container. 471
CTGDIC072I Th Server Mode Connector '*Connector name*' appears after another Server Mode Connector. 471
CTGDIC073I The Connector '*Connector name*' references unknown property '*property name*'. 471
CTGDIC074I The Connector '*Connector name*' references unknown string '*string value*' which is not defined in the schema. . . . 472
CTGDIC075I The attribute map '*attribute map name*' references undefined/unavailable work attribute '*attribute name*'. 472
CTGDIC076I Local development server launched 472
CTGDIC077I Process exit code: '*exit code*'. 472
CTGDIC078I The Connector '*Connector name*' references the object '*object name*'. . . . 473
CTGDIC079I You have not updated the solution directory and not doing so may affect your connection to this server. Do you want to update the solution properties before saving? 473
CTGDIC080I Resource already exists. Do you wish to overwrite? Overwrite: '*File name*' Last modified: '*Last modified*' 473
CTGDIC081I Cannot find a form to display for object class *Object Class* 473
CTGDIC082I The file .rs.xml cannot be imported, please export the project and then import that file. 474

CTGDIC083I A restart of the IBM Security Directory Integrator server is required to activate changes made to the system store of a running IBM Security Directory Integrator server. 474
CTGDIC084I IBM Security Directory Integrator Version: 7.2 This plug-in is provided by IBM Corp. CTGDKM217I Inspecting xml files for new constraints added. 499
CTGDKM218E The global id, host, or port is null. 499
CTGDKM219E The data violates unique constraint requirement of table TDI_SERVER_MASTER. The data cannot be migrated. 500
CTGDKM220I Generating Autogenerated IDs for the following table: *table name*. . . . 500
CTGDKM221I Old ID value is: *ID value*. . . 500
CTGDKM222I Column added to insert: *column name*. 500
CTGDKM223I SQL statement in master tables: 500
CTGDKM224I Generated ID: *ID*. 501
CTGDKM225E Error cannot generate key for table: *table name*. 501
CTGDKM226E An error was encountered while connecting to the database for generating IDs for master tables. 501
CTGDKM227I SQL insert statements for the rest of the tables: 501
CTGDKM228I Reading list of files from directory... 501
CTGDKM229I Renaming table *table name* to *table name*. 502
CTGDKM230I Adding columns for Security Directory Integrator 7.2 changes. 502
CTGDKM231I Number of columns to be added: *number of columns*. 502
CTGDKM232I Column data added to xml. Column name:*column name*. Column value:*column value*. 502
CTGDKM233I Initializing DB Connection properties... 502
CTGDKM234E An error was encountered while trying to read amc.properties file. . . . 503
CTGDKM235E An error was encountered while trying to write to file. 503
CTGDKM236E An error was encountered while trying to add data to database. 503
CTGDKM237I Updating XML files with constraints added in new release. 503
CTGDKM238E The global id, host or port is null. 503
CTGDKM239E The data violates unique constraint requirement. The data cannot be migrated. 504
CTGDKM240E An error has occured while parsing the xml holding AMC DB data. . . . 504
CTGDKM241E An error has occured while reading Administration and Monitoring Console data transferred to xml files. . . 504
CTGDKM242I Autogenerating ids for : *table name*. 504
CTGDKM243E An error has occured while autogenerating key. 504
CTGDKM244E An error has occured while removing columns to update saved data. . . 505
CTGDKM245E An error has occured while adding columns to update saved data. . . . 505
CTGDKM246E An error has occured while renaming table to update saved data. . . . 505
CTGDKM247E An error has occured while creating sql insert statements. 505
CTGDKM248E An error has occured while updating xml files with newly generated ids. 505
CTGDKM249I Updating the XML for table: *table name* with new ID. 506
CTGDKM301I Starting file migration... . . 506
CTGDKM302I Parsing options... 506
CTGDKM303E The *operator switch* option occurred more than once. 506
CTGDKM304E No value specified for *option name* option. 506
CTGDKM305E Incorrect command usage. . . 507
CTGDKM306E Unknown option *operator switch* encountered. 507
CTGDKM307E The *operator switch* option was not specified. This is a mandatory option. . 507
CTGDKM308I Options Parsed: *options*. . . 507

CTGDKM309E An error *error* occurred while reading the XML properties file. 507
CTGDKM310E Unable to migrate the file *file name*. The file does not exist or cannot be read. 508
CTGDKM311E Unable to migrate the file *file name*. The file specified is not a file. 508
CTGDKM312E Unable to migrate the file *file name*. The file specified cannot be written to. 508
CTGDKM313E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the file name. 508
CTGDKM314E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the new file. . 509
CTGDKM315E Unable to perform the migration. Unable to backup the file *file name* to *file name*. 509
CTGDKM316I Adding the new properties... 509
CTGDKM317I Completed adding the new properties. 509
CTGDKM318I Started modifying the old properties with new values and commenting the old properties.... 509
CTGDKM319I Completed modifying the old properties with new values and commenting the old properties. 510
CTGDKM320I Starting commenting the old properties.... 510
CTGDKM321I The number of old properties to be commented are *number of properties*. . 510
CTGDKM322I There are no old properties to be removed for release *release version*. . . 510
CTGDKM323I There are no new properties added for release *release version*. 511
CTGDKM324I Updating the properties.... 511
CTGDKM325I Migration completed with exit code *exit code*. 511
CTGDKM326I The file *file name* is successfully deleted. 511
CTGDKM327I Failed to delete file *file name*. 511
CTGDKM328I Initializing migration, loading the *xml prop file* properties file . 512
CTGDKM329I There are no properties in the new release which need to be updated in the older release. 512
CTGDKM101W The command did not complete successfully. See previous messages or error logs for details. 512
CTGDKM102E Unknown value passed for '-op' option. 512
CTGDKM103E Incorrect command usage. . . 512
CTGDKM104E No value specified for *option name* option. 513
CTGDKM105I The usage for the command is: tdimigam -f propfile [-b backfile] [-n newfile] [-v] [-?] where: -f propfile The name of the file to migrate -b backfile Back up the original file with the specified name -n newfile Name to give the file that is migrated -v Enable verbose mode -? Prints this usage statement 513
CTGDKM106I Return Code: *return code*. . . 513
CTGDKM107I Parsing options... 513
CTGDKM108I Options Parsed: *options*. . . 514
CTGDKM109E The *operator switch* option occurred more than once. 514
CTGDKM110E Unknown option *operator switch* encountered. 514
CTGDKM111W Already reached the end of argument list. 514
CTGDKM112E The *operator switch* option was not specified. This is a mandatory option. . 514
CTGDKM113I Starting file migration... . . 515
CTGDKM114E Unable to perform the migration. Unable to backup the file *file name* to *file name*. 515
CTGDKM115E Unable to migrate the file *file name*. The file does not exist or cannot be read. 515
CTGDKM116E Unable to migrate the file *file name*. The file specified is not a file. 515
CTGDKM117E Unable to migrate the file *file name*. The file specified cannot be written to. 515
CTGDKM118E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the file name. 516
CTGDKM119E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the new file. . 516
CTGDKM120E Error deleting file: *file name*. 516
CTGDKM001W The command did not complete successfully. See previous messages or error logs for details. 516
CTGDKM002E Unknown value passed for '-op' option. 517
CTGDKM003E Incorrect command usage. . . 517
CTGDKM004E No value specified for *option name* option. 517
CTGDKM005I The usage for the command is: tdimiggbl -f propfile [-b backfile] [-n newfile] [-v] [-?] where: -f propfile The name of the file to migrate -b backfile Backup the original file with the specified name -n newfile Name to give the file that is migrated -s dir Specifies the working directory where the solution directory is located. -v Enable verbose mode -? Prints this usage statement 517
CTGDKM006I Return Code: *return code*. . . 518

CTGDJZ513I Open IdML Function Component will create a *idml mode* IdML. 758
CTGDJZ514I The generated IdML will be validated. 758
CTGDJZ515I The MSS''s *param name* has value: '*value*'. 758
CTGDJZ516I The MSS''s *param name* has been overridden to value: '*value*'. 758
CTGDJZ517I The Common Data Model version of the generated IdML will be '*cdm version*'. 758
CTGDJZ518I Open IdML Function Component opened book '*value*'. 759
CTGDJZ519E Parameter '*param name*' is not provided. 759
CTGDJU101E Unable to read the entry because the 'defaultAttribute' ''*attribute value*'' value was not set in the Entry object. 759
CTGDJU102E Unable to read the entry because the Entry object is of an unknown type: ''*object type*''. Specify an object of type 'String', 'File', 'InputStream', or 'Reader'. 759
CTGDIR101I The properties file ''*file name*'' does not exist and will be ignored. . 759
CTGDIR102E Unable to modify entry because no key value was provided. 760
CTGDIR103W The properties file ''*file name*'' for *property store name* was not found, and will be created if anything is written to it. 760
CTGDIR104E The Certificate ''*certificate name*'' for property file *file name* was not found. 760
CTGDKN001I Proxy stop requested. 760
CTGDKN002E Encountered an unknown hostname or IP address. 761

CTGDKN003E Proxy stop request failed! The server is probably already stopped. . . . 761
CTGDKN004I Waiting for '*number of threads*' threads to die. 761
CTGDKN005I Interrupted while waiting for the other threads to die. 761
CTGDKN006E Unable to start the Java Proxy because the Java property '*property name*' was not specified. 761
CTGDKN007E Unable to start the Java Proxy. The path to the Java Proxy configuration file is not valid. 762
CTGDKN008E Unable to start the Java Proxy. The proxy configuration file property was not specified. 762
CTGDKN009E Unable to start the Java Proxy. The server socket could not be created. 762
CTGDKN010I The authentication folder is: '*directory name*'. 762
CTGDKN011I Plug-in/Proxy authentication successful. 762
CTGDKN012I Plug-in/Proxy authentication failed. 763
CTGDKN013E An unexpected Input/Output Exception occurred. 763
CTGDKN014I The Java Proxy is shutting down... 763
CTGDKN015E An unexpected exception occurred. 763
CTGDKN016E Unable to start the Java Proxy. The configuration property 'syncClass' is missing. 763
CTGDKN017E Unable to start the Java Proxy. The Password Store class could not be instantiated. 764
CTGDKN018I Invalid value for '*property name*' property, falling back to the default port '*port number*'. 764
CTGDKN019I Sending Proxy Stop request. 764
CTGDKN020E Could not connect to '*hostname*' :'*port number*'. 764
CTGDKN021I The Java Proxy does not recognize the byte-order mark. 764
CTGDKN022W The Proxy Stop request was rejected by the Java Proxy. 765
CTGDKN023I The Proxy stop request was sent successfully. The Proxy will react in less than *number of seconds* seconds. . . . 765
CTGDKN024I Usage of the StopProxy program: 765
CTGDKN025I stopProxy <full path to the configuration file of the Password Synchronizer> 765
CTGDKN026I Received operational code: '*operational code*'. 765
CTGDKN027I Invalid operational code: '*operational code*'. 766
CTGDKN028I Rejecting operation. 766
CTGDKN029I Invalid data received. The data might contain null characters. The operation for '*operation name*' will be rejected. 766
CTGDKN030E Invalid protocol data. Expected 0x00, received: *byte*. 766
CTGDKN031I Reading BOM. 766
CTGDKN032I Encoding not found. Using default encoding ('*character set*'). . . . 767
CTGDKN033I Found encoding '*character set*'. 767
CTGDKN034I Sending positive response to the client plug-in. 767
CTGDKN035I Insufficient input data. . . 767
CTGDKN037E A password file was not created successfully. 767
CTGDKN040I Both password files were successfully read. 768
CTGDKN041I Sending proxy password. . . . 768
CTGDKN044E The authentication process failed. The proxy did not respond as expected. 768
CTGDKN045I The password sent by the proxy is valid. 768
CTGDKN046E Authentication failed. The password sent by the proxy is not the same as the one that the client generated at the beginning of the authentication process. . 768
CTGDKN047E The authentication failed: *exception* 769
CTGDKN049E The password file '*file name*' is missing. 769
CTGDKN050E The password file '*file name*' is of unexpected format. 769
CTGDKN051E Authentication failed because a password file could not be created: *exception* 769
CTGDKN052W Could not delete proxy password file '*file name*'. 769
CTGDKN053I Proxy password file deleted successfully. 770
CTGDKN054E The client did not respond as expected. 770
CTGDKN055E The password received from the client does not match the password generated by the proxy in the beginning of the authentication process. 770
CTGDKN056I Received correct password from client. 770
CTGDKN057I Sending password to client. 770
CTGDKN059W Could not delete client password file '*file name*'. 771
CTGDKN060I Client password file deleted successfully. 771
CTGDKN061E The client did not respond as expected. 771
CTGDKN062E The client rejected the password sent by the proxy. 771
CTGDKN063I The client accepted the password sent by the proxy. 772

CTGDKN064E The authentication failed. An exception occurred: *exception* 772
CTGDKN067E The client password file '*file name*' is missing. 772
CTGDKN068E The authentication failed. The proxy does not recognize the format of the client password file. 772
CTGDKN069E Cannot install IBMJCE provider. An exception occurred: *exception* . 772
CTGDKN070E Could not obtain cipher '*cipher name*' implementation from provider '*provider name*': *exception* 773
CTGDKN071E Key store file '*file name*' does not exist. 773
CTGDKN072E Failed to open key store file '*file name*': *exception* 773
CTGDKN073E Could not find certificate with alias '*certificate alias*' in key store file '*file name*'. 773
CTGDKN074E Failed to retrieve certificate with alias '*certificate alias*' from key store file '*file name*': *exception* 773
CTGDKN075E Failed to retrieve private key with alias '*private key alias*' from key store file '*file name*': *exception* 774
CTGDKN076E Failed to retrieve public key with alias '*alias name*' from key store file '*file name*': *exception* 774
CTGDKN077E An exception occurred during the encryption operation: *exception* . . . 774
CTGDKN078E An exception occurred during the decryption operation: *exception* . . . 774
CTGDKN079I Usage: java com.ibm.di.plugin.idipwsync.EncodePW <password> 774
CTGDKN080E An unexpected error occurred. 775
CTGDKN081E Incorrect class specified in the syncClass property. 775
CTGDKN082I Invalid value for '*property name*' property, falling back to the default retry attempts '*retry attempt*'. 775
CTGDIH501I Initializing QRadar Connector version *version*, LEEF Version supported is *LEEFversion*, syslog output: *boolean*. . . . 775
CTGDIH502I Closing LEEF file. 775
CTGDIH503E Error closing LEEF file: *exception* 776

CTGDJG009E The 'Start at' parameter is set to an invalid value ''*parameter value*''.\n The parameter must be greater than 0 and less than *Integer*. 785
CTGDJC001E The Function Component could not establish a connection to the host. . . 785
CTGDJC002E The remote pathname specified could not be found. 785
CTGDJC003E An error occurred when reading from the local file 785
CTGDJC004E Pathname cannot be removed. . . 785
CTGDJC005E An error occurred when accessing the remote filesystem. 786
CTGDJC006E A unique service name cannot be found on the target machine. 786
CTGDJC007E The native Windows service binary cannot be read. 786
CTGDJC008E RSH could not bind to any local privileged port. 786
CTGDJC009E Could not find the remote user RemoteUser. 787
CTGDJC010E The specified username is not authorized to run shutdown. 787
CTGDJC011E An error occurred when executing the remote command. 787
CTGDJC012E Unable to execute the command remotely since the Remote Command Line Function Component has not been initialized. 787
CTGDJC013E The Function Component can no longer be used as it has been terminated. . 788
CTGDJC014E No command has been specified to execute. Provide a command on the IBM Security Directory Integrator GUI or as an attribute called 'command.line' in the provided Entry object. 788
CTGDJC015E Not all parameters have been provided. Ensure you have provided a hostname and username. For an REXEC or Windows connection you will also need to provide a password. For an SSH connection you have the option of providing a password OR a keystore (with associated passphrase if applicable). 788
CTGDJC016E The target machine's remote service could not be started. 788
CTGDJC017E The following internal RXA error message was generated: {0} 789
CTGDJC018E An Entry object is expected. 789
CTGDJC019E An error occurred when reading the remote file. 789
CTGDJC020E The execution of the requested command has timed out. 789
CTGDJC021E The specified standard input file does not exist. 790
CTGDJC022E An invalid connection type has been specified. The valid values for the 'connectionType' parameter are: 'ANY', 'RSH', 'SSH', 'REXEC' and 'WIN'. 790
CTGDJC023E Could not establish a connection to the target machine with the authorization credentials that were provided. 790
CTGDJC024I An attribute called 'command.line' has been provided in the Input Entry. The value entered for 'command' provided on the configuration screen, ''*value*'', will be disregarded. 790
CTGDJC025I Using the remote configuration option ''*option*'' = ''*value*''. 791
CTGDJC026I About to remotely execute the command: ''*command*''. 791
CTGDJC027I The command has been executed remotely. 791
CTGDJC028I No connection exists. 791
CTGDJC029I Starting Initalization of Function Component, ''*class name*''. . . . 791
CTGDJC030I Finished initalization of Function Component, ''*class name*''. Initialized with value of: ''*boolean*''. . . 792
CTGDJC031I Initalizing the Function Component parameters. 792
CTGDJC032I Initalizing the Function Component option ''*name*'' = ''*value*''. . . 792
CTGDJC033I Finding a suitable protocol to create a connection. 792
CTGDJC034I Protocol chosen ''*protocal name*''. 792
CTGDJC035I A connection could not be established using the provided parameters. Check the values and try again. 793
CTGDJC036I Initializing Function Component parameters done. 793
CTGDJC037E A connection to the remote machine does not exist so the specified command cannot be executed. 793
CTGDJC038I Creating a connection using the ''*protocol name*'' protocol to host ''*host name*'' for user ''*user name*''. 793
CTGDJC039I Beginning the ''*session name*'' session. 793
CTGDJC040I Session started successfully. 794
CTGDJC041I A suitable protocol could not be found. No connection has been made. . . 794

CTGDJC042I Creating a connection using the RSH protocol with the provided username on the specified host. 794
CTGDJC043I Creating a connection using the SSH protocol with the provided username, keystore and passphrase on the specified host. 794
CTGDJC044I The file ''*file name*'' could not be found. 795
CTGDJC045I You have selected to use 'any' protocol, but no password has been provided. Therefore, only SSH or RSH connections will be attempted. 795
CTGDJC046I You have selected to use 'any' protocol, but no password or SSH keystore details have been provided. Therefore, only an RSH connection will be attempted. . . . 795
CTGDJC047I The standard input destination directory on the target machine has been set to ''*directory name*''. 795
CTGDJC048I The specified standard input will be used. 795
CTGDJC049I Standard input has been appended to the specified command. The complete command that will be executed on the remote machine is: ''*command*''. . . . 796
CTGDJC050I The standard input file ''*file name*'' has been successfully transferred to the destination directory ''*directory name*''. 796
CTGDJC051I Removing the temporary directory: ''*directory name*''. 796
CTGDJC052I The value provided for the input Entry attribute, ''*attribute value*'', is not of the correct type. Therefore, this entry attribute will be disregarded. The value provided should be of type java.lang.String. 796
CTGDJC053I A port number has been provided when attempting to create a Windows connection. It is not possible to specify a port number for this type of connection. Therefore, the supplied port will be disregarded. 797
CTGDJC054I Internal RXA Debug Message from RXA method *method name*: ''*message*''. . . . 797
CTGDJC055I Internal RXA Info Message from RXA method *method name*: ''*message*''. . . . 797
CTGDJC056I Internal RXA Warning Message from RXA method *method name*: ''*message*''. . 797
CTGDJC057E Internal RXA Error Message from RXA method *method name*: ''*message*''. . . . 798
CTGDJC058I Creating the directory: ''*directory name*'' on the target computer. . 798

CTGDKH001E Exception occurred while trying to read property file: *exception*. . 802
CTGDJZ601E Rolling IdML Function Component accepts only a IBM Security Directory Integrator Entry as input. 803
CTGDJZ602E Rolling IdML Function Component can be used only for IdML books stored as files (in-memory books are not allowed). . 803
CTGDJZ603I The book '*book name*' does not exist or is already closed. 803
CTGDJZ604I The parameter *param name* was initialized with the value: '*value*'. . . . 803
CTGDJZ605I Rolling IdML Function Component will work with book: '*book name*'. 804
CTGDJZ606I The name of the currently used book '*book name*' has been overridden to '*new name*'. 804
CTGDJZ607E Parameter '*param name*' is not provided. 804
CTGDIK101E The SAP ABAP AS BOR Connector has failed to create an instance of the IBM Security Directory Integrator Function Component named ''*Function Component name*''. This failure may have been caused by incorrect installation of the Function Component or incorrect Function Component name. 804
CTGDIK102E An error has been detected while initializing the Function Component named ''*Function Component name*''. 805
CTGDIK103E An XSL transformation has failed. Ensure that a valid XML value has been supplied for the 'sapXml' attribute. The source XSL file name is ''*file name*''. . 805
CTGDIK105E The XSL files for the Connector's putEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. 805
CTGDIK106E The XSL files for the Connectors' modEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. 806

CTGDIK107E The XSL files for the Connectors' deleteEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. 806
CTGDIK108E The configured XSL file named ''*file name*'' does not exist. 806
CTGDIK109E The configured XSL file named ''*file name*'' is not a valid file. A possible cause of this error might be that the configured name is actually a directory. 807
CTGDIK110E The configured XSL file named ''*file name*'' is not readable. 807
CTGDIK111E The configuration parameter named ''*parameter name*'' is missing . . . 807
CTGDIK112E The Attribute named ''*file name*'' is not present, or does not have a value in the Entry supplied. This attribute must be present in the Connector entry. . . 807
CTGDIK113W No search criteria have been defined for the Connectors' findEntry method. This method will return null to indicate no objects found. 808
CTGDIK114W An XSL transform was performed before calling an SAP RFC. The result of the XSL transform was an empty document. An empty transform result typically occurs when mandatory XPath or Parameters are missing. The RFC call will not be performed. . . . 808
CTGDIK115W The XSL transform defined in file ''*file name*'' resulted in an empty XML document. An empty transform result typically occurs when mandatory XPath or Parameters are missing. The RFC call was not performed. 808
CTGDIK116W Some application level errors and warnings have been detected while creating the ABAP AS user. The operation may be incomplete. 808
CTGDIK117W Some application level errors and warnings have been detected while deleting the ABAP AS user. The operation may be incomplete. 809
CTGDIK118W Some application level errors and warnings have been detected while updating the ABAP AS user. The operation may be incomplete. 809
CTGDIK119E The Connector detected an exception during initialization. The message is: ''*exception*''. 809
CTGDIK120E The Connector detected an exception while performing a schema query. The message is: ''*exception*''. 809
CTGDIK121E The Connector detected an exception while adding an entry. The message is: ''*exception*''. 810
CTGDIK122E The Connector detected an exception while deleting an entry. The message is: ''*exception*''. 810
CTGDIK123E The Connector detected an exception while modifying an entry. The message is: ''*exception*''. 810
CTGDIK124E The Connector detected an exception while attempting to find an entry. The message is: ''*exception*''. 810
CTGDIK125E The Connector detected an exception while selecting entries in preparation for iterator mode processing. The message is: ''*exception*''. 810
CTGDIK126E The Connector detected an exception while iterating through the known entries. The number of entries successfully processed before the exception was *number of entries*. The message is: ''*exception*''. . . 811
CTGDIK127E No XSL style sheet files have been configured for the Connector running in ''*Connector mode*'' mode. This mode requires XSL style sheets to be defined. See the IBM Security Directory Integrator Users Guide for specific details. 811
CTGDIK128E Delete mode requires the attribute named 'sapXml' to present if no Link Criteria have been defined. 811
CTGDIK129I Adding message to error list: ''*message*''. 811
CTGDIK130I Adding message to warning list: ''*message*''. 812
CTGDIK131I Extracting the return data from element named ''*tag name*''. 812
CTGDIK132I Creating AbapErrorInfo object: message=''*message*'', error number=''*error number*'', error flag=''*error flag*''. . . . 812
CTGDIK133I The XML element to return is a table style element: ''*boolean*''. 812
CTGDIK134I The result of pre RFC XSL call is: ''*string*''. 812
CTGDIK135I The result of RFC call is: ''*string*''. 813
CTGDIK136I Executing function for XSL file:: ''*file*''. 813
CTGDIK137I The findEntry method is returning the initialized entry. 813
CTGDIK138I The findEntry method is returning null. 813
CTGDIK301I Started JCo IDoc Server and listening for requests. 813
CTGDIK302E Unable to initialize the Connector. Exception occurred: *exception* . 814
CTGDIK303E The ''*parameter name*'' parameter must be set to use the SAP IDocs Connector. 814
CTGDIK304I Optional RFC Connection parameter ''*parameter name*'' set with the value ''*parameter value*''. 814
CTGDIK305I Connector configuration parameter ''*parameter name*'' set with the value ''*parameter value*''. 814
CTGDIK306I Checking if TID Manager for TID ''*TID*'' is available for processing. . . . 815

CTGDIK307E No TID Manager found for TID ''*TID*''. 815
CTGDIK308I TID Manager for TID ''*TID*'' is available for processing. 815
CTGDIK309W Provided poll time value is 0 or less. Single request will be processed only. 815
CTGDIK310I Polling for next the IDoc request in getNextEntry method. 815
CTGDIK311E Exception generated while polling. 816
CTGDIK312E Null Entry found in the Entry list of the TID Manager for TID ''*TID*''. . 816
CTGDIK313W No TID provided with this RFM call. Manually removing the TID Manager to complete the TID Management cycle. 816
CTGDIK314I No Parser Attached to the Connector. 816
CTGDIK315I Finished processing TID Manager for TID ''*TID*'' . TID ready for confirmation. 817
CTGDIK316E The getNextEntry method returned null in Iterator mode with a valid poll time. 817
CTGDIK317W Entry contains no XML attributes to parse. 817
CTGDIK318I Attempting to parse XML content with attached Parser. 817
CTGDIK319W The attached Parser returned a null Entry. 817
CTGDIK320E Unable to parse the XML. Exception occurred: *exception* 818
CTGDIK321W Exception occurred while generating schema: *exception* 818
CTGDIK322E Unable to start the JCo IDoc Server. 818
CTGDIK323I Polling for next IDoc request in getNextClient method. 818
CTGDIK324I The onCheckTID method was called for TID ''*TID*''. . TID Management already in progress for this TID. 819
CTGDIK325I The onCheckTID method was called for TID ''*TID*''. TID Management beginning now for this TID. Next handleRequest method call will begin the inbound processing. 819
CTGDIK326I TID Manager for TID ''*TID*'' is not yet confirmed. Current status is ''*status*''. 819
CTGDIK327I TID Manager for TID ''*TID*'' is now confirmed. 819
CTGDIK328I The handleRequest method was invoked. Current TID value is ''*TID*'' . Incoming IDoc list request contains ''*number of IDocs*'' IDocs. 819
CTGDIK329E Unable to convert IDoc request into a IBM Security Directory Integrator entry. The writeIDocToTDIEntry method returned null IDoc Entry. 820
CTGDIK330E No value provided for current transaction identifier. This list of IDocs will not be processed. 820
CTGDIK331E Current TID ''*TID*'' already has a TID Manager and is being processed. Ignoring this request. 820
CTGDIK332E No IDoc Entries available. Ignoring request for TID ''*TID*''. 821
CTGDIK333I Created TID Manager for TID ''*TID*'' with ''*number of IDoc entries*'' IDoc entries for processing. 821
CTGDIK334E Unable to convert IDoc request into a IBM Security Directory Integrator entry. The Connector received a null JCoIDoc.Document object. 821
CTGDIK335I The handleRequest method was invoked. Current TID value is ''*TID value*''. Incoming RFM request is ''*RFM name*''. . . . 821
CTGDIK336W No TID received with this RFM request. Defaulting for TID Management processing. 822
CTGDIK337I RFM as XML: [''*TID*'']. 822
CTGDIK338E Unable to convert RFM request into a IBM Security Directory Integrator entry. No RFMs provided in request. . . . 822
CTGDIK339E Unable to convert RFM request into a IBM Security Directory Integrator entry. The JCO.Function object received was null. 822
CTGDIK340I Storing RFM request as XML file ''*file name*''. 823
CTGDIK341E Failed to read RFM request XML file ''*file name*'' into IBM Security Directory Integrator Entry. No contents found in file. 823
CTGDIK342E Failed to process RFM XML file. Exception occurred: *exception* 823
CTGDIK343E An exception occurred. Exception trapped from JCo Server with Program ID of ''*Program ID*'': *exception* . . 823
CTGDIK344E An error was encountered. An error message was trapped from JCo Server with Program ID of ''*Program ID*'': *error message*. 824
CTGDIK345I State Change occurred for JCo Server with Program ID of ''*Program ID*''. Previous State: ''*old state*'' New State: ''*new state*''. 824
CTGDIK346I Trace message trapped from JCo Server. Trace Level: ''*trace level*'' Trace Message: ''*trace message*''. 824
CTGDIK347W File was not able to be deleted: ''*file name*''. 824
CTGDIK348I Import parameter: ''*value*''. 825
CTGDIK349I The import parameter is a structure. 825
CTGDIK350I The import parameter is a table.. 825
CTGDIK351I The import parameter is a simple field. 825

CTGDIK352I No Input Fields required for this RFM. 825
CTGDIK353I RFM export Paramters:---------- 826
CTGDIK354I The export parameter is a structure. 826
CTGDIK355I The export parameter is a simple field. 826
CTGDIK356I No Export Fields returned for this RFM. 826
CTGDIK357I RFM table Paramters:---------- 826
CTGDIK358I Rows found for table: ''*table name*''. 827
CTGDIK359I No rows found for table: ''*table name*''. 827
CTGDIK360I Field ''*field name*'' has string value ''*value*''. 827
CTGDIK362I Field ''*field name*'' has raw value ''*value*''. 827
CTGDIK364I A bad field value passed. . . 827
CTGDIK365I Input is a Record. Record fields are as follows: 828
CTGDIK366I Record field: ''*value*''. . . . 828
CTGDIK367I Input is a table. Table records are as follows: 828
CTGDIK368I Input is a structure. Structure records are as follows: 828
CTGDIK201E Must call the initialize method first! 828
CTGDIK202E Entry Attribute ''*attribute name*'' missing value. 829
CTGDIK203E Entry Attribute ''*attribute name*'' missing value or value does not match expected type. Expected type: ''*document type*''. 829
CTGDIK204E Entry attribute ''*attribute name*'' must be one of 'xmlDomDocument', 'xmlString', or 'multiValuedAttributes'. . 829
CTGDIK205E Entry object expected. . . . 829
CTGDIK206E Must call initialize() first. 829
CTGDIK207E Function cannot be reused once terminate() has been called. 830
CTGDIK208E ''*class name*'' != ''*class name*''. 830
CTGDIK209E Mandatory RFC parameter named ''*field name*'' has not been supplied. . . . 830
CTGDIK210E Length of supplied value for field ''*field name*'' exceeds maximum length ''*field length*''. 830
CTGDIK211E ''*class name*'' does not equal ''*class name*''. 831
CTGDIK212E Mandatory RFC parameter named ''*field name*'' has not been supplied. . . . 831
CTGDIK213E No such function named ''*function name*''. 831
CTGDIK214E The remove method is not implemented. 831
CTGDIK215E The Function Component detected an exception while attempting to disconnect. The message is: ''*exception*''. 831
CTGDIK216E Connection pool ''*pool name*'' already exists. The message is: ''*exception*''. 832
CTGDIK217E No more connections available in ''*pool name*''. The message is: ''*exception*''. 832
CTGDIK218E Unable to establish a connection using ''*pool name*''. The message is: ''*exception*''. 832
CTGDIK219E Unable to execute RFC ''*function name*''. The message is: ''*exception*''. 832
CTGDIK220E Communication error with SAP ABAP Application Server. The message is: ''*exception*''. 832
CTGDIK221W Trouble invoking ''*function name*''. The function has been retried apos;'*number of retries*'' times. 833
CTGDIK222E Trouble invoking ''*function name*''. The function has been retried apos;'*number of retries*'' times. The message is: ''*exception*''. 833
CTGDIK223E Unable to create DOM parser. The message is: ''*exception*''. 833
CTGDIK224E Unable to parse DOM parser. The message is: ''*exception*''. 833
CTGDIK225E Unable to read DOM parser. The message is: ''*exception*''. 833
CTGDIK226E Failed to prepare parameters for RFC. The message is: ''*exception*''. . . 834
CTGDIK227I Executing function for XSL file:: ''*file*''. Multiple elements with name ''*element name*'' are present in the structure type. Using the element in first position following the preorder traversal. . 834

CTGDIK245I The input entry is: ''*entry*''. 837
CTGDIK246I Obtaining RFC request from DOM Document. 838
CTGDIK247I Invoking RFC from DOM Document. 838
CTGDIK248I Obtaining RFC request from XML string. 838
CTGDIK249I Invoking RFC from XML string. 838
CTGDIK250I Invoking RFC using MVA parameter. 838
CTGDIK251I Using JCo config option ''*option name*'': ''*option value*''. 839
CTGDIK252I The supplied options are not supported or were incomplete. Usage: java -cp (SAP_JCO_HOME)/sapjaco.jar;(TDI_HOME)/jars/functions/SapR3RfcFC.jar -Djava.library.path=(SAP_JCO_HOME) com.ibm.di.fc.sapr3rfc.RfcXmlInvoker-f [input XML file] -o [output XML file] -p [JCO Connection properties file] -f The name of the file containing the input RFC request as XML. -o The name of the file to be produced containing RFC response as XML. -p The JCO Connection properties file. . . . 839
CTGDIK253I Input entry value: ''*entry value*''. 839
CTGDIK001E The SAP ABAP Application Server User Registry Connector failed to create an instance of the Security Directory Integrator Function Component ''*Function Component Name*''. This failure may have been caused by incorrect installation of the Function Component or an incorrect Function Component name. 840
CTGDIK002E An error has been detected while initializing the Function Component ''*Function Component name*''. 840
CTGDIK003E An XSL transformation has failed. Ensure that a valid XML value has been supplied for the 'sapUserXml' attribute. The source XSL file name is ''*file name*''. 840
CTGDIK005E The XSL files for the Connectors' putEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. 841
CTGDIK006E The XSL files for the Connectors' modEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. 841
CTGDIK007E The XSL files for the Connectors' deleteEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. 841
CTGDIK008E The configured XSL file named ''*file name*'' does not exist. 842
CTGDIK009E The configured XSL file named ''*file name*'' is not a valid file. A possible cause of this error might be that the configured name is actually a directory. 842
CTGDIK010E The configured XSL file named ''*file name*'' is not readable. 842
CTGDIK011E The configuration parameter named ''*file name*'' is missing. The configured Connector mode requires additonal configuration of this parameter. Ensure these values have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. See the IBM Security Directory Integrator Users Guide for specific details. 843
CTGDIK012E The Attribute named ''*attribute name*'' is not present, or does not have a value, in the Entry supplied. This attribute must be present in the Connector entry. . . 843
CTGDIK013W No search criteria have been defined for the Connectors'' findEntry method. This method will return null to indicate no objects found. 843
CTGDIK014W An XSL transform was performed before calling an SAP RFC. The result of the XSL transform was an empty document. An empty transform result typically occurs when mandatory XPath or Parameters are missing; for example, sapUserName. The RFC call will not be performed. 844
CTGDIK015W The XSL transform defined in file ''*file name*'' resulted in an empty XML document. An empty transform result typically occurs when mandatory XPath or Parameters are missing, e.g. sapUserName. The RFC call was not performed. 844
CTGDIK016W Some application level errors and warnings have been detected while creating the SAP ABAP AS user. The operation may be incomplete. 844
CTGDIK017W Some application level errors and warnings have been detected while deleting the SAP ABAP AS user. The operation may be incomplete. 844
CTGDIK018W Some application level errors and warnings have been detected while updating the SAP ABAP AS user. The operation may be incomplete. 845
CTGDIK019E The Connector detected an exception during initialization. The message is: ''*exception*''. 845
CTGDIK020E The Connector detected an exception while performing a schema query. The message is: ''*exception*''. 845
CTGDIK021E The Connector detected an exception while adding an entry. The message is: ''*exception*''. 845
CTGDIK022E The Connector detected an exception while deleting an entry. The message is: ''*exception*''. 846

CTGDIK023E The Connector detected an exception while modifying an entry. The message is: ''*exception*''. 846
CTGDIK024E The Connector detected an exception while attempting to find an entry. The message is: ''*exception*''. 846
CTGDIK025E The Connector detected an exception while selecting entries in preparation for iterator mode processing. The message is: ''*exception*''. 846
CTGDIK026E The Connector detected an exception while iterating through the known entries. The number of entries successfully processed before the exception was *number of entries*. The message is: ''*exception*''. . . 846
CTGDIK027E No XSL style sheet files have been configured for the Connector running in ''*Connector mode*'' mode. This mode requires XSL style sheets to be defined. See the IBM Security Directory Integrator Users Guide for specific details. 847
CTGDIK028I The findEntry method is returning null. 847
CTGDIK029I The findEntry method is returning the initialized entry. 847
CTGDIK030I The findEntry method is returning null. 847
CTGDIK031I Adding message to error list: ''*message*''. 848
CTGDIK032I Adding message to warning list: ''*message*''. 848
CTGDIK033I Extracting the return data from element named ''*tag name*''. 848
CTGDIK034I Creating AbapErrorInfo object: message=''*message*'', error number=''*error number*'', error flag=''*error flag*''. . . . 848
CTGDIK035I The XML element to return is a table style element: ''*boolean*''. 848
CTGDIK036I The result of pre RFC XSL call is: ''*string*''. 849
CTGDIK037I The result of RFC call is: ''*string*''. 849
CTGDIK038I Executing function for XSL file: ''*file*''. 849
CTGDII201E The SCIM server URL is not specified. 849
CTGDII202E The SCIM resource endpoint is not specified. 849
CTGDII203E The ID attribute is missing in the conn entry. 850
CTGDII204E Unsupported operator in link criteria. 850
CTGDIR001W Unable to load script libraries. The Script Connector has no associated MetamergeConfig object. 850
CTGDIR002E Operation 'selectEntries' failed in Script Connector: ''*error message*''. 850

CTGDIW603I Processing the constraint *constraint type* for *column* column. . . . 1140
CTGDIW604I The primary key name is *primary key name*. 1140

CTGDIW605I The foreign key name is *key name*. 1140
CTGDIW606I Detected remote server version: *server version*. Disabling tombstone button and Manage properties button. 1141
CTGDIW607E An error occurred while getting the meta merge config: *error* . . . 1141
CTGDIW608I No action to be performed for the command *command name*. 1141
CTGDIW609E An error occurred while deleting the rule with Rule ID *rule id*: *error* 1141
CTGDIW610W An error occurred while deleting the file *file name*: 1141
CTGDIW611E The string *path* is not a valid URL. Malformed Url exception occurred while converting the string to URL. . . . 1142
CTGDIW612E An error occurred while closing the output stream. 1142
CTGDIW613E The selected tombstone entry does not exist. 1142
CTGDIW614E A thread in waiting/sleeping/paused state is interrupted by another thread. 1142
CTGDIW615E An error occurred while getting the server id for IBM Security Directory Integrator server on host *host* and port *port*: *error* 1142
CTGDIW616E Conversion of string *string* to *number type* failed 1143
CTGDIW617E An error occurred while deleting the tombstones. 1143
CTGDIW618W Any changes to JDBC or SSL properties will need require a manual restart of the Administration and Monitoring Console. Apply changes to console properties? 1143
CTGDIW619E An error occurred while reading properties using Server API. . . . 1143
CTGDIW620E An error occurred while accessing AssemblyLine information using Server API. 1143
CTGDIW621E An error occurred while accessing Config information using Server API. 1144
CTGDIW622E An error occurred while closing file stream. 1144
CTGDIW623E An error occurred while rolling back database transaction : *error* . 1144
CTGDIW624E An error while rolling back database transaction : *error* 1144
CTGDIW625E Select an Action Manager log to delete. 1144
CTGDIW626E The End Date is earlier than the Start Date. 1145
CTGDIW627E Unable to find group: *string*. 1145
CTGDIW628I SDI servers earlier than 7.1 version does not support graceful shutdown. 1145
CTGDJB001W The command did not complete successfully. See previous messages or error logs for details. 1145
CTGDJB002E Unknown value passed for '-op' option. 1145
CTGDJB003E The server *hostname* does not support Tombstones. Tombstone support is not available in pre-6.1 servers. 1146
CTGDJB004E Incorrect command usage. . . 1146
CTGDJB005E Unable to get Tombstone manager. 1146
CTGDJB006E Only a single Config can be specified. 1146
CTGDJB007E No value specified for *option name* option. 1146
CTGDJB008E Only a single AssemblyLine can be specified. 1147
CTGDJB010E The value for the age option has to be an integer greater than zero (days). 1147
CTGDJB011E Conflicting Tombstone option passed. Use keyword 'all' or specify a set of Tombstone attributes. 1147
CTGDJB012E The 'all' keyword should be the last argument passed. 1147
CTGDJB014E The *option switch* option is mandatory. 1148
CTGDJB015E Could not locate Config *Config name*. 1148
CTGDJB016I Connected to server *hostname and port*. 1148
CTGDJB017I Config started: *Config name* 1148
CTGDJB018I Config already running: *Config name* 1148
CTGDJB019E Could not start Config: *Config name* 1149
CTGDJB020I AssemblyLine running: *AssemblyLine name*. 1149
CTGDJB021I AssemblyLine started: *AssemblyLine name*. 1149
CTGDJB022E AssemblyLine *AssemblyLine name* not found. 1149
CTGDJB023E Could not start AssemblyLines on the server *hostname and port*. 1150
CTGDJB028E The Config *Config name* is not loaded. 1150
CTGDJB029I Config stopped: *Config name*. 1150
CTGDJB030E Could not stop Config: *Config name*. 1150
CTGDJB031I AssemblyLine stopped: *AssemblyLine name*. 1150
CTGDJB032E Could not stop AssemblyLine: *AssemblyLine name*. 1151
CTGDJB033E AssemblyLine already stopped: *AssemblyLine name*. 1151
CTGDJB034E Error occurred while stopping AssemblyLines. 1151
CTGDJB039E Cannot connect to server *hostname and port*. 1151
CTGDJB040I The server *hostname and port* has been shutdown. 1151

CTGDJB041I Config *Config name* reloaded. 1152
CTGDJB042E Config *Config name* is not running. 1152
CTGDJB043E One or more Configs could not be reloaded on the server *hostname and port*. Check the previous messages or error logs for details. 1152
CTGDJB044I All the specified Configs have been successfully reloaded on the server *hostname and port*. 1152
CTGDJB045E The *operator switch* option occurred more than once. 1152
CTGDJB046E Unknown option *operator switch* encountered. 1153
CTGDJB047E The *operator switch* option was not specified. This is a mandatory option. 1153
CTGDJB048E It is mandatory to specify Config. 'all' keyword is not allowed with -c option. 1153
CTGDJB049I Usage: tdisrvctl [general_options] -op operation [operation_specific_options] general_options: -h host remote server IP address or hostname(default is localhost) -K keystore name of the SSL key database file -p port port number(default is 1099) -P key_pwd key file password -s dir Specifies the working directory where the solution directory is located. -T truststore name of the SSL trust store database file -u userID username(for custom authentication) -v run in verbose mode -w user_pwd user password(for custom authentication) -W trust_pwd trust file password -? display command usage operation: event send custom notification event prop manage Config properties queryop query an AssemblyLine for operations reload reload running Configs report generate Config report or list Configs on remote server shutdown shut down the server srvinfo view IBM Security Directory Integrator server information status view status of Configs or AssemblyLines start start specific Config or AssemblyLines stop stop specific Config or AssemblyLine tombstone view Tombstone entries for specific Config or AssemblyLine deletetombstone delete a tombstone entry debug debug components in a running AssemblyLine To get help for a specific operation: tdisrvctl -op operation -? . . 1154
CTGDJB050I The usage for reload operation is: tdisrvctl [general_options] -op reload -c config_list where: -c config_list comma separated list of Configs to reload . . . 1154
CTGDJB051I The usage for shutdown operation is: tdisrvctl [general_options] -op shutdown [-o return_code] [-f] where: -o return_code shutdown server with specified return code -f force a controlled shutdown and exit all AssemblyLines . . . 1155
CTGDJB052I The usage for srvinfo operation is: tdisrvctl [general_options] -op srvinfo 1155
CTGDJB053I The usage for status operation is: tdisrvctl [general_options] -op status [-c config_list | all] [-r AL_list | all] [-listen] where: -c config_list comma separated list of Configs or keyword 'all' -r AL_list comma separated list of ALs or keyword 'all' -listen start receiving the logs of a running Config or AssemblyLine Example: To see the status of all loaded Configs and ALs tdisrvctl [general_options] -op status To see the status of all running ALs tdisrvctl [general_options] -op status -r all To see the status of all components of a particular loaded Config tdisrvctl [general_options] -op status -c Config.xml -r all Note: - The keyword 'all' indicates all Configs or AssemblyLines. - The -listen option requires exactly one Config or AssemblyLine to be specified. 1155

CTGDJB054I The usage for the start operation is: tdisrvctl [general_options] -op start -c config [-e password] [-r AL_list | all] [-s] [-r AL_list -alop opname [{attr1:value1;attr2:value2;attrN:valueN}]| -f filename] [-m config_run_name -o storeName1=value1, storeName2=value2, storenameN=valueN] [-t] [-listen] [-sync] where: -c config name of config to start -e password password of the config file if it is password protected -r AL_list comma separated list of AssemblyLines to start or keyword 'all' -s simulate mode run AssemblyLine in simulate mode -alop opname AssemblyLine operation with required attributes and their values -f filename filename to specify the operations -m config run name run name of config -o property file list comma separated list of property store names and values -t start a temporary Config -listen receive the logs of the specified Config or AssemblyLine -sync execute AssemblyLine synchronously Note: - The -c option is mandatory. - The keyword 'all' indicates all AssemblyLines. - The -t option expects the Config specified in the -c option to be located on the client machine. - The -listen option requires exactly one Config or AssemblyLine to be specified. - The -listen option executes an AssemblyLine synchronously. There is no need to combine it with the -sync option. - The -sync option requires exactly one AssemblyLine to be specified. . 1156
CTGDJB055I The usage for stop operation is: tdisrvctl [general_options] -op stop -c config [-r AL_list | all] [-f] where: -c config name of Config -r AL_list comma separated list of ALs to stop or keyword 'all' -f force a controlled shutdown of AssemblyLines Note: - The -c option is mandatory. - The keyword 'all' indicates all AssemblyLines. 1156
CTGDJB056I The usage for tombstone operation is: tdisrvctl [general_options] -op tombstone -c config [-r AL_name] [-age n] [[attribute_list] | all] where: -age n display tombstone record for the last 'n' days (default is 1 day) -c config name of Config -r AL_name name of Aseembly Line all show all Tombstone attributes attribute_list: -ct component type -cn component name -cfg configuration name -guid Tombstone entry's guid -et event type -ex exit code -stime component's start time -ctime Tombstone create time -desc error description -um user message -stat statistics (valid for ALs only) Example: To see the last 2 days Tombstone entries (all attributes) for Config C1.xml tdisrvctl [general_options] -op tombstone -c C1.xml -age 2 all Note: - The -c option is mandatory. - Only one of the -r or -t option is allowed. Not both. 1157
CTGDJB057E The Config *Config name* is not loaded on the server *hostname and port*. . 1157
CTGDJB058I The Config folder on server *hostname and port* is empty. 1157
CTGDJB059I The usage for report operation is: tdisrvctl [general_options] -op report [-c config | -l] where: -c config name of the Config whose report is to be generated -l list the Configs in the remote server's Config folder Note: - The specified Config must be already loaded on the remote server. - Only one of the -c or -l option is allowed. Not both. 1158
CTGDJB060E The server *hostname* does not support 'config' folder. The 'config' folder support is not available in pre-6.1 servers. 1158
CTGDJB061I The usage for event operation is: tdisrvctl [general_options] -op event -e event_name [-s source] [-d data] where: -e event_name name of the event to send -s source the name of the source invoking the event (default tdisrvctl) -d data the data (message) to be passed to an event listener (default is null) Note: - All events sent from tdisrvctl (-e option) are automatically prefixed by the string "user". Example: To send an event "user.process.X.completed" from "admin" tdisrvctl -h hostname -op event -e "process.X.completed" -s admin -d "Admin triggered event". 1158
CTGDJB062I The event *event name* successfully sent. 1159

CTGDJB063I The usage for prop operation is: tdisrvctl [general_options] -op prop -c config [-l] | [[-o store] [[-g key | all] | [-s key=value [-e]] | [-d key]]] where: -c config name of the Config to use -l list all the configured property stores -o name of the property store to use -g key get the value of the specified key (or keyword 'all' implying get all keys) -s key=value set the key to the specified value -e encrypt the value when putting in the store (can be used with -s option only) -d key delete the specified key from the store Note: - The -c option is mandatory. The specified Config should be a loaded Config on the remote server. - The -l, -g, -s, and -d options are mutually exclusive, and cannot be used together. - The -e option can be used with only the -s option. - The -o option is mandatory when using the -d option. Examples: To list all property stores for Config C1.xml tdisrvctl -op prop -c C1.xml -l To get all properties for Config C1.xml tdisrvctl -op prop -c C1.xml -g all To get all properties for Config C1.xml from store MyStore tdisrvctl -op prop -c C1.xml -o MyStore -g all To set a property MY_PROP to value MY_VALUE for Config C1.xml in store MyStore and mark it as protected tdisrvctl -op prop -c C1.xml -o MyStore -s "MY_PROP=MY_VALUE" -e . . . 1159
CTGDJB064E Only one of the options -l, -g, -s, and -d can be specified. They cannot occur together. 1160
CTGDJB065E The property store (-o option) is not specified. 1160
CTGDJB066E Property store *property store name* does not exist. 1160
CTGDJB067I The property key *property key* does not exist. 1160
CTGDJB068E The server *hostname* does not support remote client event notification. This feature is not available in pre-6.1 servers. 1161
CTGDJB069E The server *hostname* does not support common APIs for IBM Security Directory Integrator Property management. This feature is not available in pre-6.1 servers. 1161
CTGDJB070I The property *key name* has been set and committed. 1161
CTGDJB071I The property *key name* successfully deleted. 1161
CTGDJB072I The usage for query operation is: tdisrvctl [general_options] -op queryop -c config -r AL_name where: -c config name of a loaded configuration -r AL_name valid AssemblyLine in the specified configuration 1162

About this publication

This publication contains the information that you require to develop solutions by using components that are part of IBM® Security Directory Integrator.

IBM Security Directory Integrator components are designed for network administrators who are responsible for maintaining user directories and other resources. It is assumed that you have practical experience with installation and usage of both IBM Security Directory Integrator and IBM Security Directory Server.

The information is also intended for users who are responsible for the development, installation, and administration of solutions by usingIBM Security Directory Integrator. The reader must familiar with the concepts and the administration of the systems that the developed solution would connect to. Depending on the solution, these systems might include, but are not limited to, one or more of the following products, systems, and concepts:

- IBM Security Directory Server
- IBM Security Identity Manager
- IBM Java™ runtime environment (JRE) or Oracle Java runtime environment
- Microsoft Active Directory
- Windows and UNIX operating systems
- Security management
- Internet protocols, including HyperText Transfer Protocol (HTTP), HyperText Transfer Protocol Secure (HTTPS) and Transmission Control Protocol/Internet Protocol (TCP/IP)
- Lightweight Directory Access Protocol (LDAP) and directory services
- A supported user registry
- Authentication and authorization concepts
- SAP ABAP Application Server

Access to publications and terminology

Read the descriptions of the IBM Security Directory Integrator Version 7.2.0.1 library and the related publications that you can access online.

This section provides:

- A list of publications in the "IBM Security Directory Integrator library."
- Links to "Online publications" on page cxviii.
- A link to the "IBM Terminology website" on page cxix.

IBM Security Directory Integrator library

The following documents are available in the IBM Security Directory Integrator library:

- *IBM Security Directory Integrator Version 7.2.0.1 Federated Directory Server Administration Guide*

  Contains information about using the Federated Directory Server console to design, implement, and administer data integration solutions. Also contains

© Copyright IBM Corp. 2006, 2014

information about using the System for Cross-Domain Identity Management (SCIM) protocol and interface for identity management.

- *IBM Security Directory Integrator Version 7.2.0.1 Getting Started Guide*

  Contains a brief tutorial and introduction to IBM Security Directory Integrator. Includes examples to create interaction and hands-on learning of IBM Security Directory Integrator.

- *IBM Security Directory Integrator Version 7.2.0.1 Users Guide*

  Contains information about using IBM Security Directory Integrator. Contains instructions for designing solutions using the Security Directory Integrator designer tool (the Configuration Editor) or running the ready-made solutions from the command line. Also provides information about interfaces, concepts and AssemblyLine creation.

- *IBM Security Directory Integrator Version 7.2.0.1 Installation and Administrator Guide*

  Includes complete information about installing, migrating from a previous version, configuring the logging functionality, and the security model underlying the Remote Server API of IBM Security Directory Integrator. Contains information on how to deploy and manage solutions.

- *IBM Security Directory Integrator Version 7.2.0.1 Reference Guide*

  Contains detailed information about the individual components of IBM Security Directory Integrator: Connectors, Function Components, Parsers, Objects and so forth – the building blocks of the AssemblyLine.

- *IBM Security Directory Integrator Version 7.2.0.1 Problem Determination Guide*

  Provides information about IBM Security Directory Integrator tools, resources, and techniques that can aid in the identification and resolution of problems.

- *IBM Security Directory Integrator Version 7.2.0.1 Message Guide*

  Provides a list of all informational, warning and error messages associated with the IBM Security Directory Integrator.

- *IBM Security Directory Integrator Version 7.2.0.1 Password Synchronization Plug-ins Guide*

  Includes complete information for installing and configuring each of the five IBM Password Synchronization Plug-ins: Windows Password Synchronizer, Sun Directory Server Password Synchronizer, IBM Security Directory Server Password Synchronizer, Domino® Password Synchronizer and Password Synchronizer for UNIX and Linux. Also provides configuration instructions for the LDAP Password Store and JMS Password Store.

- *IBM Security Directory Integrator Version 7.2.0.1 Release Notes*

  Describes new features and late-breaking information about IBM Security Directory Integrator that did not get included in the documentation.

Online publications

IBM posts product publications when the product is released and when the publications are updated at the following locations:

IBM Security Directory Integrator Library
The product documentation site (http://www-01.ibm.com/support/knowledgecenter/SSCQGF/welcome) displays the welcome page and navigation for this library.

IBM Security Systems Documentation Central
IBM Security Systems Documentation Central provides an alphabetical list of all IBM Security Systems product libraries and links to the online documentation for specific versions of each product.

IBM Publications Center

The IBM Publications Center site (http://www-05.ibm.com/e-business/linkweb/publications/servlet/pbi.wss) offers customized search functions to help you find all the IBM publications you need.

Related information

Information related to IBM Security Directory Integrator is available at the following locations:

- IBM Security Directory Integrator uses the JNDI client from Oracle. For information about the JNDI client, see the *Java Naming and Directory Interface™ Specification* at http://download.oracle.com/javase/7/docs/technotes/guides/jndi/index.html .
- Information that might help to answer your questions related to IBM Security Directory Integrator can be found at https://www-947.ibm.com/support/entry/myportal/over-accesspubsview/software/security_systems/tivoli_directory_integrator.

IBM Terminology website

The IBM Terminology website consolidates terminology for product libraries in one location. You can access the Terminology website at http://www.ibm.com/software/globalization/terminology.

Accessibility

Accessibility features help users with a physical disability, such as restricted mobility or limited vision, to use software products successfully. With this product, you can use assistive technologies to hear and navigate the interface. You can also use the keyboard instead of the mouse to operate all features of the graphical user interface.

For additional information, see the Accessibility Appendix in *Configuring Directory Integrator*.

Technical training

For technical training information, see the following IBM Education website at http://www.ibm.com/software/tivoli/education.

Support information

IBM Support provides assistance with code-related problems and routine, short duration installation or usage questions. You can directly access the IBM Software Support site at http://www.ibm.com/software/support/probsub.html.

Troubleshooting provides details about:

- What information to collect before contacting IBM Support.
- The various methods for contacting IBM Support.
- How to use IBM Support Assistant.
- Instructions and problem-determination resources to isolate and fix the problem yourself.

Statement of Good Security Practices

IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM DOES NOT WARRANT THAT ANY SYSTEMS, PRODUCTS OR SERVICES ARE IMMUNE FROM, OR WILL MAKE YOUR ENTERPRISE IMMUNE FROM, THE MALICIOUS OR ILLEGAL CONDUCT OF ANY PARTY.

Error Message Reference

Overview

The message reference provides a list of all informational, warning, and error messages that are associated with the IBM Security Directory Integrator. Messages that are returned by third-party software or other IBM product software are not listed here.

Message format

A displayed or printed message can appear by itself or with other information, such as a time stamp. A message consists of a message identifier (ID) and message text. A message number is also associated with each message.

Message ID format

A message ID consists of 10 alphanumeric characters that uniquely identify the message. The message ID is composed of:

- a 5-character product identifier
- a 1-character component or subsystem identifier
- a 3-digit serial number
- a 1-character type code indicating the severity of the message

The product identifiers for IBM Security Directory Integrator are CTGDI, CTGDJ and CTGDK.

Some valid message IDs are:

```
CTGDIS568E
CTGDIV018W
CTGDIZ709I
CTGDJN004E
```

Component identifiers

Messages that are associated with IBM Security Directory Integrator contain the component or subsytem identifiers that are shown in the following tables:

Table 1. CTGDI Component Table

Component identifier	Component
A	EmfSdoToXml FC, Axis2 WS Server Connector, Axis2 WS Client FC, Server API RMI, Security
B	EmfXmlToSdo FC, TP Server, JAX-RS, AtomStorage, API Connection, REST Server, Webcommon
C	Config Editor
D	Server Notification Listener Connector
E	z/OS® Changelog Connector, zOS LDAP Changelog Connector
F	SendMail FC
G	System Queue
H	System Queue Connector/System Store Connector /CCMDBConnector/DPAConnector/Report

N	Java Proxy, Password Stores and Password Plug-ins, JMS Drivers
O	Update Installer

Severity

The severity is indicated by the last character in the message ID.

I Informational

Provides information or feedback about normal events that occur.

```
CTGDIZ707I Deleting JAR file...
CTGDJC0036I Initializing Remote Command Line Function Component
     parameters done.
CTGDJF007I Synchronization from End Of Data will be performed: the
     Connector will only report changes that occur after it is started.
```

W Warning

Indicates that potentially undesirable conditions have occurred, but processing can continue; for example:

```
CTGDJT006W Unable to load script libraries. The Script Connector has no
     associated MetamergeConfig object.
CTGDIC019W Your solution directory {0} does not contain solution files.
     Do you want to create them?
CTGDIC066W Please establish a connection first.
```

E Error

Indicates that a problem has occurred that requires intervention or correction before processing can continue; for example:

```
CTGDIC078E Could not read WSDL file.
CTGDIG015E Default System Queue is not initialized.
CTGDJE008E No documents in the list of UnIDs, or the list is null.
```

Presentation of messages

The following list describes the different parts of the message explanations that are presented in this message reference documentation.

Explanation
Describes the meaning of the message, including why the message was issued. Might describe what system actions were taken as a result of the message.

Operator Response
Provides information on how to correct the problem.

Administrator Response
Provides information on how to correct the problem if System Administrator authority is required.

Programmer Response
Describes the corrective actions the System Programmer should take.

Messages

The IBM Security Directory Integrator messages are listed in alphabetical order according to their component identifiers.

CTGDJB501I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB502E Unable to create Action Manager Thread for [AM_ID]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for AssemblyLine Not Executed For Specified Time type of trigger).

Action

Check the exception trace following this message in the logs. Ensure that the time units were correctly specified.

CTGDJB503E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution view.

Action

Verify that the remote Security Directory Integrator server associated with this Solution view is running, and remote Server API engine is enabled on that server. If SSL is not enabled at the remote Security Directory Integrator Server end, then ensure that the IP address of the machine running Action Manager is mentioned in the api.remote.nonssl.hosts property in the global.properties or solution.properties file of the remote Security Directory Integrator Server. If SSL is enabled at the remote Security Directory Integrator Server end, then ensure that the Action Manager key store and trust store are set up correctly. Refer to the Security Directory Integrator Installation and Administrator Guide for steps on how to configure Security Directory Integrator for SSL.

CTGDJB504E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB505E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register an AssemblyLine terminate listener.

Explanation

The Action Manager was unable to create a thread because it could not register an AssemblyLine terminate listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB506I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB507I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB508I AssemblyLine *AssemblyLine name* has not run since *time* seconds. Starting execution of associated actions.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB509I Rule *rule name* has already been triggered earlier. Awaiting the next run of AssemblyLine *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB510I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB511I Action Manager initialization completed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB512I Started Health AssemblyLine Manager.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB513I Action Manager initialization started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB514E Property *property name* is not set.

Explanation

The Action Manager was unable to initialize because the required property action.manager.prop.file was not set. This property is required for finding the location of the Action Manager configuration file am_config.properties.

Action

Ensure that in the startAM.bat(sh) file the action.manager.prop.file property is being set to point to the location of the am_config.properties file.

CTGDJB515E Unable to load the am_config.properties file. Check the value of action.manager.prop.file property. Current value is: *file path*

Explanation

The Action Manager was unable to initialize because the property action.manager.prop.file in the startAM.bat(sh) file is pointing to an invalid location of am_config.properties.

Action

Ensure that in the startAM.bat(sh) file the action.manager.prop.file property is being set to point to the location of the am_config.properties file. See the associated exception trace.

CTGDJB516E Unable to load the amc.properties file. Current value of com.ibm.di.amc.properties.file.location property is: *file path*

Explanation

The Action Manager was unable to initialize because the property com.ibm.di.amc.properties.file.location in the am_config.properties file is pointing to an invalid location of amc.properties. The Action Manager needs to load the amc.properties to obtain SSL (and other) details of the Administration and Monitoring Console.

Action

Ensure that in the am_config.properties file the com.ibm.di.amc.properties.file property is being set to point to the location of the amc.properties file. See the associated exception trace. Also ensure that forward slashes are used in specifying the path.

CTGDJB517I SSL Trust Store: *trust store path*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB518I SSL Key Store: *key store path*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB519I Initializing connection to database.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB520E Unable to initialize database.

Explanation

The Action Manager was unable to initialize connection to database. This may occur if there is an error in the JDBC URLs specified in the am_config.properties. The Action Manager connects to the Administration and Monitoring Console's database using Derby in network mode. If the specified Derby database does not exist, or is booted in embedded mode, then Action Manager cannot connect to the database. To create the database, the Administration and Monitoring Console must have been started at least once. Action Manager will start the database in network mode, in case its not running in network mode already.

Action

Ensure that the JDBC settings in the am_config.properties file are correct, and pointing to the Administration and Monitoring Console's Derby database. Ensure that the Administration and Monitoring Console is not already connected to the database in Embedded mode. The recommended procedure is as follows: 1) Ensure that the Administration and Monitoring Console's database exists. If not, start the Administration and Monitoring Console. On starting the Administration and Monitoring Console for the first time, the Derby database is automatically created. 2) Shutdown the Administration and Monitoring Console and reconfigure it to connect to the database in network mode (if not already configured for network mode). 3) Start Action Manager. Action Manager will start the database in network mode. 4) Start the Administration and Monitoring Console, which will also connect to the same database over network mode.

CTGDJB521W Action Manager was unable to read property com.ibm.di.amc.am.healthAL.interval.time. Health AssemblyLine triggering interval set to a default value of 30 minutes.

Explanation

The Action Manager was unable to read the com.ibm.di.amc.am.healthAL.interval.time property from the am_config.properties file. This property is used to determine the triggering interval for Health AssemblyLines of Solution Views. If this property is not defined, then Action Manager will attempt to trigger all configured Health AssemblyLines every 30 minutes (unless the Health AssemblyLine is not running already, in which case it will not trigger a new run of the Health AssemblyLine).

Action

Ensure that there is a valid time value (in seconds) specified for the com.ibm.di.amc.am.healthAL.interval.time property in the am_config.properties file.

CTGDJB522I Creating Action Manager threads.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB523E Unable to obtain connection to database.

Explanation

The Action Manager was unable to obtain a connection to database. This may occur if there is an error in the JDBC URLs specified in the am_config.properties. The Action Manager connects to the Administration and Monitoring Console's database using Derby in network mode. If the specified Derby database does not exist, or is booted in embedded mode, then Action Manager cannot connect to the database. To create the database, the Administration and Monitoring Console must have been started at least once. Action Manager will start the database in network mode, in case its not running in network mode already. This could also happen, if the database shutdown (maybe because the Administration and Monitoring Console was shutdown). This will happen, only if the Administration and Monitoring Console had booted the database, and now the Administration and Monitoring Console has been shutdown. It is recommended that to avoid this situation, start Action Manager first, and then start the Administration and Monitoring Console.

Action

Ensure that the JDBC settings in the am_config.properties file are correct, and pointing to the Administration and Monitoring Console's Derby database. Ensure that the Administration and Monitoring Console is not already connected to the

database in Embedded mode. The recommended procedure is as follows: 1) Ensure that the Administration and Monitoring Console's database exists. If not, start the Administration and Monitoring Console. On starting the Administration and Monitoring Console for the first time, the Derby database is automatically created. 2) Shutdown the Administration and Monitoring Console and reconfigure it to connect to the database in network mode (if not already configured for network mode). 3) Start Action Manager. Action Manager will start the database in network mode. 4) Start the Administration and Monitoring Console, which will also connect to the same database over network mode.

CTGDJB524I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On termination of AssemblyLine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB525I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On receiving Event.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB526I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On specific property value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB527I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On query of AssemblyLine result.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB528I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On server API failure.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB529I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On elapsed time interval since last execution of AssemblyLine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB530E Exception while constructing Action Manager threads.

Explanation

The Action Manager was unable to create listener threads because some internal error occurred. See the logs, or accompanying exception trace for more information.

Action

See the associated exception trace for reasons of error. Try running Action Manager again.

CTGDJB531I Action Manager threads created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB532I Database modification listener started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB533I Checking for any Action Manager rule updates.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB534E Error occurred while running Database modification listener.

Explanation

The Action Manager's database listener thread, that checks if any Action Manager rule has been modified from the Administration and Monitoring Console, encountered a database exception while trying to read data from the database. This could have happened if the database has been shutdown, or some other internal error occurred.

Action

Verify that the database is running. Look at the exception trace in the log.

CTGDJB535E Error occurred while trying to delete data from the AM_UPDATE_DETAILS table.

Explanation

The Action Manager's database listener thread, that checks if any Action Manager rule has been modified from the Administration and Monitoring Console, encountered a database exception while trying to delete data from the AM_UPDATE_DETAILS table in the database. This could have happened if the database has been shutdown, or some other internal error occurred.

Action

Verify that the database is running. Look at the exception trace in the log.

CTGDJB536I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On termination of AssemblyLine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB537I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On receiving Event.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB538I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On specific property value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB539I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On query of AssemblyLine result.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB540I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On server API failure.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB541I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On elapsed time interval since last execution of AssemblyLine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB542E Error occurred while constructing Action Manager thread for rule: *rule name*

Explanation

The Action Manager's real time listener thread, that checks if any Action Manager rule has been modified from the Administration and Monitoring Console, encountered an exception while trying to create an Action Manager thread for the modified rule. See the associated log messages and exception trace for more information.

Action

Look into the log messages and exception trace for more information. Modify the particular rule again using the Administration and Monitoring Console.

CTGDJB543E Error occurred while trying to insert data into the AM_UPDATE_DETAILS table.

Explanation

Action Manager writes into the AM_UPDATE_DETAILS table, to indicate that a rule has been modified, so that the database modification listener thread can pick up this modification notification, and appropriately modify listener threads. An error occurred while trying to insert information in the AM_UPDATE_DETAILS table. This may have occurred if the database is down, or due to some other internal error.

Action

Verify that the database is running. Look at the exception trace in the log.

CTGDJB544E Error occurred while trying to delete all data from the AM_UPDATE_DETAILS table.

Explanation

On startup, the Action Manager clears all the data from the AM_UPDATE_DETAILS table, since it is anyways going to construct all threads again. Due to some database error, Action Manager was unable to clear the data from this table.

Action

Verify that the database is running. Look at the exception trace in the log.

CTGDJB545I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB546I Created Action Manager thread for [Config]: *Config instance*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB547I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB548I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB549I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB550E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for AssemblyLine Terminated type of trigger). This may occur, because the database is down, or some internal database related error occurred.

Action

Check the exception trace following this message in the logs. Ensure that the database is running in network mode. It is recommended to start Action Manager first, and the Administration and Monitoring Console later. Action Manager will start the database in network mode, to which the Administration and Monitoring Console can later connect.

CTGDJB551E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB552E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine terminate listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB553E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine terminate listener.

Explanation

The Action Manager was unable to create a thread because it could not register an AssemblyLine terminate listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB554I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB555I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB556I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB557I DBConnectionFactory instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB558I Derby network server already running.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB559I Unable to ping Derby network server. Attempting to start.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB560I Started Derby network server.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB561E Unable to start Derby network server. Database unavailable.

Explanation

The Action Manager was unable to start Derby network server. This may occur if there is an error in the JDBC URLs specified in the am_config.properties. The Action Manager connects to the Administration and Monitoring Console's database using Derby in network mode. If the specified Derby database does not exist, or is booted in embedded mode, then Action Manager cannot connect to the database or start the database in network mode. To create the database, the Administration and Monitoring Console must have been started at least once. Action Manager will start the database in network mode, in case its not running in network mode already.

Action

Ensure that the JDBC settings in the am_config.properties file are correct, and pointing to the Administration and Monitoring Console's Derby database. Ensure that the Administration and Monitoring Console is not already connected to the database in Embedded mode. The recommended procedure is as follows: 1) Ensure that the Administration and Monitoring Console's database exists. If not, start the Administration and Monitoring Console. On starting the Administration and Monitoring Console for the first time, the Derby database is automatically created. 2) Shutdown the Administration and Monitoring Console and reconfigure it to connect to the database in network mode (if not already configured for network mode). 3) Start Action Manager. Action Manager will start the database in network mode. 4) Start the Administration and Monitoring Console, which will also connect to the same database over network mode.

CTGDJB561W Error while closing database Statement.

Explanation

Action Manager encountered some database error which caused statement.close() API to fail.

Action

Ensure that the database is running in network mode, and see the exception trace for more details.

CTGDJB562W Error while closing database ResultSet.

Explanation

Action Manager encountered some database error which caused resultSet.close() API to fail.

Action

Ensure that the database is running in network mode, and see the exception trace for more details.

CTGDJB563W Error while closing database Connection.

Explanation

Action Manager encountered some database error which caused connection.close() API to fail.

Action

Ensure that the database is running in network mode, and see the exception trace for more details.

CTGDJB564I Rule *rule name* not triggered since event data did not match.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB565I Rule *rule name* not triggered since event source did not match.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB566I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB567E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for Event Received type of trigger). This may occur, because the database is down, or some internal database related error occurred.

Action

Check the exception trace following this message in the logs. Ensure that the database is running in network mode. It is recommended to start Action Manager first, and the Administration and Monitoring Console later. Action Manager will start the database in network mode, to which the Administration and Monitoring Console can later connect.

CTGDJB568E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB569E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine terminate listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB570E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register specified Event listener.

Explanation

The Action Manager was unable to create a thread because it could not register an event listener as per the user specified parameters.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB571I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB572I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB573I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB574W Unable to get list of running AssemblyLines for Solution View: *Solution View*. Ignoring Health AssemblyLine for this Solution view.

Explanation

The Action Manager was unable to determine the list of running AssemblyLines for this Solution view. For this reason, it ignored any health AssemblyLine defined for this Solution view. This may happen if there is an error in the Config instance associated with this Solution view.

Action

Ensure the remote server API is on. Verify that the Config instance associated with this Solution view is running. Action Manager will ignore the Health AssemblyLine for this Solution view, until the next interval.

CTGDJB575W Unable to obtain Config Instance associated with the Solution View: *Solution View*. Ignoring Health AssemblyLine for this Solution view.

Explanation

The Action Manager was unable to obtain a handle to the Config instance associated with this Solution view. This may happen because the Config is not loaded on the server.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. Also, Verify that the Config instance associated with this Solution view is running. No action required, if the user does not expect the Config to be loaded currently. Action Manager will ignore the Health AssemblyLine for this Solution view, until the next interval.

CTGDJB576E Unable to obtain list of Health AssemblyLines for Solution Views.

Explanation

The Action Manager was unable to read the list of Health AssemblyLines from the CONFIG_VIEW_HEALTH_AL_DETAILS table in database. Some internal database error may have occurred.

Action

Ensure that the database is running in network mode, and the CONFIG_VIEW_HEALTH_AL_DETAILS table is not corrupted. Try again.

CTGDJB577I Updating Health AssemblyLine status in database for Solution view *Solution View ID*. [HealthAL Result]: *result*. [HealthAL Status]: *status_description*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB578E Error updating Health AssemblyLine status in database for Solution view *Solution View ID*. [HealthAL Result]: *result*. [HealthAL Status]: *status_description*.

Explanation

The Action Manager was unable to update the Health AssemblyLine status in CONFIG_VIEW_HEALTH_STATUS table in database. Some internal database error may have occurred.

Action

Ensure that the database is running in network mode, and the CONFIG_VIEW_HEALTH_STATUS table is not corrupted / locked. See accompanying exception trace.

CTGDJB579I Creating Health AssemblyLine Listener thread for [Solution View]: *Solution View ID*. [Config]: *Config instance*. [AssemblyLine]: *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB580W Unable to obtain session with remote Security Directory Integrator server for Health AssemblyLine: *AssemblyLine name*.

Explanation

The Action Manager was unable to obtain a session with the remote Security Directory Integrator server for the Solution view associated with this Health AssemblyLine. The remote Security Directory Integrator server may have shut down.

Action

Ensure that the remote Security Directory Integrator server is running, and the remote server API is on. Action Manager will ignore the Health AssemblyLine for this Solution view, until the next interval.

CTGDJB581E Unable to create base listener for Health AssemblyLine: *AssemblyLine name*.

Explanation

The Action Manager was unable to create a Health AssemblyLine terminate listener thread because it could not create a DIEventListener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB582E Unable to register stop AssemblyLine listener for Health AssemblyLine: *AssemblyLine name*.

Explanation

The Action Manager was unable to create a Health AssemblyLine terminate listener thread because it could not register an Health AssemblyLine stop listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB583E Unable to start Health AssemblyLine:*AssemblyLine name*

Explanation

The Action Manager was unable to run the Health AssemblyLine because of some internal error. See exception trace.

Action

See the accompanying exception trace.

CTGDJB584E Result work entry is null in Health AssemblyLine: *AssemblyLine name*. No Health status update will be done in database.

Explanation

The Health AssemblyLine returned a null work entry object.

Action

Check the Health AssemblyLine.

CTGDJB585I In Health AssemblyLine *AssemblyLine name* healthAL.result attribute value is: *attribute_value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB586I In Health AssemblyLine *AssemblyLine name* healthAL.status attribute value is: *attribute_value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB587I Terminating Health AssemblyLine thread for [Solution View]: *Solution View ID* [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB588W Unable to remove event listener registered for AssemblyLine terminate events for [Solution View]: *Solution View ID* [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name*

Explanation

Due to an internal error, Action Manager was unable to remove event listener configured for listening to Health AssemblyLine termination events.

Action

Ensure that the remote Security Directory Integrator server is of the version 6.1.1 or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB588E Unable to obtain handle to AssemblyLine object for Health AssemblyLine: *AssemblyLine name*

Explanation

The Action Manager was unable to obtain a handle to Health AssemblyLine. This may have occurred because the Health AssemblyLine terminated before the Stop Event listener was registered, or the AssemblyLine does not exist.

Action

Put a sleep() of about 5 to 10 seconds to slow down the execution of the Health AssemblyLine and try again. Ensure the health AssemblyLine exists in the specified Config.

CTGDJB589I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB590E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for Property Value listener type of trigger).

Action

Check the exception trace following this message in the logs. Ensure that the time units were correctly specified.

CTGDJB591E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB592E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to obtain Config Instance: *Config Instance*.

Explanation

The Action Manager was unable to create a thread because it could not obtain a handle to the Config instance on the remote server.

Action

Verify that the Config Instance associated with this Solution View is loaded.

CTGDJB593E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. [Config Instance]: *Config Instance*. Unable to obtain handle to Security Directory Integrator Properties object.

Explanation

The Action Manager was unable to create a thread because it could not obtain a handle to the Security Directory Integrator Properties object.

Action

Verify that the remote Security Directory Integrator Server is of version 6.1.1 or higher. Try reloading the Config and try again.

CTGDJB594I Created Action Manager thread for [Config]: *Config instance*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB595I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB596E Error in [Rule]: *rule name* [Solution View]: *Solution View name* The property values cannot be compared since one of the property is not a valid integer. [Key]: *property name* [Current Value]: *property value* [Compared to value]: *value*

Explanation

The Action Manager was unable to check triggering condition because the property value or the value to be compared to are not integers.

Action

Ensure that the specified property has an integer value, and that the value to be compared to is also a valid integer.

CTGDJB597E Error in [Rule]: *rule name* [Solution View]: *Solution View name* Unable to determine triggering condition.

Explanation

The Action Manager was unable to determine triggering condition because an error occurred. Check the exception trace for more details.

Action

See the accompanying exception for more details.

CTGDJB598I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB599I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB600E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for Query AssemblyLine result type of trigger).

Action

Check the exception trace following this message in the logs. Ensure that the time units were correctly specified.

CTGDJB601E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB602I The Config instance *Config instance* is not running. Will obtain handle to AssemblyLine later.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB603E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB604E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and the remote server API is on. See the accompanying exception trace.

CTGDJB605I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB606I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB607I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB608W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name*

Explanation

This may have happened because the AssemblyLine does not exist, or some internal error occurred.

Action

Check the AssemblyLine and the accompanying exception trace.

CTGDJB609E Result work entry is null in AssemblyLine: *AssemblyLine name*. Rule will not be triggered.

Explanation

The AssemblyLine returned a null work entry object.

Action

Check the AssemblyLine.

CTGDJB610E No value found for attribute *attribute name*. in result work entry. Rule will not be triggered.

Explanation

The AssemblyLine work entry does not contain a value for the specified attribute.

Action

Check the AssemblyLine.

CTGDJB611I Attribute *attribute name* value is *attribute value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB612E Error in [Rule]: *rule name* [Solution View]: *Solution View name* The attribute values cannot be compared since one of the values is not a valid integer. [Attribute]: *Attribute name* [Current Value]: *Attribute value* [Compared to value]: *value*

Explanation

The Action Manager was unable to check triggering condition because the attribute value or the value to be compared to are not integers.

Action

Ensure that the specified attribute has an integer value, and that the value to be compared to is also a valid integer. Check the AssemblyLine and the Action Manager rule definition.

CTGDJB613W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name* Cannot obtain result work entry.

Explanation

This may have happened because the AssemblyLine does not exist, or some internal error occurred.

Action

Check the AssemblyLine and the accompanying exception trace.

CTGDJB614E An error occurred while executing an action. [Solution View]: *Solution View name* [Rule]: *Rule name* [Action Order]: *sequence order* [Action Type]: *action type*

Explanation

Action Manager encountered an error when executing actions. See the accompanying messages or exception trace to get more details.

Action

See the error messages or exception trace.

CTGDJB615I Action successfully executed. [Solution View]: *Solution View name* [Rule]: *Rule Name* [Action Order]: *sequence_order* [Action Type]: *action_type*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB616E An error occurred while executing an action. [Solution View]: *Solution View name* [Rule]: *Rule Name*

Explanation

Action Manager encountered an error when executing actions. See the accompanying messages or exception trace to get more details.

Action

See the error messages or exception trace.

CTGDJB617E Unable to insert/commit into AM_RUN_HISTORY table.

Explanation

Action Manager encountered an error when storing the action execution details into AM_RUN_HISTORY table.

Action

See the error messages or exception trace.

CTGDJB618E Unable to obtain rule information from AM_ACTION_DETAILS_RULE table.

Explanation

Action Manager encountered an error when reading the action details from AM_ACTION_DETAILS_RULE table in database.

Action

See the error messages or exception trace.

CTGDJB619E Unable to obtain rule information from AM_RULES_MASTER table.

Explanation

Action Manager encountered an error when reading the action details from AM_RULES_MASTER table in database.

Action

See the error messages or exception trace.

CTGDJB620I Triggering rule *rule name* of Solution view *Solution View*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB621E Unable to obtain log information from AM_ACTION_DETAILS_WRITE_LOG table.

Explanation

Action Manager encountered an error when reading the log action details from AM_ACTION_DETAILS_WRITE_LOG table in database.

Action

See the error messages or exception trace.

CTGDJB622I [Message]: *log message* [Description]: *log description*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB623E Unable to write log information to AM_LOGS table.

Explanation

Action Manager encountered an error when writing the log action to AM_LOGS table in database.

Action

See the error messages or exception trace.

CTGDJB624E Unable to read action information from AM_ACTION_DETAILS_COPY_PROPERTY table.

Explanation

Action Manager encountered an error when reading action information from AM_ACTION_DETAILS_COPY_PROPERTY table in database.

Action

See the error messages or exception trace.

CTGDJB625E Unable to obtain Config instance for Config: *Config instance*.

Explanation

Action Manager could not obtain Config instance for Copy Property Action. Check if the specified Config instance is loaded on the Security Directory Integrator Server.

Action

See the error messages or exception trace.

CTGDJB626E Unable to copy properties.

Explanation

Action Manager could not execute the copy property action. See accompanying exception.

Action

See the error messages or exception trace. Verify that the destination property store is not read-only.

CTGDJB627E Unable to obtain property information.

Explanation

Action Manager encountered an error when reading action information from AM_ACTION_DETAILS_PROPERTY_MODIFY table in database.

Action

See the error messages or exception trace.

CTGDJB628E Unable to obtain Config instance for Config: *Config instance*.

Explanation

Action Manager could not obtain Config instance for Modify Property Action. Check if the specified Config instance is loaded on the Security Directory Integrator Server.

Action

See the error messages or exception trace.

CTGDJB629E Unable to modify property to new value: *value*.

Explanation

Action Manager could not execute the modify property action. See accompanying exception.

Action

See the error messages or exception trace. Verify that the destination property store is not read-only.

CTGDJB630E Unable to obtain Event information.

Explanation

Action Manager encountered an error when reading action information from AM_ACTION_DETAILS_NOTIFY_EVENT table in database.

Action

See the error messages or exception trace.

CTGDJB631E Unable to send Event notification.

Explanation

Action Manager encountered an error when trying to send an Event notification.

Action

See the error messages or exception trace.

CTGDJB632E Unable to enable rule.

Explanation

Action Manager encountered an error when trying to read rule information from database.

Action

See the error messages or exception trace.

CTGDJB633E Unable to disable rule.

Explanation

Action Manager encountered an error when trying to read rule information from database.

Action

See the error messages or exception trace.

CTGDJB634E Unable to enable rule *rule name*

Explanation

Action Manager encountered an error when trying to update rule information in AM_RULES_MASTER table in database.

Action

See the error messages or exception trace.

CTGDJB635E Unable to disable rule *rule name*

Explanation

Action Manager encountered an error when trying to update rule information in AM_RULES_MASTER table in database.

Action

See the error messages or exception trace.

CTGDJB636E Unable to enable rule.

Explanation

Action Manager encountered an error when trying to update rule information in database.

Action

See the error messages or exception trace.

CTGDJB637E Unable to disable rule.

Explanation

Action Manager encountered an error when trying to update rule information in database.

Action

See the error messages or exception trace.

CTGDJB638E Unable to obtain AssemblyLine information.

Explanation

Action Manager encountered an error when trying to read AssemblyLine information from AM_ACTION_DETAILS_AL table in database.

Action

See the error messages or exception trace.

CTGDJB639E Unable to obtain session for stopping AssemblyLine *AssemblyLine name* with remote Security Directory Integrator server.

Explanation

Action Manager encountered an error when trying to obtain session for remote Security Directory Integrator server associated with this AssemblyLine.

Action

The remote Security Directory Integrator server may be down, or remote server API engine may not be running.

CTGDJB640E Config *Config instance* is not loaded on the remote server.

Explanation

Action Manager could not obtain Config instance while attempting to stop the specified AssemblyLine (Stop AssemblyLine Action). Since, Config is not loaded, the AssemblyLine cannot be running. Action Manager has ignored this action.

Action

See explanation. Check the action information.

CTGDJB641E Unable to stop AssemblyLine: *AssemblyLine name*.

Explanation

Action Manager could not stop the specified AssemblyLine. See the associated exception for details.

Action

See associated exception trace.

CTGDJB642E AssemblyLine: *AssemblyLine name* is not running on the Config instance: *Config instance*

Explanation

Action Manager could not stop the specified AssemblyLine since it was already not running on the specified Config instance.

Action

See explanation.

CTGDJB643E Unable to obtain AssemblyLine information.

Explanation

Action Manager encountered an error when trying to read AssemblyLine information from AM_ACTION_DETAILS_AL table in database.

Action

See the error messages or exception trace.

CTGDJB644E Unable to obtain session for starting AssemblyLine *AssemblyLine name* with remote Security Directory Integrator server.

Explanation

Action Manager encountered an error when trying to obtain session for remote Security Directory Integrator server associated with this AssemblyLine.

Action

The remote Security Directory Integrator server may be down, or remote server API engine may not be running.

CTGDJB645I Config *Config instance* is not loaded on the remote server. Attempting to load it now.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB646E Unable to start Config instance *Config instance*

Explanation

Action Manager encountered an error when trying to load Config on the remote machine.

Action

Ensure that the complete path of the Config was specified (forward slashes), and it exists on the remote machine.

CTGDJB647E Unable to start AssemblyLine *AssemblyLine name*

Explanation

Action Manager encountered an error when trying to start AssemblyLine on the remote machine.

Action

Ensure that the AssemblyLine exists in the specified Config.

CTGDJB648I Security Directory Integrator Session Generator Created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB649I Trying to establish connection to: *server* : *port*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB650I Custom Authentication with username: *username*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB651E Unable to obtain session with remote Security Directory Integrator Server: *server* : *port*.

Explanation

Action Manager was unable to obtain session with remote Security Directory Integrator server. The server may be down, or the remote server API engine may be OFF. Also, possible that Custom Authentication is on, or SSL is on, and the configuration is incorrect.

Action

Ensure the remote Security Directory Integrator server can be contacted via remote server API. Users can check connection details with tdisrvctl utility.

CTGDJB652I Started Action Manager Status Update thread.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB653E Unable to update status of Action Manager.

Explanation

The Action Manager was not able to update the status of Action Manager in the FLAG_HOLDER table in database. Some internal database error may have occurred.

Action

Ensure that the database is running in network mode, and the FLAG_HOLDER table is not corrupted. Try again.

CTGDJB654I ServerConfigHandler created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB655E ServerStatusListener thread unable to update server status.

Explanation

The ServerStatusListener thread was unable to update current status of remote server.

Action

Ensure that the database is running in network mode. See accompanying exception trace.

CTGDJB656E Unable to create ConfigLoadReloadListener thread for [SERVER_ID]: *Server ID*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering a config load reload event.

Action

Ensure the remote server API is on. See the accompanying exception trace.

CTGDJB657E Unable to create ConfigLoadReload Thread for [SERVER_ID]: *Server ID*. Unable to register ConfigLoadReloadListener.

Explanation

The Action Manager was unable to create a thread because it was unable to register a DIEventListener with remote server.

Action

Ensure the remote server API is on. See the accompanying exception trace.

CTGDJB658E Unable to remove EventListener for [SERVER_ID]: *Server ID*. Unable to remove event listener.

Explanation

The Action Manager was unable to remove event listener registered with remote server.

Action

Verify that remote server associated with the Solution view is running. See accompanying exception trace.

CTGDJB659I Started AMCServerModificationListener thread.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB660E Unable to create ServerStatusListener threads.

Explanation

The Action Manager was unable to create ServerStatusListener threads.

Action

See the accompanying exception trace. Try running Action Manager again.

CTGDJB661I Checking for any Administration and Monitoring Console Server updates.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB662E Unable to obtain connection to the Administration and Monitoring Console database.

Explanation

The Action Manager was unable to obtain a connection to the Administration and Monitoring Console database. This may occur if there is an error in the JDBC URLs specified in the am_config.properties. The Action Manager connects to the Administration and Monitoring Console's database using Derby in network mode. If the specified Derby database does not exist, or is booted in embedded mode, then Action Manager cannot connect to the database. To create the database, the Administration and Monitoring Console must have been started at least once. Action Manager will start the database in network mode, in case its not running in network mode already. This could also happen, if the database shutdown (maybe because the Administration and Monitoring Console was shutdown). This will happen, only if the Administration and Monitoring Console had booted the database, and now the Administration and Monitoring Console has been shutdown. It is recommended that to avoid this situation, start Action Manager first, and then start the Administration and Monitoring Console.

Action

Ensure that the JDBC settings in the am_config.properties file are correct, and pointing to the Administration and Monitoring Console's Derby database. Ensure that the Administration and Monitoring Console is not already connected to the database in Embedded mode. The recommended procedure is as follows: 1) Ensure that the Administration and Monitoring Console's database exists. If not, start the Administration and Monitoring Console. On starting the Administration and Monitoring Console for the first time, the Derby database is automatically created. 2) Shutdown the Administration and Monitoring Console and reconfigure it to connect to the database in network mode (if not already configured for network mode). 3) Start Action Manager. Action Manager will start the database in network mode. 4) Start the Administration and Monitoring Console, which will also connect to the same database over network mode.

CTGDJB663E Unable to obtain connection to the Administration and Monitoring Console database.

Explanation

The Action Manager was unable to obtain a connection to database. This may occur if there is an error in the JDBC URLs specified in the am_config.properties. The Action Manager connects to the Administration and Monitoring Console's database using Derby in network mode. If the specified Derby database does not exist, or is booted in embedded mode, then Action Manager cannot connect to the database. To create the database, the Administration and Monitoring Console must have been started at least once. Action Manager will start the database in network mode, in case its not running in network mode already. This could also happen, if the database shutdown (maybe because the Administration and Monitoring Console was shutdown). This will happen, only if the Administration and Monitoring Console had booted the database, and now the Administration and

Monitoring Console has been shutdown. It is recommended that to avoid this situation, start Action Manager first, and then start the Administration and Monitoring Console.

Action

Ensure that the JDBC settings in the am_config.properties file are correct, and pointing to the Administration and Monitoring Console's Derby database. Ensure that the Administration and Monitoring Console is not already connected to the database in Embedded mode. The recommended procedure is as follows: 1) Ensure that the Administration and Monitoring Console's database exists. If not, start the Administration and Monitoring Console. On starting the Administration and Monitoring Console for the first time, the Derby database is automatically created. 2) Shutdown the Administration and Monitoring Console and reconfigure it to connect to the database in network mode (if not already configured for network mode). 3) Start Action Manager. Action Manager will start the database in network mode. 4) Start the Administration and Monitoring Console, which will also connect to the same database over network mode.

CTGDJB664E Exception while constructing Action Manager threads.

Explanation

The Action Manager was unable to create listener threads because some internal error occurred. See the logs, or accompanying exception trace for more information.

Action

See the associated exception trace for reasons of error. Try running Action Manager again.

CTGDJB665I ServerStatusListener thread started for server [SERVER_NAME]: *Server Name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB666I ConfigLoadReloadListener thread started for server [SERVER_NAME]: *Server Name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB667E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB668E ServerStatusListener unable to check server restart status.

Explanation

The Action Manager was unable to check whether server has been restarted.

Action

Verify that the remote Security Directory Integrator server is running and remote Server API engine is enabled on that server.

CTGDJB669I [SERVER_NAME]: *Server Name* has been restarted in polling interval. Rule threads will be terminated and re-created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB670E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB671E Action Manager was unable to create Action Manager Thread for the following rule: [Rule]: *rule name* [Reason]: Unable to connect to server *Server Name*.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and remote Server API engine is enabled on that server.

CTGDJB672E Error occurred while trying to delete data from the AM_SERVER_UPDATE_DETAILS table.

Explanation

The ServerModificationListener thread, checks if any servers registered with the Administration and Monitoring Console has been modified. This thread has encountered a database exception while trying to delete data from the AM_SERVER_UPDATE_DETAILS table. This could have happened if the Administration and Monitoring Console database has been shutdown, or some other internal error occurred.

Action

Verify that the database is running. Look at the exception trace in the log.

CTGDJB673E Config *Config instance* is not loaded on the remote server so ActionManager cannot query the AssemblyLine result.

Explanation

The Query AssemblyLine trigger starts the AssemblyLine in the user specified time interval and on AssemblyLine termination inspects the result. Here the config associated with the AssemblyLine is not loaded on server and so ActionManager cannot start the AL.

Action

Load the config on the remote server.

CTGDJB674E Unable to start AssemblyLine *AssemblyLine name*

Explanation

Action Manager encountered an error when trying to start AssemblyLine on the remote machine.

Action

Ensure that the AssemblyLine exists in the specified config.

CTGDJB675I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB676E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for Query AssemblyLine result type of trigger).

Action

Check the exception trace following this message in the logs. Ensure that the time units were correctly specified.

CTGDJB677E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and that the remote Server API engine is enabled on that server.

CTGDJB678I The Config instance *Config instance* is not running. Will obtain handle to AssemblyLine later.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB679E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine listener.

Action

Ensure that the remote Security Directory Integrator server is a 6.1.1 server, and that the remote server API is on. See the accompanying exception trace.

CTGDJB680E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 or higher server, and the remote server API is on. See the accompanying exception trace.

CTGDJB681I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB682I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB683I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB684W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name*

Explanation

Failure to obtain a handle for this AssemblyLine may indicate that the AssemblyLine does not exist or some internal error occurred.

Action

Check the AssemblyLine and the accompanying exception trace.

CTGDJB685E Result work entry is null in AssemblyLine: *AssemblyLine name*. Rule will not be triggered.

Explanation

The AssemblyLine returned a null work entry object.

Action

Check the AssemblyLine.

CTGDJB686E No value found for attribute *attribute name*. in result work entry. Rule will not be triggered.

Explanation

The AssemblyLine work entry does not contain a value for the specified attribute.

Action

Check the AssemblyLine.

CTGDJB687I Attribute *attribute name* value is *attribute value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB688E Error in [Rule]: *rule name* [Solution View]: *Solution View name* The attribute values cannot be compared since one of the values is not a valid integer. [Attribute]: *Attribute name* [Current Value]: *Attribute value* [Compared to value]: *value*

Explanation

The Action Manager was unable to check the triggering condition because the attribute value or the value to be compared to are not integers.

Action

Ensure that the specified attribute has an integer value, and that the value to be compared to is also a valid integer. Check the AssemblyLine and the Action Manager rule definition.

CTGDJB689W Unable to obtain handle to AssemblyLine object for AssemblyLine: *AssemblyLine name* Cannot obtain result work entry.

Explanation

This may have happened because the AssemblyLine does not exist, or some internal error occurred.

Action

Check the AssemblyLine and the accompanying exception trace.

CTGDJB690I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: Inspect AssemblyLine Exit code.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB691I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On AssemblyLine start

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB692I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On config load

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB693I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On config unload

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB694I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: Timer

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB695E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (AssemblyLine start type trigger). This may occur because the database is down, or because some internal database related error occurred.

Action

Check the exception trace following this message in the logs. Ensure that the database is running in network mode.

CTGDJB696E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and that the remote Server API engine is enabled on that server.

CTGDJB697E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering an AssemblyLine start listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and that the remote server API is on. See the accompanying exception trace.

CTGDJB698E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register AssemblyLine start listener.

Explanation

The Action Manager was unable to create a thread because it could not register an AssemblyLine start listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and that the remote server API is on. See the accompanying exception trace.

CTGDJB699I Rule *rule name* terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB700I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB701E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for a config load type of trigger). This may occur, because the database is down, or because some internal database related error occurred.

Action

Check the exception trace following this message in the logs. Ensure that the database is running in network mode.

CTGDJB702E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and that the remote Server API engine is enabled on that server.

CTGDJB703E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering a config load listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and that the remote server API is on. See the accompanying exception trace.

CTGDJB704E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register config load listener.

Explanation

The Action Manager was unable to create a thread because it could not register a config load listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and that the remote server API is on. See the accompanying exception trace.

CTGDJB705I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB706I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB707I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB708E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (config unload type of trigger). This may occur because the database is down, or because some internal database related error occurred.

Action

Check the exception trace following this message in the logs. Ensure that the database is running in network mode.

CTGDJB709E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to connect to remote Security Directory Integrator server.

Explanation

The Action Manager was unable to create a thread because it could not connect to the remote Security Directory Integrator server associated with this Solution View.

Action

Verify that the remote Security Directory Integrator server associated with this Solution View is running, and that the remote Server API engine is enabled on that server.

CTGDJB710E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to create base listener.

Explanation

The Action Manager was unable to create a thread because it could not create a DIEventListener for registering a config unload listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and that the remote server API is on. See the accompanying exception trace.

CTGDJB711E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*. Unable to register config unload listener.

Explanation

The Action Manager was unable to create a thread because it could not register a config load listener.

Action

Ensure the remote Security Directory Integrator server is a 6.1.1 server or higher, and that the remote server API is on. See the accompanying exception trace.

CTGDJB712I Created Action Manager thread for [Config]: *Config instance* [AssemblyLine]: *AssemblyLine name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB713I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB714E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (timer type of trigger). This may occur because the database is down, or because some internal database related error occurred.

Action

Check the exception trace following this message in the logs. Ensure that the database is running in network mode.

CTGDJB715I Killing Action Manager thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB716I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB717I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB718I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB719W The Action manager RMI Registry is starting on default port *port*

Explanation

The Action Manager registry is starting on the default port because is either not specified in the am.properties file OR the port specified is zero.

Action

Check the am_config.properties file whether a valid port is provided for Action Manager registry.

CTGDJB720I The Action Manager RMI registry is started on port *port*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB721E An exception occured while starting the Action Manager RMI Registry: *exception*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB722W The client information provided *data value* is not sufficient for extracting the client name and client version.

Explanation

The client information should be provided as 'clientName_clientVersion'

Action

The client information is not in the expected format; therefore the client name and client version cannot be retrieved.

CTGDJB723I The System Security Manager is null. Using the Action Manager custom security manager instead.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB724I The Action manager is resetting the System Security Manager to null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB725I Creating Action Manager thread for [Solution View]: *Solution View name* [Rule]: *rule name* [Trigger Type]: On local variable.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB726E Unable to create Action Manager Thread for [Action Manager Rule Id]: *Action Manager Rule ID* [Rule]: *rule name* [Solution View]: *Solution View name*.

Explanation

One or more errors occurred while trying to read the database for creating the Action Manager listener thread (for Action Manager local variable type of trigger). This may occur, because the database is down, or some internal database related error occurred.

Action

Check the exception trace following this message in the logs.

CTGDJB727I Rule *rule name* triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB728E Unable to modify local variable to new value: *value*

Explanation

Action Manager could not execute the modify local action. See accompanying exception.

Action

See the error messages or exception trace.

CTGDJB729E An exception occurred while getting *rule name* details: *exception*

Explanation

Refer to logs for additional details.

Action

Refer to logs for additional details.

CTGDJB730E An exception occurred while executing rule *rule name*: *exception*

Explanation

Refer to logs for additional details.

Action

Refer to logs for additional details.

CTGDJB731I The rule *rule name* has no actions to be backed up.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB732E An exception occurred while backing up the original values for rule *rule name*: *exception*

Explanation

Refer to logs for additional details.

Action

Refer to logs for additional details.

CTGDJB733I The client info *client info* used for connecting with Action Manager is invalid.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB734I The table AM_ACTION_DETAILS_WRITE_LOG is empty.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB735E The API Listener is not able to create the Action Manager thread because of the exception: *exception*.

Explanation

See message.

Action

Refer to logs for additional details. Try again to create the API Failure Trigger.

CTGDJB736E Action Manager was unable to obtain the Action Manager logs to be attached with the email.

Explanation

Action Manager was unable to obtain the Action Manager logs to be attached with the email. The email will be sent without the logs.

Action

Examine the am_logging.properties for the location of the Action Manager log file. Refer to logs for additional details.

CTGDJB737E Action Manager was unable to obtain the host and port information of the SMTP server.

Explanation

Action Manager was unable to obtain the host and port information of the SMTP server. As a result, the Send email action cannot be executed.

Action

Specify the SMTP host and port information in the am_config.properties file. If authentication is required for the SMTP server, specify user and password properties.

CTGDJB738E Action Manager was unable to create and send an email message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB739E Action Manager was unable to obtain the host and port information of the SMTP server from the Action Manager config file.

Explanation

Action Manager was unable to obtain the host and port information of the SMTP server. As a result, the Send email action cannot be executed.

Action

Specify the SMTP host and port information in the am_config.properties file. If authentication is required for the SMTP server, specify user and password properties. Refer to logs for additional information.

CTGDJB740E Property java.util.logging.config.file is not set in startAM.bat(sh).

Explanation

Action Manager was unable to initialize because the required property java.util.logging.config.file was not set. This property is required for finding the location of the Action Manager logging file am_logging.properties.

Action

Ensure that in the startAM.bat(sh) file the java.util.logging.config.file property is being set to point to the location of the am_logging.properties file.

CTGDJB741E Unable to load the am_logging.properties file. Check the value of java.util.logging.config.file property in the startAM.bat(sh). The current value is set to *file path*.

Explanation

Action Manager was unable to initialize because the property java.util.logging.config.file in the startAM.bat(sh) file is pointing to an invalid location.

Action

Ensure that in the startAM.bat(sh) file the java.util.logging.config.file property is being set to point to the location of the am_logging.properties file. See the associated exception trace.

CTGDJB742I The target computer is the same as the Action Manager host.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB743W The user name or keystore is set to *property value* and the password or keystore password is set to *property value*.

Explanation

The target computer login details are not provided.

Action

The user name and password of the target computer or the keystore and keystore password used for authenticating a user with the target computer should be provided.

CTGDJB744E Failed to connect to the target computer using protocol *protocol*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB745I Failed to connect to the target computer using any of the supported protocols. Action Manager is assuming that command *command* is to be executed on localhost.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB746E An error *error* occurred while executing the command *command* on action manager host *hostname*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB747I The command *command* is executed successfully on host *hostname*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB748E The command *command* execution failed on host *hostname* with exit code *Integer*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB749E An error occurred while executing the command *command* on host *hostname*: *error*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB750E The command *command* is not executed.

Explanation

Verify the correctness of the command and the computer details.

Action

Verify the correctness of the command and the computer details.

CTGDJB751E An error was encountered while retrieving data from the database: *error*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB752E Failed to establish a connection with the target computer.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB753E An error occurred while executing the command *command*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB754W Cannot rollback the properties changes because the config instance id is null.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB755E An error occurred while rolling back the properties: *error message*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB756E An error occurred while rolling back the database changes: *error message*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB757E An error occurred while backing up the property: *error message*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB758E No command specified in the execute command action.

Explanation

The execute command action is supposed to execute a command on the target computer. There is no command specified by the user.

Action

Specify a valid command which needs to be executed on the target computer.

CTGDJB759E Action Manager was unable to obtain local variable *variable name*.

Explanation

The Action Manager was unable to obtain the specified local variable.

Action

Restart Action Manager and verify that the database is running.

CTGDJB760E Unable to obtain local variable information.

Explanation

Action Manager encountered an error when reading action information from database.

Action

See the error messages or exception trace.

CTGDJB761E An error occurred while terminating thread for rule *rule name*: *error*.

Explanation

Action Manager encountered an error when terminating a rule thread. from database.

Action

See the error messages or exception trace.

CTGDJB762E An error occurred while starting thread for rule *rule name*: *error*.

Explanation

Action Manager encountered an error when starting a rule thread. from database.

Action

See the error messages or exception trace.

CTGDJB763W An error occurred while closing the database connection: *error*.

Explanation

Action Manager encountered an error when closing a database connection. from database.

Action

See the error messages or exception trace.

CTGDJB764W An error occurred while checking for server updates: *error*

Explanation

Action Manager encountered an error while checking for server updates. from database.

Action

See the error messages or exception trace.

CTGDJB765I An error occurred while closing the input stream of file *file name*: *error*.

Explanation

Action Manager encountered an error while closing the input stream of a file. from database.

Action

See the error messages or exception trace.

CTGDJB766E An error occurred while starting thread: *error*

Explanation

Action Manager encountered an error when starting a thread. from database.

Action

See the error messages or exception trace.

CTGDJB767W An error occurred while rolling back the database changes: *error*.

Explanation

Action Manager encountered an error when rolling back the database changes.. from database.

Action

See the error messages or exception trace.

CTGDJB768I Action Manager trying to connect to *hostname* host using protocol *protocol*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB769I Action Manager failed to connect to *hostname* host using protocol *protocol*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB770I Password is null, hence failed to connect to *hostname* host using protocol *protocol*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB771I Failed to connect to *hostname* host using protocol *protocol* because either password or keystore or keystore password is not provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB772E Failed to start Action Manager because an exception occurred: *exception*

Explanation

An exception occurred while starting Action Manager. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB772I Exiting Action Manager with error code *error code*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB774E An error occurred while initializing truststores: *exception*

Explanation

An exception occurred while initializing truststores. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB775E An error occurred while initializing keystores: *exception*

Explanation

An exception occurred while initializing keystores. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB776E An error occurred while initializing Action Manage RMI: *exception*

Explanation

An exception occurred while initializing RMI. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB777E Unable to establishing a connection to the database. An exception occurred: *exception*

Explanation

An exception occurred while initializing DB Connection. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB778E Unable to execute the rule *rule name*. An exception occurred: *exception*

Explanation

An exception occurred while executing the rule. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB779E An error occurred while rolling back the database changes for rule *rule name*: *exception*

Explanation

An exception occurred while rolling back db changes. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB780E An error occurred while rolling back the actions for rule *rule name*: *exception*

Explanation

An exception occurred while rolling back actions. Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB781E An error occurred while retrieving actions: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB782E An error occurred while retrieving trigger types for Rule Id *rule id*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB783E An error occurred *error message* while retrieving rules for Server Id *server id*.

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB784E An error occurred while retrieving rules for Config URL *URL*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB785E An error occurred while retrieving the Server version: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB786E An error occurred while checking the Server version: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB787E An error occurred while getting the Server name for Server Id*server id*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB788E An error occurred while getting the triggered triggers: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB789E An error occurred while getting the Rule Id for rule *rule name*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB790E An error occurred while getting the Config Instance for Solution View *solution view name*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB791E An error occurred while getting the Solution Id for Solution View *solution view name*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB792E An error occurred while getting the Solution View name for Solution Id *solution id*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB793E An error occurred while getting the action details for Rule Id *rule id*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB794E An error occurred while enabling/disabling a rule with Rule id *rule id*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB795E An error occurred while retrieving actions for rule with Rule ID *rule id*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB796E An error occurred while initializing of String encryption decryption utility: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB797I Encryption scheme *encryption scheme* is not supported.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB798I The string being encrypted is empty or null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB799E An error occurred while encrypting a string: *error*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB800I The string being decrypted is empty or null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB801E An error occurred while decrypting: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB802E An error occurred while decrypting property: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB803E An error occurred while encrypting property: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB804E An error occurred while killing Action Manager thread: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB805W An error occurred while executing command *command*: *error message*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB806E The hostname *hostname* is unknown. Exception occurred: *exception*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB807E An error occurred while unregistering the listener: *error*

Explanation

Refer logs for additional information.

Action

Refer logs for additional information.

CTGDJB808I Executing the SQL command for rolling back the action.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB809I Rolling back the properties changes made by force trigger.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB810E An error occurred while rolling back the database transaction: *error*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB811E A threading exception has occured.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB812E An error occurred while trying to kill the QueryAL listener thread.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB813E A threading exception has occured.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB814E A threading exception has occured.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB815W An exit code for the command execution cannot be displayed.

Explanation

The exit code for the command execution cannot be displayed since the command may have spawned a daemon process or there may have been an error during command execution.Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJB816E An error occurred while getting values for local Action Manager variable : *error message*

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDJF001E The 'iteratorStateKey' parameter must be set to use the Active Directory Change Detection Connector.

Explanation

The required parameter iteratorStateKey was not specified in the Active Directory Change Detection Connector.

Action

Specify the iteratorStateKey parameter in the Connector.

CTGDJF002W An old configuration parameter 'usnFileName' is used that stores the USN in a text file. This function is no longer supported.

Explanation

Specified the parameter usnFileName is no longer supported in the Active Directory Change Detection Connector. This indicates an old configuration file was used and needs to be migrated.

Action

Consult the Reference Guide for migration information.

CTGDJF003W The 'sleepInterval' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid sleepInterval parameter in the Connector if the default value is not wanted.

CTGDJF004W The 'timeout' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid timeout parameter in the Connector if the default value is not wanted.

CTGDJF005W The 'pageSize' parameter set to an invalid value ''*parameter value*''. Will not use paging.

Explanation

See message.

Action

Specify a valid pageSize parameter in the Connector if paging needs to be enabled.

CTGDJF006W The 'pageSize' parameter set to a negative value ''*parameter value*''. Will not use paging.

Explanation

See message.

Action

Specify a valid pageSize parameter in the Connector if paging needs to be enabled.

CTGDJF007I Synchronization from End Of Data will be performed: the Connector will only report changes that occur after it is started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF008E Unable to retrieve the USN value from the given object.

Explanation

USN value object is NULL. This is an internal error.

Action

Contact IBM support.

CTGDJF009E Synchronization from End Of Data requested, but can't retrieve the highest committed USN number. Exception occurred: *exception*

Explanation

See the next exception.

Action

No action is required.

CTGDJF010E Invalid numeric USN value: *USN value*.

Explanation

Unable to parse String USN value to Long. This is an internal error.

Action

Contact IBM support.

CTGDJF011E Invalid type for USN value object: *class name*.

Explanation

The type of the USN object must be Entry, String or Number. This is an internal error.

Action

Contact IBM support.

CTGDJF012I Connector is restarting. Will get start USN value from restart data.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF013E Could not retrieve USN value from restart data. Exception occurred: *exception*

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDJF014E Error on access to the System Store: *exception*

Explanation

Could not read the USN values from the System Store.

Action

Inspect the error message for more details on the error.

CTGDJF015I Will read start USN values from System Store. Parameter: *parameter name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF016I Parameter ''*parameter name*'' not found in the System Store. Will use the 'Start at' parameter value for start USN.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF017E The 'Start at' parameter was not specified.

Explanation

'Start at' parameter is null.

Action

Specify the startAt parameter in the Connector.

CTGDJF018I Start USN value: *USN value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF019E The method getHighestCommittedUsn could not retrieve the highest committed USN number from the Active Directory.

Explanation

The highest committed USN number is -1.

Action

No action is required.

CTGDJF020W The method getNextSearchResult encountered a PartialResultException which typically occurs when reaching the last element in the result set. No action is required. The exception is: *exception*

Explanation

See method hasMore() of NamingEnumeration class for more detailed description of this exception.

Action

No action is required.

CTGDJF021I Timeout waiting for the next changed entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF022I LDAP search query: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF023E The method storeUSNForNextSynch could not store the USN value in the System Store. Exception occurred: *exception*

Explanation

Error occurs when tying to store the USN values for the next synchronization.

Action

Check the database store.

CTGDJF024I Current USN value is *USN value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF025E The restart info is NULL. Cannot restart.

Explanation

There is no restart information in the entry.

Action

Check the checkpoint configuration.

CTGDJF026I Blocking for new changes...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF027W Invalid 'Sleep Interval' value specified: *parameter value*. Will use default value of *interval in seconds*.

Explanation

See message.

Action

No action is required.

CTGDJF028W Invalid 'Timeout' value specified: *parameter value*. Will use default value of *timeout value*.

Explanation

See message.

Action

No action is required.

CTGDJF029W Invalid 'Page Size' value specified: *parameter value*. Will not use paging.

Explanation

See message.

Action

No action is required.

CTGDJF030E Invalid 'START_USN' value: *USN value*. 'START_USN' value will be set to 0.

Explanation

See message.

Action

No action is required.

CTGDJF031I Get next page: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJF032E Could not store the USN value in System Store.

Explanation

See message.

Action

No action is required.

CTGDJF033W The 'iteratorStateKey' parameter is not specified in the Active Directory Change Detection Connector. The Connector will not persist state.

Explanation

The parameter iteratorStateKey is not specified in the Active Directory Change Detection Connector.

Action

Specify the iteratorStateKey parameter in the Connector configuration to enable state persistence.

CTGDKF001W Invalid 'Sleep Interval' value specified: *interval in seconds*. Will use default value of *interval in seconds*.

Explanation

See message.

Action

No action is required.

CTGDKF002W Invalid 'Timeout' value specified: *parameter value*. Will use default value of *integer*.

Explanation

See message.

Action

No action is required.

CTGDKF003E USN Entry does not contain ''*attribute name*'' attribute.

Explanation

See message.

Action

No action is required.

CTGDKF004I USN values set to zero. Full synchronization will be performed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF005I Connector is restarting. Will get start USN values from restart data.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF006E Could not retrieve USN values from restart data. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF007I Will read start USN values from file: *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF008E Could not close USN properties file ''*file name*''. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF009E Error: Could not read start USN values from file ''*file name*''. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF010E Error: 'Iterator State Store' parameter not specified.

Explanation

See message.

Action

No action is required.

CTGDKF011E At least one of the parameters 'Iterator State Store' or 'USN Filename' (backward compatibility mode) should be specified.

Explanation

See message.

Action

No action is required.

CTGDKF012E USN storage not specified.

Explanation

See message.

Action

No action is required.

CTGDKF013E Error on access to the Persistent Parameter Store. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF014I Will read start USN values from Persistent Parameter Store; parameter: *parameter name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF015E Could not retrieve start USN values from persistent parameter ''*parameter name*''. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF016W Parameter ''*parameter name*'' not found in Persistent Parameter Store. The startAt's value will be used.

Explanation

See message.

Action

No action is required.

CTGDKF017I Will use the 'Start at' parameter value for construction of the start USN values.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF018E The 'Start at' parameter not specified.

Explanation

See message.

Action

Specify the Start at parameter in the Connector.

CTGDKF019I Synchronization from End Of Data will be performed: the Connector will only report changes that occur after it is started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF020E Error: Synchronization from End Of Data requested, but can't find highest committed USN number: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF021E Invalid 'Start at' value specified: *mStartAt*.

Explanation

See message.

Action

No action is required.

CTGDKF022I Start USN values:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF023I Initial 'CURRENT_USN_CREATED' parameter is greater than the 'END_USN' parameter. Setting 'CURRENT_USN_CREATED' parameterto the value of the 'START_USN' parameter.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF024I Both the 'CURRENT_USN_CREATED' and 'CURRENT_USN_CHANGED' parameters are smaller than the 'START_USN' parameter. Setting the 'CURRENT_USN_CREATED' parameter to the value of 'START_USN' parameter.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF025I Start USN values internally adjusted to:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF026E Could not retrieve highest committed USN number.

Explanation

The highest committed USN number is an attribute specific to Active Directory.

Action

Make sure that the Connector is accessing Active Directory and not some other LDAP server.

CTGDKF027E Could not retrieve highest committed USN number.

Explanation

The highest committed USN number is an attribute specific to Active Directory.

Action

Make sure that the Connector is accessing Active Directory and not some other LDAP server.

CTGDKF028I LDAP search query: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF029E An PartialResultException caught when retrieving an Entry from the Active Directory Server based on the given filter: *exception*

Explanation

In some cases when there are no Exchange Directory Service objects that match, the filter PartialResultException is thrown.

Action

Check the filter.

CTGDKF030I Timeout waiting for next changed entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF031E Could not store USN values in file ''*file name*''. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKF032I Current USN values are:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF033E Could not store USN values in Persistent Parameter Store. Exception occurred: *exception*

Explanation

System Store might not be configured properly.

Action

Make sure that the System Store configuration settings are correct.

CTGDKF034I Current USN values are:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF035E Restart info is NULL. Cannot restart.

Explanation

An internal error occurred. The Checkpoint/Restart feature failed.

Action

Contact IBM support.

CTGDKF036I USN values needed for the next synchonization with Active Directory.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKF037I USN attribute *name*: *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY001E Unable to get next entry. No AssemblyLine to execute.

Explanation

The AssemblyLine Connector could not get the next entry because there were no AssemblyLines to execute/retrieve.

Action

The method initialize should be invoked first.

CTGDIY002E Expecting com.ibm.di.entry.Entry, object found *Java class name*.

Explanation

If the work Entry of the adapted Assembly Line has an attribute named conn, that attribute must contain values of type com.ibm.di.entry.Entry only.

Action

Verify the logic of the adapted Assembly Line.

CTGDIY003I Computed modes for *Connector name* :

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY004I Operations for *Assembly Line name* :

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY005I Standard modes recorded :

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY006E Unable to connect to server/config: *server host / Config instance id*.

Explanation

Cannot find the specified configuration instance on the specified Security Directory Integrator server.

Action

Verify that the specified server is running. Verify that the specified configuration is running on the specified server.

CTGDIY007I Performing operation: *operation name*, work Entry: *entry name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY008I Operation *operation name* returned *Java object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY101E Unable to select AssemblyLine operation. The remote Config ''*Config name*'' cannot be found on server ''*server name*''.

Explanation

The configuration instance specified in the AssemblyLine Function Component's Config parameter could not be found on the remote server.

Action

Verify the specified Config parameter exists on the remote server.

CTGDIY102E Unable to select AssemblyLine operation. Connection to server ''*server name*'' cannot be obtained.

Explanation

The remote server instance specified in the AssemblyLine Function component's server parameter may not be currently active.

Action

Verify the specified server instance [hostname:port] combination is active on the remote server and then try to establish a connection again.

CTGDIY103E No server configured.

Explanation

The Server configuration parameter is required for the query configuration operation to work.

Action

Enter a valid remote Security Directory Integrator server information [hostname:port] in the AssemblyLine Function Component server parameter fields and then perform the query configuration operation.

CTGDIY104E Unable to retrieve initialized schema. The remote Config ''*Config name*'' cannot be found on server ''*server name*''.

Explanation

The configuration instance specified in the AssemblyLine Function Component's Config parameter could not be found on the remote server.

Action

Verify the specified Config parameter exists on the remote server.

CTGDIY105E Unable to select AssemblyLine. The remote Config ''*Config name*'' cannot be found on server ''*server name*''.

Explanation

The configuration instance specified in the AssemblyLine Function Component's Config parameter could not be found on the remote server.

Action

Verfiy the specified Config parameter exists on the remote server.

CTGDIY106E Unable to retrieve initialized schema. Connection to server ''*server name*'' cannot be obtained.

Explanation

The remote server instance specified in the AssemblyLine Function component's server parameter may not be currently active.

Action

Verify the specified server instance [hostname:port] combination is active on the remote server and then try to establish a connection again.

CTGDIY107E Unable to select AssemblyLine. Connection to server ''*server name*'' cannot be obtained.

Explanation

The remote server instance specified in the AssemblyLine Function component's server parameter may not be currently active.

Action

Verify the specified server instance [hostname:port] combination is active on the remote server and then try to establish a connection again.

CTGDIY108I Waiting 2 seconds for remote AssemblyLine to complete: ''*AssemblyLine Name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIY109E The Config instance not specified for server ''*server name*''.

Explanation

See message.

Action

Verfiy the specified Config parameter exists on the remote server.

CTGDIY110E The 'assemblyLine' parameter must be set to use the AssemblyLine Function Component.

Explanation

The required parameter assemblyLine was not specified in the AssemblyLine Function Component.

Action

Specify the assemblyLine parameter in the Function Component.

CTGDIY111E Unable to parse attributes in the entry. Encountered an unknown TCB parameter ''*parameter name*''.

Explanation

There is no dot symbol in the attribute name.

Action

Check the attribute names prefix must be '$tcb.'.

CTGDIY112E Exception occurred while retrieving configuration: *exception*

Explanation

Cannot get the specified configuration.

Action

Contact IBM support.

CTGDIY113W Warning: Cannot run local AssemblyLines.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA201E The required WSDL file location was not provided.

Explanation

The Axis2 Web Service Client Function Component requires a WSDL file in order to generate all the required elements for the request message.

Action

Provide a valid path to the WSDL file. It can point to a local file or remote URL.

CTGDIA202E No service specified in the Function Component's configuration.

Explanation

The Axis2 Web Service Client Function Component requires a service name which corresponds to the service which will be invoked.

Action

Provide a valid service name. Use the button next to it to see all services in the WSDL file.

CTGDIA203E No endpoint specified in the Function Component's configuration.

Explanation

The Axis2 Web Service Client Function Component requires an endpoint name which corresponds to the Web Service's listening URL.

Action

Provide a valid endpoint name. Use the button next to it to see all endpoints in the WSDL file.

CTGDIA204E No operation specified in the Function Component's configuration.

Explanation

The Axis2 Web Service Client Function Component requires an operation name which corresponds to the operation which will be invoked.

Action

Provide a valid operation name. Use the button next to it to see all operations in the WSDL file.

CTGDIA205I Setting HTTP Basic Authentication headers. The username is: *username*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA206E The Axis2 Web Service Client Function Component accepts only a IBM Security Directory Integrator Entry for input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

The Axis2 Web Service Client Function Component expects only a IBM Security Directory Integrator Entry for input. Check the AL logic and try again.

CTGDIA207E An Exception occured while tring to invoke the Web Service. Exception message: *exception*

Explanation

Axis specific fault occured. Check the Exception message for more details.

Action

Axis specific fault occured. Check the Exception message for more details.

CTGDIA208E The input operation message parameter was not found in the provided input entry. The required input parameter is: *exception*

Explanation

The Axis2 Web Service Client Function Component requires the input operation message parameter to be provided in the input entry.

Action

Try mapping the required message parameter to the input entry.

CTGDIA101E There are multiple services described in the WSDL document at '*URL*'. Select one of them.

Explanation

When there are multiple services described in the WSDL document, you must specify a service name.

Action

Verify that a valid service name is provided in the Connector configuration.

CTGDIA102E The WSDL document at '*URL*' does not contain a description of service '*service name*'.

Explanation

The Connector could not find a service with the specified name in the WSDL document.

Action

Verify that the specified service name is correct.

CTGDIA103I An HTTP client connection failed with error: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA104E A problem was encountered while parsing the SOAP request '*SOAP request*'. The error is: *exception*

Explanation

The Connector could not process the specified SOAP request message.

Action

Verify that the SOAP message is correct.

CTGDIA105I The response payload is expected in an Attribute with name '*attribute name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA106E The Connector has been passed both a normal message and a fault message. Only one outgoing message is allowed.

Explanation

The web service cannot return both a normal SOAP message and a SOAP fault. Modify the AssemblyLine logic so that it constructs either a normal response or a fault response, but not both at the same time.

Action

Verify that the logic of the associated AssemblyLine is correct.

CTGDIA107E A problem was encountered while constructing the SOAP response message. The error is: *exception*

Explanation

See the exception message.

Action

Verify that the AssemblyLine logic is correct.

CTGDIA108I Neither a normal response payload, nor a fault has been passed to the Connector. Will not generate a SOAP response.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA109E Provide a $faultReason Attribute.

Explanation

The fault reason is a mandatory field of a SOAP fault. When you set the $faultCode Attribute at run-time, you must also set the $faultReason Attribute.

Action

Verify that the AssemblyLine logic is correct.

CTGDIA110E A problem was encountered while constructing the SOAP fault message. The error is: *exception*

Explanation

See the exception message.

Action

Verify that the AssemblyLine logic is correct.

CTGDIA111E A problem was encountered while configuring the underlying Axis2 library. The error is: *exception*

Explanation

See the exception message.

Action

Verify that the Security Directory Integrator installation is not corrupt.

CTGDIA112E A problem was encountered while reading the WSDL document at '*URL*'. The error is: *exception*

Explanation

See the exception message.

Action

Verify that the WSDL document exists and is valid.

CTGDIA113E Unknown SOAP version: '*SOAP namespace URI*'.

Explanation

The Connector could not determine the SOAP version based on the specified namespace URI.

Action

Verify that the SOAP namespace URI is valid.

CTGDIA114E Missing 'wsdlUrl' parameter.

Explanation

The WSDL URL is a mandatory parameter.

Action

Verify that the configuration is correct.

CTGDIA115E Could not obtain AssemblyLine configuration.

Explanation

The WSDL generation process uses the configuration of the AssemblyLine that contains the current Connector.

Action

Verify that the Connector is part of an AssemblyLine.

CTGDIA116E Cannot derive a web service description from the AssemblyLine configuration. The error is: *exception*

Explanation

See the exception message.

Action

Verify that the AssemblyLine configuration is correct.

CTGDIA117E A problem was encountered while writing the WSDL document to file '*file name*'. The error is: *exception*

Explanation

See the exception message.

Action

Verify that the file name is correct. Verify that the file system permissions allow the file to be written.

CTGDIA118E The message exchange pattern '*URL*' of operation '*operation name*' does not allow a SOAP fault response.

Explanation

A SOAP fault has been passed to the Connector, but the WSDL operation does not allow a fault response.

Action

Verify that the AssemblyLine logic is correct.

CTGDIA119E The message exchange pattern '*URL*' of operatio '*operation name*' requires a response. Either provide a normal response in an Attribute named '*Attribute name*' or provide a SOAP fault.

Explanation

A SOAP fault has been passed to the Connector, but the WSDL operation does not allow a fault response.

Action

Verify that the AssemblyLine logic is correct.

CTGDIA120I Will not generate a SOAP response, because an HTTP body is provided in the 'conn' Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA121I WSDL file generated successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ601I Web service called successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ602I Parameter 'wsdlUrl': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ603E Parameter 'wsdlUrl' is empty.

Explanation

See message.

Action

Specify a valid 'wsdlUrl' parameter in the Function Component.

CTGDIZ604I Parameter 'soapOperation': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ605E Parameter 'soapOperation' is empty.

Explanation

See message.

Action

Specify a valid 'soapOperation' parameter in the Function Component.

CTGDIZ606I Parameter 'complexTypes': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ607I Parameter 'operationParamList': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ608I WSDL service QName: *service queue name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ609I WSDL port QName: *port queue name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ610I WSDL operation style: *operation style*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ611I Registered class ''*class name*'' for ''*queue name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ612E Entry Attribute ''*attribute*'' is missing.

Explanation

See message.

Action

Check the attributes in the entry.

CTGDIZ613I About to call web service...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ614I SOAP response Java Object: *response Java Object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ615W This web service returned a SOAP Fault message. Fault string is: *axisFault string*.

Explanation

In this case axisFault represents a SOAP Fault message received from the web service.

Action

No action is required.

CTGDIZ617E The invocation of this web service failed for the following reason: *class name*: *message*.

Explanation

In this case axisFault represents an Exception which has occurred on the local machine, and not a SOAP Fault message received from the web service.

Action

No action is required.

CTGDIZ619I Additional output parameter: parameter name:*parameter name*, parameter value: *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ620I Additional output parameter: parameter name:*parameter name*, parameter value: *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ621E Axis EasyInvoke Soap WS Function Component expected either an Entry or an Object[], but received ''*class*'' instead.

Explanation

The method perform of the Function Component expected an Entry or an Object as a parameter.

Action

Invoke the perform method with the correct parameter.

CTGDIZ622w The value ''*value*'' is invalid for the ''timeOut'' parameter.

Explanation

A numerical value is expected.

Action

Check the "timeOut" parameter.

CTGDIZ623I The invocation of a service will wait forever for a response.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ001E The 'wsdlFile' parameter must be set to use the Axis Easy Web Service Server Connector.

Explanation

The required parameter wsdlFile was not specified in the Axis Easy Web Service Server Connector.

Action

Specify the wsdlFile parameter in the Connector.

CTGDIZ002I The 'wsdlFile' parameter is set to *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ003E The 'soapOperation' parameter must be set to use the Axis Easy Web Service Server Connector.

Explanation

The required parameter soapOperation was not specified in the Axis Easy Web Service Server Connector.

Action

Specify the soapOperatione parameter in the Connector.

CTGDIZ004I The 'soapOperation' parameter is set to *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ005I The 'complexTypes' parameter is set to *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ006E Cannot find the *attribute name* attribute of the op-entry.

Explanation

The attribute does not exist or the attribute does not have any values.

Action

No action is required.

CTGDIZ007E The operation name ''*operation name*'' extracted from the SOAP request is not valid operation name.

Explanation

See message.

Action

Ensure the operation name is valid.

CTGDIZ008I Response Object values: *array of values*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ009I Request Object array: *array of values*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ201I Successfully generated a SOAP message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ202E Parameter 'wsdlUrl' is empty.

Explanation

See message.

Action

Specify a valid 'wsdlUrl' parameter in the Connector.

CTGDIZ203I Parameter 'wsdlUrl': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ204E Parameter 'soapOperation' is empty.

Explanation

See message.

Action

Specify a valid 'soapOperation' parameter in the Connector.

CTGDIZ205I Parameter 'soapOperation': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ206I Parameter 'complexTypes': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ207E Parameter 'mode' is empty.

Explanation

See message.

Action

Specify a valid 'mode' parameter in the Connector.

CTGDIZ208I Parameter 'mode': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ209E Parameter 'mode' has invalid value: ''*parameter value*''.

Explanation

See message.

Action

Specify a valid 'mode' parameter in the Connector.

CTGDIZ210I Parameter 'operationParamList': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ211I Parameter 'returnXMLType': *mReturnXMLType*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ212E Invalid value for 'returnXMLType': *parameter value*.

Explanation

See message.

Action

Specify a valid 'returnXMLType' parameter in the Connector.

CTGDIZ213I Generated SOAP message Attribute: *attribute*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ214I WSDL service QName: *service queue name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ215I WSDL port QName: *port queue name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ216I WSDL operation style: *operationStyle*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ217I AXIS href/multiRef is to *boolean*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ218E The value of the 'soapFault' attribute has an invalid type: *attribute value*.

Explanation

The value of the soapFault attribute must be of type org.apache.axis.AxisFault.

Action

Check the SOAP message.

CTGDIZ219E Entry Attribute ''*attribute name*'' is missing.

Explanation

See message.

Action

Check the attributes in the entry.

CTGDIZ220I About to generate a SOAP message using the following parameters:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ221I Target namespace: *namespace*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ222I SOAP operation: *operation*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ223I Complex types: *types*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ224I SOAP operation parameters: *parameters*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ225I This is a *message type* message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ226I Generated SOAP message: *SOAP message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ227E The Function Component expected either an Entry or an Object[], but received the class ''*class*'' instead.

Explanation

The method perform of the Function Component expected an Entry or an Object as a parameter.

Action

Invoke the perform method with correct parameter.

CTGDIZ228I Registered type mapping: Java type: *Java class name* XML type: *XML qualified name* Serializer Factory: *Java class name* Deserializer Factory: *Java class name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ501I Parsed a SOAP message successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ502I Parameter 'wsdlUrl': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ503E Parameter 'wsdlUrl' is empty.

Explanation

See message.

Action

Specify a valid 'wsdlUrl' parameter in the Function Component.

CTGDIZ504I Parameter 'soapOperation': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ505E Parameter 'soapOperation' is empty.

Explanation

See message.

Action

Specify a valid 'soapOperation' parameter in the Function Component.

CTGDIZ506I Parameter 'complexTypes': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ507I Parameter 'mode': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ508E Parameter 'mode' is empty.

Explanation

See message.

Action

Specify a valid 'mode' parameter in the Function Component.

CTGDIZ509E Parameter 'mode' has invalid value: ''*parameter value*''.

Explanation

See message.

Action

Specify a valid 'mode' parameter in the Function Component.

CTGDIZ510I Parameter 'inputType': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ511E Invalid value for 'inputType': *parameter value*.

Explanation

See message.

Action

Specify a valid 'inputType' parameter in the Function Component.

CTGDIZ512I Parsed Java Object Attribute: *attribute*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ513I WSDL service QName: *service queue name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ514I WSDL port QName: *port queue name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ515E Entry Attribute ''*attribute*'' is missing.

Explanation

The value of the entry attribute must be xmlDOMElement or xmlString.

Action

Check the parameter 'inputType' in the Function Component.

CTGDIZ516I About to parse a SOAP message using the following parameters:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ517I Complex types: *complex type*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ518I SOAP message: *SOAP message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ519I Parsed Java Object: *Java object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ520E The message parsed is a SOAP Fault message. The fault string is: *fault string*.

Explanation

The result object from parsing is an instance of AxisFault object.

Action

Check the SOAP message.

CTGDIZ521I Additional output parameter: parameter name:*parameter name*, parameter value: *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ522I Additional output parameter: parameter name:*parameter name*, parameter value: *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ523I Registered type mapping: Java type: *Java class name* XML type: *XML qualified name* Serializer Factory: *Java class name* Deserializer Factory: *Java class name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ524E Invalid object recieved: *object*.

Explanation

The Function Component has not received a SOAP request message. It must receive the message either as XML DOM Element or as XML String Java object.

Action

Check the AssemblyLine logic and try again.

CTGDKM401E Missing source file. Use "*command line switch*" to specify it.

Explanation

The user has not provided valid source file.

Action

See error message.

CTGDKM402E Cannot read file: "*file which was unable to read*"

Explanation

Either the specified path is invalid or the application has no rights to read the file.

Action

Make sure the provided path is valid and that the user you execute the application with, has sufficient rights to read the file.

CTGDKM403E Duplicate files specified!

Explanation

The user has specified the same files for both input and output.

Action

Make sure the two files are different.

CTGDKM404E Cannot write file: "*file which was unable to write*"

Explanation

Either the specified path is invalid or the application has no rights to write to the file.

Action

Make sure the provided path is valid and that the user you execute the application with, has sufficient rights to write to it.

CTGDKM405E Cannot delete file: "*file which was unable to delete*"

Explanation

Either the specified path is invalid or the application has no rights to delete the file.

Action

Make sure the provided path is valid and that the user you execute the application with, has sufficient rights to delete the file.

CTGDKM406E Cannot rename file "*filename of source file*" to "*filename of destination file*"

Explanation

Either the specified path is invalid or the application has no rights to rename the file.

Action

Make sure the provided path is valid and that the user you execute the application with, has sufficient rights to rename the file.

CTGDKM407I Usage: <migration command> -f source_file [-b backup_file][-n dest_file][-?][-v]... -? Shows this help. -v Print more verbose information to the standard output. -f source_file Specifies the file to migrate. -b bakup_file Specifies the file to use as backup. -n dest_file Specifies the file to output the migration result to.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM408E Error migrating file.

Explanation

See the error message and the produced log.

Action

Check the exception message for more information.

CTGDKM409I File successfully migrated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKJ001E Castor mapping file not specified.

Explanation

The 'mappingFile' Function Component parameter is not set.

Action

Specify the mappingFile parameter.

CTGDKJ002E Invalid value for '*parameter name*': *parameter value*.

Explanation

The return type value is incorrect.

Action

Set a proper value to the return type parameter.

CTGDKJ003E Could not load mapping file: *Exception message*

Explanation

An Exception occured while trying to load the mapping file.

Action

Check the mapping file and try again.

CTGDKJ004E Could not create Document Builder: *exception message*

Explanation

An exception occured while the Factory was trying to create a new document builder.

Action

DocumentBuilder which satisfies the configuration requested cannot be created.

CTGDKJ005E Invalid root element name: *Exception message*

Explanation

There are several possible reasons for this Exception: while creating the DOMElement, if an illegal character is in the specified name; or the parent node is of a type that does not allow children of the type of the newChild node while appending the child node ; or the parent node is created from a different document than the one which created the child node while appending the child node; or the parent node is read-only or if the previous parent of the node being inserted is read-only while appending the child node.

Action

Verify that the name of the root element does not contain invalid characters.

CTGDKJ006E Error on marshalling Entry attributes: *Exception message*

Explanation

There are several possible reasons for this Exception: while creating the DOMElement, if an illegal character is in the specified name; or the parent node is of a type that does not allow children of the type of the newChild node while appending the child node; or the parent node is created from a different document than the one which created the child node while appending the child node; or the parent node is read-only or if the previous parent of the node being inserted is read-only while appending the child node; or while sets the mapping to be used by the marshalling Framework; or while marshalling Object as XML.

Action

Verify the content of the mapping file.

CTGDKJ007E Error while transforming DOM to string: *Exception message*

Explanation

There are several possible reasons for this Exception: while obtain the new instance of the TransformerFactory if the implementation is not available or cannot be instantiated; or while creating the new Transformer object; or while setting the output property if the property is not supported, and is not qualified with a namespace; or while transforming if an unrecoverable error occurs during the transformation.

Action

Contact IBM support.

CTGDKJ008E Could not load mapping file: *Exception message*

Explanation

This Exception could occur if the mapping file is invalid or if an Error occur while reading the mapping file.

Action

Check the mapping file and try again.

CTGDKJ009E Could not create Document Builder: *Exception message*

Explanation

An Exception occured while creating the DocumentBuilder which satisfies the configuration requested.

Action

Check the configuration parameters and try again.

CTGDKJ010E Error on object marshalling: *exception message*

Explanation

There are several possible reasons for this Exception: while creating the DOMElement, if an illegal character is in the specified name; or while setting the mapping file to be used by the marshalling Framework; or while marshalling Object as XML.

Action

Verify the syntax of the name of the root element.

CTGDKJ011E Exception while transforming DOM to String: *exception message*

Explanation

There are several possible reasons for this Exception: the Function Component may have been unable to obtain the new instance of the TransformerFactory because the implementation was not available or could not be instantiated; or the Function Component may have been unable to create the new Transformer object; or the Function Component may have been unable to set the output property because the property was not supported, or was not qualified with a namespace; or the Function Component may have encountered an unrecoverable error during a transformation.

Action

Examine the exception message. Contact IBM support.

CTGDKJ012E Invalid return type specified: *return type*.

Explanation

The return type does not match the supported return types.

Action

Provide a proper return type.

CTGDKJ101E Castor mapping file not specified.

Explanation

The 'mappingFile' Function Component parameter is not set.

Action

Specify the mappingFile parameter.

CTGDKJ102E Invalid value for '*parameter name*': *parameter value*.

Explanation

The return type value is incorrect.

Action

Set a proper value to the return type parameter.

CTGDKJ103E Empty attribute specification: *attributes*.

Explanation

The received attribute is empty.

Action

Provide a valid value in the Attribute Specification.

CTGDKJ104E XPath not specified for attribute: *attribute name*.

Explanation

The received attribute value is not correct.

Action

In the Attribute Specification provide a valid value.

CTGDKJ105E Could not load mapping file: *exception message*

Explanation

An error occured while trying to load mapping file. The file is invalid.

Action

Provide a valid mapping file and try again.

CTGDKJ106E Could not create Unmarshaller: *exception message*

Explanation

An error occured while trying to create a new Unmarshaller object. A possible reason for the error is when an invalid mapping is used for creating the Unmarshaller object.

Action

Try with valid mapping for creating the Unmarshaller object.

CTGDKJ107E Unable to create DOM Document from XML String: *exception message*

Explanation

An error occured while trying to create Document from XML String. There are several possible reasons: - while creating a new DocumentBuilder if a DocumentBuilder cannot be created which satisfies the configuration requested. -

while parsing the Document with the given InputSource if an Input/Output error occurs or if a parse error occurs.

Action

If the exception is during the parse of the xmlString, correct the XML element given as String object and try again.

CTGDKJ108E No input data was passed to the Function Component. The Function Component was passed the following expected type: *input type*.

Explanation

No data is provided to the Function Component.

Action

Try with input data matching the expected type.

CTGDKJ109E Special type '*special type attribute*' with attribute:*attribute name* is not supported.

Explanation

The specified special type of attribute in the Attribute Specification section of the Function Component is not supported.

Action

Change the type of the attribute in the Attribute Specification section of the Function Component and try again.

CTGDKJ110E Unable to select attribute from XML at path: *attribute xPath* Exception occurred: *Exception message*

Explanation

An error occured while trying to select a nodelist with the given prefix.

Action

Specify a valid XPath variable of the attribute in the Attribute Specification section of the Function Component and try again.

CTGDKJ111E Error on unmarshalling: *exception message*

Explanation

There are several possible reasons for this error: if an error occured during the unmarshalling process; or if there is a validation error; or while creating the DOMElement if there is an invalid character; while appending the child node if the parent node is of a type that does not allow children of the type of the newChild node; or if the parent node is created from a different document than the one which created the child node while appending the child node; or the parent node is read-only or if the previous parent of the node being inserted is read-only while appending the child node.

Action

Verify that no invalid characters are used or contact IBM support.

CTGDKJ112E Could not select XML elements: *Exception message*

Explanation

An error occured while trying to select a nodelist with the given prefix.

Action

The used prefix is '*'. Contact IBM support.

CTGDKJ113E Invalid input data passed. The Function Component was passed the following expected type: *input type*. Exception occurred: *Exception message*.

Explanation

Invalid data is provided to the Function Component.

Action

Try with input data matching the expected type.

CTGDJA001E The situation.reasoningScope attribute has not been defined.

Explanation

The user has not mapped a value for attribute situation.reasoningScope.

Action

Map value for the attribute situation.reasoningScope.

CTGDJA002E The value of attribute situation.categoryName is not defined.

Explanation

The user has not mapped a value for attribute situation.categoryName.

Action

Map value for the attribute situation.categoryName.

CTGDJA003E The value of attribute RepeatCount is invalid.

Explanation

The user has mapped an invalid value for attribute RepeatCount in output map.

Action

Map a numerical value for attribute RepeatCount.

CTGDJA004E The value of attribute ElapsedTime is undefined.

Explanation

The user has not mapped a value for attribute ElapsedTime in output map.

Action

Map a numerical value for attribute ElapsedTime.

CTGDJA005E The value of attribute ElapsedTime is invalid.

Explanation

The user has mapped an invalid value for attribute ElapsedTime in output map.

Action

Map a numerical value for attribute ElapsedTime.

CTGDJA006E The value of attribute Severity is invalid.

Explanation

The user has mapped a non-numerical value for attribute Severity in the output map.

Action

Map a numerical value between 0 and 70 for attribute Severity.

CTGDJA007E The value of attribute Priority is invalid.

Explanation

The user has mapped a non-numerical value for attribute Priority in the output map.

Action

Map a numerical value between 0 and 100 for attribute Priority.

CTGDJA008E The value of attribute SequenceNumber is invalid.

Explanation

The user has mapped a non-numerical value for attribute SequenceNumber in the output map.

Action

Map a numerical value for attribute SequenceNumber.

CTGDJA009E The value of attribute situation.categoryName is invalid: *Value of attribute*

Explanation

The user has mapped an invalid value for attribute situation.categoryName in the output map.

Action

Refer to the documentation for defined values for attribute situation.categoryName.

CTGDJA010E The argument being passed to perform method is invalid.

Explanation

The user has mapped an invalid value as an argument for the perform method .

Action

An argument of type Entry must be passed to the perform method.

CTGDJA011E A null value cannot be passed as an argument to the perform method.

Explanation

The user has mapped an invalid value as an argument for the perform method.

Action

An argument of type Entry must be passed to the perform method.

CTGDJA012E Both of the attributes ''event'' and ''eventXml'' have invalid or undefined values.

Explanation

The user has mapped an invalid value or has not mapped any value.

Action

Either a valid object of type "org.eclipse.hyades.logging.events.cbe.CommonBaseEvent" must be set to the "event" attribute or a valid XML String representation of a CBE object must set to the "eventXml" attribute.

CTGDJA013E The ''eventXml'' attribute does not contain a valid XML as a CBE object representation. Reason: *Exception Message*

Explanation

The user has mapped an invalid XML String.

Action

A valid XML String must be set to the "eventXml" attribute.

CTGDJA014E Only one of the attributes ''event'', ''eventXml'' must be set.

Explanation

The user has mapped both attributes ("event" and "eventXml") at the same time.

Action

A Single attribute is expected to be mapped (either "event" or "eventXml").

CTGDJA015E Could not retrieve a CBE object from the XML specified in ''eventXml'' attribute.

Explanation

The user has mapped an invalid XML String.

Action

A valid XML String must be set to the "eventXml" attribute.

CTGDKL101E Error parsing XML. An invalid XML representation of a CBE object. Exception occurred: *ExceptionMSG*

Explanation

The input XML does not comply with the CBE specification.

Action

Correct the input XML so it be valid against the CBE schema.

CTGDKL103E Error generating a CBE object from the specified attributes.

Explanation

Some of the required attributes are missing or incorrect.

Action

Refer to the documentation to check the required attributes.

CTGDKL106E Unable to validate the CBE object in the ''event'' attribute. Exception occurred: *ExceptionMSG*

Explanation

The user has mapped an invalid CBE object.

Action

Map a valid CBE object.

CTGDKL107E The CBEParser writer is not initialized.

Explanation

The CBEParser cannot write due to writer initialization failure.

Action

Check the configuration of the component which is using the CBEParser.

CTGDIH201E Parameter '*param name*' was initialized with value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH202E Parameter '*param name*' is not provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH203E Unsupported mode: '*mode*' for selected artifact type: '*type name*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH204E An exception occured while trying to close the database connection: *message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH205E No Entry provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH206E Incompatible classification: expected - '*expected class name*' , found - '*actual class name*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH207E Unable to create '*instance*' instance from an input Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH208I Search Query for '*instance*' : '*searchQuery*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH209E Actual CI already exists for GUID - '*guid*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH210E Config Item already exists for GUID - '*guid*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH211E Relation already exists: '*relation*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH212E CI Relation already exists: '*ciRelation*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH213E Could not get the classification for the selected class type '*classType*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ551E Close IdML Function Component accepts only a IBM Security Directory Integrator Entry as input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

Close IdML Function Component expects only a IBM Security Directory Integrator Entry as input. Check the AL logic and try again.

CTGDJZ552E The book '*book name*' is already closed or has never been created.

Explanation

Close IdML Function Component always attempts to close its configured book. If its is executed repeatedly in the Flow of the AssemblyLine for the same book name, an error will occur.

Action

Check the AL logic and try again.

CTGDJZ553I Close IdML Function Component will work with book: '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ554I The name of the currently used book '*book name*' has been overridden to '*new name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ555I Close IdML Function Component closed book '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ556E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the Close IdML Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDIX001E The 'commandLine' parameter must be set to use the Command Line Connector.

Explanation

The required parameter commandLine was not specified in the Command Line Connector.

Action

Specify the commandLine parameter in the Connector.

CTGDIX002E Unable to run a command. The 'commandLine' parameter must be set to use the Command Line Connector.

Explanation

The required parameter commandLine was not specified in the Command Line Connector.

Action

Specify the commandLine parameter in the Connector.

CTGDIZ701I Running WSDL2Java...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJW003I Parser will use first input line for column names.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJW004I No column names provide. Will use first output entry for column names: ''*column names*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJW005I A long Line was encountered at line number ''*line number*''. The line is ''*number of bytes*'' bytes and the line contents are ''*line*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ701I The Class Type *param name* has value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ702I Use a DIS system for the needed meta-data: '*use dis*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ703I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ704E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the Data Cleanser Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDJZ705E The Data Cleaser Function Component accepts only a IBM Security Directory Integrator Entry as input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

The Data Cleaser Function Component expects only a IBM Security Directory Integrator Entry as input. Check the AL logic and try again.

CTGDIZ901E Delta key attribute not defined.

Explanation

In order for the Delta mechanism to be able to uniquely identify each entry, a unique attribute must be specified to use as the Delta key.

Action

Verify the Delta configuration.

CTGDIZ902E The perform method of the Function Component was not passed an object of type com.ibm.di.entry.Entry. This object is not a valid parameter to pass to the perform method.

Explanation

A parameter of type different from com.ibm.di.entry.Entry was passed to the perform method.

Action

Verify that the parameter being manually passed to the perform method of a Function Component (for example from a Script Component) is an object of type com.ibm.di.entry.Entry.

CTGDIZ903E DELTA: Duplicate delta key: *key value*.

Explanation

The sequence id of the entry with the specified key is not consistent with the sequence id for the Delta Table from the Delta Systable.

Action

Verify the Delta Store is not corrupted and if the problem persists contact IBM support.

CTGDIZ904I DELTA: new entry, key = *key value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ905I DELTA: modified entry, key = *key value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ906I DELTA: No changes, key = *key value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ907I DELTA: skip next unchanged entry.

Explanation

No additional information is available for this message.

Action

CTGDKN417I The password of user '*user name*' could not be stored.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN418E Unable to mark admin request '*UNID*' as processed.

Explanation

An error has occurred and the admin request could not be processed on this cycle.

Action

Check the NotesException following this error message.

CTGDKN419I Will assume the objects [*object name*;] and [*object name*] are equal.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN420E Unable to retrieve password document from helper database.

Explanation

An error has occurred while retrieving a document.

Action

Check the auxiliary message of the exception for more details.

CTGDKN421E The field '*field ID*' is missing from a document in the '*database name*' database.

Explanation

See message.

Action

Check if the secret key is imported in the Server ID file.

CTGDKN422I Could not save success indicator for Notes client.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN423I Will reject all changes to the Person document for user '*user name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN424E An error has occurred while retrieving the Person document.

Explanation

See the error message.

Action

Check the auxiliary message of the exception for more details.

CTGDKN425E Could not read data from the Person document.

Explanation

An error has occurred while reading a document.

Action

Check the auxiliary message of the exception for more details.

CTGDKN426E Could not remove custom fields in the Person document.

Explanation

An error has occurred while removing document fields.

Action

Check the auxiliary message of the exception for more details.

CTGDKN427E Cannot synchronize password. User identifier field '*field ID*' is empty.

Explanation

See message.

Action

No help provided.

CTGDKN428I User identifier is NULL. Will not synchronize password.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN429I Searching for UNID with filter: '*filter*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN430I Missing UNID. Password will not be synchronized.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN431I Will use the Distinguished Name for password synchronization.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN432I Will prefix Distinguished Name with: '*prefix name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN433I Found UNID: '*UNID*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN434I Synchronizing User ID: '*user name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN435I Domino Plug-in/Proxy authentication successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN436I Domino Plug-in/Proxy authentication failed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN437E Could not connect to localhost on port *port number*.

Explanation

The Domino plug-in was unable to connect to the Java Proxy. The Java Proxy may not be running.

Action

Ensure the Java Proxy is running and try again.

CTGDKN438E The file '*file name*' could not be found.

Explanation

The specified configuration file must be placed in the Domino Data directory.

Action

Ensure the configuration file is available.

CTGDKN439E The file '*file name*' could not be read.

Explanation

The file is probably read-protected.

Action

Ensure the user that runs the Domino Server has enough privileges to read the configuration file.

CTGDJE002E The Notes Thread not alive. Domino Change Detection Connector cannot execute the needed command against the Domino Server without an active Notes Thread.

Explanation

See message.

Action

Contact IBM support.

CTGDJE003E Fatal Error while executing command against Domino Server: *exception*

Explanation

See message.

Action

Review the message returned from the Domino Server to see how to respond.

CTGDJE004I Domino Change Detection Connector is restarting.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE005I Checkpoint/restart is only supported in 'After read' and 'End of cycle' mode.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE006E No documents in the list of UnIDs, or the list is null.

Explanation

The method getCurrentDocumentUnID fail3e trying to get the UnID of the current document from the document info returned by the native layer.

Action

Review the exception to find further details on the error.

CTGDJE007E No documents in the list of UnIDs, or the list is null.

Explanation

The method getCurrentDocumentNoteID failed trying to get the NoteID of the current document from the document info returned by the native layer.

Action

Contact IBM support.

CTGDJE008E No documents in the list of UnIDs, or the list is null.

Explanation

The method getCurrentDocumentState failed trying to get the state (normal or deleted) of the current document from the document info returned by the native layer. This is an internal error.

Action

Contact IBM support.

CTGDJE009E Connector already initialized. You must terminate it before initializing again.

Explanation

An attempt was made to initialize the Domino Change Detection Connector after it was already initialized.

Action

Verify that the Connector is terminated before attempting to initialize the Connector again.

CTGDJE010E Connector was unable to initialize local Notes session to Domino Server. Exception encountered: *exception*

Explanation

The Domino Change Detection Connector could not create a local Notes session to the Domino Server.

Action

Verify that the Connector parameters are configured correctly and that the Domino Server is running. Also, review the exception in the message for further information on why the error occurred.

CTGDJE011I Enabling SSL flag since 'iiopSSL' was not set to true or false.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE012E NotesException encountered trying to create a session with the Domino Server: Class Name=''*class name*'', Exception=*exception*

Explanation

The Domino Change Detection Connector encountered an exception while trying to create a session with the Domino Server and was unable to continue.

Action

Verify that the Domino Server being queried is still running and that the connection information in the Domino Change Detection Connector has been configured properly.

CTGDJE013I Successfully connected to Domino Server: Name=''*server name*'', Version=''*version number*'', Platform=''*operating system*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE014E Domino Change Detection Connector unable to open database ''*database name*'' on server ''*server name*''.

Explanation

The Domino Change Detection Connector was unable to connect to the specified database on the Domino Server.

Action

Verify that the correct database name was specified for the Domino Change Detection Connector and that the connection information in the Domino Change Detection Connector has been configured properly.

CTGDJE015E Domino Change Detection Connector unable to open database ''*database name*'' on server ''*server name*''.

Explanation

The Domino Change Detection Connector was unable to connect to the specified database on the Domino Server.

Action

Verify that the correct database name was specified for the Domino Change Detection Connector and that the connection information in the Domino Change Detection Connector has been configured properly.

CTGDJE016E Could not initialize the Domino Change Detection Connector. Exception occurred: *exception*

Explanation

Failed to initialize the Domino Change Detection Connector.

Action

See exception in message for information on how to respond.

CTGDJE017W Domino Change Detection Connector could not terminate the local Notes session. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJE018W Domino Change Detection Connector could not close the IIOP objects. Exception occurred: id=*id* exception=*exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJE020E The 'dominoServerIP' parameter must be set to use the Domino Change Detection Connector.

Explanation

The required parameter dominoServerIP was not specified in the Domino Change Detection Connector.

Action

Specify the dominoServerIP parameter in the Connector.

CTGDJE021E The 'userName' parameter must be set to use the Domino Change Detection Connector.

Explanation

The required parameter userName was not specified in the Domino Change Detection Connector.

Action

Specify the userName parameter in the Connector.

CTGDJE022E The 'database' parameter must be set to use the Domino Change Detection Connector.

Explanation

The required parameter database was not specified in the Domino Change Detection Connector.

Action

Specify the database parameter in the Connector.

CTGDJE024E The 'deliveryMode' parameter was set to an invalid value: ''*parameter value*''.

Explanation

The required parameter deliveryMode was specified in the Domino Change Detection Connector but the value was not valid

Action

Specify a valid value for the deliveryMode parameter in the Connector.

CTGDJE025E The 'systemStoreKey' parameter must be set to use the Domino Change Detection Connector.

Explanation

The required parameter systemStoreKey was not specified in the Domino Change Detection Connector.

Action

Specify the systemStoreKey parameter in the Connector.

CTGDJE026W The 'sleepInterval' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid sleepInterval parameter in the Connector if the default value is not wanted.

CTGDJE027W The 'timeout' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid timeout parameter in the Connector if the default value is not wanted.

CTGDJE028E Could not read synchronization state from System Store. Exception occurred: *exception*

Explanation

The method selectEntries failed trying to read the start synchronization state.

Action

Review the exception to find further details on the error.

CTGDJE029E Could not retrieve state from persistent store. Exception occurred: *exception*

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDJE030E The System Store key not found and 'Start At' parameter not specified.

Explanation

See message.

Action

Specify a valid 'Start At' parameter in the Connector.

CTGDJE031I Start at start of data. Will perform full synchronization.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE032I Start at end of data. Will listen for new changes only.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE033I Start at specific date. Will use start date: *date*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE034E Invalid Start At value: *date*.

Explanation

See message.

Action

Specify a valid 'Start At' parameter in the Connector.

CTGDJE035E The System Store Entry does not contain the 'SYNC_TIME' attribute.

Explanation

Either the System Store database is corrupted or an internal error occurred.

Action

Make sure the System Store database is not corrupted, before contacting IBM support.

CTGDJE036E Invalid value of the ''*PROP_SYNC_TIME*'' System Store Entry attribute: *attrValue*.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDJE037E The System Store Entry attribute 'SYNC_TIME' is of unknown type: *class name*.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDJE038I Start date for synchronization: *date*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE039I Verify reported UnIDs are processed on previous runs.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE040I Timeout waiting for next changed entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE041E UnID list is null.

Explanation

Connector tries to retrieves the next valid document from the list of changed document UnIDs, the list is null. This is an internal error.

Action

Contact IBM support.

CTGDJE042E Could not retrieve document with UnID ''*unID*''.

Explanation

Domino Change Detection Connector could not retrieve document with specific UnID.

Action

Check database permissions.

CTGDJE043I Check database permissions.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE044I If the document is already deleted, it will be reported on the next poll.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE045E Could not read document's last modification date. Exception occurred: id=*id*: exception=*exception*

Explanation

Failed to verify whether the document passed has not been processed on previous Connector's runs.

Action

Review the exception to find further details on the error.

CTGDJE046E Invalid end date value: *time stamp*

Explanation

The 'UnID' parameter read from the Property Store has an invalid value.

Action

Make sure the Property Store is not corrupted, before contacting IBM support.

CTGDJE047E Error on closing the store: *exception*

Explanation

Failed to delete all stored document UnIDs from the System Store.

Action

Inspect the error message for more detailed information on the error.

CTGDJE048E Could not clear Property Store table:. Exception occurred: *exception*

Explanation

Failed to delete all stored document UnIDs from the System Store.

Action

Review the exception to find further details on the error.

CTGDJE049I Stores the synchronization state in the System Store. Start date is ''*date*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE050I Check docs is set to ''*UnIDs*'' UnID.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE051E Could not store the synchronization state in the System Store. Exception occurred: *exception*

Explanation

Failed to store the synchronization state in the System Store.

Action

Review the exception to find further details on the error.

CTGDJE052E Could not terminate the IIOP seesion. Exception occurred: id=*ID*, exception=*exception*

Explanation

Failed to terminate the IIOP Notes sessions.

Action

Review the exception to find further details on the error.

CTGDJE053E Could not terminate the local Notes session. Exception occurred: *exception*

Explanation

Failed to terminate the local Notes sessions.

Action

Review the exception to find further details on the error.

CTGDJE054E Error on stopping internal thread. Exception occurred: *exception*

Explanation

The method terminate failed trying to stop the internal thread.

Action

Review the exception to find further details on the error.

CTGDJE055E Exception while closing the System Store table: *exception*

Explanation

Failed to close the connection to the System Store.

Action

Review the exception to find further details on the error.

CTGDJE056E Could not retrieve created date for the document ''*document ID*''. Exception occurred: id=*ID*, exception=*exception*

Explanation

Failed to set the creation date attribute.

Action

Review the exception to find further details on the error.

CTGDJE057I Will assign a value of NULL to attribute '$$DateCreated'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE058E Could not retrieve last modified date for document ''*document ID*''. Exception occurred: id=*ID*, exception=*exception*

Explanation

Failed to set the modification date attribute.

Action

Review the exception to find further details on the error.

CTGDJE059I Will assign a value of NULL to attribute '$$DateModified'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE060I The item ''*item name*'' is of type ATTACHMENT and will not be added to the Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE061I Added a new attribute to the entry: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE062I The item type is *item type*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE063E Could not retrieve item values. Exception occurred: id=*ID*, exception=*exception*

Explanation

The Notes API could not recognize the item value.

Action

Contact IBM support.

CTGDJE064I Value(s) for attribute ''*attribute name*'' will be skipped.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE065I The data is: *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE066E Could not convert Notes date to Java date. Exception occurred: id=*ID*, exception=*exception*

Explanation

Connector failed to convert Domino dates to Java dates.

Action

Review the exception to find further details on the error.

CTGDJE067I Date value for attribute ''*attribute name*'' will be skipped.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE068E Could not determine change type for document with UNID ''*document ID*''. Exception occurred: id=*ID*, exception=*exception*

Explanation

Connector cannot determine the type of the added document.

Action

Review the exception to find further details on the error.

CTGDJE069I Will assign change type 'unknown' to document ''*document ID*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE070E Native call to getModifiedNotes method returned NULL.

Explanation

Connector failed to retrieve the UnIDs of all changed Domino documents.

Action

Contact IBM support.

CTGDJE071E Could not parse end date value: *date*.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDJE072E Invalid string date format passed: *date string*.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDJE073E Exception occurred while retrieving document with UnID ''*unID*'': id=*ID*, exception=*exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJE074I Local Client Session successfully created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE075E Connector unable to create Local Client Session. Exception encountered: *exception detail message string*

Explanation

The Domino Change Detection Connector could not create a Local Client session to the Domino Server.

Action

Verify that the Connector parameters are configured correctly and that the Domino Server is running. Also, review the exception in the message for further information on why the error occurred.

CTGDJE076I IIOP Session successfully created. The specified IOR string is used. SSL is turned on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE077E Connector unable to create IIOP Session with the configured IOR string. SSL is turned on. Exception encountered: *exception detail message string*

Explanation

The Domino Change Detection Connector could not create a IIOP Session to the Domino Server.

Action

Verify that the Connector parameters are configured correctly and that the Domino Server is running. Also, review the exception in the message for further information on why the error occurred.

CTGDJE078I IIOP Session successfully created. SSL is turned on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE079E Connector unable to create IIOP Session with SSL turned on. Exception encountered: *exception detail message string*

Explanation

The Domino Change Detection Connector could not create a IIOP Session to the Domino Server.

Action

Verify that the Connector parameters are configured correctly and that the Domino Server is running. Also, review the exception in the message for further information on why the error occurred.

CTGDJE080I IIOP Session successfully created. SSL is turned off.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE081E Connector unable to create IIOP Session with the configured IOR string. SSL is turned off. Exception encountered: *exception detail message string*

Explanation

The Domino Change Detection Connector could not create a IIOP Session to the Domino Server.

Action

Verify that the Connector parameters are configured correctly and that the Domino Server is running. Also, review the exception in the message for further information on why the error occurred.

CTGDJE082I IIOP Session successfully created. SSL is turned off.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE083E Connector unable to create IIOP Session. SSL is turned off. Exception encountered: *exception detail message string*

Explanation

The Domino Change Detection Connector could not create a IIOP Session to the Domino Server.

Action

Verify that the Connector parameters are configured correctly and that the Domino Server is running. Also, review the exception in the message for further information on why the error occurred.

CTGDJE084W The 'systemStoreKey' parameter was not specified in the Domino Change Detection Connector. The Connector will not persist state.

Explanation

The parameter systemStoreKey was not specified in the Domino Change Detection Connector.

Action

Specify the systemStoreKey parameter in the Connector to enable state persitence.

CTGDJE085W The Document item *name of document item* of type *type of document item* was not handled.

Explanation

The Notes API failed to process this document item's values.

Action

Contact IBM support.

CTGDJE086I Notes API exception ID: *ID of Notes API exception* Notes API exception text: *text of Notes API exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE087E The following exception occurred during Connector's initialization: *exception*

Explanation

Needed jar file, that is Notes.jar or NCSO.jar is not added to the classpath of IBM Security Directory Integrator.

Action

Add the needed jar file to the classpath of IBM Security Directory Integrator.

CTGDJE088E The following exception occurred during Connector's termination: *exception*

Explanation

Needed jar file, that is Notes.jar or NCSO.jar is not added to the classpath of IBM Security Directory Integrator.

Action

Add the needed jar file to the classpath of IBM Security Directory Integrator.

CTGDJE089E Failed to convert the port parameter value to a numeric type: *parameter value*.

Explanation

The specified value for the parameter does not have the appropriate format.

Action

Specify value with appropriate format for the httpPort parameter.

CTGDJE090I The Delivery Mode parameter is removed since IBM Security Directory Integrator 6.1.1. Refer to the IBM Security Directory Integrator documentation for more information.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJE091I Sorting changed documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE092W The iterator state key is not specified. No state will be stored. The Start At parameter's value will be used.

Explanation

See message.

Action

Specify the iterator state key if you want the state of the changelog connector to be saved.

CTGDKC001E Connector Notes Thread not alive. Cannot perform.

Explanation

The user tries to execute operation after the Connector has been terminated.

Action

Check the business logic of the solution, so that the Connector is not used after it has been terminated.

CTGDKC002E Failed to execute the command. NotesException occurred: *exception*

Explanation

The Notes Run time might be not initialized or error has occurred during operation execution.

Action

Check that Security Directory Integrator and the external systems are configured correctly.

CTGDKC003E Fatal error while executing the command. Exception occurred: *exception*.

Explanation

This error occurs in result of class linkage, thread or virtual machine error.

Action

Review the exception to find further details on the error.

CTGDKC004E Connector already initialized. You must terminate it before initializing again.

Explanation

The user tries to initialize the Connector, for example through script, that has been already initialized.

Action

Check the values of the configuration parameters and the business logic of your solution.

CTGDKC005W Exception occurred while terminating: *exception*

Explanation

The user may has loaded a Connector without initializing it. For example through the getConnector method.

Action

Check the values of the configuration parameters and the business logic of the solution.

CTGDKC009I Will use full-text search in Iterator and Lookup modes.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC010I Will use regular database search in Iterator and Lookup modes.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC012I Sucessfully connected to Domino Server: Name=''*server name*'', Version=''*version number*'', Platform=''*operating system*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC013E Unable to open 'Name and Address Book' database: *database name*.

Explanation

The configuration parameter, pointing to the server where the database is or the database name may be mistyped or the user may have not rights to access the database.

Action

Verify the database exists and is available as well as check the other configuration parameters of the Connector.

CTGDKC014I Successfully opened 'Name and Address Book' database *database name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC015I The Database *database name* is full-text indexed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC016I The database *database name*is not full-text indexed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC017E Unable to open Admin database: *database name*.

Explanation

The user may have not rights to access the database or the configuration parameter, pointing to the server where the database is or the database name may be mistyped.

Action

Check the configuration of the Connector as well as that the user have rights to access the database.

CTGDKC018I Successfully opened the Administration Requests Database: *database name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC019E Unable to select entries. The View 'People' was not found.

Explanation

If the database is local, both the public and personal views and folders are returned. If the database is on server, only public vews and folders are returned.

Action

Check that the view you look up is present and is not forbidden to be returned. Contact IBM support if the problem still exists.

CTGDKC020E Could not filter documents. NotesException occurred: ID=*ID*, Error Text=*error text*

Explanation

Domino server allows to restrict the operations a user can perform. If the full-text filter is mistyped, no documents will be returned.

Action

Check configuration of the Connector and security settings of the Domino server. Contact IBM support if the problem still exists.

CTGDKC021I View search returned NULL.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC022I View search returned *number of documents* documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC023E Could not perform database search. NotesException occurred: ID=*ID*, Error Text=*error text*

Explanation

Domino server allows to restrict the operations a user can perform. The user might have not rights to search the database.

Action

Check the security settings of the Domino server. Contact IBM support if the problem still exists.

CTGDKC024I Database search returned NULL.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC025I Database search returned *number of documents* documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC026E Error retrieving next user Document. NotesException occurred: ID=*ID*, Error Text=*error text*

Explanation

If one creates more than one object to represent the same Domino element, recycling one recycles all. Results are undefined if one attempts to use a recycled object.

Action

Check the business logic of the solution and contact IBM support if the problem still exists.

CTGDKC027E Unable to find the entry. The View 'People' was not found.

Explanation

Domino server allows to restrict the operations a user can perform. The user might have not proper rights.

Action

Check the security settings and contact IBM support if the problem still exists.

CTGDKC028I Full Text Search view for: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC029I Full Text Search returns *number of documents* documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC030I Database search with formula: *formula*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC031I Database search returned NULL in the findEntry method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC032I Database search returned *number of documents* documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC033E Given Document is NULL. Cannot build Entry.

Explanation

Null is returned if the document collection that results from database search contains no documents.

Action

Check the configuration of the Connector.

CTGDKC034I Document vector of items is NULL.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC035I Building entry with all items: *items*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC036I Item ''*item name*'' is of type ATTACHMENT will not be added to Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC037I New Attribute: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC038I item type: *item type*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC039I Item values: *item values*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC040E Unable to modify the entry. The document not found or multiple documents found.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC041E Unable to modify the entry. The user FullName not found. Cannot set user's access type.

Explanation

The user FullName has no value or the value is numeric or date-time.

Action

Contact IBM support.

CTGDKC042E Entry Attribute ''*attribute name*'' is required when creating a mail database using a custom mail template.

Explanation

The MailFile attribute is mandatory to be present in the entry.

Action

Ensure that the entry has MailFile attribute with proper value.

CTGDKC043E Unable to add entry. Cannot build search criteria to find user document after registration. User document not updated.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC044E Unable to add the entry. Cannot update user document after registration. User document not found or multiple documents found.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC045E Unable to add the entry. Cannot create person document. The required Attribute ''*attribute name*'' is missing or empty.

Explanation

The LastName attribute is mandatory to be present.

Action

Ensure that the LastName attribute is present in the entry and has proper value.

CTGDKC046E Unable to add the entry. Cannot create new user document.

Explanation

Domino server allows to restrict the rights of a user.

Action

Check that the security settings are proper and contact IBM support if the problem still exists.

CTGDKC047E Unable to delete the entry. The document not found or multiple documents were found.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC048E Unable to delete the entry. The user FullName not found. Cannot delete user.

Explanation

The item FullName has no value or the value is numeric or date-time.

Action

Contact IBM support.

CTGDKC049I Will find person document using formula: *formula*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC050I Updating attribute in document: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC051E Could not hash the http password. Exception occurred: *exception*

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC052I Updating password value in document: *password*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC053I Updating value in document: *attribute value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC054I Updating values in document: *attribute values*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC055E Cannot update the document. The document cannot be saved.

Explanation

Someone else might be editing the document at the moment.

Action

Check the business logic of the document and contact IBM support if the problem still exists.

CTGDKC056I FullName criteria element value changed from ''*FullName*'' to ''*FullName*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC057I FullName Attribute changed from ''*FullName*'' to ''*FullName*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC058W Could not recycle Domino object. Exception occurred: *exception*

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC059E NotesException occurred while performing Domino Action: ID=*ID*, Error Text=*error text*.

Explanation

Required attribute, needed for the operation being executed, is missing.

Action

Ensure all the required attributes are available in the entry and have proper values.

CTGDKC060E NotesException occurred while trying to reset and extract the data: ID=*ID*, Error Text=*error text*.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC061E Cannot perform Domino Action: *error message*.

Explanation

Domino server allows to restrict the actions a user can do.

Action

Check that the security settings have proper values and contact IBM support if the problem still exists.

CTGDKC062E Cannot perform Domino Action. NotesException occurred: ID=*ID*, Error Text=*error text*.

Explanation

Domino server allows to restrict the actions a user can do.

Action

Check that the security settings have proper values and contact IBM support if the problem still exists.

CTGDKC063E Unable to clear attributes. NotesException occurred: ID=*ID*, Error Text=*error text*.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC064E Cannot perform Domino Action: *error message*.

Explanation

Review the message for explanation why the operation cannot be performed.

Action

Contact IBM support.

CTGDKC065E Unable to execute Domino Action. NotesException occurred: ID=*ID*, Error Text=*error text*.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC066E The isDenyGroupMember method was passed NULL for the Deny Group Document parameter.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC067E The isDenyGroupMember method was passed NULL for the User Name parameter.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC068E Deny Access Group ''*group name*'' does not exists.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKC069E Cannot instantiate UserAccess. The Connector's Notes session is NULL.

Explanation

The Connector did not succeed to create session to Domino server.

Action

Check that the needed configuration for creating session is set up and contact IBM support, if the problem still exists.

CTGDKC070E Cannot instantiate UserAccess. The Connector's database is NULL.

Explanation

Domino allows to restrict the actions a user can perform. Or the database may not be present on the specified server.

Action

Check the security settings and the configuration of the Connector.

CTGDKC071E Unable to enable the user. Could not find view ''*view name*''.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC072E Unable to enable the user. Could not find view ''*view name*''.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC073E Unable to enable the user. NotesException occurred: ID=*ID*, Error Text=*error text*.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC074E Unable to disable user. Could not find view ''*view name*''.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC075E Unable to disable user. Could not find view ''*view name*''.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC076E Unable to disable user. Deny Access Group ''*group name*'' does not exists.

Explanation

The specified Deny Access Group does not exist.

Action

Specify an existing Deny Access Group.

CTGDKC077E Unable to disable user. Deny Access Group ''*group name*'' does not exists.

Explanation

The specified Deny Access Group does not exist.

Action

Specify an existing Deny Access Group.

CTGDKC078E Unable to disable user. NotesException occurred: ID=*ID*, Error Text=*error text*.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check the security settings and contact IBM support if the problem still exists.

CTGDKC079E Cannot instantiate UserDeletion. The Connector's Notes session is NULL.

Explanation

The Connector has not been initialized.

Action

Make sure the Connector is initialized.

CTGDKC080E Cannot instantiate UserDeletion. Admin database is NULL.

Explanation

The Connector has not been initialized.

Action

Make sure the Connector is initialized.

CTGDKC081E Cannot instantiate UserDeletion. The Connector's database is NULL.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check the security settings and the configuration of the Connector and contact IBM support if the problem still exists.

CTGDKC082E The UserDeletion::sendAdminRequestDeleteUser method could not create admin request document.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC083E Could not create admin request document.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC084E Cannot instantiate UserRegistration. The Connector's Notes session is NULL.

Explanation

The Connector has not created a session.

Action

Check that the required configuration of Security Directory Integrator and all the external systems are performed and contact IBM support if the problem still exists.

CTGDKC085W The UserRegistration::extractAndStoreData method could not parse 'REG_Expiration' value (*attribute value*). Will use default value of NULL.

Explanation

The value of the REG_Expiration attribute is not a valid date object.

Action

Make sure the attribute has a valid date object.

CTGDKC086E The UserRegistration::perform method could not create Registration object.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC087E Could not create Registration object.

Explanation

Domino server allows to restrict the actions a user can perform.

Action

Check that the security settings are correct and contact IBM support if the problem still exists.

CTGDKC088E Failed to convert the port parameter value to a numeric type: *parameter value*.

Explanation

The specified value for the parameter does not have the appropriate format.

Action

Specify value with appropriate format for the httpPort parameter.

CTGDKC089E NotesException encountered while trying to create a session with the Domino Server: Class Name=''*class name*'', Exception=*exception*

Explanation

The Domino Users Connector encountered an exception while trying to create a session with the Domino Server and was unable to continue.

Action

Verify that the Domino Server being queried is still running and that the connection information in the Domino Users Connector has been configured properly.

CTGDKC090I IIOP Session successfully created. The specified IOR string is used. SSL is turned on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC091I IIOP Session successfully created. SSL is turned on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC092I IIOP Session successfully created. The specified IOR string is used. SSL is turned off.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC093I IIOP Session successfully created. SSL is turned off.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC094I Using specified 'IOR' in the connection information for opening the session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC095I Session to Domino Server is created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC096I Opening Session to Domino Server: Session Type=''*Session Type*'',, Hostname=''*Hostname*'', User ID=''*User ID*'', Requested IIOP/SSL=''*Boolean*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC097E Unable to create local Notes thread because the lotus.domino.NotesThread class was not found in the classpath of the program. Exception occurred: *exception*

Explanation

The Domino Users Connector encountered an exception while trying to create a local notes thread. The lotus.domino.NotesThread class is needed to create the thread and it was not found in the classpath.

Action

Verify the classpath of the program and ensure the Notes.jar file is in the classpath.

CTGDKC098I Domino Users Connector's local Notes thread started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC099W Domino Users Connector could not terminate the local Notes thread. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDKC100I Domino Users Connector's local Notes thread terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC101I Missing '*attr name set type*' value

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC102I Invalid '*attr name set type*' value

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC103I Missing '*attr name deny group*' value

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC104I Group does not exist: *group name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC105I Missing user's FullName value

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC106I Invalid Delete Mail File value

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC107E Group does not exist: *group name*

Explanation

The Domino group that the user should be added to does not exist.

Action

Verify that the group name is correct and exists.

CTGDKC108E Invalid Delete Mail File value

Explanation

See message

Action

Verify the delete mail file value.

CTGDKC109I Required Attribute ''*attr name*'' is missing.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC110I Invalid value (''*id*'') set to Attribute ''*type*''. Check Connector's documentation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC111I User Registration should not perform according to the '*attribute name*' Attribute.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKC112E Could not register user ''*last name*''.

Explanation

Registration of the new user has failed.

Action

Check for errors reported during registration.

CTGDIH251E An exception occured while trying to close the database connection: *message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH252E Parameter '*param name*' is not provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH253E Parameter '*param name*' was initialized with value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH254E No Entry provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH255E Primary key not found while deleting an deployed asset!

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH256I deleteRow(...); Query: '*query*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH257E Deployed Asset with the given description already exists!: '*dpaObject*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH277I removeEntry(...); class instance: '*classInst*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH278E Missing asset class name in the input entry '*entry*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH279I createSelectQuery(...); Query: '*query*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM101E Failed to read DSML because input stream was not found. The input or output modes of the DSML Parser may not be valid.

Explanation

See message.

Action

Check the input and output modes of the DSML Parser.

CTGDIM102W Writing out entry but the entry is missing the DN attribute ''*attribute value*''.

Explanation

See message.

Action

Verify that all entries have the DN attribute set.

CTGDIM103I Reading entry where parent node is ''*node name*'' and the current node is ''*node name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM104I *indent* DOCUMENT node type.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM105I *indent* Node Name: *node name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM106I *indent* Node Value: *node value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM107I *indent* Node type is not recognized.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN001E The 'url' parameter must be set to use the DSML v2 SOAP Connector.

Explanation

The required parameter url was not specified in the DSML v2 SOAP Connector.

Action

Specify the url parameter in the Connector.

CTGDIN002I Connector will use SOAP binding.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN003E Unable to initialize DSML v2 SOAP Connector because an unsupported protocol ''*protocol name*'' was specified.

Explanation

The specified protocol is not correct.

Action

Set the appropriate protocol. This is set in the URL specified in the URL parameter.

CTGDIN004E The putEntry method was called without the required '$dn' Attribute in Entry.

Explanation

The mandatory $dn attribute is not specified.

Action

Set the $dn attribute in the Entry.

CTGDIN005I The putEntry method called with '$dn' attribute set to ''*attribute value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN006I Selecting entries with search base of ''*DN*'' and filter of ''*filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN007I Searching for entry where ''*naming DN*'' equals ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN008I Searching for entry using filter ''*filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN009I No entries found while searching for entry in DSML v2 SOAP Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0010I Single entry found while searching for entry in DSML v2 SOAP Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0011I Multiple entries found while searching for entry in DSML v2 SOAP Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0012E The modify entry operation failed because the operation was invoked without an update entry being specified.

Explanation

No update entry applied for modify entry operation because no update entry was specified.

Action

Set the update entry.

CTGDIN0013E The modify entry operation failed because it was a delta modify and no '$dn' attribute was provided in either the conn entry or the link criteria.

Explanation

See message.

Action

Set the $dn attribute in conn entry or link criteria.

CTGDIN0014E The modify entry operation failed because no distinguished name was found in existing entry.

Explanation

See message.

Action

Provide required distinguished name in the Entry.

CTGDIN0015I The modify entry for the modify operation is ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0016I The modify operation will rename entry ''*old DN*'' to ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0017E The deleteEntry method was called with no '$dn' attribute or link-criteria.

Explanation

No specified $dn attribute or link-criteria.

Action

Set $dn attribute or link-criteria.

CTGDIN0018I The deleteEntry method was called with '$dn' attribute equal to ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0019I No DSML response returned from server.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0020I No message body returned from server.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0021I No response returned from DSML server.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0022E Received a error DSML response Entry. Entry attribute information: dsml.operation attribute:*attribute value*, dsml.errorType attribute:*attribute value*, dsml.message attribute:*attribute value*.

Explanation

errorResponse accepted.

Action

No action is required.

CTGDIN0023I Received a search DSML response Entry. Entry attribute information: dsml.operation attribute:*attribute value*, dsml.resultcode attribute:*attribute value*, resultDescr:*attribute valuer*, dsml.error attribute:*attribute value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIN0024E Received a search DSML response Entry. Entry attribute information: dsml.operation attribute=*attribute value*, dsml.resultcode attribute:*attribute value*, dsml.resultdescr attribute:*attribute value*, dsml.error attribute:*attribute value*.

Explanation

See message.

Action

No action is required.

CTGDIN025I Connector will not use SOAP binding.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM001E Required parameter is missing: ''*parameter*''.

Explanation

The specified required parameter is not set.

Action

Set the specified parameter.

CTGDIM002I The Parser is running in server mode.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM003I The Parser output indention is disabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM004I Soap envelope enabled in the Parser.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM005E Failed to read DSML because input stream was not found. The input or output modes of the DSMLv2 Parser may not be valid.

Explanation

See message.

Action

Check the input and output modes of the DSMLv2 Parser.

CTGDIM006I Initializing DSML Input Document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM007E The DSML document being parsed has no root node.

Explanation

See message.

Action

Verify that the DSML document being passed to the Parser has a root node.

CTGDIM008I Reading batchRequest.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM009I Reading batchResponse.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM010E Failed to write DSML because output stream was not found. The input or output modes of the DSMLv2 Parser may not be valid.

Explanation

See message.

Action

Check the input and output modes of the DSMLv2 Parser.

CTGDIM011I Initializing Output Document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM012I Parser configured to resume on error.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM013I Parser will perform parallel processing.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM014I Parser configured so that responses will be unordered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM015E Message type not supported while reading an Entry: *DSML operation*.

Explanation

The message that must be parsed is not a supported type.

Action

Check documentation of supported types of messages, provide requests that has only this types.

CTGDIM016E Error while transforming DOM to string: *exception*

Explanation

An unrecoverable error occured during the course of transforming DOM to string.

Action

Check the syntax of message in the request.

CTGDIM017W An error occured while flushing the SOAP message: *exception*

Explanation

See message

Action

Check configuration of the server that should receive the message.

CTGDIM018I Base64 decoding attribute: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM019I Attribute *attribute anem* is specified as binary attribute but the value received is not Base64 encoded. A value of NULL will be assigned.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIM020E The required attribute 'principal' was not set for the authorization request.

Explanation

The mandatory required principal attribute is not set for the authorization request.

Action

Set the principal attribute.

CTGDIM021E The required attribute 'DN' was not set for the search request.

Explanation

The mandatory DN attribute is not set for the search request.

Action

Set the DN attribute.

CTGDIM022W Error on base64 decoding: *entry*.

Explanation

This error occurs when all binary attribute values of the Entry are decoded on base64.

Action

No action is required.

CTGDIM023E The required attribute 'DN' was not set for the modify request.

Explanation

The mandatory DN attribute is not set for the modify request.

Action

Set the DN attribute.

CTGDIM024E The required attribute 'modification' was not set for modify request.

Explanation

The mandatory modification attribute is not set for modify request.

Action

Set the modification attribute.

CTGDIM025E The required attribute 'DN' was not set for the add request.

Explanation

The mandatory DN attribute is not set for the add request.

Action

Set the DN attribute.

CTGDIM026E Attribute not set for the add request: *attribute name*.

Explanation

The dsml attribute must be provided when creating and writing an add request

Action

Set the correct dsml attributes.

CTGDIM027E The required attribute 'DN' was not set for the delete request.

Explanation

The mandatory DN attribute is not set for the delete request.

Action

Set the DN attribute.

CTGDIM028E The required attribute 'DN' was not set for the modifyDN request.

Explanation

The mandatory DN attribute is not set for the modifyDN request.

Action

Set the DN attribute.

CTGDIM029E The required attribute 'newRDN' was not set for the modifyDN request.

Explanation

The mandatory newRDN attribute is not set for modifyDN request.

Action

Set the newRDN attribute.

CTGDIM030E The required attribute 'DN' was not set for the compare request.

Explanation

The mandatory DN attribute is not set for the compare request.

Action

Set the DN attribute.

CTGDIM031E Assertion is not set for the compare request.

Explanation

See message.

Action

Set the correct dsml attributes.

CTGDIM032E The required attribute 'abandonID' not set for the abandon request.

Explanation

The Mandatory abandonID attribute is not set for the abandon request.

Action

Set the abandonID attribute.

CTGDIM033E The required attribute 'requestName' was not set for the extended request.

Explanation

The mandatory requestName attribute is not set for the extended request.

Action

Set the requestName attribute.

CTGDIM034E The required attribute 'requestValue' was not set for the extended request.

Explanation

The mandatory requestValue attribute is not set for the extended request.

Action

Set the requestValue attribute.

CTGDIM035E The searchResultEntry was not set while creating the search request.

Explanation

See message.

Action

Set the searchResultEntry in the attribute in the Entry.

CTGDIM036E The searchResultEntry was not set while creating the search response.

Explanation

See message.

Action

Set searchResultEntry in the attribute in the Entry while writing search response.

CTGDIM037E The require attribute 'errorType' not set for the error response.

Explanation

The mandatory errorType attribute is not set for the error response.

Action

Set error type attribute.

CTGDIM038E Unable to write the Entry. The required attribute 'dsml.operation' was missing from the Entry.

Explanation

See message.

Action

Set the specified attribute.

CTGDIO001I Exiting initialization early because Connector already initialized with a java.net.Socket object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO002I Connector will use SOAP binding.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO003I Using provided java.net.Socket object for DSML client session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO004I No DSML request available from client.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO005W Exception while authenticating to HTTP Parser: *exception*

Explanation

See message.

Action

No action is required.

CTGDIO006W No message body available from client.

Explanation

Request from the client has no message body. Request cannot be processed.

Action

Check the client request structure and body.

CTGDIO007W Failed to initialize the DSML v2 SOAP Server Connector because the DSML Parser could not be initialized. Exception encountered: *exception*

Explanation

See message.

Action

No action is required.

CTGDIO008E The 'dsmlPort' parameter must be set to use the DSML v2 SOAP Server Connector.

Explanation

The required parameter dsmlPort was not specified in the DSML v2 SOAP Server Connector.

Action

Specify the dsmlPort parameter in the Connector.

CTGDIO009I Listening for DSML SSL connections on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0010I Listening for DSML connections on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0011I DSML v2 SOAP Server Connector closed client connection.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0012I Terminate server request received.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0013I Creating dummy connection using IP Address ''*IP Address*'' and port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0014W Encountered an IOException on unblocking the DSML v2 SOAP Server Connector's server socket: *exception*

Explanation

See message.

Action

No action required.

CTGDIO0015I DSML v2 SOAP Server Connector is already terminating. Not sending termination request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0016I Sending termination request to the DSML v2 SOAP Server Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0017E Server Socket is not open, cannot accept client requests.

Explanation

DSMLv2 SOAP Server Connector cannot listen on a specified port and cannot accept client connections.

Action

Check parameters that specified the port of the Server Socket, check that this port is not used yet.

CTGDIO0018I Connector terminated by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO0019W Authentication failed. Client could not authenticate more than 3 times. Exiting...

Explanation

See message.

Action

No action is required.

CTGDIO0020I The user name is set to ''*user name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIO021I Connector will not use SOAP binding.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK201W The Connector has overridden the Server Location parameter: '*new value*'.

Explanation

The connector will use the new value specified in the Advanced Properties section.

Action

Verify that the Advanced Properties section does not contain a ServerLocation property.

CTGDJK20wW The connector has overridden the Server Port parameter: '*new value*'.

Explanation

The connector will use the new value specified in the Advanced Properties section.

Action

Verify that the Advanced Properties section does not contain a ServerPort property.

CTGDJK103I Initialization successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK104I Waiting *number of seconds* second(s) for an event to occur.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK105I Getting an event from the cache.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK106I Waiting for an event to occur...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK107I Sending event: *raw message text*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK208E Error sending event. Error code: '*error code*'

Explanation

An error was encountered while sending an event to the remote server.

Action

Check that the remote server is reachable.

CTGDJK109I Termination successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK110I Received event: '*event raw text*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK111I The Event contains *number of entries* entry(s).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK212E Error parsing event message: '*event raw text*'.

Explanation

The underlying framework was unable to parse the received message.

Action

Check the configuration settings of the remote server, as well as the connector's configuration.

CTGDJK213E Error processing mapping file: *exception*.

Explanation

See the message for more details.

Action

Check whether the schema file name is specified correctly and that the file exists.

CTGDIA001E The perform method of the Function Component was not passed an object of type com.ibm.di.entry.Entry. This object is not a valid parameter to pass to perform method.

Explanation

A parameter of type different from com.ibm.di.entry.Entry was passes to the perform method.

Action

Verify that the parameter being manually passed to the perform method of Function Component (for example from a Script Component) is an object of type com.ibm.di.entry.Entry.

CTGDIA002E Error occurred while converting the Data Objects to XML: *exception*

Explanation

The specified error occurred while converting the structure of Data Objects to an XML document.

Action

Make sure the data objects are consistent with the XML Schema file.

CTGDIA003E Required Function Component parameter ''*parameter name*'' is not set.

Explanation

The specified required Function Component parameter is not set.

Action

Set the specified Function Component parameter.

CTGDIA004E Invalid prefix to namespace URI mapping on line ''*line number*''.

Explanation

The format of the prefix to namespace URI mapping is invalid on the specified line.

Action

Check the namespaceMap parameter of the Function Component.

CTGDIA005E An error occurred while processing the XML Schema file ''*file name*'': *exception*

Explanation

The specified error occurred while processing the XML Schema file.

Action

Verfiy the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIA006E There is no feature representing the XML element or attribute with name ''*attribute name*''.

Explanation

The EClass object has no feature representing the XML element or attribute with the specified name.

Action

Check the names of the Entry Attributes to conform to the XML Schema name.

CTGDIA007E There are siblings from the same namespace with case-insensitive equality in names: ''*feature name*''.

Explanation

The element with the specified name has a sibling with a case-insensitive equal name and the elements are from the same namespace.

Action

Change the name of the siblings so there is no case-insensitive equality.

CTGDIA008E There are siblings from different namespaces with case-insensitive equality in names, and the names are not namespace prefixed: ''*feature name*''.

Explanation

The element with the specified name has a sibling with case-insensitive equal name, from a different namespace. The names are not namespace prefixed.

Action

Change the name of the siblings or should use the useNamespace parameter so the names are prefixed.

CTGDIA009E The ''*feature name*'' XML element or attribute is invalid according to the XML Schema.

Explanation

The specified name is an invalid XML element or attribute according to the XML Schema.

Action

Check the names of the XML elements and attributes in the names of the Entry Attributes to conform with the XML Schema.

CTGDIA010E The Entry Attribute ''*attribute name*'' specifies an XML element or attribute with ancestor ''*feature name*'' that has a sibling with the same name.

Explanation

The specified Entry Attribute refers to an XML element or attribute with ancestor that has a sibling with the same name.

Action

Do not specify an XML element or attributes with an ancestor that has a sibling with the same name. Remove the specified Entry Attribute from the mapping or

ensure that the XML element or attribute has no ancestor with a sibling with the same name.

CTGDIA011E The XML Schema does not define a root element.

Explanation

See message.

Action

Verify the XML Schema defines a root element and if it does not, the XML Schema should be changed to define a root element.

CTGDIA012I The XML Schema has been successfully parsed and an Ecore model has been created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA013I The Entry Attributes have been successfully applied to the data structure.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA014I The parameter ''*parameter name*'' initialized with a value of ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA015E An error occurred while processing the XML Schema file ''*file name*'': ''*diagnostic message*''.

Explanation

The error occurred while processing the XML Schema file.

Action

Verify the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIA016E An error occurred while processing the XML Schema file ''*file name*''.

Explanation

The error occurred while processing the XML Schema file.

Action

Verify the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIA017E An error occurred while processing the XML Schema file ''*file name*'': *exception*

Explanation

The specified error occurred while processing the XML Schema file.

Action

Verify the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIA018I The XML that results from conversion from the DOM Element to XML is: *xml data*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIA019E Invalid value encountered in attribute ''*attribute name*'' ''*attribute value*''.

Explanation

The Function Component encountered an invalid value for an Enumeration data type in the Attribute Map.

Action

Verify the value set for the specified attribute is valid according to the xml schema being used by the Function Component.

CTGDIB001E The perform method of the Function Component was not passed an object of type com.ibm.di.entry.Entry. This object is not a valid parameter to pass to perform method.

Explanation

A parameter of type different from com.ibm.di.entry.Entry was passes to the perform method.

Action

Verify that the parameter being manually passed to the perform method of Function Component (for example from a Script Component) is an object of type com.ibm.di.entry.Entry.

CTGDIB002E The Entry Attribute ''*attribute name*'' is not present in the Entry.

Explanation

The expected Entry Attribute is not present in the Entry.

Action

Verify the specified Entry Attribute is properly mapped to the connection Entry.

CTGDIB003E Error occurred while processing the XML document: *exception*

Explanation

The specified error occurred while processing the XML document. This error normally occurs when the XML document is not well formed or is not valid according to the XML Schema.

Action

Verify the XML document passed to the Function Component is well formed and valid according to the XML Schema.

CTGDIB004E The required Function Component parameter ''*parameter name*'' is not set.

Explanation

The specified required Function Component parameter is not set.

Action

Set the specified Function Component parameter.

CTGDIB005E Invalid prefix to namespace URI mapping on line ''*line number*''.

Explanation

The format of the prefix to namespace URI mapping is invalid on the specified line.

Action

Check the namespaceMap parameter of the Function Component.

CTGDIB006E An error occurred while processing the XML Schema file ''*file name*'': *exception*

Explanation

The specified error occurred while processing the XML Schema file.

Action

Verify the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIB007E There are siblings from the same namespace with case-insensitive equality in names: ''*feature name*''.

Explanation

The element with the specified name has a sibling with case-insensitively equal name and the elements are from the same namespace.

Action

Change the name of the siblings so there is no case-insensitive equality.

CTGDIB008E There are siblings from different namespaces with case-insensitive equality in names, and the names are not namespace prefixed: ''*feature name*''.

Explanation

The element with the specified name has a sibling with case-insensitive equal name, from a different namespace. The names are not namespace prefixed.

Action

Change the name of the siblings or should use the useNamespace parameter so the names are prefixed.

CTGDIB009I The parameter ''*parameter name*'' initialized with a value of ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIB010I The XML parsing has been completed. Data Objects have been successfully created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIB011I The Entry Attributes have been successfully created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIB012I The XML Schema has been successfully parsed and an Ecore model has been created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIB013I The Ecore model has been successfully checked for conformity.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIB014E An error occurred while processing the XML Schema file ''*file name*'': ''*diagnostic message*''.

Explanation

The specified error occurred while processing the XML Schema file.

Action

Verify the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIB015E An error occurred while processing the XML Schema file ''*file name*''.

Explanation

The specified error occurred while processing the XML Schema file.

Action

Verify the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIB016E An error occurred while processing the XML Schema file ''*file name*'': ''*diagnostic message*''.

Explanation

The specified error occurred while processing the XML Schema file.

Action

Verify the if the XML Schema file is well-formed and valid according to the XML Schema specification.

CTGDIB017E The Entry Attribute ''*attribute name*'' is not present in the Entry.

Explanation

The expected Entry Attribute is not present in the IBM Security Directory Integrator Entry.

Action

Verify the specified Entry Attribute is properly mapped to the connection Entry.

CTGDIB018I The XML resulting from the converion from DOM Element is: *xml data*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT001E The 'filePath' parameter must be set to use the File Connector.

Explanation

The required parameter filePath was not specified in the File Connector.

Action

Specify the filePath parameter in the Connector.

CTGDIT002I File Connector waiting for data. On attempt ''*attempt count*'' and will timeout after attempt ''*maximum number of attempts*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT003E The 'filePath' parameter must be set to use the File Connector to a open file for reading.

Explanation

The required parameter filePath was not specified in the File Connector. Must be specified to open a file for reading.

Action

Specify the filePath parameter in the Connector.

CTGDIT004E The 'filePath' parameter must be set to use the File Connector to a open file for writing.

Explanation

The required parameter filePath was not specified in the File Connector. The parameter must be specified to open a file for writing.

Action

Specify the filePath parameter in the Connector.

CTGDIT008E File Connector timed out while waiting for lock on file.

Explanation

The File Connector must be able to lock the file it is going to read from or write to.

Action

Verify that the program has permissions to read from or write to the file. Also, verify the file is not currently being used or locked by another program.

CTGDIT010I Open input: *path*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT011I Open output: *path*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT051E The starting directory path is not specified.

Explanation

The 'Directory Path' parameter in the configuration of the Connector is not set.

Action

Set the 'Directory Path' parameter in the configuration of the Connector.

CTGDIT052E The depth parameter can not be negative.

Explanation

The 'Depth' parameter is a negative number.

Action

Either leave the 'Depth' parameter blank or provide a non-negative value.

CTGDIT053E The glob pattern '*glob pattern*' is invalid.

Explanation

The given filter is not a correct glob pattern.

Action

Check the documentation of the Connector and modify the filter so that it matches the glob syntax.

CTGDIT054I No permission to read '*directory*' directory.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT055I '*file*' does not exist.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT056I Full Path '*full path*' criteria is used. Connector will skip Lookup and use the specified file or directory directly.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT057I Read only file '*file*' is deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT058E File '*file*' is read-only.

Explanation

The specified file is Read-Only and cannot be deleted without the 'Force Delete' option.

Action

Enable the 'Force Delete' option in the configuration of the Connector.

CTGDIT059I Non-empty directory '*directory*' is deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIT060E Directory '*directory*' is not empty.

Explanation

The specified directory is not empty and cannot be deleted without the 'Force Delete' option.

Action

Enable the 'Force Delete' option in the configuration of the Connector.

CTGDIT061E Deleting '*file*' failed.

Explanation

The 'Force Delete' operation failed.

Action

This operation relies on file system specific capabilities.

CTGDIT062E '*file*' is not a directory.

Explanation

The provided 'Directory Path' in not a real directory.

Action

Provide a correct starting directory path.

CTGDIT063E The name of the file or directory is not specified. At least the 'fullPath' or 'name' attribute must be provided in the Output Map.

Explanation

The file cannot be named with the provided information.

Action

Provide the 'fullPath' or 'name' attribute in the Output Map.

CTGDIT064E '*file*' already exists.

Explanation

The specified file or directory already exists on the file system.

Action

Provide information for a non-existent file or directory.

CTGDIT065E Directory '*directory*' could not be created.

Explanation

A problem occurred during the directory creation.

Action

This operation relies on file system specific capabilities.

CTGDIT066E File '*file*' could not be created.

Explanation

A problem occurred during the file creation.

Action

This operation relies on file system specific capabilities.

CTGDIT067E '*file*' could not be made Read-Only.

Explanation

A problem occurred when setting the Read-Only flag.

Action

This operation relies on file system specific capabilities.

CTGDIT068E Dates must use format: *date format*

Explanation

A Date attribute in the Link Criteria is not formatted correctly.

Action

Provide a value in accordance with the specified format.

CTGDIT069E Copying '*from file*' to '*to file*' failed.

Explanation

The copy operation has failed.

Action

This operation relies on file system specific capabilities.

CTGDIT070E Moving '*from file*' to '*to file*' failed.

Explanation

The move operation has failed.

Action

This operation relies on file system specific capabilities.

CTGDIT071E Boolean attributes expect values true or false.

Explanation

A Boolean attribute in the Link Criteria has an incorrect value.

Action

Provide a correct value for the Boolean attribute.

CTGDJZ801I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ802E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the File Transfer Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDJZ803I File Transfer Function Component will work FTP file transfer mode set to: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ804I File Transfer Function Component will work 'Convert source file to character set of target system' option set to: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ805I File Transfer Function Component will work 'Enable SSL for AS400 connection' option set to: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ806I File Transfer Function Component will use '*value*' for AS400 connections.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ807I The parameter *param name* is not specified. Default connection protocol '*value*' will be used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ808I The value of Source parameter *param name*is set with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ809I The value of Target parameter *param name*is set with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ810I The direction of the file transfer is: '*value*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ811E Unable to determinde the direction of the file transfer.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ812I File Transfer Function Component is establising connection to the host: '*value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ813I File Transfer Function Component has successfully established a connection to the host: '*value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ814E File Transfer Function Component could not establish a connection to the host: '*value*

Explanation

A connection to the target machine is not possible because the connection parameters provided are not valid, or because of problems with the network.

Action

Verify that the connection parameters are valid and that the network connection to the target is active and then try again the connection.

CTGDJZ815E File Transfer Function Component could not establish a connection to the target machine.

Explanation

A connection to the target machine is not possible because the connection parameters provided are not valid, missing connection parameters or because of problems with the network.

Action

Verify that the connection parameters are valid and that the network connection to the target is active and then try again the connection.

CTGDJZ816E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed to establish the FTP connection.

Action

Provide a value for this parameter.

CTGDJZ817E File Transfer Function Component accepts only a IBM Security Directory Integrator Entry as input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

File Transfer Function Component expects only a IBM Security Directory Integrator Entry as input. Check the AL logic and try again.

CTGDJZ818I The value of configuration parameter '*param*' set in configuration GUI has been overridden to '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ819E An invalid connection type has been specified. The valid values for the 'connectionType' parameter are: 'RSH', 'SSH', 'REXEC', 'AS400', 'WIN' and 'FTP'.

Explanation

The value for the 'connectionType' parameter should be one of the following: "RSH", "SSH", "REXEC", "AS400", "WIN", "FTP".

Action

Verify that the 'connectionType' parameter has been set to an appropriate value. The valid values for this parameter are: "RSH", "SSH", "REXEC", "AS400", "WIN", "FTP".

CTGDJZ820E Not all parameters have been provided. Ensure you have provided a hostname and username. For an REXEC, FTP and Windows connection you will also need to provide a password. For an SSH connection you have the option of providing a password OR a keystore (with associated passphrase if applicable).

Explanation

Not all required properties have been configured for the Function Component.

Action

Ensure you have provided a hostname and username. For an REXEC, FTP and Windows connection you will also need to provide a password. For an SSH connection you have the option of providing a password OR a keystore (with associated passphrase if applicable).

CTGDJZ821E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the File Transfer Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDJZ822E Unable to delete temporary file '*param name*'.

Explanation

The specified file might be in use.

Action

Please delete the file manually.

CTGDJZ823E Target file path '*param name*' is same as Source file path, unable to transfer file.

Explanation

Source and Target file paths should not be same.

Action

Please specify a different Target file path.

CTGDJZ824E Source file path '*param name*' not found.

Explanation

Source file path should be existing.

Action

Please specify a different Source file path.

CTGDJZ825E Target file '*param name*' might be in use or read-only or target path does not exist.

Explanation

Target file should not be in use or read-only, also the target path should exists.

Action

Please specify a different Target file path.

CTGDJZ826E File Transfer Function Component could not establish a connection to the target machine using given parameters in Configuration Editor. File Transfer Function Component will continue, if any attribute mapping provided in runtime.

Explanation

This exception occures because there might be invlid connection parameters provided in Configuration Editor either in Source or Target section.

Action

Verify that the connection parameters are valid and that the network connection to the target is active and then try again the connection.

CTGDJZ827E Specified target directory '*param name*' does not exist.

Explanation

Target directory path should exists on the target machine.

Action

Please specify a different Target directory or select 'Create Directory' check-box in configuration panel.

CTGDJZ828E Unable to create specified target directory '*param name*'

Action

Please check you have proper access to create specified target directory.

CTGDJY101I Parser set padding character to ''*character*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIP001I Connector terminating: ''*Connector name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIP002W Exception encountered while closing socket connection to ftp server: ''*error*''

Explanation

An exception was encountered while trying to close the socket connection to ftp server. The exception was caught and the program will continue running.

Action

No action is required.

CTGDIP003I Opening connection to FTP Server: ''*hostname*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIP004I Logging onto FTP server with user ID ''*user ID*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIP005I Using FTP operation ''*operation*'' at server location ''*location*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIP006E The 'ftpHost' parameter must be set to use the FTP Client Connector.

Explanation

The required parameter ftpHost was not specified in the FTP Client Connector.

Action

Specify the ftpHost parameter in the Connector.

CTGDKK101E The 'configFile' parameter must be set to use the GLA Connector.

Explanation

The required parameter configFile is not set in the GLA Connector.

Action

Specify the path to the adapter configuration file in the configFile parameter.

CTGDKK102E The adapter configuration file is not valid: *exception message*.

Explanation

The given configuration file is not valid. See the exception message for more information.

Action

Correct the adapter configuration file and try again.

CTGDKK103I The adapter configuration file is validated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK104I The adapter configuration file is started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK105E The execution of the adapter configuration file failed: *Exception message*

Explanation

An Exception occurred during the execution of the adapter configuration file. See the Exception message for more information.

Action

See the Exception message for more information.

CTGDKK106E There is no registered GLAConnector matching the specified in the TDIOutputter 'tdi_correlation_id' parameter: *Correlation ID*.

Explanation

The Hashtable of the TDIOutputter does not contain a Connector registered to the specified 'tdi_correlation_id'.

Action

Specify a correct value in the TDIOutputter 'tdi_correlation_id' parameter.

CTGDKK107E There are more than one configured TDIOutputters in the adapter configuration file.

Explanation

The GLAConnector allows only one TDIOutputter to be configured in the adapter configuration file.

Action

Put only one TDIOutputter in the adapter configuration file.

CTGDKK108E An exception occurred while converting the XML file to Document object: *exception message*

Explanation

There are several possible reasons for this exception. A DocumentBuilder may not have been able to be created which satisfied the configuration requested. An IO error occurred. Or, a parse error occurred.

Action

See the Exception message for more information.

CTGDKK109E The given adapter configuration file does not have a configured TDIOutputter.

Explanation

The GLAConnector needs a TDIOutputter to be configured in the adapter configuration file in order to receive the CBE objects.

Action

Set a TDIOutputter in the adapter configuration file and try again. Refer to the GLAConnector documentation about how to configure the TDIOutputter.

CTGDJP201I Finding entries with URL set to *URL*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP202E Unable to send request to HTTP Server because an invalid protocol *protocol* was specified in the URL.

Explanation

See message.

Action

Verify the URL specified contains a valid protocol for the HTTP Client Connector. Valid values for the protocol are http and https.

CTGDJP203I Connected to *URL*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ651E Attribute *attribute* does not accept value '*value*'.

Explanation

The specified value is not supported by that parameter. For instance the '$operation' attribute of this Connector accepts the following string values: 'create', 'modify', 'delete' (case insensitive). If something else is passed into the attribute this error will occur.

Action

Provide valid values for the Connector's parameters. Consult the documentation for the supported ones.

CTGDJZ652E The IdML book is opened in REFRESH mode and supports only CREATE operations.

Explanation

The IdML book this Connector is working with has been opened in Refresh mode, meaning only 'create' operations may be used for it.

Action

Set the operation to 'create' from the '$operation' attribute or as a delta operation (i.e. the operation set to delta tagged entry will override the operation attribute of the Connector). Alternatively, change the book mode to Delta (from the Open IdML Function Component).

CTGDJZ653E No class type specified in the configuration of the IdML Ci and Relationship Connector.

Explanation

In order to discover the schema of this Connector, the class type parameter must be provided. Otherwise the Component does not know which attributes to display.

Action

Set the required Class Type parameter from IdML Ci and Relationship Connector's configuration panel.

CTGDJZ654I IdML Ci and Relationship Connector will work with book: *book name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ655I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ656I The name of the currently used book '*book name*' has been overridden to '*new name*'.

Explanation

No additional information is available for this message.

Action

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJR016E The entry does not contain a valid changelog entry (changes attribute missing) for operation: *operation type*.

Explanation

See message.

Action

Put a valid 'changes' attribute in the entry.

CTGDJR017E LDIF Parser could not parse 'changes' attribute from the entry.

Explanation

See message.

Action

Put a valid 'changes' attribute in the entry.

CTGDJR018I The attributes does not contain 'lastchangenumber' attribute.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJR019E Could not retrieve the last change number.

Explanation

Attributes do not contain 'lastchangenumber' attribute.

Action

No action is required.

CTGDJR020E Could not store the change number value in the System Store. Exception occurred: *exception*

Explanation

The method storeChangenumberForNextSynch fails trying to set a property in the System Store.

Action

Check the System Store.

CTGDJR021I The current change number value is: *change number*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJR022I A NamingExceptionEvent occurred: *event*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJR023I A notification event was received: *event*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJR024E Restart info does not contain 'changeNumber' attribute.

Explanation

See message.

Action

No action is required.

CTGDJR025W Exception occurred while terminating the Connector: *exception*

Explanation

See message.

Action

No action is required.

CTGDJR026W The iterator state key is not specified. No state will be stored. The Start At parameter's value will be used.

Explanation

See message.

Action

Specify the iterator state key if you want the state of the changelog connector to be saved.

CTGDJZ401E An Exception occurred when using the Naming and Reconciliation Service API.

Explanation

The Component was not able to use the IT registry Naming and Reconciliation Service. Check the provided Exception for details.

Action

For more information please refer to the logs of the Naming and Reconciliation Service API.

CTGDJZ402E An Exception occurred during a database operation when using Naming and Reconciliation Service API.

Explanation

The Component was not able to use the IT registry database. Check the provided Exception for details.

Action

For more information please refer to the logs of Naming and Reconciliation Service API.

CTGDJZ403I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ404I Init IT registry Function Component will work with book: '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ405I Init IT registry Function Component will work with Refresh set to: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ406I The Common Data Model version of the registered MSS will be '*cdm version*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ407E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the Init IT registry Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDJZ408I Use an IT registry system for the needed meta-data: '*use it registry*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ409E Init IT registry Function Component accepts only a IBM Security Directory Integrator Entry as input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

Init IT registry Function Component expects only a IBM Security Directory Integrator Entry as input. Check the AL logic and try again.

CTGDJZ410E The Common Data Model version specified '*param name*' is not a valid Common Data Model version.

Explanation

The Common Data Model version should be in a format of three dot-separated numbers.

Action

Please specify value of Common Data Model version in a format of three dot-separated numbers.

CTGDJZ411I The MSS's *param name* has value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ412E Either MSS Name or Manufacturer Name, Hostname and Product Name are not set in output map of FC.

Explanation

Either MSS Name or Manufacturer Name, Hostname and Product Name are mandatory for an MSS registration.

Action

Please provide the listed information in the FC's Output Map.

CTGDJZ413E The Common Data Model version is not set in configuration panel of FC.

Explanation

Common Data Model version is mandatory for an MSS registration.

Action

Please provide a valid Common Data Model version in the FC's Configuration panel.

CTGDJZ414I The name of the currently used book '*book name*' has been overridden to '*new name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ415E JDBC parameter '*param name*' is not set in Configuration panel of FC and can not be read from the IT registry's properties file.

Explanation

This JDBC parameter is mandatory for an MSS registration.

Action

Please provide this parameter either in Configuration panel or in IT registry's properties file.

CTGDJZ416I Init IT registry Function Component has already opened book '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ417E The book '*book name*' is opened and currently used.

Explanation

The book with the provided book name is currently in use by another Init IT registry Function Component. It will have to release it before this Component can use it.

Action

Check if there is another running AssemblyLine with IT registry Components. If the problem persists either provide another book name for your IT registry Components or restart the SDI server.

CTGDIZ401I There was no SOAP response header.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ402E Parameter 'wsdlUrl' is empty.

Explanation

See message.

Action

Specify a valid 'wsdlUrl' parameter in the FC.

CTGDIZ403I Parameter 'wsdlUrl': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ404E Parameter 'soapOperation' is empty.

Explanation

See message.

Action

Specify a valid 'soapOperation' parameter in the Function Component.

CTGDIZ405I Parameter 'soapOperation': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ406I Parameter 'providerUrl': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ407I Parameter 'returnXMLType': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ408E Invalid value for 'returnXMLType': *parameter value*.

Explanation

See message.

Action

Specify a valid 'returnXMLType' parameter in the Function Component.

CTGDIZ409I Parameter 'inputType': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ410E Invalid value for 'inputType': *parameter value*.

Explanation

See message.

Action

Specify a valid 'inputType' parameter in the Function Component.

CTGDIZ411I SOAP request Attribute: *mInputAttr*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ412I SOAP response Attribute: *attribute*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ413E Entry Attribute ''*attribute*'' is missing.

Explanation

See message.

Action

Check the attributes in the entry.

CTGDIZ414I About to call web service at *provider URL* using:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ415I SOAP Action: *SOAP action*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ416I SOAP request: *SOAP request*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ417I Called successfully web service at *provider URL*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ418I SOAP response: *SOAP response*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ419I SOAP response header: *SOAP response header*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ420I SOAP response body: *SOAP response body*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ421I Web service is one way: *boolean*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ422E The SOAP request message is not initialized.

Explanation

The Function Component has not received a SOAP request message. It should receive the message either as XML DOM Element or as XML String Java object.

Action

Check the AssemblyLine logic and try again.

CTGDIZ423E Invalid object recieved: *object*.

Explanation

The Function Component has not received a SOAP request message. It must receive the message either as XML DOM Element or as XML String Java object.

Action

Check the AssemblyLine logic and try again.

CTGDIH401I ISAM v2 Connector version *version* .

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH402I ISAM Initialization is successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH403E ISAM Initialization failed: *exception*

Explanation

The ISAM Connector was not able to complete initialization.

Action

Use the logged exception to understand what caused the problem, and correct it.

CTGDIH404E The specified Distinguished Name (secDN) does not exist: *dn*

Explanation

The import of the specified user failed, because the user could not be found.

Action

Verify that the Distinguished Name (DN) references an existing user.

CTGDIH405I User *name* import is successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH406E An invalid group identification or Distinguished Name was specified: *dn*

Explanation

The import of the specified group failed, because the group could not be found.

Action

Verify that the group identification or Distinguished Name (DN) references an existing group.

CTGDIH407I Group *name* import is successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH408E The ISAM API configuration file must be defined.

Explanation

The parameter ISAM API configuration file must have a value.

Action

Set the parameter ISAM API configuration file to a correct file.

CTGDIH409W Error removing user *userId* from the group *groupName*: *exception*.

Explanation

An exception occurred when removing the user from the group.

Action

Check the exception for more information about the problem that occurred. Determine if further action is needed.

CTGDIH410E Group *groupName* was not found.

Explanation

The group could not be found when trying to add or delete a member from the named group.

Action

Verify the group name.

CTGDIH411W Unable to add user *userId* to group *groupName*: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH412W Unable to delete user *userId* from group *groupName*: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH413E Mandatory attribute *name* missing from Output Map.

Explanation

The specified mandatory attribute could not be found in the entry that was provided to the connector.

Action

Provide the mandatory attribute.

CTGDIH414E No entry found to modify.

Explanation

When trying to modify an entry, the current entry was not found.

Action

Make sure that the modify operation is called only when there is an entry to modify.

CTGDIH415E No entry found to delete.

Explanation

When trying to delete an entry, the current entry was not found.

Action

Make sure that the delete operation is called only when there is an entry to delete.

CTGDIH416E Unable to delete an entry because the naming attribute *name* not found in entry.

Explanation

When trying to delete an entry, the mandatory naming attribute was missing, and therefore the entry could not be deleted.

Action

Make sure that the entry contains the naming attribute.

CTGDIH417E This connector only supports the following operators: Equals, Contains, starts With and ends With

Explanation

The link criteria contains an unsupported operator. The connector was unable to do the search.

Action

Use one of the supported operators.

CTGDIH418E Negate not supported for Link Criteria.

Explanation

The connector was unable to do the search because the link criteria contained a negated operation.

Action

Try to write the Link Criteria without using negate.

CTGDIH419E This connector only supports searching for the naming attribute (*name*).

Explanation

The connector is only able to use the naming attribute for searching.

Action

Only use the naming attribute for searching.

CTGDIH420 No Link Criteria defined.

Explanation

The link criteria list was empty.

Action

Please provide at least one link criteria.

CTGDIR301I Password not specified. Will use empty string value for password.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR302E Required parameter is missing: *parameter name*.

Explanation

See message.

Action

The specified parameter of the ITIM Agent Connector should be checked.

CTGDIR303I The selectEntries method will perform Agent search with filter: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR304I The selectEntries method's search returned at least one Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR305I No Entries returned by search in the selectEntries method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR306I The getNextEntry method has no more Entries to return.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR307E The putEntry method could not add new Entry. Exception occurred: *exception*

Explanation

Could not create the new JNDI Entry.

Action

Check the DN attribute $dn in the entry.

CTGDIR308E Unable to add Entry. The naming attribute $dn was not specified in Entry.

Explanation

The DN attribute $dn is null.

Action

Check the DN attribute $dn in the entry.

CTGDIR309E Unable to modify the Entry because the Entry to modify was not found.

Explanation

See message.

Action

Check the Search Criteria.

CTGDIR310E The modEntry was unable to modify the Entry because the aOldEntry parameter passed in was null.

Explanation

The parameter aOldEntry of the method modEntry is null.

Action

Check the old entry parameter and verify that value is not null.

CTGDIR311I No distinguished name was given to the modEntry method. Will use the existing one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR312E Unable to modify entry. The entry is missing the naming attribute.

Explanation

No distinguished name attribute existing in the old Entry.

Action

Check the entry attribute $dn.

CTGDIR313I Rename entry from *old DN* to *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR314I Ignoring attribute *attribute ID*. It is empty and does not exist in the current Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR315I No modification items for entry: *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR316E The entry will not be modified. There are no modification items.

Explanation

The modification items count is zero.

Action

Check the contents of the entry.

CTGDIR317E Unable to modify entry. Exception occurred while building ModificationItems object: *exception*

Explanation

An exception was encountered when the method modEntry tried to modify the Entry.

Action

Analyse the exception.

CTGDIR318E Deletion of multiple entries not yet supported by the deleteEntry method.

Explanation

The method deleteEntry is called with no entry.

Action

Invoke the method deleteEntry with a valid entry.

CTGDIR319E The deleteEntry method was called with no $dn attribute in the Entry.

Explanation

There is no DN attribute in the entry.

Action

Check the DN attribute $dn in the entry.

CTGDIR320I Searching for Entry with $dn equal to *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR321I Search for *DN* did not return any entries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR322I The findEntry method found the Entry: *entry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR323I The findEntry method could not add found entry: *entry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR324I NULL entry returned by findEntry method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR325E Could not find a JNDI Entry with the given search criteria: *exception*

Explanation

An PartialResultException is encountered when trying to find the entry.

Action

Check the search criteria.

CTGDIR326E Could not find a JNDI Entry with the given search criteria: *exception*

Explanation

An NameNotFoundException is encountered when trying to find the entry.

Action

Check the search criteria.

CTGDIR327I The findEntry method search using the filter *filter* on the base DN *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR328I Search for Entries using the filter *filter* did not return any entries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR329I The findEntry method found the Entry: *entry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR330I The findEntry method could not add found entry: *entry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR331I NULL entry returned by findEntry method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR332E Could not find a JNDI Entry with the given search criteria: *exception*

Explanation

An PartialResultException is encountered when trying to find the entry.

Action

Check the search criteria.

CTGDIR333E Could not find a JNDI Entry with the given search criteria: *exception*

Explanation

An NameNotFoundException is encountered when trying to find the entry.

Action

Check the search criteria.

CTGDIR334I addDNFromCriteria: Vector instance.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR335I addDNFromCriteria: SearchCriteria instance.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR336I The addDNFromCriteria method was passed an SearchCriteria.rscSearch instance object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR337E Cannot mix $dn matching with other attributes in a search.

Explanation

The method addDnFromCriteria encountered a SearchCriteria object equals to $dn.

Action

Check the values in the object creteria.

CTGDIR338I The addDNFromCriteria method will add DN value to list: *search filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR339E Unknown object type in search filter: *class name*: *search filter*.

Explanation

The object in search filter must be an instance of Vector or SearchCriteria.

Action

Ensure the search filter specified is an instance of Vector or SearchCriteria.

CTGDIR340W Exception occured while trying to terminate: *exception*

Explanation

An NamingException is encountered when trying to terminate the Connector.

Action

No action is required.

CTGDJZ451E Attribute *attribute* does not accept value '*value*'.

Explanation

The specified value is not valid for this attribute. 1)If the attribute is '$operation', the following string values are valid: 'create', 'modify', 'delete' (case insensitive). If anything else is passed into the attribute an exception will occur. 2)If the attribute is 'dateFilter', it accepts a valid date in past.

Action

Provide valid values for the Connector's parameters. Consult the documentation for those that are supported.

CTGDJZ452E An IT registry book opened in REFRESH mode supports only CREATE operations.

Explanation

The IT registry Book this Connector is working with has been opened in Refresh mode, meaning only 'create' operations may be used for it.

Action

Set the operation to 'create' from the '$operation' attribute or as a delta operation (for example, the operation set to delta tagged entry will override the operation attribute of the Connector). Alternatively, change the book mode to Delta (from the Init IT registry Function Component).

CTGDJZ453E No class type specified in the configuration of the IT registry Ci and Relationship Connector.

Explanation

In order to discover the schema of this Connector, the class type parameter must be provided. Otherwise the Component does not know which attributes to display.

Action

Set the required Class Type parameter from IT registry Ci and Relationship Connector's configuration panel.

CTGDJZ454I IT registry Ci and Relationship Connector will work with book: *book name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ455I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ456I The name of the currently used book '*book name*' has been overridden to '*new name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ457I Use an IT registry system for the needed meta-data: '*use it registry*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ458I The book '*book name*' does not exist or is already closed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ459E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the IT registry Ci and Relationship Connector and must be provided.

Action

Provide a value for this parameter.

CTGDJZ460E Relationship '*relationship name*' cannot be updated.

Explanation

The specified relationship cannot be updated by the IT registry Ci and Relationship Connector and must be removed

Action

Remove this relationship or change the $operation.

CTGDJZ461E Lookup Criteria '*criterion*' is not supported.

Explanation

The specified criteria is inappropriate for IT registry Ci and Relationship Connector.

Action

Change the criterion to 'equals' or uncheck 'Match Any'

CTGDJZ462E Filter Criteria '*criterion*' is not valid

Explanation

The criteria mentioned is not in proper format for the IT registry Ci and Relationship Connector.

Action

The attributes should be mention in format as specified below: (for example, cdm:Model=T61p,cdm:Manufacturer=IBM).

CTGDJZ463E An exception occured while trying to close the database connection: *exception message*

Explanation

A database access error may had occured. See the exception message for details.

Action

No action required.

CTGDJZ464E Configuration Item '*ci name*' cannot be updated.

Explanation

The IT registry contains only identifying attributes for each Configuration Item. And since they cannot be updated, no update operation is supported by the Connector.

Action

Change the $operation of the IT registry Ci and Relationship Connector, or remove it from the AssemblyLine.

CTGDJZ465E Incorrect GUID value passed to attribute '*guid attr*'.

Explanation

The GUID attributes of the IT registry Ci and Relationship Connector require values from type 'com.ibm.di.fc.itregistry.ConfigurationItemId'. Such objects are created by both this Connector and the Init IT registry FC.

Action

Change the value of the specified attribute.

CTGDJZ466I All IT registry items will be queried.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ468E Relationship '*relationship name*' cannot be fetched as 'isDeleted' is set.

Explanation

Relationships cannot be fetched by the IT registry Ci and Relationship Connector and must be removed for such configuration.

Action

Change the artifact type or uncheck isDeleted.

CTGDJJ001E The 'method' parameter must be set to use the Java Class FC.

Explanation

The required parameter method was not specified in the Java Class FC.

Action

Specify the method parameter in the Function Component.

CTGDJJ002E The 'javaClass' parameter must be set to use the Java Class FC.

Explanation

The required parameter javaClass was not specified in the Java Class FC.

Action

Specify the javaClass parameter in the Function Component.

CTGDJJ003E Unable to locate the method ''*method name*'' in class ''*class name*''.

Explanation

The configured method in the Java Class FC could not be found.

Action

Verify that the configured Java Class and method exist and are valid. The operator should ensure the class can be found in the class path of the IBM Security Directory Integrator server.

CTGDJJ004E Unable to locate the method ''*method name*'' in class ''*class name*''.

Explanation

The configured method in the Java Class FC could not be found.

Action

Verify that the configured Java Class and method exist and are valid. The operator should ensure the class can be found in the class path of the IBM Security Directory Integrator server.

CTGDJJ005E Function Component could not perform the configured method because it expected an Entry object but encountered an object of another type.

Explanation

The Java Class Function Component expected to perform a method using an Entry object but encountered an object of a different type.

Action

Verify that the data being passed to the Java Class Function Component are valid entries.

CTGDJJ006E Function Component failed to convert the object ''*object type*'' to a Date object. Exception occurred: *exception*

Explanation

See message.

Action

Verify that the data being passed to the Java Class Function Component is of valid Java object types. Review exception to find further details on the error.

CTGDJJ007E Function Component could not convert the object ''*object type*'' with the name ''*object name*'' to class ''*class name*'' because the class type was not recognized.

Explanation

See message.

Action

Verify that the data being passed to the Java Class FC is of valid Java object types. Review the Reference Guide for more information.

CTGDIJ001E No default JDBC driver. The 'jdbcDriver' parameter must be set.

Explanation

The required parameter jdbcDriver is not set.

Action

Set the jdbcDriver parameter.

CTGDIJ002W An exception occurred while trying to disable autocommit mode in the database. The database does not allow autocommits to be disabled. Autocommit will always occur on the database itself.

Explanation

See message.

Action

No action is required. Any value configured for the parameter 'jdbcDriver' will not be used and autocommit will always occur on the database itself.

CTGDIJ003I Successfully built an entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ004W Unable to set the commit mode specified in the 'jdbcCommit' parameter with a value of ''*commit mode*''.

Explanation

The Database does not support autocommit or autocommit mode cannot be enabled.

Action

No action is required.

CTGDIJ005W Unable to obtain schema information from the database. The following exception was encountered: *error*.

Explanation

Metadata cannot be obtained due to incorrect parameter or database error.

Action

Provide correct table name and schema name.

CTGDIJ006I Executing query to catch the metadata: *meta query*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ007I JDBC provider parameter being parsed with the following value: ''*parameter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ008W JDBC provider parameter was encountered with no colon separator in line and will be skipped: ''*parameter*''.

Explanation

Extra parameters cannot be extracted.

Action

Check current Database documentation and provide correct parameters separated with colon.

CTGDIJ009I JDBC provider parameter successfully parsed. The parameter name is ''*parameter*'' and the value is ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ010I Executing a ALTER SESSION SQL statement: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ011I Executing a SELECT SQL statement to retrieve entries: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ012E Cannot execute SQL Statement: *SQL statement*.

Explanation

Error occurred while executing the specified SQL statement.

Action

Specify correct SQL Statement.

CTGDIJ013I JDBC/ODBC Source Columns.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ014I Committing the SELECT statement issued.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ015I Entries has been selected.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ016I No more entries to retrieve from SQL search results.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ017I Preparing and executing the query SQL statement to find an entry: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ018W Prepared SQL statement to find entry failed: *exception*

Explanation

After prepared SQL statement has been executed and error occurs due to an incorrect SQL statement or database error.

Action

Specify correct SQL Statement.

CTGDIJ019I Executing query SQL statement to find entry: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ020W No attributes found in the entry to modify.

Explanation

Entry which should be modified has no attributes.

Action

Provide some attributes in the entry.

CTGDIJ021E No attributes specified to modify.

Explanation

There are no specified attributes to modify.

Action

Set some attributes for modification.

CTGDIJ022I Set update attribute in prepared SQL statement: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ023W The prepared SQL statement to modify the entry will not be used. Exception occurred: *exception*

Explanation

An error occurred while prepared SQL statement was being prepared or executed.

Action

Verify the prepared SQL statement is correct.

CTGDIJ024I Executing update SQL statement modify an entry: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ025I Update SQL statement to modify an entry returned ''*return value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ026W The prepared SQL statement to add an entry will not be used. Exception occurred: *exception*

Explanation

An error occurred while the prepared SQL statement was being prepared or executed.

Action

Verify the prepared SQL statement is correct.

CTGDIJ027I Executing update SQL statement to add an entry: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ028I Update SQL statement to add an entry returned ''*return value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ029I Executing update SQL statement to delete an entry: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ030I Update SQL statement to delete an entry returned ''*return value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ031W Exception caught in getNextSQLSelectEntry method while building an Entry: *exception*

Explanation

An error occurred while building the Entry.

Action

Verify the database is working correctly.

CTGDIJ032E No metadata available for the specified table: ''*table name*''.

Explanation

No metadata available for specified table.

Action

Check whether the specified table name is valid or not in the jdbcTable parameter of the Connector.

CTGDIJ033E The jdbc table name was not specified.

Explanation

No table name was specified and it is required.

Action

Specify an appropriate table name. The jdbcTable parameter can be used to specify the table name.

CTGDIJ034E Null ResultSet is received when retrieving metadata of the table.

Explanation

No result returned from current request. The ResultSet object is null.

Action

Provide correct data for the tablename and schema.

CTGDIJ035I ResultSet object was received successful when retrieving metadata of the table. Message: *message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ036I Metadata was received successful. The metadata contained *number of elements* elements.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ037E The table or view specified (*tablename*) was not found, or not accessible.

Explanation

The metadata received from the server was an empty list.

Action

Specify appropriate table name or schema name.

CTGDIJ038W Cannot build where clause (Advanced Link Mode).

Explanation

See message.

Action

No action is required.

CTGDIJ039E Cannot build where clause because the link criterai list is empty.

Explanation

The where clause cannot be built. The link criteria is empty.

Action

Set link criteria.

CTGDIJ040E Cannot build where clause because an unknown criteria type was specified.

Explanation

The where clause cannot be built. The link criteria specified is not valid.

Action

Set the link criteria correctly.

CTGDIJ041E Cannot build where clause (substring match).

Explanation

The where clause cannot be built. The link criteria is not correct.

Action

Set link criteria correctly.

CTGDIJ042E Cannot build where clause (initial string match).

Explanation

The where clause cannot be built. The link criteria is not correct.

Action

Set link criteria correctly.

CTGDIJ043E Cannot build where clause (final string match).

Explanation

The where clause cannot be built. The link criteria is not correct.

Action

Set the link criteria correctly.

CTGDIJ044I Prepared SQL statement: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ045I Preparing to set prepared SQL statement value using attribute name ''*attribute name*'' and attribute value ''*attribute value*''. The index is set at ''*index*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ046E No MetaData description for attribute being set in the prepared SQL statement: ''*attribute name*''.

Explanation

See message.

Action

Set the description for attributes.

CTGDIJ047I Set prepared SQL statement value for attribute to null at index apos;'*index*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ048I Java Class name of attribute value: ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ049I Type of attribute value: ''*attribute type*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ050I Set 'LONGVARCHAR' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ051I Set 'VARCHAR' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ052I Set 'CHAR' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ053I 'CHAR' value found but has a different size from the column. The column size is ''*column size*'' and the value length is ''*value length*''. The Connector will attempt to pad or trim the value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ054I Unable to pad or trim 'CHAR' value. The column size is ''*column size*'' and the value length is ''*value length*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ055I Successfully padded or trimmed the 'CHAR' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ056I Set 'OTHER' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ057I Set 'INTEGER/TINYINT/SMALLINT' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ058W Exception caught while parsing Integer from 'INTEGER/TINYINT/SMALLINT' value: *exception*

Explanation

The value being parsed is not an Integer.

Action

No action is required.

CTGDIJ059I Set 'DECIMAL/BIGINT/NUMERIC' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ060W Exception caught while parsing Double from 'DECIMAL/BIGINT/NUMERIC' value: ''*exception*''.

Explanation

The value being parsed is not numeric.

Action

No action is required.

CTGDIJ061I Set 'FLOAT' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ062I Set 'REAL/DOUBLE' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ063I Set 'BIT' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ064I Set 'DATE/TIME/TIMESTAMP' value: ''*class name*'', ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ065I Set 'java.sql.Timestamp' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ066I Set 'java.sql.Date' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ067I Set 'java.sql.Time' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ068I Set 'java.util.Date' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ069I Converting 'java.util.Date' to 'java.sql.Timestamp': ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ070I Creating a timestamp value using the current time in the format specified in the 'jdbcDateFormat' parameter with the 'SimpleDateFormat' class: ''*date format*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ071W Exception encountered using the 'SimpleDateFormat' class to create timestamp value: *exception*

Explanation

The program encountered an exception while trying to create a timestamp value using the current time in the format specified in the jdbcDateFormat parameter SimpleDateFormat class.

Action

No action required. The program will find another method to create the timestamp.

CTGDIJ072I Creating a timestamp value using the current time with the 'DateFormat' class: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ073I Creating a timestamp value using the current time in the format 'yyyy.MM.dd hh:mm' with the 'SimpleDateFormat' class.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ074I Set timestamp value from 'SimpleDateFormat' class: ''*date*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ075I Convert and set the timestamp value to a long value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ076I Set 'BLOB': *value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ077I Set 'CLOB': *value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ078I Set value for an unhandled type ''*type*'' as a string on column ''*column name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ079W SQL warning encountered from prepared SQL statement: *SQL statement*.

Explanation

See message.

Action

No action is required.

CTGDIJ080I Attempting to build an entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ081I Retrieving attribute value based on the column name ''*column name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

No action is required.

CTGDIJ094I Retrieved attribute of type 'TIME': ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ095W Retrieved attribute of type 'TIME': 'null'.

Explanation

The attribute retrieved is of type Time.

Action

No action is required.

CTGDIJ096I Retrieved attribute of type 'TIMESTAMP': ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ097W Retrieved attribute of type 'TIMESTAMP': 'null'.

Explanation

Value that is provided is not Timestamp.

Action

No action is required.

CTGDIJ098I Retrieved attribute of type 'VARBINARY': *class name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ099I Retrieved attribute value of type 'VARBINARY': 'null'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ100I Retrieved attribute value of type 'OBJECT': '*class name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ101I Set value of attribute ''*attribute name*'': ''*attribute value*''. The class type of the attribute is ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ102I Set value of attribute ''*attribute name*'': ''*attribute value*''. The class type of the attribute is 'basic'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ103I Set value of attribute ''*attribute name*'': 'null'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ104W Exception encountered using the 'DateFormat' class to create a timestamp value: *exception*

Explanation

The program encountered an exception while trying to create a timestamp value using the current time with the DateFormat class.

Action

No action required. The program will find another method to create the timestamp.

CTGDIJ105W Exception encountered using the 'SimpleDateFormat' class to create a timestamp value: ;*exception*

Explanation

The program encountered an exception while trying create a timestamp value using the current time in the format 'yyyy.MM.dd hh:mm' with the SimpleDateFormat class.

Action

No action required. The program will find another method to create the timestamp.

CTGDIJ106W Unable to set 'DATE/TIME/TIMESTAMP' value: ''*class name*'', ''*value*''. Exception encountered trying to convert the timpstamp value to a long: *exception*

Explanation

The program encountered an exception while trying create a timestamp value using the current time in the format 'yyyy.MM.dd hh:mm' with the SimpleDateFormat class.

Action

The program will continue without setting the timestamp value in the prepared SQL statement. You might need to check the timestamp value to ensure it is valid.

CTGDIJ107I 'CHAR' value found but has a different size from the column. The column size is ''*column size*'' and the value length is ''*value length*''. The Connector will not pad or trim the value since the padding is disabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIJ108E The database ''Schema'' name is not provided.

Explanation

The Schema name is required for establishing connection with the database.

Action

Please provide the schema name to establish connection with the database.

CTGDIJ109E Unable to connect to the database (*exception message*). Verify that all the database connection parameters are correctly specified.

Explanation

Unable to connect to database. One reason could be that DB User name and password may be required for establishing connection with the database. The JDBC URL and driver specified should be valid.

Action

Try connecting to database after providing the correct database connection properties.

CTGDIJ110E The database user ''Password'' is not provided.

Explanation

The DB User Password is required for establishing connection with the database.

Action

Please provide the user password to establish connection with the database.

CTGDIJ111E An error occurred while trying to create sql statement.

Explanation

An error occurred while trying to create sql statement.

Action

Check the sql parameters provided and try again.

CTGDIJ112E An exception occured while trying to close the database connection: *exception message*

Explanation

A database access error may had occured. See the exception message for details.

Action

No action required.

CTGDIJ113E An exception occured while trying to clear warnings from connection object: *exception message*

Explanation

A database access error may had occured. See the exception message for details.

Action

No action required.

CTGDIJ114E Unable to set 'BIT' value using attribute name: ''*attribute name*'' and attribute value ''*attribute value*''.

Explanation

The attribute value provided could not be parsed.

Action

Provide correct value.

CTGDIJ115E Incorrect number of parameters in prepared SQL statement: *sql statement*

Explanation

There must be exactly one expression immediately following each question mark in a custom prepared SQL statement.

Action

Provide a correct prepared SQL statement.

CTGDIJ116W Unable to get MetaData for PreparedStatement: *exception*

Explanation

The call PreparedStatement.getParameterMetaData() failed with the given Exception. All parameters will be set with the PreparedStatement.setObject(int, Object) method.

Action

Make sure that all parameters provided to the PreparedStatement can be automatically converted with the standard mapping from Java Object types to SQL types.

CTGDII001I The getNextEntry method received message of type *class name*.

CTGDII037I Setting JMS header: *JMS header*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII038I Setting JMS reply to *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII039I No message to acknowledge.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII040I Using the configured Parser for this JMS Connector to generate a JMS text message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII041I While generating JMS text message - using the value of the following Entry attribute for the contents of the JMS text message:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII042I While generating JMS bytes message - using the serialized Entry object as the contents of this JMS bytes message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII043I While generating JMS object message - using the Entry object as the contents of this JMS object message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII044I Parsing a JMS text message with the following contents:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII045I Using the configured Parser for this JMS Connector to parse this JMS text message into an Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII046I While parsing JMS text message - there is no configured Parser for this JMS Connector; storing the raw text data in the 'message' Entry attribute.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII047I Deserializing JMS bytes message into Entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII048I Storing the raw bytes data of the JMS bytes message in the 'message' Entry attribute as a byte array.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII049I Successfully extracted Entry object from JMS bytes message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII050I Map certain properties.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII051E No default JMS driver. The 'jms.driver' parameter must be set to use the JMS Connector.

Explanation

See message.

Action

Set the jms.driver parameter.

CTGDII052E Unknown JMS Header: *JMS header*.

Explanation

See message.

Action

No action is required.

CTGDII053W Error while closing topic connection: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDII054W Error while closing queue connection: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDII055W Unable to deserialize bytes message: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDII056I Interrupted while waiting for messages. Closing connection to server.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN601E *parameter name* JMS IBMMQ Driver parameter must be provided.

Explanation

See message.

Action

Verify that the parameters for IBMMQ are correct and that the IBMMQ Driver is properly initialized.

CTGDKN602E Bad broker parameter for IBMMQ. Expecting host:port. Exception occurred: *exception*

Explanation

See message.

Action

Check used parameters for correct format and verify that the IBMMQ Driver is properly initialized.

CTGDKN603E *parameter name* JMS IBMMQe Driver parameter must be provided

Explanation

See message.

Action

Specify value for jms.mqe.driver parameter

CTGDKN604E MQe does not support JMS Topics.

Explanation

MQe only supports JMS Queues (the Point-to-Point mechanism in terms of the JMS specification), and not JMS Topics (the Publish/Subscribe mechanism in terms of the JMS specification).

Action

Only JMS Queues can be used with MQe. If JMS Topics are needed, a different JMS provider must be used.

CTGDKN605E Either the 'js.jsfile' or 'js.jsscript' parameter must be set to use the JMS Script Driver.

Explanation

See message.

Action

Specify the js.jsfile or js.jsscript parameter in the JMS Script Driver.

CTGDKN606E Unable to read custom script from file: *file name*.

Explanation

See message.

Action

Contact IBM support.

CTGDKN607E Unable to initialize ScriptEngine:

Explanation

See message.

Action

Contact IBM support.

CTGDKN608E Script error:

Explanation

An error occurred while executing the JMS initialization script.

Action

Check the JMS initialization script of the JMS Connector.

CTGDKN609E Exception occurred in Script Driver initialization: *exception*.

Explanation

The JMS initialization script has thrown an exception.

Action

Check the Script Driver initialization parameters and contact IBM support.

CTGDKN610E The JMS Driver is missing the required property '*property name*'.

Explanation

See the error message.

Action

Check the JMS Driver configuration section and correct the problem.

CTGDKN611E Invalid numeric value for property ' *property name*': *property value*'.

Explanation

The specified property must contain a numerical value.

Action

Correct the value of the specified property.

CTGDKN612E The MQe JMS Driver could not open a port to receive notifications.

Explanation

See the error message.

Action

Check the exception message for more details.

CTGDKN613E Exception caught: *exception*

Explanation

An unexpected exception has been thrown.

Action

Check the exception message for more details.

CTGDKN614I Notification server terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN615I Received notification operation opcode: '*operation code*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN616I Connection accepted from *hostname*: *port number*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN617I Message transfer was triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN618E Invalid notification operation code: '*operation code*'.

Explanation

The client has sent a operation code that is not recognized by the notification listener.

Action

No help provided.

CTGDKN619I Message transfer was not triggered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN620E *parameter name* JMS WebsphereESB Driver parameter must be provided.

Explanation

See message.

Action

Verify that the parameters for WebsphereESB are correct and that the WebsphereESB Driver is properly initialized.

CTGDKN621E Bad broker parameter for WebsphereESB. Expecting host:port:sib_endpoint. Exception occurred: *exception*

Explanation

See message.

Action

Check used parameters for correct format and verify that the WebsphereESB Driver is properly initialized.

CTGDKN201E Invalid values for the properties: '*property name*' and '*property name*'. Only one of the properties can have a value of true.

Explanation

Only one of the specified properties can be set to true at the same time.

Action

Set only one of the properties to be true, or set both to be false.

CTGDKN202E An unexpected exception has been thrown.

Explanation

See the error message.

Action

Check the exception for more detatils.

CTGDKN203I The remote JMS Provider could not be contacted at the moment: '*exception*'. The password change will be rejected.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN204I The password for user '*user name*' could not be stored as changed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN205I The password for user '*user name*' was successfully stored as added.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN206I The password for user '*user name*' could not be stored as added.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN207I The password for user '*user name*' was successfully stored as deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN208I The password for user '*user name*' could not be stored as deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN209I Loading JMS Driver: '*driver name*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN210I Could not configure JMS but the exception will be ignored: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN211I The linked exception is: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN212I Connecting to the JMS Provider...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN213I JMS connection started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN214I An exception occurred while sending password update message. The exception will be ignored.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN215E The required property '*property name*' is missing from the configuration file.

Explanation

See the error message.

Action

Check the configuration file for that property.

CTGDKN216I Exit requested.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN217I JMS connection closed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN218I The password for user '*user name*' was successfully stored as changed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN219I Successfully set port range 1414-1700.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN220I Unable to set port range, error: *error*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK001E The 'mode' parameter must be set to use the JMX Connector.

Explanation

The required parameter mode was not specified in the JMX Connector.

Action

Specify the mode parameter in the Connector.

CTGDJK002E Invalid 'mode' parameter set in the the JMX Connector: ''*parameter value*''.

Explanation

The required parameter mode was specified in the JMX Connector but was set to an invalid value.

Action

Specify a proper value for the mode parameter in the Connector.

CTGDJK003E The 'mBeanTypes' parameter must be set to use the JMX Connector.

Explanation

The required parameter mBeanTypes was not specified in the JMX Connector.

Action

Specify the mBeanTypes parameter in the Connector. If you need to receive notifications from all MBeans, check the allMBeans parameter.

CTGDJK004E The 'url' parameter must be set to use the JMX Connector.

Explanation

The required parameter url was not specified in the JMX Connector.

Action

Specify the url parameter in the Connector.

CTGDJK005E The MBean name ''*MBean name*'' provided does not match any of the registered MBeans.

Explanation

An InstanceNotFoundException was encountered when the method addListener was trying to add NotificationListener. The NotificationListener handles the notifications emitted by the registered MBean.

Action

No action is required.

CTGDJK006E A communication problem occurred when talking to the MBean server. Exception occurred: *exception*

Explanation

An IOException wasencountered when the method addListener was trying to add NotificationListener. The NotificationListener will handle the notifications emitted by the registered MBean.

Action

Check the network connection.

CTGDJK007E The MBean name ''*object name*'' provided does not match any of the registered MBeans.

Explanation

An InstanceNotFoundException was encountered when the method isNotificationBroadcaster was verifying the ObjectName name, an MBean, was registered in the MBean server.

Action

No action is required.

CTGDJK008E A communication problem occurred when talking to the MBean server. Exception occurred: *exception*

Explanation

An IOException was encountered when the method isNotificationBroadcaster was verifying the ObjectName name, an MBean, was registered in the MBean server.

Action

Check the network connection.

CTGDJK009E The MBean name ''*object name*'' provided does not match any of the registered MBeans.

Explanation

An InstanceNotFoundException was encountered when method removeListeners was trying to remove a listener from a registered MBean.

Action

No action is required.

CTGDJK010E A communication problem occurred when talking to the MBean server. Exception occurred: *exception*

Explanation

An IOException was encountered when method removeListeners was trying to removes a listener from a registered MBean.

Action

Check the network connection.

CTGDJK011E The listener object name ''*object name*'' is not registered in the MBean.

Explanation

An ListenerNotFoundException was encountered when method removeListeners was trying to remove a listener from a registered MBean.

Action

No action is required.

CTGDJK012I The listener object name ''*object name*'' has been successfully removed from a registered MBean.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJK013I Notification received: Type:*type object*, Sequence number:*SequenceNumber*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL001I Using LDAP SSL connection. Ensure that TCP port number is changed accordingly.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL002I Parsing next JNDI Provider Parameter: ''*JNDI Provicer Parameter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL003E Bad JNDI Provider Parameter encountered: ''*JNDI Provicer Parameter*''.

Explanation

The specified parameter is not properly set.

Action

Set the parameter in proper way.

CTGDIL004I Searching for entries from base DN ''*DN*'' using search filter ''*filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL005I There are more entries that can be processed in the search results.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL006I No entries returned in the search results.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL007W The throw limit was exceeded, when method selectEntries performed the search in the named context.

Explanation

This happened due to a user or system specified limit. Examples of such limits include client and server configuration limits such as size, time, number of hops, etc.

Action

Increase or remove the limit set.

CTGDIL008W The naming exception is encountered when the method selectEntries performed the search in the named context: *exception*

Explanation

The nature of the failure is described by the name of the subclass.

Action

No action is required.

CTGDIL009I No entries returned in the search results.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL010I No more entries to retrieve, so no entries returned in search results.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL011I Performing a directory search.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL012I Search filter for directory search is set to ''*filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL013E Cannot add entry because the naming parameter *parameter name* was not found in the entry.

Explanation

The specified parameter not presented.

Action

Set the parameter.

CTGDIL014W The modify entry operation failed because no distinguished name was found in existing entry.

Explanation

See message.

Action

Provide required distinguished name in the Entry.

CTGDIL015I Renaming entry from ''*old DN*'' to ''*new DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL016I No distinguished name given, using existing one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL017E The deleteEntry method was called with no *naming parameter* attribute.

Explanation

The deleteEntry method is called with no nameParameter attribute.

Action

Ensure the naming parameter is set before calling the deleteEntry method.

CTGDIL018I Searching for an entry where ''*naming parameter*'' equals ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL019I Searching for entry using filter ''*filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL020I No entries found while searching for entry in JNDI Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL021I Single entry found while searching for entry in JNDI Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL022I No entries found while searching for entry in JNDI Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL023I Multiple entries found while searching for entry in JNDI Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL024I JNDI Connector successfully added attribute value to attribute in entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL025W Modification of entry failed. Attribute already exists with given value. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDIL026W Modification of entry failed. An exception was encountered when the method addAttributeValue tried to add a given value to an attribute: *exception*

Explanation

See message.

Action

No action is required.

CTGDIL027I Retrieving next schema entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL028I The class definition for object class ''*object class name*'' is *class definition*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL029W An exception was encountered when retrieving a context containing the schema objects of the named object's class definitions. The name of the object whose object class definition is to be retrieved: *search DN*. The exception is: *exception*

Explanation

See message.

Action

No action is required.

CTGDIL030W A naming exception was encountered when retrieving the named object in the method getAttributeSyntax. The name of the object to look up is: *attribute name*. The exception is: *error*

Explanation

See message.

Action

No action is required.

CTGDIL031I Successfully replaced a given attribute value from an entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL032I Successfully removed a given attribute value from an entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL033I Successfully remove an attribute from an entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIL034W Modification of entry failed. An exception was encountered while replacing a given attribute with a certain value: *exception*

Explanation

See message.

Action

No action is required.

CTGDIL035W Modification of entry failed. An exception was encountered while removing a given attribute value from an entry: *exception*

Explanation

See message.

Action

No action is required.

CTGDIL036W Modification of entry failed. An exception was encountered while removing a given attribute from an entry: *exception*

Explanation

See message.

Action

No action is required.

CTGDIL037W Modifitation of entry failed. An attribute already exists with given value. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDJQ001I Using LDAP SSL connection. Ensure TCP port number is changed accordingly.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ002I Username specified, using Simple authentication.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ003I Using Anonymous bind.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ004I No username specified, using Anonymous bind.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ005I Next extra parameter: *parameter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ006I Parsed a JNDI extra parameter with no colon separator in the line: *parameter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ007I JNDI Provider Parameter: parameter name=*parameter name*, parameter value=*value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ008I Setting binary attributes to: *attribute value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ009I No binary attributes specified using default: *attribute names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ010E Cannot perform VirtualListView search without sort attribute specified.

Explanation

The ldapVLVPageSize and dapSortAttribute attributes are dependant. If the user specifies ldapVLVPageSize to perform VirtualListView search, the ldapSortAttribute must be specified also.

Action

Specify a valid sort attribute value.

CTGDJQ011I Using Virtual List View. The sort attribute is *attribute name* and page size is *page size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ012I Requesting Sort Control for attribute *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ013I Dumping LDAP return attributes...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ014I Attribute: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ015I Using 'Paged Search' control: The page size is set to *page size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ016W The LDAP server did not confirm that it supports 'Paged Search' control.

Explanation

See message.

Action

No action is required. The Paged Search control may be ignored by the LDAP server.

CTGDJQ017I The selectEntries method will search the LDAP server for entries using the search base *DN* and the search filter ''*search filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ019I Entries were returned from the search.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ020I No entries returned from the search

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ021I The selectEntries method will return a NULL value for the entries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ022I The selectEntries method will return no entries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ023I A PartialResultException occurred and will be ignored.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ024I Request the next page using Virtual List View Control at offset *index*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ025W PartialResultException occurred while retrieving the next entry from the LDAP server. LDAP server does not support paged results.

Explanation

See message.

Action

Check LDAP server documentation to see if it supports paged results or set the attribute ldapPageSize to 0.

CTGDJQ026E The putEntry method failed because no distinguished name ($dn attribute) was specified in entry.

Explanation

See message.

Action

Add the $dn attribute to the Entry.

CTGDJQ027E Unable to modify the entry. A delta modify occurred and no distinguished name ($dn attribute) was provided in the conn entry or the link criteria.

Explanation

See message.

Action

Add the $dn attribute to the Entry.

CTGDJQ028I No distinguished name ($dn attribute) was given. The existing distinguished name will be used to modify the entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ029E Unable to modify the entry. No distinguished name ($dn attribute) was given and no existing entry was found.

Explanation

See message.

Action

Add the $dn attribute to the Entry.

CTGDJQ030I Renaming entry from ''*old DN*'' to ''*new DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ031I Initial rename of entry was unsuccessful. A manual move of entry will be attempted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ032I Initial rename of entry was unsuccessful. A manual move of entry will not be attempted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ033I The modify operation on attribute *attribute name* will be ignored. The attribute value would have been removed if the attribute was present in the current entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ034E Unable to modify the entry. The attribute *attribute name* at index *index* was specified to be modified but had an attribute value with an undefined operation code.

Explanation

See message.

Action

Ensure the attribute values of the modify work entry contains a valid operation code.

CTGDJQ035I The attribute *attribute name* will not be modified. The operation code for attribute value ''*attribute value*'' was unchanged.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ036I The entry *DN* will not be modified because there were no modification operations specified on the entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ038E LDAP Connector was unable to modify the entry. An exception occured while creating a ModificationItem object that is used to modify the entry: *exception*

Explanation

See message.

Action

Check all attributes and attribute values specified to be modified in the Entry. See the exception for more information on the error.

CTGDJQ039I Dumping LDAP Connector Modification List...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ040I Modification item: *modification item*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ041I Finished dumping LDAP Connector Modification List.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ042I Attribute already exists with given value: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ043E The deleteEntry method was called with no '$dn' attribute or link-criteria.

Explanation

See message.

Action

Verify the required $dn is an attribute in the Entry or presence of link criteria.

CTGDJQ044I Searching for $dn = *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ045I Object found for *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ046E Unable to find the Entry. The findEntry method encountered a PartialResultException: *exception*

Explanation

The error indicates the result being returned are partial, and that the operation cannot be completed.

Action

No action is required.

CTGDJQ047I LDAP Connector will look for Entry using the filter *filter* on the base DN *DN*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ048E Unable to find the Entry. The findEntry method encountered a PartialResultException: *exception*

Explanation

The error indicates the result being returned are partial, and that the operation cannot be completed.

Action

No action is required.

CTGDJQ049E Unable to find the Entry. The findEntry method encountered a NameNotFoundException: *exception*

Explanation

The error indicates the named component cannot be resolved because it is not bound.

Action

No action is required.

CTGDJQ050E Unable to convert the entry to a set of attributes. The AD unicode password is not a multi-value field (ref AutoMapADPassword).

Explanation

See message.

Action

Check the AD unicode password.

CTGDJQ051I The Attribute 'userPassword' was encoded and auto-mapped to 'unicodePwd'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ052I Ignoring unchanged attribute:*attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ053I Removing empty string value for attribute *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ055I Removing empty attribute: *attribute ID*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ056E Unable to move the Entry. Exeception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ057E The moveEntry method removed the Entry ''*DN*'' but failed to add it again during rename.

Explanation

See message.

Action

Verify the LDAP server is still active and attempt to modify the entry again.

CTGDJQ058I Successfully moved entry ''*DN*'' to ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ059I Doing a compare of DN *DN* using filter *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ060I Comparison is true using filter *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ061I Comparison is false using filter *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ062I The modification was successful. The attribute value was added.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ063E Attribute already exists with given value: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ064E The modification failed. An exception occurred while trying to add an attribute value: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ065I The modification was successful. The attribute value was replaced.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ066E Attribute already exists with given value: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ067E The modification failed. An exception occurred while tring to replace an attribute value: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ068I The modification was successful. The attribute value was removed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ069E The modification failed. An exception occurred while tring to remove an attribute value: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ070I The modification was successful. All attribute values were removed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ071E The modification failed. An exception occurred while tring to remove all the attribute values: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ072I The page result size: *result size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ073I The page result size is unknown.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ074E Virtual List View Sort did not complete successfully. The return code returned was *return code*.

Explanation

See message.

Action

No action is required.

CTGDJQ075I Virtual List View List Size: *size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ076I Virtual List View Target Offset: *offset*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ077I Target Offset: *offset*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ078I Virtual List View changed result set size from *size* to *size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ079I Virtual List View Context ID is NULL.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ080I Getting the next Schema class.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ082W Unable to query server information: *error message*.

Explanation

The LDAP Server does not support querying server information.

Action

No action is required.

CTGDJQ083I The LDAP server does not tell us about it's supported controls.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ085I The LDAP server does not tell us about it's supported extensions.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ086I Dumping LDAP Server Information...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ087W Unable to get server information.

Explanation

The LDAP Server does not support querying server information.

Action

No action is required.

CTGDJQ088I Supported Controls of LDAP Server:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ089I Control *control name*: *boolean*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ090I Naming Contexts (use in your search base parameter).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ091I No info on the naming contexts.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ092I Naming context at index*index*: *naming context*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ093I Finished dumping LDAP Server Information.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ094I The feature object passed to the addDNFromCriteria method is an instance of class Vector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ095I The feature object passed to the addDNFromCriteria method is an instance of class SearchCriteria.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ096I The feature object passed to the addDNFromCriteria method is an instance of class SearchCriteria.rscSearch.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ097E Cannot mix $dn matching with other attributes in a search.

Explanation

See message.

Action

No action is required.

CTGDJQ098I Add DN value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ099E Unknown object type in search filter: *class name*: *object*.

Explanation

The type of the object in the filter is not supported.

Action

Use one of the supported types.

CTGDJQ100E LDAP Connector is unable to rebind to the LDAP server.

Explanation

All attempts to reauthenticate using the currently open connection but underlying reconnect function failed.

Action

Check the connection to the server.

CTGDJQ101E Failed to query the schema on the search DN *DN*. Exception occurred: *exception*

Explanation

An NameNotFoundException is encountered.

Action

Review the exception to find further details on the error.

CTGDJQ102E Failed to get the attribute syntax on the search DN *DN*. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ103E The VirtualListViewControl class cannot be loaded.

Explanation

An appropriate JAR library (which contains the VirtualListViewControl class) needs to be provided.

Action

Contact IBM support.

CTGDJQ104E The VirtualListViewControl class does not provide the required interface.

Explanation

A required method was not found in the currently loaded VirtualListViewControl class. Possibly a wrong version of this class was provided.

Action

Contact IBM support.

CTGDJQ105E The VirtualListViewResponseControl class cannot be loaded.

Explanation

An appropriate JAR library (which contains the VirtualListViewResponseControl class) needs to be provided.

Action

Contact IBM support.

CTGDJQ106E The VirtualListViewResponseControl class does not provide the required interface.

Explanation

A required method was not found in the currently loaded VirtualListViewResponseControl class. Possibly a wrong version of this class was provided.

Action

Contact IBM support.

CTGDJQ107W The selectEntries method was unable to perform the search. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ108W The compare method was unable to perform the search. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ109W Error while quering schema. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ110W Cannot close the connection to the LDAP Server. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDJQ111W Unable to find the Entry. The findEntry method encountered a NameNotFoundException: *exception*

Explanation

The error indicates the named component cannot be resolved because it is not bound.

Action

No action is required.

CTGDJQ112W The LDAP "ldapUrl" name is not provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ113W The Distinguished Name *url* cannot be parsed as a URL.

Explanation

The LDAP server returned a Distinguished Name marked as a URL, but it cannot be parsed as a URL.

Action

No action is required.

CTGDKN101I Adding LDAP entry for person with distinguished name '*distinguished name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN102I Successfully added LDAP entry for person with name '*person name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN103E Failed to add LDAP entry for person with distinguished name '*distinguished name*'. An exception occurred: *exception*

Explanation

The LDAP add operation failed. See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operating normally.

CTGDKN104E An exception occurred during password encryption: *exception*

Explanation

A password could not be encrypted.

Action

Verify that the configuration of the LDAP Password Store is correct.

CTGDKN105E An exception occurred during password decryption: *exception*

Explanation

A password could not be decrypted.

Action

Verify that the configuration of the LDAP Password Store is correct.

CTGDKN106E Failed to initialize encryption: *exception*

Explanation

The cryptography module of the LDAP Password Store could not be initialized.

Action

Verify that the configuration of the LDAP Password Store is correct.

CTGDKN107E Missing required property: *property name*.

Explanation

A required property could not be found in the configuration.

Action

Verify that the configuration of the LDAP Password Store is correct.

CTGDKN108E Failed to connect to the LDAP server. An exception occurred: *exception*

Explanation

Could not establish connection to the LDAP server. See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN109I Adding password values for user with distinguished name '*distinguished name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN110E Could not add password values, because the user name is empty.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDKN111E Unable to add password values for user '*user name*' because the password store could not connect to the LDAP Server. An exception occurred: *exception*

Explanation

Could not establish connection to the LDAP server. See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN112I There is no LDAP entry for user '*user name*'. Will create one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN113E Could not add password values for user '*user name*': *exception*

Explanation

An error occurred while adding password values for the user. See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct.

CTGDKN114I Deleting password values for user with distinguished name '*distinguished name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN115E Could not delete password values, because the user name is empty.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDKN116E Could not delete password values for user '*user name*'. Failed to obtain the original list of passwords for the user from the LDAP server: *exception*

Explanation

When the LDAP Password Store is about to delete password values for a user, it first obtains the existing password values from the LDAP server. This task has failed. See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN117E Could not delete password values for user '*user name*': *exception*

Explanation

See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN118E Could not delete password values for user '*user name*': *exception*

Explanation

See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN119I Checking if the LDAP server is accessible.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN120I Modifying password values for user with distinguished name '*distinguished name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN121E Could not modify password values because the user name is empty.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDKN122I Empty list of passwords found while modifying password values. Will remove the password attribute.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN123I There is no LDAP entry for user '*user name*'. Will create one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN124E Could not modify password values for user '*user name*': *exception*

Explanation

See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN125I The password values to modify are *count*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN126I There is no LDAP entry for user '*user name*'. Will create one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN127E Could not modify password values for user '*user name*': *exception*

Explanation

See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN128I No password attribute was found while trying to remove the password attribute for user '*user name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN129E Failed to remove password attribute for user '*user name*': *exception*

Explanation

See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN130I Verifying LDAP suffix.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN131E Suffix '*LDAP suffix*' does not exist in the LDAP server: *exception*

Explanation

The configured LDAP suffix is incorrect.

Action

Verify that the configuration of the LDAP Password Store is correct.

CTGDKN132E An exception occurred while verifying the LDAP suffix: *exception*

Explanation

Unexpected LDAP error is encountered while verifying that the configured LDAP suffix is correct. See the error message for details.

Action

Verify that the LDAP server is operational.

CTGDKN133W Password values will not be stored in the Password Store, because the user identifier is empty.

Explanation

This is an internal error.

Action

Inspect the error logs.

CTGDKN136W Additional information about a user will not be written to the Password Store because the user identifier is empty.

Explanation

This is an internal error.

Action

Inspect the error logs.

CTGDKN137I There is no LDAP entry for user '*user name*'. Will create one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN138E Could not set additional information for user '*user name*': *exception*

Explanation

See the error message for details.

Action

Verify that the configuration of the LDAP Password Store is correct. Verify that the LDAP server is operational.

CTGDKN139I Setting additional information '*extra info*' for user with distinguished name '*distinguished name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ301I Terminate server request received while accepting connections.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ302I Creating dummy connection using IP Address ''*IP Address*'' and port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ303I LDAP Server Connector is already terminating. Not sending termination request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ304I Sending termination request to LDAP Server Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ305E No server Connector available or this Connector is no longer accepting connections.

Explanation

The Connector terminated and is no longer accepting connections

Action

No action is required.

CTGDJQ306I Connector already initialized with a java.net.Socket object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ307I Using provide java.net.Socket object for LDAP client session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ308I Listening for LDAP SSL connections on port: *port*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ309I Listening for LDAP connections on port: *port*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ310E Server Socket is not open, cannot accept client requests.

Explanation

LDAPServerConnector cannot listen on a specified port and cannot accept client connections.

Action

Check the parameters used to specify the port of the Server Socket. Verify the port is not already in use.

CTGDJQ311I Connector terminated by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJQ312E LDAP Server Connector was unable to get the next message because there is no client session.

Explanation

See message.

Action

Use the getNextClient method to get next client session.

CTGDJQ313E Failed to get the next message. An IOException occurred while reading the next request: *exception*

Explanation

See message.

Action

Verify the connection between server and client.

CTGDJQ314E LDAP Server Connector unable to get the next entry. The LDAPMessage object returned a NULL Request object.

Explanation

See message.

Action

No action is required.

CTGDJQ315I Starting packet dump...

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV001E NotesException encountered while trying to retrieve the next entry from the Domino Server: ''*exception ID*'', ''*exception message*''

Explanation

The Lotus Notes Connector encountered an exception while trying to retrieve the next entry from the Domino Server and was unable to continue.

Action

Verify that the Domino Server being queried is still running and that the information being retrieved is still present.

CTGDIV002I Opening Session to Domino Server: Session Type=''*Session Type*'',, Hostname=''*Hostname*'', User ID=''*User ID*'', Requested IIOP/SSL=''*Boolean*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV003I Using specified 'IOR' in the connection information for opening the session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV004E NotesException encountered trying to create a session with the Domino Server: Class Name=''*class name*'', Exception=*exception*

Explanation

The Lotus Notes Connector encountered an exception while trying to create a session with the Domino Server and was unable to continue.

Action

Verify that the Domino Server being queried is still running and that the connection information in the Lotus Notes Connector has been configured properly.

CTGDIV005I Success establishing a Notes Session: Name=''*server name*'', Version=''*version number*'', Platform=''*operating system*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV006E Lotus Notes Connector unable to open database ''*database name*'' on server ''*server name*''.

Explanation

The Lotus Notes Connector was unable to connect to the specified database on the Domino Server.

Action

Verify that the correct database name was specified for the Domino Server and that the connection information in the Lotus Notes Connector has been configured properly.

CTGDIV007I The Database connected to is full-text indexed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV008I The Database connected to not is full-text indexed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV009I The Connector will use full-text search on the database.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV010I The Connector will not use full-text search on the database.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV011E The specified search view ''*search view*'' was not found in the database. The Lotus Notes Connector is unable to select entries without a valid database search view.

Explanation

The Lotus Notes Connector was unable to find the specified search view in the database of the Domino Server.

Action

Verify that the correct search view was specified for the Domino Server. The notesSearchView parameter of the Lotus Notes Connector should be checked.

CTGDIV012I Database select statement: ''*select statement*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV013E Unable to retrieve entries from Domino Server. NotesException encountered: *exception*

Explanation

The Lotus Notes Connector encountered an exception while trying to perform a search to retrieve a set entries from the Domino Server.

Action

Verify that the correct select statement was specified for the Domino Server. The notesSelection parameter of the Lotus Notes Connector should be checked.

CTGDIV014I No results returned from database search.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV015I Database search returned *number of documents* documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV016E The Lotus Notes Connector failed to create a new document on the Domino Server.

Explanation

The Lotus Notes Connector encountered an exception while trying to create a new document on the Domino Server.

Action

Verify that the document being added does not already exist on the Domino Server and that the Domino Server is still running.

CTGDIV017I Lotus Notes Connector building entry from retrieved document: *document attributes*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV018I Lotus Notes Connector's local Notes thread started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV019I Lotus Notes Connector's local Notes thread terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV020E Unable to create local Notes thread because the lotus.domino.NotesThread class was not found in the classpath of the program. Exception occurred: *exception*

Explanation

The Lotus Notes Connector encountered an exception while trying to create a local notes thread. The lotus.domino.NotesThread class is needed to create the thread and it was not found in the classpath.

Action

Verify the classpath of the program and ensure the Notes.jar file is in the classpath.

CTGDIV021E Lotus Notes Connector was unable to modify the entry because the entry was not found on the Domino Server.

Explanation

See message.

Action

Verify the document being modified exists on the Domino Server.

CTGDIV022E Lotus Notes Connector was unable to delete the entry because the entry was not found on the Domino Server.

Explanation

See message.

Action

Verify the document being deleted exists on the Domino Server and that the correct document is being choosen for deletion.

CTGDIV023I Adding attribute to entry: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV024I Attribute value added was null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV025I Attribute value added was ''*attribute value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV026I Attempting to build an entry in the Lotus Notes Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV027I Successfully built an entry in the Lotus Notes Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV028I Database search view is set to *search view*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV029I FTSearch filter on search view: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV030I FTSearch return code was *return code*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV031W Reverting to basic search because FTSearch on database view failed: *filter*. NotesException occurred: Error=*error*, Error Text=*error text*

Explanation

See message.

Action

No action is required.

CTGDIV032I FTSearch filter on database: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV033I Formula Search filter on database: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV034I No documents found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV035I Found *number of documents* documents.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV036I Get document with Notes ID ''*Notes ID*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV037I Document with Notes ID ''*Notes ID*'' not found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV038W Unable to get document with Notes ID: *Notes ID*. NotesException occurred: Error=*error*, Error Text=*error text*

Explanation

See message.

Action

Review the exception to determine the next course of action to take.

CTGDIV039I Will update *number of attributes* attributes in document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV040E Lotus Notes Connector was unable to save the document it was trying to modify.

Explanation

See message.

Action

Verify you have the permissions to modify the document on Domino Server and that the Domino Server is still running.

CTGDIV041E Lotus Notes Connector was unable to save the document it was trying to modify. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception encountered. The exception should provide more information on why the failure occurred.

CTGDIV042I Attribute ''*attribute name*'' will be updated with value ''*attribute value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV043I Attribute ''*attribute name*'' will be updated with value ''*attribute value*'' which is of class type ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV044W Lotus Notes Connector could not terminate the local Notes thread. Exception occurred: *exception*

Explanation

See message.

Action

No action is required.

CTGDIV045I IIOP Session with specified IOR string is created. SSL is on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV046I IIOP Session with specified IOR string is created. SSL is off.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV047I IIOP Session is created. SSL is on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV048I IIOP Session is created. SSL is off.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV049I Session to Domino Server is created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV050I The specified port: ''*port*'' is bigger than 65535. The default port 80 will be used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV051I No port is specified. The default port 80 will be used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIV052E The specified match operation for the UNID or NoteID in the Link Criteria is not correct.

Explanation

The allowed match operation when using UNID or NoteID is only exact matching. The user has specified another one.

Action

Specify "equals" match operation. The case does not have effect.

CTGDIV053E Document with the specified UNID/NoteID was not found.

Explanation

Document with the specified UNID/NoteID was not found.

Action

No action required.

CTGDIV054E Connector already initialized. You must terminate it before initializing again.

Explanation

The user tries to initialize the Connector, for example through script, that has been already initialized.

Action

Check the values of the configuration parameters and the business logic of your solution.

CTGDIV055W Error occured while executing the command ''SET_CURRENT''. Exception thrown: *exception*

Explanation

See message.

Action

Look at the exception message and try to fix the problem.

CTGDIV056W Exception occurred while terminating: *exception*

Explanation

The user may have loaded a Connector without initializing it. For example, through the getConnector method.

Action

Check the values of the configuration parameters and the business logic of the solution.

CTGDIV057E The Notes thread is not alive. Lotus Notes Connector cannot execute the required command against the Domino Server without an active Notes Thread.

Explanation

See message.

Action

Try to innitialize the NotesThread first, that is, using the initNotesThread method.

CTGDIV058E Fatal Error while executing command against Domino Server: *exception*

Explanation

See message.

Action

Review the message returned from the Domino Server to see how to respond.

CTGDIV059I Did not find view *view name* in database *database name*: Database.getView returned NULL.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN001E Required Connector parameter 'mailServer' is not set.

Explanation

The specified Connector parameter mailServer is required, but not set.

Action

Set the Connector parameter mailServer.

CTGDJN002E Required Connector parameter 'mailUser' is not set.

Explanation

The specified Connector parameter mailUser is required, but not set.

Action

Set the Connector parameter mailUser.

CTGDJN003E Required Connector parameter 'mailFolder' is not set.

Explanation

The specified Connector parameter mailFolder is required for Addonly mode, but not set.

Action

Set the Connector parameter mailFolder.

CTGDJN004E The 'pollInterval' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid pollInterval parameter in the Connector if the default value is not wanted.

CTGDJN005E The 'pollInterval' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid pollInterval parameter in the Connector if the default value is not wanted.

CTGDJN006E The port specified as part of the 'mailServer' parameter must be a numeric value. Exception encountered while try to parse out port: *parameter value*

Explanation

See message.

Action

Specify a valid mailServer parameter in the Connector and ensure the port portion specified is numeric.

CTGDJN007I Opened mail folder ''*folder name*'' in read and write mode.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN008E Unable to initialize Mailbox Connector. The mail folder ''*folder name*'' does not exist on the mail server.

Explanation

See message.

Action

Set the Connector parameter mailFolder to a folder that exists on the mail server being connected to.

CTGDJN009I Initializing SSL settings.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN010I Disconnecting from mail server but exception was encountered while closing the mailbox: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN011W Mail message at index ''*index number*'' could have been deleted from the mail server and could not be retrieved. Error encountered while creating an Entry from a javax.mail.Message object: *exception*

Explanation

See message.

Action

Verify that the mail message was deleted.

CTGDJN012E The findEntry method could not process request because it was passed a search criteria one or more attributes it does not support.

Explanation

See message.

Action

Verify that the attributes for the search criteria are supported attributes. Use the following Supported attributes list : mail.messagenumber, mail.from, mail.to, mail.cc, mail.subject, and mail.messageid.

CTGDJN013E Unable to delete entry because more than one entry found to potentially remove.

Explanation

See message.

Action

Verify that the search criteria sent to the deleteEntry method will result in only a single Entry being returned to delete.

CTGDJN014E Unable to delete entry because the specified entry to delete could not be found.

Explanation

See message.

Action

Verify that the search criteria sent to the deleteEntry method will result in only a single Entry being returned to delete.

CTGDJN015E Unable to delete entry because the specified entry does not have the required property 'mail.message'.

Explanation

See message.

Action

Verify that entry being deleted has the mail.message property.

CTGDJN016I Folder does not support the expunge method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN017W Mail message at index ''*index number*'' could have been deleted from the mail server and could not be deleted. Error encountered while creating an Entry from a javax.mail.Message object: *exception*

Explanation

See message.

Action

Verify that the mail message was deleted.

CTGDJN018E POP3 protocol does not support appending of messages.

Explanation

The Mailbox Connector cannot be used in Addonly mode for POP3 server.

Action

Use the Connector in Addonly mode with another protocol(for example, IMAP).

CTGDJN019I Mail Folder is automatically set to ''INBOX'' for POP3 protocol.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN020E Mail Folder ''*folder name*'' does not exist on the mail server and parameter 'createFolder' is set to false.

Explanation

The supplied mail folder does not exist on the mail server and the parmater for auto-creation 'createFolder' is set to false.

Action

Supply an existing mail folder or set the 'createFolder' parameter to true.

CTGDJN021I The mail folder ''*folder name*'' did not exist on mail server and was automatically created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN022I The mail folder ''*folder name*'' was searched for messages, but none were found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN022E The Mailbox Connector cannot find mail matching the specified Link Criteria.

Explanation

The Connector did not find a message corresponding to the Link criteria. The Connector tried to add the message, but adding a message is not available in 'Update mode'.

Action

Verify that the looked-up mail message exists on the store.

CTGDJN023E No Entry is supplied in the output map for 'update' or 'add' operation.

Explanation

The input Entry object supplied for 'update' or 'add' operation is null.

Action

Verify that an Entry is supplied correctly.

CTGDJN024E Message in Attribute '*message*' is not in appropriate format.

Explanation

The supplied object is of type different from 'javax.mail.Message' 'javax.mail.Message[]'.

Action

Verify that the supplied object is of the appropriate type.

CTGDJN025E An Error occurred when appending the message to the specified folder:'*Exception*'.

Explanation

An internal error occurred while executing the javax.mail.Folder.appendMessage() method.

Action

No response needed.

CTGDJN026I The supplied messages were successfully added to the folder:'*folder name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN027E Unable to update entry, because the specified entry to update could not be found.

Explanation

See message.

Action

Verify that the search criteria sent to the modEntry method will result in only a single Entry being returned to update.

CTGDJN028E Unable to update entry, because the specified entry to update does not contain the message.

Explanation

See message.

Action

Verify that the 'mail.message' Attribute is mapped correctly.

CTGDJN029I Searching folder: '*folder name*' for subfolders.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN030I No subfolders were found in folder: '*folder name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN031I The folder: '*folder name*' does not exist on the store.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN032I The folder: '*folder name*' cannot be opened.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN033I Serching folders in namespaces: '*folder name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN034E The folder:'*folder name*' cannot be created successfully.

Explanation

The javax.mail.Folder.create() method failed, when attempting to create the specified folder.

Action

Verify that a folder can be created at the specified location and that the user has the necessary permissions.

CTGDJN035E The value for flag:'*flag name*' was not updated due to the following error: '*Exception*'.

Explanation

A MessagingException was thrown when trying to update a message flag. A reason might be that the store does not support this type of flag.

Action

Verify that the store supports this type of flag.

CTGDJN036I POP3 Messages do not support 'Flags.Flag.RECENT', therefore the Flag is not updated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJN037E Unable to initialize Mailbox Connector. The Mailbox Connector supports only the 'INBOX' folder when the POP3 protocol is chosen.

Explanation

The POP3 protocol supports only 'INBOX' folder on the server side, therefore when the Connector is in POP3 mode, you cannot specify another mail folder.

Action

Set the Connector parameter mailProtocol to 'IMAP' or supply 'INBOX' as the value for the mailFolder parameter.

CTGDIQ201I The 'watermark' parameter is set to *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIQ202E Queue with name *name* does not exist.

Explanation

Queue with given name does not exist.

Action

Specify a valid queue name.

CTGDIQ001E The Memory Stream Connector cannot add the entry because it has no Parser to write to.

Explanation

The Memory Stream Connector failed to add an entry because it had no Parser to write to.

Action

Verify that the Memory Stream Connector has a Parser configured to write to.

CTGDIQ101E Required Connector parameter 'queueName' is not set.

Explanation

The specified Connector parameter queueName is required, but not set.

Action

Set the Connector parameter queueName.

CTGDIQ102E Required Connector parameter 'jdbcTable' is not set.

Explanation

The specified Connector parameter jdbcTable is required, but not set.

Action

Set the Connector parameter jdbcTable.

CTGDIQ103E Unable to get next entry because a non-entry object was received from queue: ''*object info*''.

Explanation

The Memory Queue Connector could not get the next entry because the entry in the queue was not a valid Entry object.

Action

Verify the entries in the Memory Queue Connector's queue are valid Entry objects.

CTGDIQ104E Queue with name *name* does not exist.

Explanation

Queue with given name does not exist.

Action

Specify a valid queue name.

CTGDIC001I Delete selected items?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC002E Cannot load a Connector with configuration type: *class*.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDIC003W Delete table *table name*?

Explanation

The delete operation will delete the delta table and commit the change. The operation is permanent and there is no possible rollback of this transaction.

Action

Confirm if the delta table is to be deleted and proceed with the operation.

CTGDIC004I Table *table name* deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC005I Server says it supports the Paged Search control.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC006W Unable to determine whether the LDAP Server supports paged searches. Verify the LDAP Server supports paged searches.

Explanation

The Server did not give any response around the ability to support paged searches. Paged searches may or may not be be supported.

Action

Verify whether the LDAP server supports Paged Search control before using Paged Search.

CTGDIC007W Unable to perform paged search. This LDAP server does not support paged search.

Explanation

The LDAP Server does not support paged search.

Action

Paged search cannot be used.

CTGDIC008W Unable to lookup changelog information. The LDAP server does not provide server information.

Explanation

The LDAP Server does not provide server information, therefore it is not possible to query the server for the changelog base.

Action

Use another method to find the changelog base.

CTGDIC009W Unable to lookup changelog information. The Context attribute ''firstchangenumber'' does not exist on the LDAP Server.

Explanation

The Context attribute "firstchangenumber" does not exist on the LDAP Server.

Action

Check the LDAP Server configuration.

CTGDIC010I The First Change number is set to *first number*. The Last Change number is set to *last number*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC011W Unable to retrieve Changelog base name. The ''changelog'' attribute does not exist in the LDAP server info entry.

Explanation

The "changelog" attribute of this LDAP server does not exist.

Action

Use another method to find the Changelog base name.

CTGDIC012I LDAP Server changelog base name: '*changelog*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC013W Delete table *table name*?

Explanation

The delete operation will delete the named table and commit the change. The operation is permanent and there is no possible rollback of this transaction.

Action

Confirm if the table is to be deleted and proceed with the operation.

CTGDIC014W Unable to query schema until the Connector is configured.

Explanation

The Connector has not been configured. The schema cannot be queried.

Action

Configure the Connector before querying the schema.

CTGDIC015W Unable to lookup change number information. The LDAP server does not provide server information.

Explanation

The LDAP Server does not provide server information, therefore it is not possible to lookup the first/last change number.

Action

Use another method to find the first/last change number.

CTGDIC016E Enter the WSDL URL first.

Explanation

In order to retrieve the services from a WSDL file, the location to such should be specified.

Action

Enter a valid WSDL file location in the WSDL URL field.

CTGDIC017E No services were found in the specified WSDL file.

Explanation

The WSDL file specified in the WSDL URL parameter contains no services.

Action

Check the WSDL file. If it does not contain any services then it is an invalid WSDL file.

CTGDIC018E Enter a service name first.

Explanation

Each endpoint/operation is associated with a service. In order to see all endpoints/operations you must enter a service first.

Action

Enter a service name first. You can use the service button to discover all services in the WSDL file.

CTGDIC019E No endpoints were found in the specified WSDL file.

Explanation

The WSDL file specified in the WSDL URL parameter contains no endpoints.

Action

Check that the WSDL file is a valid one.

CTGDIC020E No operations were found in the specified WSDL file.

Explanation

The WSDL file specified in the WSDL URL parameter contains no operations.

Action

Check that the WSDL file is a valid one.

CTGDIC022E The attribute '*attribute name*' is already mapped.

Explanation

The specified attribute is already mapped and cannot be mapped a second time.

Action

Select an alternate attribue to map in the attribute map.

CTGDIC023E Exception encountered while creating component of type '*component type*': '*error message*'.

Explanation

See message.

Action

Review the error message and exception to find further details on the error.

CTGDIC024W Unable to update component. The referenced component no longer exists: *file name*.

Explanation

The component could not be updated because it no longer exists.

Action

Review the exception to find further details on the warning.

CTGDIC025E Exception encountered while updating an external component.

Explanation

The component could not be updated because an error was encountered.

Action

Review the exception to find further details on the error.

CTGDIC026E The remote Config *Config file* cannot be found on server *server name*.

Explanation

The configuration instance specified in the Config parameter of AssemblyLine Function Component could not be found on the remote server.

Action

The operator should check if the specified config parameter exists on the remote server.

CTGDIC027E Connection to server *server name* cannot be obtained.

Explanation

The remote server instance specified in the AssemblyLine Function component's server parameter may not be currently active.

Action

The operator should make sure that the specified server instance [hostname:port] combination is active on the remote server and then try to establish a connection again.

CTGDIC028E No server configured.

Explanation

The Server configuration parameter is required for the query configuration operation to work.

Action

The Operator should enter a valid remote IBM Security Directory Integrator server information [hostname:port] in the AssemblyLine function component's server parameter fields and then perform the query configuration operation.

CTGDIC029I The application will not function properly without the IBM Security Directory Integrator install directory. Specify the IBM Security Directory Integrator install directory.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC030E Installation directory specified is not valid. A local IBM Security Directory Integrator installation is required for the application to run.

Explanation

See message.

Action

Specify a valid local IBM Security Directory Integrator installation directory so the application can run properly.

CTGDIC031E Exception encountered while loading the Config file: '*file name*'.

Explanation

The application was unable to load the specified Config file.

Action

Review the exception to find further details on the error.

CTGDIC032W Exception encountered while loading the Config file: '*file name*'.

Explanation

The application was unable to load the specified Config file.

Action

Review the exception to find further details on the error.

CTGDIC033E Unable to load Config file. Cannot determine folder for referenced Config file: '*file name*'.

Explanation

The application was unable to load the specified Config file because the folder where the Config file is located could not be found.

Action

Check the file system where the Config file should be located and ensure it exists.

CTGDIC034E Unable to save file because an exception was encountered.

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIC035E Unable to load BaseEditor because there is no quick-edit object.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDIC036E Exception occurred while downloading properties.

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIC037I Update completed succesfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC038E Exception occurred while upload properties.

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIC039I The connector did not return any schema information. Do you want to open the connection and read one entry?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC040I Do you want to clear the current schema before updating?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC041I Do you want to clear the current schema before updating?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC043I The Component returned an empty entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC044I No schema information returned. Would you like to read an entry?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC045I Solution directory updated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC046E The folder already exists: '*folder name*'.

Explanation

A folder with that name already exists.

Action

Choose a unique name and try again.

CTGDIC047E Attribute already assigned to attribute '*attribute name*'.

Explanation

This attribute name has already been used for another attribute.

Action

Use another attribute name that is not already used.

CTGDIC048E Error: '*error message*'

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIC049E Exception encountered while opening the configuration file: '*error message*'

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIC050E Uanble to open the configuration file. An exception occurred: '*error message*'

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIC051I Solution directory created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC052I Unable to build configuration file. An exception occurred: '*error message*'

Explanation

See message.

Action

Review the attached Exception to find further details on the error.

CTGDIC053I Unable to create folder '*name*'. An exception occurred: '*error message*'

Explanation

See message.

Action

Review the attached exception to find further details on the error.

CTGDIC054E Target folder '*folder name*' is not a folder.

Explanation

The name specified is not a folder. The problem occurred while trying to build a configuration file.

Action

Check the configuration file.

CTGDIC055E Unable to remove object from configuration file. An exception occurred: '*error message*

Explanation

The problem occured while trying to remove an object from the configuration file.

Action

Check the configuration file.

CTGDIC056E Cannot determine folder for object '*object name*'.

Explanation

While trying the build the configuration file, the object mentioned was not recognized and could not be placed in any folder.

Action

Check the object and the configuration file.

CTGDIC057W Cannot find cached configuration for file '*file name*'.

Explanation

While trying the build the configuration file, the named object did not have a cached copy.

Action

Check the object and the configuration file. The named object was probably deleted. Add the object back to the configuration as needed.

CTGDIC058W Using cached version of file '*file name*'.

Explanation

While trying the build the configuration file, the file containing the named object was not found and a cached copy was used instead.

Action

The named object was probably deleted. Add the object back to the configuration as needed.

CTGDIC059E An unsupported action was encountered. You can only open configuration files that exist in your workspace.

Explanation

Only IBM Security Directory Integrator configuration files that exists in your workspace can be opened. Using File/Open to open files outside the workspace is not supported.

Action

Use the File/Import command to import the files into your workspace project.

CTGDIC060E Cannot create the specified directory: '*directory name*'.

Explanation

The named directory could not be created.

Action

Verify that the file name is correct. Verify that the file system permissions allow the file to be written.

CTGDIC061E The specified solution directory '*name*' is a file.

Explanation

The solution directory is a file.

Action

Remove existing file, rename the file, or use another name for the solution directory.

CTGDIC062E Created the file '*file name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC063I Do you want to stop the local server running on '*server address*'?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC064I The server is being started...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC065I This will clear the current object(s) and restore the value to the inherited one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC066I When the Skip Lookup option is selected, no 'Before/After Lookup' and 'On Multiple Entries' hooks are invoked. Also, no add is done in Update mode if an entry is not found to match the criteria.

Explanation

Make sure that your solution takes into account these restrictions.

Action

No response needed.

CTGDIC067I The Schema item '*schema name*' already exists.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC068I The file has been changed on the file system. Do you want to reload the editor?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC069I Referenced component no longer exists: '*file name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC070I Unknown class encountered. Unable to reattach to the class '*class name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC071I The parent is not a container.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC072I Th Server Mode Connector '*Connector name*' appears after another Server Mode Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC073I The Connector '*Connector name*' references unknown property '*property name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC074I The Connector '*Connector name*' references unknown string '*string value*' which is not defined in the schema.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC075I The attribute map '*attribute map name*' references undefined/unavailable work attribute '*attribute name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC076I Local development server launched ...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC077I Process exit code: '*exit code*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC078I The Connector '*Connector name*' references the object '*object name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC079I You have not updated the solution directory and not doing so may affect your connection to this server. Do you want to update the solution properties before saving?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC080I Resource already exists. Do you wish to overwrite? Overwrite: '*File name*' Last modified: '*Last modified*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC081I Cannot find a form to display for object class *Object Class*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC082I The file .rs.xml cannot be imported, please export the project and then import that file.

Explanation

The file .rs.xml in every project is special, and cannot be directly imported into another project. Instead, the whole project should be exported, and the resulting file can be imported.

Action

Export the project in question, then import the exported file.

CTGDIC083I A restart of the IBM Security Directory Integrator server is required to activate changes made to the system store of a running IBM Security Directory Integrator server.

Explanation

The IBM Security Directory Integrator server cannot change its system store configuration while running. A restart of the server is required to active changes.

Action

Stop the server and then start it again.

CTGDIC084I IBM Security Directory Integrator Version: 7.2 This plug-in is provided by IBM Corp. Your use of this plug-in is governed by the license that was agreed to when the plug-in was installed as part of a feature installation. Licensed Materials - Property of IBM Corp. (C) Copyright IBM Corp. and other(s), 2002, 2013. All Rights Reserved.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC085I Do you want to restore the file from the runtime configuration of the project?

Explanation

The Configuration Editor maintains a copy of each project file in a runtime configuration. When you save a component to disk it is also copied to the runtime configuration.

Action

Answer yes to recreate the file with the copy from the runtime configuration.

CTGDIC086W A Property can only be exposed once.

Explanation

This message is displayed when an attempt is made to expose a property more than once.

Action

No action is required.

CTGDIC087W An item with that name already exists.

Explanation

Items must have unique names.

Action

Choose another name.

CTGDIC088W Error while renaming to '*new name*'.

Explanation

The component could not be renamed because an error was encountered.

Action

Consider the attached error message, and choose another name.

CTGDIC089W You must configure sandbox settings before running the AssemblyLine in Record or Playback mode.

Explanation

The AssemblyLine must have a database name specified in order to record or playback an AssemblyLine.

Action

Use the Sandbox Settings and configure a database name.

CTGDIC090W This Attribute Map item contains an expression. If it is changed, it must be changed to javascript code.

Explanation

This Attribute Map item is of the deprecated type expression. There is no editor to change an expression. Using the javascript editor on this item will cause it to be changed to type javascript.

Action

Answer OK to go ahead with the change.

CTGDIC091W The proxy AssemblyLine was successfully updated.

Explanation

The proxy AssemblyLine was updated with the changes from the simulation settings of the current AssemblyLine.

Action

CTGDIC092E The ikeyman.exe file not found. Searched in folders *path1* and *path2*.

Explanation

The IBM Key Management could not be started, because the executable could not be found.

Action

Verify the ikeyman.exe file exists.

CTGDIC093E No // found in ''*url*''. Hostname cannot be determined.

Explanation

The URL prefix is parsed to determine the hostname and port. There should be a // in front of the hostname.

Action

Enter a correct URL prefix.

CTGDIC094I Delete selected items? There will be no undo.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC095W Component ''*name*'' automatically moved to the DataFlow section.

Explanation

The named component had the wrong mode for being in the Feed section, and was automatically moved to the DataFlow section.

Action

If necessary, change the mode and move the Connector to the Feed section.

CTGDIC096W The AssemblyLine is still running on the server. Do you want to stop it?

Explanation

When you close a run window you have the option of leaving the assemblyline running or stop it. You can also stop or reopen the assemblyline from the Servers view.

Action

Choose yes or no as appropriate.

CTGDIC097W Could not locate *name* while resolving dependencies.

Explanation

When you import a configuration file, all the resources that are needed are also imported into the project. This message indicates that one such resource could not be found, it may have been deleted from the configuration file.

Action

Verify that this does not cause a problem.

CTGDIC098I Connection to *DataBase* Successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC099W Connection to *DataBase* Failed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC100I The branch '*Branch name*' has no preceeding IF/ELSEIF component.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC101I The case '*Case name*' is not inside a Switch component.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC102I The attribute map for '*Connector name*' is empty (auto-mapping is either off in the AssemblyLine or the connector is not part of an AssemblyLine).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC103I Do you want to replace the reference to '*Property name*' with the value '*Value name*'?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC104I The system store configuration has no value for parameter: {0}

Explanation

The configuration for the system store is incomplete. Open the system store configuration screen and fill in the missing parameter.

Action

CTGDIC105E The specified namespace is already defined

Explanation

There can only be one definition for a namespace.

Action

Either delete the existing definition for the namespace, or choose another name for the namespace.

CTGDIC106I *Run option* on *Server name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC107W An Operation with that name already exists.

Explanation

There can only be one operation with a given name.

Action

Choose another name.

CTGDIC108E The system encountered an internal error while trying to validate a product license. Message: *message*.

Explanation

An internal error is preventing validation of the product license.

Action

Contact IBM support.

CTGDIC109E The system cannot find an enrolled product license.

Explanation

An enrolled product license could not be found.

Action

In order to use Security Directory Integrator, you need to ensure that a valid license is enrolled. If you experience any problems with licensing, you should contact your IBM representative or authorized dealer for assistance.

CTGDIC110E The evaluation period has expired.

Explanation

The evaluation period for this copy of Security Directory Integrator has now expired.

Action

This copy of Security Directory Integrator is licensed for use for a limited period only. This copy of Security Directory Integrator has now exceeded the licensed period and will no longer execute. You can purchase a full license for unlimited use of the product by contacting your IBM representative or authorized dealer.

CTGDIC111W There are *number of days* days left in the evaluation period.

Explanation

The evaluation period for this copy of Security Directory Integrator has the specified number of days to run until expiry.

Action

This copy of Security Directory Integrator is licensed for use for a limited period only. This copy of Security Directory Integrator will continue to execute for the specified number of days, but will then expire and not execute in the future. You can purchase a full license for unlimited use of the product by contacting your IBM representative or authorized dealer.

CTGDIC112E The evaluation period is invalid.

Explanation

The evaluation period for this copy of Security Directory Integrator is invalid.

Action

This copy of Security Directory Integrator is licensed for use for a limited period only. This copy of Security Directory Integrator appears to have more than the maximum allowed number of days (90) remaining in the evaluation period.

CTGDIC113E No help page found for topic ''*topic*''.

Explanation

There was an error while trying to display the help for the selected topic.

Action

Search the Security Directory Integrator documentation on the IBM website for help on the selected topic.

CTGDIC114E Parameter '*parameter name*' is required.

Explanation

The named parameter must be given a value.

Action

Specify a value for the parameter.

CTGDIC115E There are *number* missing values.

Explanation

Several parameters have not been given a value.

Action

Specify a value for all parameters that require a value.

CTGDIC116W AssemblyLine terminated - showing last 10 log messages (use view log file to view entire log)

Explanation

The AssemblyLine was terminated and logging of messages is suspended until the log has been drained. Only the last ten lines are shown but you can use the View log button to view all log lines from the AssemblyLine.

Action

Specify a value for all parameters that require a value.

CTGDIC117W Software Update is disabled in this product.

Explanation

Software update is not supported in this product. To use this product with other Eclipse plugins you should install Security Directory Integrator in a separate Eclipse installation.

Action

Install this product in a different Eclipse installation for use with other plugins.

CTGDIC118E An error occurred while retrieving the CDM version.

Explanation

The used CDM meta-data source is not available. Depending on the used source either the idmlcert.jar is missing, or the CDM meta-data of the IT registry has been corrupted.

Action

Try changing the meta-data source to the alternative (either the JAR file or an IT registry system). If the problem persists, verify the location of the JAR file (/jars/3rdparty/IBM/cdm/idmlcert.jar) and the integrity of the meta-data in the remote IT registry system.

CTGDIC119E Failed to connect to the IT registry database (parameters: *it_registry_credentials*). The thrown exception is: *exception*.

Explanation

A connection could not be established with the IT registry database.

Action

Verify that the IT registry is running and the used credentials are correct.

CTGDIC120I Successfully connected to the IT registry database (parameters: *it_registry_credentials*).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDI3244I Successfully connected to the database (parameters: *credentials*).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDI3245I Failed to connect to the database (parameters: *credentials*). The thrown exception is: *exception*.

Explanation

A connection could not be established with the database.

Action

Verify that the database is running and the used credentials are correct.

CTGDIC121I No types were found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC122I Common Data Model version is '*cdm*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC123E AssemblyLine failed: *string*

Explanation

The assemblyline failed while running or stepping through it.

Action

Check the log in the console view for more information about the error.

CTGDIC124I AssemblyLine Completed- *number* record(s) read- *number* record(s) written- *number* error(s)*string*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC126I *number* record(s) record(s) found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC127I No MSS were found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC128I The Component has reached the end of the data source.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC129I Input value:- *string*Output value: *string*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC130I AssemblyLine Completed- *number* record(s) read- *number* record(s) added- - *number* record(s) modified- *number* record(s) unchanged- - *number* error(s)*string*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC131I An error occurred while initializing component [*name*].

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC132I An error occurred in component [*name*].

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC133I An error occurred while executing AssemblyLine Hook *name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC134I Illegal character ''*character*'' in name.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC135E Parameter '*parameter name*' must be a number.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC136E Parameter '*parameter name*' cannot be less than *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC137E Parameter '*parameter name*' cannot be greater than *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC138E Value for '*label*' must be a list of increasing numbers.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC139E There are not that many days in the month.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC140W For some combinations of Day and Month this Scheduler will not run.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC141W Some months this Scheduler will not run.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC142E Can not find a suitable protocol.

Explanation

A suitable protocol could not be found to connect to target computer with the given configuration parameters.

Action

In order to get the list of suitalble protocol(s) please provide sufficient and correct configuration parameters.

CTGDIC143W Some files could not be refactored. Check Error log for details.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC144W Unable to locate the connection form for this component. This is mostly likely because a jar or zip file is missing. Make these library files available to SDI by copying them anywhere under the 'jars' subfolder of the SDI installation directory. Or if you want to leave these files in place and point to them instead, then add their file/folder paths to the 'com.ibm.di.loader.userjars' property. You must restart SDI for changes made to take affect.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIC145W The port for your *name* SDI Server is already in use at *address* in the Solution Directory *directory name*.

Explanation

The Solution Directory, which is used by the connected SDI Server, does not match the Solution Directory in the Default Server Document.

Action

Ensure that every SDI Server uses a unique API port. This allows you to run several SDI Servers with different Solution Directories. You can access all the SDI Servers using unique API port.

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE024I Checking to see if property is in the property store: *property store name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE025I Found the property in the property store: *property store name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE026I The property was not found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE027E No available property stores to write key ''*key*''.

Explanation

The user has tried to write to a property store that does not exists.

Action

Define a property store with suitable name.

CTGDKE028E No default store to accept: *key*.

Explanation

The user has not specified default property store.

Action

Define default property store to be used instead of the store with the specified name or property store with such name.

CTGDKE029I The Property Store cache is disabled. The cache timeout is set to *number of seconds* seconds.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE030I The Property Store cache is enabled. The cache timeout is set to *number of seconds* seconds.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE031I Caching all properties from data source.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE032I Cached *number of properties* properties.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE033I Returning cached entry for key *key*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE034I Removing expired cache entry for key=*key*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE035I Adding cache entry for key *key*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE036E Property key ''*key*'' is not unique.

Explanation

The key, of which the user tried to read the value, is not unique.

Action

Ensure the records in a property store have not repeating keys.

CTGDKE037E Property store ''*property store name*'' is configured as read-only.

Explanation

The store to which the user writes is configured as read only.

Action

Configure the property store so that it is not read only.

CTGDKE038E No 'key' attribute specified.

Explanation

The entry does not have the "key" attribute.

Action

Define the "key" attribute in the entry.

CTGDKE039E Error occurred when creating IBM Security Directory Integrator Property store. Property store: *property store name* Exception: *exception*

Explanation

Error occurred during the initialization of Properties Connector.

Action

Check the configuration.

CTGDKE040E Property store ''*store name*'' is not available to read key ''*key*''.

Explanation

The named property store from which the user tried to get a value, is not available.

Action

Verify that the property store with the given name exists and is properly configured.

CTGDKE041W Property store ''*store name*'' does not contain key ''*key*''.

Explanation

The named property store from which the user tried to get a value, did not contain the given key.

Action

Verify that the property store with the given name contains the key.

CTGDKE042E Problem parsing component definition file ''*path name*''.

Explanation

The file indicated by the given path could not be parsed, and the corresponding component will not be available.

Action

Verify the syntax of the file indicated.

CTGDKE043E An error occurred while encrypting data.

Explanation

See error trace.

Action

Check the configuration and try again.

CTGDKM201I Parsing to get options provided by user.

Explanation

No additional information is available for this message.

Action

CTGDKM202I Starting the Administration and Monitoring Console back up operations to location: *location*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM203I Starting the Administration and Monitoring Console restore operations from location: *location*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM204I Parsing to get options provided by user.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM205I The database table being backedup is: *table name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM206E SQL Exception while trying to read Database tables

Explanation

The tool encountered an SQL exception while trying to read the database to be migrated.

Action

Check that database properties specified in amc.properties are accurate and try again.

CTGDKM207E An Exception was encountered while trying to connect to customer database. Unable to back the database.

Explanation

The tool encountered an exception while trying to back up the database.

Action

Check error logs and try again.

CTGDKM208E An exception occurred while trying to write to an xml file for the database table *table name*.

Explanation

The tool encountered an exception while trying to write to an xml file for a specific table in the database.

Action

Check error logs.

CTGDKM209E An exception occurred while trying to read column data from tables to create xml files.

Explanation

The tool encountered an SQL exception while trying to read from table column from database.

Action

Check error logs.

CTGDKM210I Column Name:*column name*. Column Value:*column value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM211I Generated SQL statements for rest of the tables.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM212I Back up location is: *location*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM213I SQL exception thrown while executing the following SQL statement: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM214I Adding the autogenerated ids from master tables to rest of xml files.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM215I Updating xml of table: *statement* with new ID.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM216I Writing to xml files: .

Explanation

No additional information is available for this message.

Action

CTGDKM234E An error was encountered while trying to read amc.properties file.

Explanation

An error was encountered while trying to read the amc.properties file.

Action

Check that the location specified for the amc.properties file is accurate and try again.

CTGDKM235E An error was encountered while trying to write to file.

Explanation

An error was encountered while trying to write to file.

Action

Check logs and try again.

CTGDKM236E An error was encountered while trying to add data to database.

Explanation

An error was encountered while trying to add data to database.

Action

Check logs and try again.

CTGDKM237I Updating XML files with constraints added in new release.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM238E The global id, host or port is null.

Explanation

The global id, host or port is null.

Action

The data has been corrupted. Try again.

CTGDKM239E The data violates unique constraint requirement. The data cannot be migrated.

Explanation

The data violates unique constraint requirement. The data cannot be migrated.

Action

The data has been corrupted. Try again.

CTGDKM240E An error has occured while parsing the xml holding AMC DB data.

Explanation

An errror has occured while parsing the xml holding AMC DB data.

Action

Check the logs and try again.

CTGDKM241E An error has occured while reading Administration and Monitoring Console data transferred to xml files.

Explanation

An error has occured while reading Administration and Monitoring Console data transferred to xml files.

Action

The saved data has been corrupted. Try again.

CTGDKM242I Autogenerating ids for : *table name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM243E An error has occured while autogenerating key.

Explanation

An error has occured while autogenerating key.

Action

Check error logs and try again.

CTGDKM244E An error has occured while removing columns to update saved data.

Explanation

An error has occured while removing columns to update saved data.

Action

Check error logs and try again.

CTGDKM245E An error has occured while adding columns to update saved data.

Explanation

An error has occured while adding columns to update saved data.

Action

Check error logs and try again.

CTGDKM246E An error has occured while renaming table to update saved data.

Explanation

An error has occured while renaming table to update saved data.

Action

Check error logs and try again.

CTGDKM247E An error has occured while creating sql insert statements.

Explanation

An error has occured while creating sql insert statements.

Action

Check error logs and try again.

CTGDKM248E An error has occured while updating xml files with newly generated ids.

Explanation

An error has occured while updating xml files with newly generated ids.

Action

Check error logs and try again.

CTGDKM249I Updating the XML for table: *table name* with new ID.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM301I Starting file migration...

Explanation

No additional information is available for this message.

Action

CTGDKM302I Parsing options...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM303E The *operator switch* option occurred more than once.

Explanation

The tdimigamc command was invoked with the same parameter passed more than once. Options can be passed only once. Fox example, the user may have passed the '-b' option twice, which is not allowed.

Action

Pass each option only once.

CTGDKM304E No value specified for *option name* option.

Explanation

The tdimigamc command was invoked by passing an option whose value had not been specified. The value is also required.

Action

Check the tdimigamc command usage, and invoke the tdisrvctl command again with the correct option and associated value.

CTGDKM305E Incorrect command usage.

Explanation

The tdimigamc command was invoked by passing unsupported command line options, or unexpected end of argument list was encountered or there was an incorrect usage of the command line options.

Action

Check the tdimigamc command usage and try invoking the tdisrvctl command with valid arguments.

CTGDKM306E Unknown option *operator switch* encountered.

Explanation

The tdimigamc command was invoked with an unknown option.

Action

See the tdimigamc command usage and invoke the command with the allowed options only.

CTGDKM307E The *operator switch* option was not specified. This is a mandatory option.

Explanation

The tdimigamc command was invoked without specifying the -op option.

Action

See the tdimigamc command usage and invoke the command with the correct and mandatory options specified.

CTGDKM308I Options Parsed: *options*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM309E An error *error* occurred while reading the XML properties file.

Explanation

There was an error while loading the XML properties file.

Action

Refer to the logs for additional information. Verify that the migamc.jar file is in the classpath.

CTGDKM310E Unable to migrate the file *file name*. The file does not exist or cannot be read.

Explanation

The migration failed because the file to migrate does not exist or could not be read.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM311E Unable to migrate the file *file name*. The file specified is not a file.

Explanation

The migration failed because the file specified for migration was not a file.

Action

Verify that the specified file to migrate exists and is a file that can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM312E Unable to migrate the file *file name*. The file specified cannot be written to.

Explanation

The migration failed because the file could not be written to.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM313E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the file name.

Explanation

The migration failed because the file to migrate and the file to backup are the same.

Action

Specify a different file names for the file to migrate and the backup file.

CTGDKM314E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the new file.

Explanation

The migration failed because the new file name and the file to backup are the same.

Action

Specify a different file names for the file to backup and the new file.

CTGDKM315E Unable to perform the migration. Unable to backup the file *file name* to *file name*.

Explanation

The migration failed because the file to migrate could not be backed up.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM316I Adding the new properties...

CTGDKM326I The file *file name* is successfully deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM327I Failed to delete file *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM328I Initializing migration, loading the *xml prop file* properties file .

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM329I There are no properties in the new release which need to be updated in the older release.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM101W The command did not complete successfully. See previous messages or error logs for details.

Explanation

One or more errors occurred during the execution of the command.

Action

Check the previous messages displayed by the tdimigam command, or look at the error logs for more details.

CTGDKM102E Unknown value passed for '-op' option.

Explanation

An illegal operation parameter was passed.

Action

Check the tdimigam command usage for allowed options.

CTGDKM103E Incorrect command usage.

Explanation

The tdimigam command was invoked by passing unsupported command line options, or unexpected end of argument list was encountered or there was an incorrect usage of the command line options.

Action

Check the tdimigam command usage and try invoking the tdisrvctl command with valid arguments.

CTGDKM104E No value specified for *option name* option.

Explanation

The tdimigam command was invoked by passing an option whose value had not been specified. The value is also required.

Action

Check the tdimigam command usage, and invoke the tdisrvctl command again with the correct option and associated value.

CTGDKM105I The usage for the command is: tdimigam -f propfile [-b backfile] [-n newfile] [-v] [-?] where: -f propfile The name of the file to migrate -b backfile Back up the original file with the specified name -n newfile Name to give the file that is migrated -v Enable verbose mode -? Prints this usage statement

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM106I Return Code: *return code*.

CTGDKM109E The *operator switch* option occurred more than once.

Explanation

The tdimigam command was invoked with the same parameter passed more than once. Options can be passed only once. Fox example, the user may have passed the '-b' option twice, which is not allowed.

Action

Pass each option only once.

CTGDKM110E Unknown option *operator switch* encountered.

Explanation

The tdimigam command was invoked with an unknown option.

Action

See the tdimigam command usage and invoke the command with the allowed options only.

CTGDKM111W Already reached the end of argument list.

Explanation

While parsing the arguments, the tdimigam utility encountered an unexpected end of arguments.

Action

Check the command usage and try again.

CTGDKM112E The *operator switch* option was not specified. This is a mandatory option.

Explanation

The tdimigam command was invoked without specifying the -op option.

Action

See the tdimigam command usage and invoke the command with the correct and mandatory options specified.

CTGDKM113I Starting file migration...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM114E Unable to perform the migration. Unable to backup the file *file name* to *file name*.

Explanation

The migration failed because the file to migrate could not be backed up.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM115E Unable to migrate the file *file name*. The file does not exist or cannot be read.

Explanation

The migration failed because the file to migrate does not exist or could not be read.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM116E Unable to migrate the file *file name*. The file specified is not a file.

Explanation

The migration failed because the file specified for migration was not a file.

Action

Verify that the specified file to migrate exists and is a file that can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM117E Unable to migrate the file *file name*. The file specified cannot be written to.

Explanation

The migration failed because the file could not be written to.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM118E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the file name.

Explanation

The migration failed because the file to migrate and the file to back up are the same.

Action

Specify a different file names for the file to migrate and the backup file.

CTGDKM119E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the new file.

Explanation

The migration failed because the new file name and the file to back up are the same.

Action

Specify a different file names for the file to backup and the new file.

CTGDKM120E Error deleting file: *file name*.

Explanation

The specified file could not be deleted.

Action

Check the file permitions.

CTGDKM001W The command did not complete successfully. See previous messages or error logs for details.

Explanation

One or more errors occurred during the execution of the command.

Action

Check the previous messages displayed by the tdimiggbl command, or look at the error logs for more details.

CTGDKM002E Unknown value passed for '-op' option.

Explanation

An illegal operation parameter was passed.

Action

Check the tdimiggbl command usage for allowed options.

CTGDKM003E Incorrect command usage.

Explanation

The tdimiggbl command was invoked by passing unsupported command line options, or unexpected end of argument list was encountered or there was an incorrect usage of the command line options.

Action

Check the tdimiggbl command usage and try invoking the tdisrvctl command with valid arguments.

CTGDKM004E No value specified for *option name* option.

Explanation

The tdimiggbl command was invoked by passing an option whose value had not been specified. The value is also required.

Action

Check the tdimiggbl command usage, and invoke the tdisrvctl command again with the correct option and associated value.

CTGDKM005I The usage for the command is: tdimiggbl -f propfile [-b backfile] [-n newfile] [-v] [-?] where: -f propfile The name of the file to migrate -b backfile Backup the original file with the specified name -n newfile Name to give the file that is migrated -s dir Specifies the working directory where the solution directory is located. -v Enable verbose mode -? Prints this usage statement

CTGDKM009E The *operator switch* option occurred more than once.

Explanation

The tdimiggbl command was invoked with the same parameter passed more than once. Options can be passed only once. Fox example, the user may have passed the '-b' option twice, which is not allowed.

Action

Pass each option only once.

CTGDKM010E Unknown option *operator switch* encountered.

Explanation

The tdimiggbl command was invoked with an unknown option.

Action

See the tdimiggbl command usage and invoke the command with the allowed options only.

CTGDKM011W Already reached the end of argument list.

Explanation

While parsing the arguments, the tdimiggbl utility encountered an unexpected end of arguments.

Action

Check the command usage and try again.

CTGDKM012E The *operator switch* option was not specified. This is a mandatory option.

Explanation

The tdimiggbl command was invoked without specifying the -op option.

Action

See the tdimiggbl command usage and invoke the command with the correct and mandatory options specified.

CTGDKM013I Starting file migration...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM014E Unable to perform the migration. Unable to backup the file *file name* to *file name*.

Explanation

The migration failed because the file to migrate could not be backed up.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM015E Unable to migrate the file *file name*. The file does not exist or cannot be read.

Explanation

The migration failed because the file to migrate does not exist or could not be read.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM016E Unable to migrate the file *file name*. The file specified is not a file.

Explanation

The migration failed because the file specified for migration was not a file.

Action

Verify that the specified file to migrate exists and is a file that can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM017E Unable to migrate the file *file name*. The file specified cannot be written to.

Explanation

The migration failed because the file could not be written to.

Action

Verify that the specified file to migrate exists and a can be read and written to. Also, verify you have read permissions on the backup file location.

CTGDKM018E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the file name.

Explanation

The migration failed because the file to migrate and the file to backup are the same.

Action

Specify a different file names for the file to migrate and the backup file.

CTGDKM019I Performing migration deletion operations...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM020I Performing migration addition operations...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM021I Performing migration Derby operations...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM022I Performing migration modification operations...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKM023E Unable to migrate the file *file name*. The file name of the backup file must not be the same name as the new file.

Explanation

The migration failed because the new file name and the file to backup are the same.

Action

Specify a different file names for the file to backup and the new file.

CTGDKM024E An error has occurred while reading the stash file: *exception*

Explanation

The specified error has occurred while reading the stash file.

Action

See the exception for more information.

CTGDKM025E No password has been found in the Server stash file.

Explanation

The Server stash file must contain the password of the Server keystore (and optionally the password of the key).

Action

Provide a password in the stash file.

CTGDIS001E The version number of the Connector is undefined.

Explanation

The getVersion method of the Connector did not return a version number. A version number can only be displayed for a user defined Connector if the getVersion method of the Connector is defined and returns a java.lang.String object.

Action

If the Connector is not a user defined Connector that has been added to the IBM Security Directory Integrator jars directory, contact IBM Support. Otherwise, verify the user defined Connector has properly implemented the getVersion method.

CTGDIS002E Error on printing component version numbers.

Explanation

There was an error while displaying the version information of all the installed components using the ibmdisrv -v flag.

Action

See the ibmdi.log to view the specific exception.

CTGDIS003I *** Start dumping Entry

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS004I *** Finished dumping Entry

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS005I *** Start dumping Object ***

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS006I *** Finished dumping Object ***

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS007I Dump of SYSTEM.PROPERTIES.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS008I Loading system templates.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS009E Error while setting log file: ''*file name*''.

Explanation

There was an error setting the specified log file for the output logs using the -l flag of ibmdisrv.

Action

Verify you have the required security permission to reassign the standard output stream. You can check this through the Security Manager permissions.

CTGDIS010E No configuration file specified.

Explanation

There was no configuration file specified for the ibmdisrv command.

Action

Confirm if you want to proceed with the delete operation. Choose Cancel if you do not want the network server to be deleted from the configuration list.

CTGDIS011E Error loading configuration file *file name*.

Explanation

The configuration file specified using the -c commandline option for the ibmdisrv could not be loaded. Either the configuration file does not exist or the path to configuration file might be wrong.

Action

Verify that the specified file exists, and that the specified path is correct.

CTGDIS012E Error while setting properties.

Explanation

There was an error while setting the system properties.

Action

Verify a security manager exists and its checkPermission method allows setting the specified properties.

CTGDIS014E Error while initializing manager.

Explanation

Could not initialize the administration and the monitoring console. The administration and monitoring console might already be started.

Action

Verify the administration and monitoring console is already started.

CTGDIS015E Error while auto starting AssemblyLines.

Explanation

Error while auto-starting the AssemblyLine(s) specified by the -r flag of ibmdisrv.

Action

The specified AssemblyLine might not exist in the configuration file. Specify an Assembly Line that exists in the currently selected configuration file.

CTGDIS016E Error while auto starting EventHandlers.

Explanation

Error while auto-starting the EventHandler(s) specified by the -t flag of ibmdisrv.

Action

The specified EventHandler might not exist in the configuration file. Specify an EventHandler that exists in the currently selected configuration file.

CTGDIS017E Error while starting EventHandler *EventHandler name*.

Explanation

Error while auto-starting the EventHandler(s) specified by the -t flag of ibmdisrv.

Action

The specified EventHandler might not exist in the configuration file. Specify an AssemblyLine that exists in the currently selected configuration file.

CTGDIS018E Cannot declare the error object.

Explanation

Error while declaring the Script engine error object for the AssemblyLine component.

Action

Check the logs for the exception thrown by the Bean Scripting framework.

CTGDIS019E The EventHandler *EventHandler name* has no associated Java class.

Explanation

There is no corresponding Java class for the specified EventHandler.

Action

Verify the jar file for the specified EventHandler exists under TDI_HOME/jars/eventhandlers directory.

CTGDIS020E Cannot debug old style EventHandlers.

Explanation

The old style EventHandlers cannot be debugged.

Action

The old style EventHandlers cannot be debugged. The old style EventHandlers are deprecated and should not be used. You should use a new style EventHandler instead.

CTGDIS021E No Config path configured.

Explanation

There is no configuration path specified for the reloading the configuration file.

Action

Make sure that the configuration path is set and then try to reload the configuration.

CTGDIS022E Error while loading configuration.

Explanation

The Connector configuration could not be loaded.

Action

Check the Connector is a valid meta-merge config object.

CTGDIS023E Error while getting AttributeMap for *attribute map*.

Explanation

Could not retrieve the attribute map for the named Connector. The attribute map may not be defined.

Action

Verify the attribute map is defined for the named Connector.

CTGDIS024E Error while getting Config for AssemblyLine *AssemblyLine name*.

Explanation

Could not retrieve the configuration for the specified AssemblyLine.

Action

Verify the configuration for the AssemblyLine exists.

CTGDIS025E Exception while loading configuration: *file name*.

Explanation

The Connector configuration could not be loaded.

Action

Check the logs for the specific exception. Contact IBM support for resolution of the specific exception.

CTGDIS026E SkipTo: Unknown Connector *Connector name*.

Explanation

The specified Connector is an unknown Connector type and cannot be loaded. Only Connectors of known types can be loaded. Either you have mentioned a Connector of unknown type or you trying to inherit from a Connector of unknown type.

Action

Specify a Connector which is supported by IBM Security Directory Integrator. For getting a list of all the known or supported Connectors use the ibmdisrv -v option. This will list the supported Connectors and their classes. Use this list to the specify a Connector inside the AssemblyLine or in the inheritance of a Connector.

CTGDIS027E Could not auto-start the EventHandler(s).

Explanation

The ibmdisrv command line parameter '-D' prevented start of EventHandler/Listener tasks.

Action

If you want the EventHandlers to auto-start make sure that the -D commandline option is not used while starting ibmdisrv.

CTGDIS028I Starting AssemblyLine *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS029I Starting AssemblyLine *AssemblyLine name* for debug.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS030I AssemblyLine *AssemblyLine name* started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS031I AssemblyLine *AssemblyLine name* started for debugging.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS032I Starting EventHandler: *EventhHandler name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS033I EventHandler *EventhHandler name* has started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS034I Wait for completion of AssemblyLine: *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS035I Wait for completion of EventHandler: *EventHandler name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS036I Exit after auto-run requested.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS037I Server terminates because only main thread is left.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS038I System termination requested by external process.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS039I Waiting for the completion of the currently executing task.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS040I Loading configuration from stdin.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS041I Loading configuration from *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS042W Possible deadlock detected, allowing one more thread to start.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS043I Enabled hook script for *hook name* is empty.

Explanation

The specified hook is enabled but is empty.

Action

You can disable the specific hook if it is empty and not needed.

CTGDIS044I Initializing Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS045I Connector is iterator, call selectEntries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS046I Initialization finished.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS047W Entry not found.

Explanation

Could not find the entry object specified by the link criteria.

Action

No entry object matching the link criteria was found. Consider changing the link criteria.

CTGDIS048E Multiple entries found and no 'On Multiple Entries' Hook defined.

Explanation

The link criteria has returned multiple entries on lookup. But there are no multiple hooks defined to handle the multiple entries. The On Multiple Entries hooks must be defined to let IBM Security Directory Integrator know how to handle multiple entries returned by the link criteria.

Action

You must define the On Multiple Entries hooks and enable it.

CTGDIS049I Entry not found, calling ADD.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS050I Entry found, calling MODIFY.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS051W Task is not allowed to modify entries.

Explanation

You are trying to modify an entry object, but there are no modify attributes specified in the attribute map. This operation will be skipped.

Action

Specify a valid attribute in the attribute map for modification.

CTGDIS052I (Modify) Attribute *attribute name* removed. It is part of the attribute map (mod) but not present in the conn entry (ref. Null Value Behavior).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS053I (Modify) Attribute *attribute name* included in modify operation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS054E Connector is not configured to add Entries.

Explanation

You are trying to add an entry object with a Connector which is not configured to run in either the add or modify mode.

Action

To perform add operations configure the Connector in the addonly mode or the update mode and then run the AssemblyLine.

CTGDIS055I Loading user jars from *path*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS056I Trigger *trigger name* was not handled, call default handler.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS057I Hook *hook name* not enabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS058I Connector *Connector name* inherits from *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS059I Virtual Connector provided.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS060W No Connector provided for runtime Connector.

Explanation

You are trying to use a virtual Connector but no runtime Connector is specified.

Action

Specify a runtime Connector.

CTGDIS061I Reuse Connector *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS062I Cannot load Connector *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS063I Using advanced link criteria (script).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS064I Loading Attribute Map.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS065I Load Hooks.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS066W No link criteria configured.

Explanation

The Connector is configured in either the update/lookup or the delete mode, but no link criteria is configured. It is required that the link criteria be configured for a Connector configured to run in update/lookup or delete mode.

Action

Configure the link criteria by using the simple link criteria or the advanced link criteria.

CTGDIS067E Unable to find configuration for AssemblyLine *AssemblyLine name*.

Explanation

For the specified AssemblyLine there is no corresponding configuration file specified using the -c commandline option of ibmdisrv.

Action

You should specify the configuration file which includes the specified AssemblyLine. Use the ibmdisrv's -c commandline option to specify the configuration file.

CTGDIS068E Unknown object class passed as parameter to AssemblyLine: *AssemblyLine name*.

Explanation

An unknown object is passed as a parameter to the AssemblyLine.

Action

Make sure only supported parameters are passed to an AssemblyLine.

CTGDIS069I Loading Connectors.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS070I Finished loading Connectors.

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS128E Cannot find AssemblyLine *AssemblyLine name*.

Explanation

The specified AssemblyLine could not be found in the list of configuration files mentioned while starting up the ibmdisrv.

Action

Specify an AssemblyLine which exists in the currently loaded configuration(s).

CTGDIS129I No config entry for Component *component name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS131I Delta Sequence now at *sequence ID*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS140E Unable to decrypt the file. Either no password was specified or the password specified is not correct.

Explanation

The specified configuration has been encrypted using the old style password encryption. The password used for encryption must be specified to decrypt it correctly Either no password was specified or the password specified is not correct.

Action

To decrypt a file correctly a valid encryption password must be specified.

CTGDIS141I Load properties from *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS142I Error while loading *file name*, exception is *message* .

Explanation

Could not load the named global.properties/solution.properties file. The file does not exist, is not readable, or contains a syntax error.

Action

Check the exception message for more information about the problem, and correct the problem.

CTGDIS143E No criteria can be built from input (no link criteria specified).

Explanation

The specified input criteria has not been specified or is incorrect. A valid criteria must be specified for successful lookup of the entry object.

Action

Specify a valid criteria which returns at least one entry object.

CTGDIS144E No such AssemblyLine: *AssemblyLine name*.

Explanation

The AssemblyLine must exist in the currently loaded configuration file for operations to be performed. The specified AssemblyLine does not exist in the configuration file.

Action

Specify a valid and existing AssemblyLine's name while starting the AssemblyLine using the ibmdisrv -r flag or while using main.startAL() method calls.

CTGDIS145E TCB: Missing required parameter *parameter name*.

Explanation

A required parameter for the TCB is missing.

Action

Specify the TCB parameter to correct the error.

CTGDIS147E TCB:Wrong accumulator object type *object type*.

Explanation

The valid values for the accumulator object types are Collection, AssemblyLineListener, ConnectorInterface, ParserInterface and AssemblyLineComponent.

Action

Specify an object of one of the above types in the TCBs accumulateEntry() method call.

CTGDIS148I Setting Connector parameters.

Explanation

No additional information is available for this message.

CTGDIS153I Finished building TCB entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS156E Input Attribute *attribute name* is required, but not present.

Explanation

The specified input attribute is required but is not present in the entry object.

Action

The input attribute must be mapped into the entry object.

CTGDIS157E Output Attribute *attribute name* is required, but not present.

Explanation

The specified Output attribute is required but is not present in the entry object.

Action

The Output attribute must be mapped into the entry object.

CTGDIS158I Registering Script Beans.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS159E This Connector has no configured Parser.

Explanation

There is no Parser configured in the Connector's config tab. This Connector needs a Parser.

Action

Configure a valid Parser from the available Parser list in the Connector's config tab.

CTGDIS160E Connector does not support getNextEntry.

Explanation

The Connector does not support the iterator mode. Calling getNextEntry() on this Connector object is not supported.

Action

Check the supported mode of the Connectors. If the Connector does not support the iterator mode then you cannot call the getNextEntry() method.

CTGDIS161E Connector does not support modEntry.

Explanation

The Connector does not support the update mode. Calling modEntry() on this Connector object is not supported.

Action

Check the supported mode of the Connectors. If the Connector does not support the update mode then you cannot call the modEntry method.

CTGDIS162E Connector does not support deleteEntry.

Explanation

The Connector does not support the delete mode. Calling deleteEntry() on this Connector object is not supported.

Action

Check the supported mode of the Connectors. If the Connector does not support the delete mode then you cannot call the deleteEntry method.

CTGDIS163E Connector does not support findEntry.

Explanation

The Connector does not support the lookup mode. Calling findEntry() on this Connector object is not supported.

Action

Check the supported mode of the Connectors. If the Connector does not support the lookup mode then you cannot call the findEntry() method.

CTGDIS164E Connector does not support putEntry.

Explanation

The Connector does not support the addonly mode. Calling putEntry() on this Connector object is not supported.

Action

Check the supported mode of the Connectors. If the Connector does not support the addonly mode then you cannot call the putEntry method.

CTGDIS165E Connector does not support queryReply.

Explanation

The Connector does not support the CallReply mode. Calling queryReply method on this Connector object is not supported.

Action

Check the supported mode of the Connectors. If the Connector does not support the call/reply mode then you cannot call the queryReply method.

CTGDIS167E Connector does not support queryTables.

Explanation

The queryTables method of a Connector is used to discover "tables" for a connection. The Connector may implement this in which case a Vector of strings is returned. For a database Connector this would typically be a list of table/view names the user can access with the current set of parameters. For other Connectors this might translate to different concepts. For this specific Connector there is no queryTables method implemented.

Action

The Connector does not support the queryTable().

CTGDIS168E Pipe with name *pipe name* already exists.

Explanation

The pipe (memory queue pipe) already exists. You cannot create two pipes with the same name.

Action

Specify an unique name for the memory queue pipe.

CTGDIS169E No value specified.

Explanation

The queue name is a required parameter.

Action

Specify a valid and unique queue name.

CTGDIS170E The memory queue pipe is full.

Explanation

The memory queue pipe is full and no entries can be added to it.

Action

Flush out entries from the queue or stop the push() operation till the memory queue becomes empty.

CTGDIS171E Error calculating threshold.

Explanation

The memory buffer queue calculates the threshold or the water mark dynamically by taking the size of the first page written. There was an error while serializing the page which is needed to calculate the threshold.

Action

Create a new queue and try the operation again.

CTGDIS172E Error while initializing system store for paging support.

Explanation

The memory queue uses the underlying system store to persist the entry objects. If the system store is configured to use the Derby server in networked mode, make sure that the Derby network server is started. Similarly if the DB2, MS SQL Server or Oracle server is used as the system store, make sure a database instance is booted in these servers.

Action

Make sure the underlying system store database server is started and an instance of database booted in.

CTGDIS173E The MemBufferQ Callback could not be found.

Explanation

Callback not found.

Action

Callback not found.

CTGDIS174I Config Instance *Config name* exited with status *return code*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS175I Non delta-entry provided in update mode with use-delta on.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS176I Delta-entry provided in normal update mode.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS179E Error while saving the task parameters.

Explanation

There was an error saving the task parameters back into the user defined repository.

Action

See the ibmdi.log to view the specific execption.

CTGDIS180E Error while restoring the task parameters.

Explanation

There was an error restoring the task parameters from the user defined repository.

Action

See the ibmdi.log to view the specific execption.

CTGDIS181E Error while evaluating Hook '*Hook name*' in the Component '*Component name*' (*Internal Hook name*).

Explanation

There was an error while evaluating the named Hook.

Action

See the ibmdi.log to view the specific Exception.

CTGDIS182E Error while registering the JSSE Provider *provider name*.

Explanation

There was an error evaluating the single attribute map.

Action

See the ibmdi.log to view the specific exception.

CTGDIS183E Error while mapping attribute '*attribute name*' in the *MapName* Attribute Map of Component '*component name*' (*internal name*).

Explanation

There was an error mapping the attribute.

Action

See the ibmdi.log to view the specific execption.

CTGDIS184E This AssemblyLine was invoked with operation ''*operation*'', which does not match any of the defined operations for this AssemblyLine.

Explanation

The AssemblyLine was called with an unknown operation.

Action

Change the operation name to a valid operation or define a new operation in the AssemblyLine configuration.

CTGDIS185I Cannot load pooled Connector: *Connector name*. Pool not found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS186I Could not get Connector from pool: *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS187I Loaded *Connector name*, *Connector version*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS188E An error has occurred while starting the Derby network server: *exception*

Explanation

The specified error has occurred while starting the Derby network server.

Action

Verify the global properties related to the Derby network server, such as com.ibm.di.store.port, are properly configured.

CTGDIS189E Cannot find AssemblyLine with name ''*AssemblyLine name*''.

Explanation

The specified AssemblyLine was not found.

Action

Verify the AssemblyLine's name is correct and the AssemblyLine exists.

CTGDIS191E TaskCallBlock (TCB) does not name an AssemblyLine.

Explanation

The TaskCallBlock parameter of RS.startAL method does not name an AssemblyLine.

Action

Provide a TaskCallBlock parameter that names an AssemblyLine.

CTGDIS192E An error has occurred while terminating Connector Pool: *exception*

Explanation

The specified error has occurred while terminating the Connector pool.

Action

See the exception for more information.

CTGDIS193E An error has occurred on Connector Pool initialization: *exception*

Explanation

The specified error has occurred while initializing the Connector pool.

Action

See the exception for more information.

CTGDIS194E Could not create Connector Pool for Connector ''*Connector name*''. Exception occurred: *exception*

Explanation

The specified error has occurred while creating a Connector pool for the specified Connector.

Action

See the exception for more information.

CTGDIS195E An error has occurred while executing server hook file ''*file name*'': *exception*

Explanation

The specified error has occurred while executing a server hook file.

Action

See the exception for more information.

CTGDIS196E Config or group name is not specified.

Explanation

See message.

Action

Specify both a config and a group names.

CTGDIS197E Config instance with name ''*Config name*'' is already running.

Explanation

See message. You cannot start the same Configuration more than once.

Action

No action is required.

CTGDIS198E getServer(): an error has occurred while trying to obtain the RS context: *exception*

Explanation

See message.

Action

See the exception for more information.

CTGDIS199E Error has occurred while initializing the server Hooks: *exception*

Explanation

The specified error has occurred while initializing the server hooks.

Action

See the exception for more information.

CTGDIS200E An error has occurred while reading the stash file: *exception*

Explanation

The specified error has occurred while reading the stash file.

Action

See the exception for more information.

CTGDIS201E No password has been found in the Server stash file.

Explanation

The Server stash file must contain the password of the Server keystore (and optionally the password of the key).

Action

Provide a password in the stash file.

CTGDIS202E Could not set up the Server keystore password info. Exception occurred: *exception*

Explanation

See message.

Action

See the exception for more information.

CTGDIS203E Unable to find EventHandler configuration for the name: *EventHandler name*.

Explanation

The EventHandler cannot operate without configuration.

Action

Define an EventHandler with proper name.

CTGDIS204E AutoStart Folder: an exception occurred while finding/loading autostart element with name ''*name*'': *exception*

Explanation

The autostart element cannot be launched without configuration.

Action

Verify an AssemblyLine/EventHandler with the specified name exists.

CTGDIS205E AutoStart Folder: Do not know how to start component: *name*.

Explanation

The component with the specified name is not from autostart type (ex. AssemblyLine/EventHandler).

Action

Check that the component with the specified name is from autostart type (ex. AssemblyLine/EventHandler).

CTGDIS206W An error has occurred on Remote Server API initalization: *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS207W The Remote Server API engine is not started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS208W An error has occurred on Remote JMX initalization: *exception*.

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS209W The Remote JMX Server Connector is not started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS210W An error has occurred on Server API initialization: *exception*.

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS211W Server API engine is not started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS212W The ''*property name*'' external propety is already specified and will be overrwriten.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS213W No external file is specified in [-f] parameter.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS214W There is no such property store ''*property store name*'' in ''*Config ID*'' configuration.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS215W An error has occurred while processing command line parameter [-f].

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS216W An error has occurred while decrypting protected property: *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS217W An error has occurred while encrypting protected property ''*property name*'' in file ''*file name*'': *exception*.

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS218W An error has occurred while rewriting the properties file: *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS219W An error has occurred while calling server hook ''*hook name*'': *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS220W An error has occurred while unregistering the server with the Server API: *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS221W An error has occurred while registering the server with the Server API: *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS222W Server security has not been initialized.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS223W Server PKI encryption and secure remote Server API communication cannot be used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS224I No autoload directory is configured (com.ibm.di.server.autoload).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS225I The specified path is not a directory: *directory*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS226I Looking for *.xml files in directory: *directory*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS227I Autoloading Config file: *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS228I Unregister server: *server name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS229I Register server: *server name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS230I JVM ShutDown Hook has been added: ''*hook*''.

Explanation

No additional information is available for this message.

Action

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS244E Bad run mode value: *run mode*.

Explanation

The run mode value provided by the TCB block is invalid.

Action

Specify valid running mode.

CTGDIS245E Unable to interpret ''*parameter*'' as a run AssemblyLine parameter.

Explanation

The specified value is not valid run AssemblyLine parameter.

Action

Specify valid optional parameter

CTGDIS246W Unknown object class passed as parameter to start AssemblyLine: *class name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS247E Connector not defined: ''*Connector name*''

Explanation

In order to add a Connector in Iterator mode to the AssemblyLine at runtime, the Connector must exist in the AssemblyLine configuration.

Action

Verify that a Connector with the specified name exists in the configuration.

CTGDIS248E Not an EntryFeed mode Connector: *Connector name*:*Connector mode*.

Explanation

The specified Connector is not in Iterator or Server mode.

Action

Set the specified Connector in Iterator or Server mode.

CTGDIS249E Unknown Connector name: *Connector name*.

Explanation

Cannot find a Connector with the specified name.

Action

Specify correct fully qualified name of Connector.

CTGDIS250W Problem when declaring *name*, possibly illegal name.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS251I Completed iterator ''*iterator name*'' is not initialized.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS253E Server Connector *Connector name* could not be terminated. Exception occurred: *exception*.

Explanation

Problem occurred while shutting down the AssemblyLine - a Connector in Server mode could not be properly terminated.

Action

See the exception message for more information.

CTGDIS254I Adding reply channel for Connector: *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS255I AssemblyLine *AssemblyLine name* is started.

CTGDIS317I AssemblyLine pool: ConnectorPool: close function: *Connector name*; *class name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS318I AssemblyLine pool: PoolTimer: garbageCollectPool.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS319E Connector Library name is NULL.

Explanation

The error occurs when the constructor of the ConnectorPool is called with null Connector Library Name.

Action

Configure Pool definition

CTGDIS320E Connector Pool Definition Config is NULL for Connector: *Connector name*.

Explanation

The error occurs when the constructor of the ConnectorPool is called with null Pool Definition Config.

Action

Contact IBM support.

CTGDIS321E Connector Pool is not enabled for Connector: *Connector name*.

Explanation

The configuration of the Connector does not enable Connector Pool usage.

Action

Configure Connector Pool for the Connector.

CTGDIS322E Connector Pool Log is NULL for Connector: *Connector name*.

Explanation

The error occurs when the constructor of the ConnectorPool is called with null Connector Pool Log.

Action

Contact IBM support.

CTGDIS323E Invalid max pool size for Connector *Connector name*: *pool size*.

Explanation

The error occurs when the maximum Connector Pool size is less or equal to 0.

Action

Set the maximum Connector pool size to a value greater than 0.

CTGDIS324W Minimum Connector pool size exceeds the maximum size: *pool size*; *Connector name*.

Explanation

This occurs when the minimum Connector Pool size exceeds the maximum Connector Pool size.

Action

Set the miminum Connector pool size to a value less than or equal to the maximum Connector pool size.

CTGDIS325W Minimum Connector pool size is set to the maximum value: *pool size*; *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS326W Invalid initialize attmepts number: *number of attempts*; *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS327W Initialize attempts set to: *number of attempts*; *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS328W Invalid initialize sleep interval: *time interval*; *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS329W Initialize sleep interval set to: *time interval*; *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS330E Error on preparing Connector Pool instance for Connector *Connector name*. Exception occurred: *exception*

Explanation

This error occurs during creation of the initial Connector instances.

Action

See the exception message for more information.

CTGDIS331I Pool shrinker thread started for: *Connector name*; purge interval: *time interval*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS332I *Connector name* Connector Pool is initialized. Prepared instances: *pool size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS333E Error terminating Connector: *exception*

Explanation

This error occurs while terminating a Connector instance.

Action

See the exception message for more information.

CTGDIS334I *Connector name* Connector Pool is terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS335E Connector Pool is not initialized: *Connector name*.

Explanation

This error occurs when there is an attempt to use a Connector Pool that is not initialized.

Action

Contact IBM support.

CTGDIS336E Connector Pool reached its maximum size: *Connector name*.

Explanation

This error occurs when there is an attempt to add a new Connector to the pool, but the pool size has reached its maximum limit.

Action

Check the configuration of the Connector Pool and the setting of exhaustedPoolBehavior Connector's parameter.

CTGDIS337I Connector added to pool: *Connector name*; new pool size: *pool size*; free Connectors: *integer*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS338I InterruptedException while waiting for free Connector: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS339I Connector taken from pool: *Connector name*; pool size: *pool size*; free Connectors: *integer*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS340I Connector added to pool on request: *Connector name*; pool size: *pool size*; free Connectors: *integer*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS341I Connector returned to pool: *Connector name*; pool size: *pool size*; free Connectors: *integer*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS342I Connector returned to pool after pool termination: *Connector name*; pool size: *pool size*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS343E Error initializing Connector on attempt *attempt number*: *exception*

Explanation

This error occurs when attempting to initialize Connector.

Action

See the exception message for more information.

CTGDIS344I InterruptedException on Connector initialize attempt: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS345E Could not initialize pooled Connector *Connector Name* after *number of attempts* attempts.

Explanation

This error occurs when initialization of the Connector failed.

Action

Ensure the pooled Connector is configured appropriately.

CTGDIS346I New pooled Connector created: *Connector name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS347I Connector pool purge: *Connector name*; old size/free: *pool size/integer*; new size/free: *pool size/integer*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS348E Null configuration for attribute map.

Explanation

This error occurs when the attribute map configuration passed to the loadMap method is null.

Action

Contact IBM support.

CTGDIS349E Null configuration for Hooks.

Explanation

This error occurs when the hook configuration passed to the loadEventMap method is null.

Action

Contact IBM support.

CTGDIS350I Hook *hook name* [*counter*].

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS351I Map Attribute *attribute name* [*counter*].

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS352I Use null Behavior for *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS353I Script is: *script_mapping*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS354E The key store password is NULL or empty.

Explanation

This error occurs when the key store password passed to the createStashFile method is null or an empty string.

Action

Specify valid key store password

CTGDIS355E Stash file already read.

Explanation

This error occurs when trying to read the stash file more than once.

Action

Check the configuration and if the problem persists contact IBM support.

CTGDIS356E Stash file *file name* not found in solution folder.

Explanation

This error occurs when trying to read the stash file but the specified file is not present in the solution directory.

Action

The stash file should be created.

CTGDIS357E Input Stream is NULL.

Explanation

This error occurs when the input stream passed to the readArray method is null.

Action

Contact IBM support.

CTGDIS358E The key password or keystore password failed a size validation check. Unable to read in the key password or the keystore password from the stash file.

Explanation

The correct size of the key password or keystore password was determined before reading their values from the stash file. The size of one of the values read in did not match the specified size and failed the validation check.

Action

Verify that the stash file is valid and has not been corrupted. Verify the stash file has not been changed by a user or process while the application was running.

CTGDIS359E Output Stream is NULL.

Explanation

This error occurs when the output stream passed to the writeArray method is null.

Action

Contact IBM support.

CTGDIS360E Byte array is NULL.

Explanation

This error occurs when the byte array passed to the writeArray method is null.

Action

Contact IBM support.

CTGDIS361E Encrypted password data too long: *length*.

Explanation

This error occurs when the byte array passed to the writeArray is longer than 255 characters.

Action

Contact IBM support.

CTGDIS362I Stash file *file name* has been created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS363E Could not create stash file. Exception occurred: *exception*

Explanation

See message.

Action

See the exception message for more information.

CTGDIS364I Usage: createstash keyStorePassword [keyPassword [securityProviderClass]]

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS365E Expecting CRLF after javascript expression start.

Explanation

The parameter substitution for javascript expressions uses Here Document syntax to delimit the javascript code snippet. The end of the terminator string of the Here Document must be marked by CRLF.

Action

Specify the external property correctly.

CTGDIS366E Cannot find javascript terminator line: *string*.

Explanation

The parameter substitution for javascript expressions uses Here Document syntax to delimit the javascript code snippet. The end of the code snippet must be marked

by the terminator string(on its own line), which is specified at the beginning of the Here Document.

Action

Verify the syntax of the parameter substitution.

CTGDIS367E Bad index specification (missing end bracket) in: *name*

Explanation

The parameter must be in the following format: object.name_or_attribute[index]

Action

Specify the parameter correctly.

CTGDIS368E Unable to index the class *class name*.

Explanation

IBM Security Directory Integrator parameter substitution mechanism does not support indexing of objects of the specified type.

Action

Verify that the syntax is correct.

CTGDIS369E No MetamergeConfig (mc) or Config object provided.

Explanation

The method requires access to a MetamergeConfig object either explicitly through the "mc" parameter or by way of the "config" parameter.

Action

Contact IBM support.

CTGDIS370I Error decrypting password. Exception occurred: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS371I Table *table name* does not exist. Will try to create.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS372I Table *table name* has been successfully created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS373I Database shutdown not performed (non-embedded database).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS374I Database shutdown ignored for: *database name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS375I Database *database name* retained.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS376I Shutting down database: *database name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS377I Renamed table IDI_SYSPROPS to IDI_PS_DEFAULT.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS378I Error in migratetable.syspros. Exception occurred: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS379I Exception occurred while migrating delta tables: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS380I Migrating Delta Tables.

Explanation

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS381I Error in renaming table. The table does not exist. Exception occurred: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS382I Finished Migrating Delta Tables.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS383E Cannot get local namespace for: *namespace*

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDIS384I Finished including all scripts from the script library where auto-include is true in the *Config name* Config.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS385I -- Include script: *script*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS386I Including all scripts from the script library where auto-include is true in the *Config name* config.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS387E No such script: *script* (included by *context name*)

Explanation

The script is not found in the configuration.

Action

Ensure the script exists in the configuration.

CTGDIS388I Dump of JSEngine global variables

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS389E ''*function*'' is not a function

Explanation

The script element with the specified name is not a function.

Action

Ensure the script element with the specified name is a function.

CTGDIS390E Function *function name* not found.

Explanation

The function with the specified name is not defined. A script must define the function before the function can be called.

Action

Ensure the function is defined before it is called.

CTGDIS391E No functions defined.

Explanation

No function definitions are loaded by the ScriptEngine.

Action

Ensure functions are defined before used.

CTGDIS392E The system.deleteFile(...) tried to delete a directory and failed. Supplied file path: *file path*

Explanation

The system.deleteFile(...) can only delete normal files.

Action

Set an appropriate file path to point to a normal file.

CTGDIS393I Throwing this exception to tell the AssemblyLine to skip the current Entry. If used in an EventHandler, this exception tells the EventHandler to skip the remaining actions.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS394I Created file *file name*.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS494I Entry found, calling delete method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS495I handleException , *operation*, *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS496E Automatic Reconnect.

Explanation

This exception is part of the automatic reconnect logic flow and should always be internally handled.

Action

Check the Connector' settings. If the problem persists, contact IBM support.

CTGDIS497W Cannot find the java class for *component*. The jar file may be corrupted, or a file may have been deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS498I Using provided parameter.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS503E No values to add.

Explanation

This exception is part of the logic flow. It is used to instruct the AssemblyLine to skip the current Connector and continue with the next Connector in the AssemblyLine. This exception should always be internally handled.

Action

Check if the configuration is correct. If the problem persists, contact IBM support.

CTGDIS504I *Result of attribute mapping*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS505I The 'conn' object

Explanation

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS531I Not all required system store properties have been defined. The memory queue initialization will be done using system store default values.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS532E Bad signature in input stream.

Explanation

Readers of class com.ibm.di.security.EncryptedReader expect the input stream to start with a predefined character sequence (signature).

Action

Verify the input stream is encrypted and is not corrupted.

CTGDIS533E Invalid encrypted signature in input stream.

Explanation

All streams, encoded by com.ibm.di.security.EncryptedWriter are laid out in the following format: [signature][encrypted data]. Where [encrypted data] after decryption looks like this: [signature][payload data]. Where [payload data] is the actual data which was passed to the EncryptedWriter for encryption. Readers of class com.ibm.di.security.EncryptedReader expect the encrypted part of the input stream after decryption to start with the predefined signature.

Action

Verify the input stream is encrypted and is not corrupted.

CTGDIS534E Exception occurred while reading line: *exception*

Explanation

See message.

Action

Contact IBM support.

CTGDIS535E Unable to decrypt the string because it was not in the proper format. The required string format is 'length of encrypted data/space_character/encrypted data'.

Explanation

See message.

Action

Verify the string being decrypted is in the proper format.

CTGDIS536E Conditional script did not do 'ret.value=true|false'.

Explanation

Conditional script of a branch component must set the 'value' attribute of the 'ret' object to either 'true' or 'false'.

Action

Verify the configuration of the branch component.

CTGDIS537E Invalid return value: *value* (*class name*).

Explanation

Conditional script of a branch component must return a java.lang.Boolean value.

Action

Verify the configuration of the branch component.

CTGDIS538E NULL attribute name in condition number + index ''*index*''.

Explanation

Each condition in a branch component must specify a valid attribute name.

Action

Verify the configuration of the branch component.

CTGDIS541I branch-end: setNextConnector: *branch component*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS542I loop-end: setNextConnector: *component*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS543E Cannot set next Connector.

Explanation

See message.

Action

Check whether Connector with such name exists and contact IBM support.

CTGDIS544E Parsing error on line *line_number*. Last line was: *line*. Error is *error*.

Explanation

Problem found while parsing the built-in configuration from the .inf files. This is an internal error.

Action

Contact IBM support.

CTGDIS545E Parsing error at *URL* on line *line_number*. Last line was: *line*. Error is *error*.

Explanation

Problem found while parsing the built-in configuration from the .inf files. This is an internal error.

Action

Contact IBM support.

CTGDIS546E Unexpected line: *line*.

Explanation

Problem found while parsing the built-in configuration from the .inf files. This is an internal error.

Action

Contact IBM support.

CTGDIS547I Do not initialize a (runtime provided) function

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS548E Function returned non-Entry/Attribute object in AssemblyLine and no default attribute name defined: *class name=object*.

Explanation

See message.

Action

Check the configuration and if the problem persists contact IBM support.

CTGDIS549I Initialize loop component: *loop type*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS550E No work Entry Attribute name specified for the Attribute Loop.

Explanation

Loop Components support three types of loops: Conditional Loop, Connector Loop and Attribute Value Loop. The name of this work Entry Attribute is required because an Attribute Value Loop must iterate on the values of a multi-valued Attribute from the work Entry. This error indicates the name of the work Entry Attribute was not provided.

Action

Type in the name of the work Entry Attribute in the "Work Attribute Name:" text box.

CTGDIS551E No loop Entry Attribute name specified for attribute loop

Explanation

Loop Components support three types of loops: Conditional Loop, Connector Loop and Attribute Value Loop. Attribute Value Loop iterates over the values of a specified Attribute from the work Entry. Each value is passed into the loop in a new work Entry attribute - the loop Entry Attribute. This error indicates the name of the loop Entry Attribute was not provided.

Action

Specify valid name for Loop Attribute Name parameter.

CTGDIS552I checkConnectorInit: *work entry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS553I Begining of setConnectorParams method

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS554I -- setting Connector parameter: name=*parameter name*, value=*parameter value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS555E Reply Channel: Target component is null.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDIS556I SWITCH *component name*: ''*expression*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS557I CASE: *component name*''*expression*'' == ''*expression*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS564I The delta SQL1 is: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS565E Invalid DeltaStore identifier: *ID*.

Explanation

The DeltaStore identifier must not be empty and must not consist of whitespaces only.

Action

Specify valid name for deltaDB(Delta Store) parameter

CTGDIS566E Update sequence for key: *key*, update count != 1 (count = *count*).

Explanation

Inconsistency is observed while updating the database: updating info for a single key should affect a single row. This is an internal error.

Action

Contact IBM support.

CTGDIS567E Update entry for key: *key*, update count != 1 (count = *count*)

Explanation

Inconsistency is observed while updating the database: updating info for a single key should affect a single row. This is an internal error.

Action

Contact IBM support.

CTGDIS568E Insert entry for key: *key*, update count != 1 (count = *count*).

Explanation

Inconsistency is observed while inserting into the database: update count should be 1. This is an internal error.

Action

Contact IBM support.

CTGDIS569E Duplicate delta key: *key*.

Explanation

The sequence id of the entry with the specified key is not consistent with the sequence id for the Delta Table from the Delta Systable.

Action

Verify the Delta Store is not corrupted and if the problem persists contact IBM support.

CTGDIS570E Delete entry for key: *key*, update count != 1 (count = *count*).

Explanation

Inconsistency is observed while inserting into the database: update count should be 1. This is an internal error.

Action

Contact IBM support.

CTGDIS571E The getNextDeletedEntry method was called without prior selectDeletedEntries method call.

Explanation

The deleted entries should be selected before they can be iterated.

Action

Contact IBM support.

CTGDIS572E Incompatible version in *table name*.

Explanation

The table version is newer than supported.

Action

Contact IBM support.

CTGDIS573E Must specify table.

Explanation

A PropertyStore must be associated with a table.

Action

Check the PropertyStore configuration. If the problem persists contact IBM support.

CTGDIS574E Cannot put NULL value for key: *key*.

Explanation

The value of a property in a PropertyStore cannot be null.

Action

Contact IBM support.

CTGDIS582E *name*: *exception*

Explanation

An error occurred while registering the parent IBM Security Directory Integrator Server instance with the ScriptEngine of the Trigger.

Action

Contact IBM support.

CTGDIS583W Initializing script engine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS584I Cannot load log-appender: *error*

CTGDIS586I Finished including all scripts from the Script Library marked for auto-include.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS587E XML document has no root.

Explanation

The CSServersInfo.xml document is not well formed because it has no root element.

Action

Provide valid xml document

CTGDIS588E Expected child item at index *index*.

Explanation

Child node of the root element not found in CSServersInfo.xml. This is an internal error.

Action

Contact IBM support.

CTGDIS589I Connect to *server name*: *port*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS590E Process stopped by debugger.

Explanation

See message.

Action

Contact IBM support.

CTGDIS591E Call to *name* but no more calls recorded in table *table*.

Explanation

For the Sandbox record feature all operations are serialized into a store. Later replay is done based on the information in the store. Operations are recreated one by one while iterating over the store. The error indicates that replay is requested after the store is depleted. This is an internal error.

Action

Contact IBM support.

CTGDIS592E Call to *name* but next recorded method was: *method*.

Explanation

For the Sandbox record feature all operations are serialized into a store. Later replay is done based on the information in the store. Operations are recreated one by one while iterating over the store. The error indicates that the name of the operation, for which replay is requested, does not match the name of the operation in the current position of the store. This is an internal error.

Action

Contact IBM support.

CTGDIS593E Internal IDI proxy object exception: *exception*

Explanation

An error occurred while replaying/recording an operation.

Action

Contact IBM support.

CTGDIS594I Recording Connector calls to table *table name* in database *database name*.

Explanation

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS596E The nibble was unable to parse a hexadecimal digit: ''*symbol*''.

Explanation

The symbol is an invalid hexadecimal digit.

Action

Check that the parameters have valid names and contact IBM support.

CTGDIS597E Error in releasing License: *exception*

Explanation

An error occurs while releasing the license when the application is shutting down

Action

Check the license on the License Manager Server.

CTGDIS598E No Valid License was found. Server exiting...

Explanation

No license could be obtained for the current product instance. The product will not operate without license.

Action

Check the license on the License Manager Server.

CTGDIS599E Not enough capacity was found. Server exiting...

Explanation

License could not be obtained for the current product instance because all registered licenses are already in use. The product will not operate without license.

Action

Check the license on the License Manager Server.

CTGDIS600E Cannot contact IBM Tivoli License Manager Server. Server exiting...

Explanation

License could not be obtained for the current product instance because a connection to the License Manager Server could not be established. The product will not operate without license.

Action

Check the connection to the License Manager Server.

CTGDIS601E An internal error occurred while using the IBM Tivoli License Manager Toolkit. Contact IBM support.

Explanation

The IBM Tivoli License Manager Toolkit encountered an internal error. License could not be obtained for the current product instance. The product will not operate without license.

Action

Contact IBM support.

CTGDIS602E Invalid parameter exception occurred while using the IBM Tivoli License Manager Toolkit. The server is exiting...

Explanation

License request failed due to an invalid parameter.

Action

Check the parameters of the license. Check the license on the License Manager Server. If the problem persists contact IBM support.

CTGDIS603E Error in retrieving License : *exception*.

Explanation

License could not be obtained for the current product from the License Manager Server.

Action

See the exception message for more information. Check the parameters of the license and connection to the License Manager Server.

CTGDIS668I System store not initialized...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS669I [ScriptEngine] RegEx library: *library name* library.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS670I [ScriptEngine] Engine last modified date: *date*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS671E Hierarchical search criteria not supported for SQL.

Explanation

A specified search criteria object is not supported. The only supported types of criteria objects for a SQL filter are com.ibm.di.server.SearchCriteria and com.ibm.di.server.SearchCriteria.rscSearch.

Action

Verify the configuration.

CTGDIS672E Hierarchical search criteria not supported for SimpleFilter.

Explanation

A specified search criteria object is not supported. The only supported type of criteria objects for a simple filter is com.ibm.di.server.SearchCriteria.rscSearch.

Action

Verify the configuration.

CTGDIS673E Hierarchical search criteria not supported for Notes.

Explanation

A specified search criteria object is not supported. The only supported type of criteria objects for a Notes filter is com.ibm.di.server.SearchCriteria.rscSearch.

Action

Verify the configuration.

CTGDIS674I Main Step: *MAIN_STEPS[mainStep]*, Connector Index: *connectorIndex*, Iterator: *iteratorIndex*, Cycle: *cycleCounter*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS675I Licensed Materials - Property of IBM (c) Copyright IBM Corp. 2003, 2003,2006 All Rights Reserved. US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS676E Branch component with no preceeding IF/SWITCH component: *component name*.

Explanation

See message.

Action

Check the configuration.

CTGDIS677E CASE branch without preceeding SWITCH or CASE component: *component name*.

Explanation

See message.

Action

Check the configuration.

CTGDIS678E ELSE branch without preceeding IF/ELSEIF component: *component name*.

Explanation

See message.

Action

Check the configuration.

CTGDIS679E ELSEIF branch without preceeding IF/ELSEIF component: *component name*.

Explanation

See message.

Action

Check the configuration.

CTGDIS680E The System Queue was not able to obtain a JMS Driver with name ''*driver name*''.

Explanation

The System Queue was not able to obtain a JMS Driver with the specified name.

Action

Verify the JMS Driver name is correct and if the JMS Driver class is accessable by the Java Virtual Machine.

CTGDIS681E The System Queue was not able ot obtain a Queue Connection Factory.

Explanation

The System Queue was not able to obtain a Queue Connection Factory.

Action

Verify the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS682E An error occurred while getting a Queue Connection Factory: *exception*

Explanation

The specified error has occurred while getting a Queue Connection Factory.

Action

Verify the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS683E The System Queue was not able ot obtain a queue with name ''*queue name*''

Explanation

The System Queue was not able to obtain a queue with the specified name.

Action

Verify the queue name is correct and the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS684E An error has occurred while getting a queue with name ''*queue name*'': *exception*

Explanation

The specified error has occurred while obtaining a queue with the specified name.

Action

Verify the queue name is correct and the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS685E An error has occurred while receiving a message from the queue with name ''*queue name*'': *exception*

Explanation

The specified error has occurred while receiving a message from the queue with the specified name.

Action

Verify the queue name is correct and the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS686E The object received from queue with name ''*queue name*'' is not a com.ibm.di.entry.Entry object.

Explanation

The object received from the specified queue is not a com.ibm.di.entry.Entry object.

Action

Verify the queue name is correct.

CTGDIS687E The message received from queue with name ''*queue name*'' is not a Text Message (javax.jms.TextMessage).

Explanation

The message received from the specified queue is not a Text Message (javax.jms.TextMessage).

Action

Verify the queue name is correct.

CTGDIS688E The message received from queue with name ''*queue name*'' is not a Bytes Message (javax.jms.BytesMessage).

Explanation

The message received from the specified queue is not a Bytes Message (javax.jms.BytesMessage).

Action

Verify the queue name is correct.

CTGDIS689E The message received from queue with name ''*queue name*'' is not an Object Message (javax.jms.ObjectMessage).

Explanation

The message received from the specified queue is not an Object Message (javax.jms.ObjectMessage).

Action

Verify the queue name is correct.

CTGDIS690E An error has occurred while sending a message to the queue with name ''*queue name*'': *exception*

Explanation

The specified error has occurred while sending a message to the queue with the specified name.

Action

Verify the queue name is correct and the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS691E An error has occurred while creating receiver for the queue with name ''*queue name*'': *exception*

Explanation

The specified error has occurred while creating a receiver for the queue with the specified name.

Action

Verify the queue name is correct and the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS692E An error has occurred while creating sender for the queue with name ''*queue name*'': *exception*

Explanation

The specified error has occurred while creating a sender for the queue with the specified name.

Action

Verify the queue name is correct and the JMS Driver is properly initialized. The JMS Driver initialization properties are set in global.properties or solution.properties files.

CTGDIS693E Cannot initialize Default System Queue : *exception*

Explanation

The specified error has occurred while creating a Default System Queue object.

Action

Verify the parameters are correct and if the JMS Driver is properly initialized.

CTGDIS694E Default System Queue is not initialized.

Explanation

The specified error occurred while using Default System Queue object.

Action

Verify the parameters are correct and if the JMS Driver is properly initialized.

CTGDIS695E Cannot initialize MQe System Queue.

Explanation

The specified error occurred while creating MQe System Queue object.

Action

Verify the parameters for MQe System Queue are correct and if the JMS Driver is properly initialized.

CTGDIS696E MQe System Queue is not initialized.

Explanation

The specified error occurred while using MQe System Queue object.

Action

Verify the parameters for MQe System Queue are correct and if the JMS Driver is properly initialized.

CTGDIS697E The System Queue has not been started. The IBM Security Directory Integrator server has been configured to not start the System Queue.

Explanation

The specified error occurred while using System Queue engine.

Action

Verify the System Queue is turned on.

CTGDIS698W Default System Queue is not initialized. Required property 'systemqueue.jmsdriver.name' is not set.

Explanation

The specified property systemqueue.jmsdriver.name is required, but not set.

Action

Set the property systemqueue.jmsdriver.name.

CTGDIS699W MQe System Queue is not initialized. Required property ''*parameter value*'' is not set.

Explanation

The specified property is required, but not set.

Action

Set the specified property.

CTGDIS705E ERROR : *error*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIS706I XML document has no children: *tag name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS707I XML document has *number of children* children.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS708I XML Child node has no children (skipped).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS709I XML Child node has no children (skipped).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS710I The node does not exist. Creating a new one.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS711I XML Child node has no children (skipped).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS712E Failed to delete node. Exception occurred: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIS714W SAX Parse Warning: line:*line number*, ID:*ID*.

Explanation

See message.

Action

No action is required.

CTGDIS715I Usage: com.ibm.di.util.ConvertEncoding srcFile destFile srcEncoding [destEncoding]. Where destEncoding is optional; if not specified the default encoding is used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS718E The number of source files does not match the number of destination files.

Explanation

The ConvertEncoding tool converts text files between two specified encodings. The tool accepts two lists of files - source files and destination files. The n-th file from the source list will be converted to the n-th file from the destination list. The error indicates that the two lists differ in size.

Action

Verify the command-line arguments for the ConvertEncoding tool.

CTGDIS719E Error constructing RacfCredential object: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIS720I Credential: *password*, Version: *version*, Change Time: *timestamp*, Language: *language*, Expired: *date*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS721I No Connector list in task.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS724I Test program to test PKCS7 SignedData methods.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS725I Usage: IDIpkcs7Crypto [-receivecertKeystore=receiverCertificateKeystoreFileName] [-receivecertKeystorePW=receiverCertificateKeystorePassword] [-receivecertAlias=receiverCertificateAlias] [-receivecertPW=receiverCertificatePassword][-signercertKeystore=signerCertificateKeystoreFileName] [-signercertKeystorePW=signerCertificateKeystorePassword] [-signercertAlias=signerCertificateAlias] [-envelope=pkcs7EnvelopeFileName]

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS726E Unknown parameter *parameter name*.

Explanation

The IDIpkcs7Crypto tool does not know how to interpret the specified parameter.

Action

Verify the command-line arguments for the IDIpkcs7Crypto tool.

CTGDIS727I Password Envelope specified: *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS728I Recipient certificate keystore specified: *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS729I Recipient Certificate Keystore Password specified: *keystore password*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS730I Recipient Certificate Alias specified: \t*tralias*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS731I Recipient Certificate password specified: \t*password*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS732I Signer Certificate Alias specified: \t*alias*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS733I Password Value obtained: *password*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS734I Password Object Contents: *object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS735E Exception getting ContentInfo from bytes. Detail: *exception*

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDIS736I Obtaining EnvelopedData content from ContentInfo...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS737E Error in packaged information. Expecting EnvelopedData.

Explanation

The data is not enveloped for protection by encryption.

Action

Specify envelope file that contains valid PKCS7 package to be decrypted.

CTGDIS738E Error in packaged information. Expecting SignedData.

Explanation

See message.

Action

No action is required.

CTGDIS739E No KeyStore certificate returned because alias specified may be invalid. Alias: *alias* KeyStore File.

Explanation

See message.

Action

Verify that the alias specified was correct.

CTGDIS740E Error encountered while obtaining KeyStore certificate. Alias specified may be invalid. Alias: *alias* KeyStore File. Detail: *exception*

Explanation

See message.

Action

Verify that the alias specified was correct.

CTGDIS741E Error decoding password payload while obtaining sequence for DerInputStream Detail: *exception*

Explanation

I/O error occurred while reading the enveloped data from the envelope file.

Action

Try again later and contact IBM support if the problem occurs again.

CTGDIS742E Error searching Recipient keystore certificates Detail: *exception*

Explanation

The keystore has not been initialized (loaded).

Action

Contact IBM support.

CTGDIS743E Exception decrpyting envelopedData. Detail: *exception*

Explanation

Cannot get the key or cannot decrypt the enveloped data.

Action

Check the configuration data.

CTGDIS744E Error opening signer certificate file: *file name* Detail: *exception*

Explanation

The certificate provided in inStream must be DER-encoded and may be supplied in binary or printable (Base64) encoding. If the certificate is provided in Base64 encoding, it must be bounded at the beginning by -----BEGIN CERTIFICATE-----, and must be bounded at the end by -----END CERTIFICATE-----.

Action

Ensure the file that contains the data for the certificate contains all the needed information and the data is properly encoded.

CTGDIS745E Exception decrpyting envelopedData obtaining aliases from KeyStore object: *exception*

Explanation

The keystore is not initialized.

Action

Check that the specified keystore password is correct, the java.security file is consistent and the run-time service provider is consistent.

CTGDIS746E Exception decrpyting envelopedData obtaining key from KeyStore object: *exception*

Explanation

The algorithm used for recovering the key cannot be found.

Action

Check that the java.security file is consistent as well as the run-time service provider.

CTGDIS747E Exception decrpyting envelopedData obtaining key from KeyStore object: *exception*

Explanation

The key cannot be recovered. The password might be wrong.

Action

Ensure the keystore password is correct and contact IBM support if the problem still exists.

CTGDIS748E SignedData does not have certificate: *type*.

Explanation

The specified keystore does not have certificate with such alias.

Action

Specify a different keystore or certificate alias.

CTGDIS749E SignedData not verified with public key from certificate: *type*.

Explanation

The signatures on signed data are not valid for the specified certificate.

Action

If possible, specify a different keystore and/or certificate alias.

CTGDIS750E Exception occurred while verifying SignedData: *exception*

Explanation

An I/O error occurred.

Action

Check the configuration data.

CTGDIS751E Exception occurred while verifying SignedData: *exception*

Explanation

The signatures on signed data are not valid for the specified certificate.

Action

If possible, specify other keystore and/or certificate alias.

CTGDIS752E Exception occurred while verifying SignedData: *exception*

Explanation

The key cannot be recovered.

Action

Check the service provider is consistent.

CTGDIS753E Key file not found for load: *path*.

Explanation

The keystore is not found at the specified location.

Action

Specify valid path to the keystore.

CTGDIS754E Error processing key file during load: *path* Verify keystore password is correctly specified. Detail: *exception*

Explanation

I/O or format problem with the keystore data.

Action

Verify the data in the keystore are in the proper format.

CTGDIS755E Error processing key file while obtainin KeyStore instance: Provider: *provider name* Type: *store type* Detail: *exception*

Explanation

The requested keystore type is not available for the provider.

Action

Contact IBM support.

CTGDIS756E The algorithm used to check the integrity of the keystore cannot be found. Detail: *exception*

Explanation

The requested algorithm is not available in the environment.

Action

Check the configuration data in java.security file and that the run-time service provider is consistent.

CTGDIS757E Keystore could not be loaded because the provider ''*provider name*'' was not found. Encountered an exception: *exception*

Explanation

See message.

Action

Check the provider specification in the java.security file. See the exception message for more information.

CTGDIS758E Certificates in the keystore could not be loaded. Exception occurred: *exception*

Explanation

There is a certificate in the keystore that cannot be loaded.

Action

See the message for more information.

CTGDIS761E The substitution method failed. A circular reference was found a parameter: ''*parameter object.parameter name*''.

Explanation

See message.

Action

Ensure the parameter does not cause a circular reference.

CTGDIS766I Parameter { Pattern: *pattern* Object: *object* Name: *name* Qualifier: *name qualifier* Index: *index* MF Params: *params*}

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS769I Next Parameter: *parameter name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS770I -- *object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS771I *id*: *error*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS772I --> *string*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS773I *name*: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS774E The version number of the Parser is undefined.

Explanation

The getVersion method of the Parser did not return a version number. A version number can only be displayed for a user defined Parser if the getVersion method of the Parser is defined and returns a java.lang.String object.

Action

If the Parser is not a user defined Parser that has been added to the IBM Security Directory Integrator jars directory, contact IBM Support. Otherwise, verify the user defined Parser has properly implemented the getVersion method.

CTGDIS775E The version number of the Function Component is undefined.

Explanation

The getVersion method of the Function Component did not return a version number. A version number can only be displayed for a user defined Function Component if the getVersion method of the Function Component is defined and returns a java.lang.String object.

Action

If the Function Component is not a user defined Function Component that has been added to the IBM Security Directory Integrator jars directory, contact IBM Support. Otherwise, verify the user defined Function Component has properly implemented the getVersion method.

CTGDIS776E The version number of the EventHandler is undefined.

Explanation

The getVersion method of the EventHandler did not return a version number. A version number can only be displayed for a user defined EventHandler if the getVersion method of the EventHandler is defined and returns a java.lang.String object.

Action

If the EventHandler is not a user defined EventHandler that has been added to the IBM Security Directory Integrator jars directory, contact IBM Support. Otherwise, verify the user defined EventHandler has properly implemented the getVersion method.

CTGDIS777I Exception occurred in debugConnect method: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS778I The following SQL statement is to be executed: *sql statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS779E The following error occurred during method invocation, performed by Connector: *error message*.

Explanation

An internal error has occurred.

Action

Contact IBM support.

CTGDIS780I The result from method invocation, performed by Connector is: *error message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS781I Dumping the Performance Entry: *entry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS782I Dumping performance entry: *additional information*: *entry*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS783I Dumping performance entry: *additional information*: *entry*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS784I Method parameters: *method parameters*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS785I ---

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS786I *entry*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS787W The AssemblyLine could not be set up.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS788I Throwing this exception to tell the AssemblyLine to skip the current Connector and continue with the next Connector in the AssemblyLine. If used in an EventHandler, this exception tells the EventHandler to skip to the next action.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS789I Throwing this exception to tell the AssemblyLine to restart. The AssemblyLine will continue at the first non-Iterator Connector in the AssemblyLine, using the current work object. If used in an EventHandler, this exception tells the EventHandler to skip to the first action.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS790I Throwing this exception to tell the AssemblyLine to retry this Connector. The AssemblyLine will perform the operation of the current Connector again, using the current work object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS791I *property name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS792I *property value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS793E Connector class is missing on the following line of the reconnect rules configration file: *line*

Explanation

Connector class must be specified for each rule in the reconnect rules file. Eventually the class name can be empty, but the corresponding delimeters must appear.

Action

Verify that the syntax of the problem line of the reconnect rules file is correct.

CTGDIS794E Connector name is missing on the following line of the reconnect rules configration file: *line*

Explanation

Connector name must be specified for each rule in the reconnect rules file. Eventually the connector name can be empty, but the corresponding delimeters must appear.

Action

Verify that the syntax of the problem line of the reconnect rules file is correct.

CTGDIS795E Exception class is missing in the reconnect rules file on the following line: *line*

Explanation

Exception class must be specified for each rule in the reconnect rules file. Eventually the class name can be empty, but the corresponding delimeters must appear.

Action

Verify that the syntax of the problem line of the reconnect rules file is correct.

CTGDIS796E Action is missing in the reconnect rules file on the following line: *line*

Explanation

Action must be specified for each rule in the reconnect rules file.

Action

Verify that the syntax of the problem line of the reconnect rules file is correct.

CTGDIS797E Error while loading reconnect rules

Explanation

There was a problem while loading the reconnect rules - either the rules which are built into the connector jar files, or the rules from the user defined file.

Action

If the problem is in the file with user defined rules, verify that the used syntax is correct. If the problem is not in the file with user defined rules, contact IBM support.

CTGDIS798I Reconnect rule: connector class = *connectorClass*, connector name = *connectorName*, exception class = *exceptionClass*, regular expression = *exceptionMessageRegExp*, action = *action*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS800I User-defined reconnect rules:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS801I Getting reconnect choice for: connector class = *connectorClass*, connector name = *connectorName*, error = *error*. Selected rule: connector class = *rule.connectorClass*, connector name = *rule.connectorName*, exception class = *rule.exceptionClass*, regular expression = *rule.exceptionMessageRegExp*, action = *rule.getAction()*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS802I Getting reconnect choice for connector class = *connectorClass*, connector name = *connectorName*, error = *error*. No matching rule found. Using default action - *defaultAction*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS803E Invalid action encountered in the reconnect rules file on the following line: *line*

Explanation

Action must be 'error', 'ignore' or 'reconnect'.

Action

Verify that the syntax of the problem line of the reconnect rules file is correct.

CTGDIS805E Problems were encountered while parsing the file with user-defined reconnect rules. The rules with errors were not loaded. Total count of rules with errors: *error count*.

Explanation

While parsing the file with user-defined reconnect rules, an error message for each problem rule was logged. The current message only alerts that there were errors.

Action

Verify that the syntax of the user-defined rules is correct - check the logged error messages for each particular problem rule.

CTGDIS806E User-defined rule with error has been encountered: *exception error message*.

Explanation

See message.

Action

Verify that the syntax of the user-defined rules is correct.

CTGDIS807E Queue with the name *name* does not exist.

Explanation

See message.

Action

Specify queue that exists in memory.

CTGDIS808E Problem encountered while running AssemblyLine Pool

Explanation

See message.

Action

Examine the Server log to see what is the concrete problem.

CTGDIS809E handleException - cannot handle exception , *operation*

Explanation

An exception occurred during the operation of the AssemblyLineComponent. No hooks are available, so the exception is left unhandled.

Action

Verify that the configuration is correct.

CTGDIS810E handleException - cannot handle exception , *operation*

Explanation

An exception occurred during the operation of the AssemblyLineComponent. The reconnect mechanism (for Connectors only) could not handle the exception. The

configured error hooks did not handle the exception, so the exception is left unhandled.

Action

Verify that the configuration is correct.

CTGDIS811E Cannot insert new Entry in Delta Table, the original Exception was *sqlException*

Explanation

An Exception occurred while inserting an Entry into the Delta Table. This could be caused by some database problem, lack of permission, or maybe because more than one AssemblyLine used the same Delta Table.

Action

Consider the original Exception, and try to correct the problem. If more than one AssemblyLine use the same Delta Table at one time, the solution should be rewritten.

CTGDIS812E Cannot create table. The SQL statements on which the error occurred are: *sql statements*. The Exception is: *exception*

Explanation

The SQL statements, used to create table did not execute correctly. It might be due to the configuration of IBM Security Directory Integrator or some Connector or due to internal error.

Action

Check the configuration and contact IBM support if the problem still exists.

CTGDIS813W The AssemblyLine could not be set up due to problem with the Script Engine.

Explanation

The reference to the Script Engine is null.

Action

Contact IBM support.

CTGDIS814E An exception occurred while starting an AssemblyLine: *exception*

Explanation

The AssemblyLine cannot be started. It might be due to error in constructing the Task Call Block or in the process of starting the AssemblyLine.

Action

Check the configuration and contact IBM support if the problem still exists.

CTGDIS818I Next Parameter Expanded: *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS819E Error occurred in starting Event Handler: *exception*.

Explanation

Error occurred during starting Event Handler on debug port. The port might be already busy or the Event Handler might not be defined.

Action

Check that such Event Handler is defined and the port on which it should run is not already used by another program.

CTGDIS820E Error occurred in initializing server' security when the server runs in secure mode: *exception*.

Explanation

The specified error has occurred while reading the stash file.

Action

See the message for more information.

CTGDIS821I *version information*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS822E Error occurred getting version information: *exception*.

Explanation

I/O error occurred.

Action

Try again later and contact IBM support if the problem still exists.

CTGDIS823I The command is: *command*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS824I Sending password...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS825I Read line: *line*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS826I Line included in the reply: *line*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS827I Class name: *class name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS828I Superclass / Interface

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS829E Exception occurred while creating the database file: *exception*

Explanation

Error while creating database file.

Action

Check the configuration.

CTGDIS830I *formatting message*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS831I Next database element: *database element*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS832W Database element information: *element information*.

Explanation

The B-Tree logic failed. This is an internal error.

Action

Contact IBM support.

CTGDIS833I Executing empty system store method. All contents of table associated with queue will be deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS834E SAX Parse error message: *message*

Explanation

Review the error message for more information.

Action

Contact IBM support.

CTGDIS835I The memory buffer store thread is alive and an interrupt request was sent to it.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS836I The memory buffer load thread is alive and an interrupt request was sent to it.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS837E Exception occurred while trying to evaluate script expression: *exception*.

Explanation

See the exception message for more information.

Action

Verify that the script expression is correct.

CTGDIS840W The size of the AssemblyLine Pool has been reset to 1 because debugging is enabled.

Explanation

While debugging, the size of the AssemblyLine Pool cannot be greater than 1.

Action

Disable debug mode if the solution needs a larger AssemblyLine Pool size.

CTGDIS841W AssemblyLine pool: The maximum number of concurrent instances has been reset to the number of prepared instances, *number of prepared instances*, because the configured value, *maximum number of concurrent instances*, is less than the number of prepared instances.

Explanation

The Config has a value for maximum concurrent instances that is less than the number of prepared instances. The value for maximum concurrent instances has been reset.

Action

Set the maximum concurrent instances to a value that is greater than or equal to the number of prepared instances.

CTGDIS845E No config object provided, cannot evaluate *expression*.

Explanation

To evaluate this expression, you need to provide a config object.

Action

Add a config object to the map provided to the substitute method.

CTGDIS846E Cannot evaluate *expression*, no AssemblyLine Component found.

Explanation

The AssemblyLine Component that this expression refers to, could not be located.

Action

Make sure the config object is part of an AssemblyLine containing the named AssemblyLine Component.

CTGDIS847W Could not recognize value *value* for Global Property *property*, *default value* will be used.

Explanation

The value for the named property was not one that could be recognized and used. As a consequence, the default value will be used instead.

Action

Verify the spelling for the value of the named property.

CTGDIS848E FIPS Mode failed to initialize. Exception: *exception*

Explanation

An Exception occurred during FIPS initialization. Check the Exception message for more details.

Action

Review the Exception message; verify that all FIPS recommendations are met.

CTGDIS849I FIPS Mode successfully initialized.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS850E An Error occurred while trying to remove the IBMJCEFIPS security provider from the providers list. Exception: *exception*

Explanation

The IBMJCEFIPS provider should be set before the IBMJCE provider. That is why it is first removed and later installed in the correct place in the security providers list.

Action

View the Exception message for more information.

CTGDIS851E An Error occurred while trying to install the security providers. Exception: *exception*

Explanation

The security providers should be installed in specific order to run IBM Security Directory Integrator in FIPS Compliant Mode.

Action

View the Exception message for more information.

CTGDIS852E An Error occurred while trying to install the IBMJCEFIPS security provider in the correct place in the security providers list.

Explanation

The IBMJCEFIPS provider should be set before the IBMJCE provider in the security providers list.

Action

View the Exception message for more information.

CTGDIS853E An Error occurred while trying to set the default JSSE socket factories, the IBM Security Directory Integrator security provider System property and the FIPS enabling property in IBMJSSE2 provider. Exception: *exception*

Explanation

This could be due to some Security permissions. The properties are not set because the JVM Security Manager did not allowed it.

Action

View the Exception message for more information.

CTGDIS854E The '*property name*' property is read-only and its value could not be changed.

Explanation

User tries to set a property which is internal and its value cannot be changed.

Action

Change the property name to value which is not a read-only property.

CTGDIS855I A property with the name *property name* does not exist.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS859E A required parameter is missing: *parameter name*

Explanation

The parameter with the specified name was not found within the supplied parameters.

Action

Provide the required parameter.

CTGDIS860E Unexpected token: *parameter name* If the token is intended to be a parameter value, provide a parameter name for it. If the token is intended to be a parameter name, prefix it with <->.

Explanation

The command line uses an incorrect syntax.

Action

Verify that the command line is correct.

CTGDIS861I Usage: -genseckey -alias <key alias> -keyalg <key algorithm> -keysize <key size> -keystore <keystore file> -storepass <keystore password> -storetype <keystore type> [-keypass <key password>] [-keygenproviderclass <security provider for key generation>] -delete -alias <key alias> -keystore <keystore file> -storepass <keystore password> -storetype <keystore type> -importkey -srcalias <key alias in the source keystore> -srckeystore <source keystore file> -srcstorepass <source keystore password> -srcstoretype <type of the source keystore> [-srckeypass <password for the key in the source keystore>] -destalias <key alias in the destination keystore> -destkeystore <destination keystore file> -deststorepass <destination keystore password> -deststoretype <destination keystore type> [-destkeypass <password for the key in the destination keystore>] -list -keystore <keystore file> -storepass <keystore password> -storetype <keystore type> -printseckey -alias <key alias> -keystore <keystore file> -storepass <keystore password> -storetype <keystore type> [-keypass <key password>]

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS862E The tool could not determine the operation you would like to execute. Verify that your syntax is correct. Currently supported operations are : *parameter name*, *parameter name* and *parameter name*. Call the tool without parameters to see the usage manual.

Explanation

The provided parameters are either not correctly spelled or are insufficient.

Action

Verify that the command line syntax is correct.

CTGDIS863E Cannot read keystore file *file name*: *exception*

Explanation

See the exception message.

Action

See the exception message. Check if the keystore file exists. Check if the keystore password is correct.

CTGDIS864E Key generation failed for algorithm '*algorithm name*' and key size *number*: *exception*

Explanation

See the exception message.

Action

See the exception message. Check if the key size and the key algorithm name are valid.

CTGDIS865I Key algorithm: *algorithm name* Key size: *number* Raw key: *raw binary data*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS866E No secret key has been found under alias '*alias*' in keystore '*alias*'.

Explanation

See the exception message.

Action

See the exception message. Check if the key password is correct.

CTGDIS867I *alias* : private key entry

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS868I *alias* : trusted certificate entry

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS869I *alias* : secret key entry

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS870E No entry exists under alias '*alias*' in keystore '*file name*'

Explanation

The entry cannot be deleted because it does not exist.

Action

Verify that the alias is correct.

CTGDIS871E Operation failed with error: *exceptions*

Explanation

See the message of the exception.

Action

See the message of the exception.

CTGDIS872E The keystore does not contain a private key entry under alias '*key alias*'. Transformation '*transformation name*' requires a public/private key pair.

Explanation

The keystore entry under the specified alias is either missing or is not a private key entry.

Action

Provide an RSA key pair under the specified alias.

CTGDIS873E The key pair under alias '*key alias*' is for algorithm '*algorithm name*'. RSA keys are required for transformation '*transformation name*'.

Explanation

The key pair under the specified alias is not suited for the specified transformation.

Action

Provide an RSA key pair under the specified alias.

CTGDIS874E The keystore does not contain a secret key under alias '*key alias*'. Transformation '*transformation name*' requires a secret key.

Explanation

The keystore entry under the specified alias is either missing or is not a secret key entry.

Action

Provide a secret key under the specified alias.

CTGDIS875E The required system property '*property name*' has not been set.

Explanation

The specified property is mandatory. Provide an appropriate value for it in global.properties/solution.properties.

Action

Verify that the property is set.

CTGDIS876E Cannot load keystore file '*file name*' of type '*keystore format*': *exception*

Explanation

See the exception message.

Action

See the exception message. Verify that the keystore password is correct. Verify that the keystore file is of the specified type.

CTGDIS877E Cannot write keystore file '*file name*' of type '*keystore format*': *exception*

Explanation

See the exception message. The keystore could not be written to the file system.

Action

See the exception message. Verify that the keystore file is writable.

CTGDIS878E No entry exists under alias '*alias*' in the source keystore '*file name*'

Explanation

Cannot find the entry to be imported under the specified alias in the source keystore file.

Action

Verify that the alias is correct.

CTGDIS879E The provided password for the entry under alias '*alias*' is incorrect: '*exception*'

Explanation

The tool cannot read the entry because the provided password is incorrect.

Action

Verify that the password for the entry is correct.

CTGDIS880I Started Derby in Network mode on host ''*host name*'' and port ' '*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS881E Not able to start Derby server in Network mode. An exception occurred while starting Derby server in Network mode: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS882E Derby server Host name is not specified, hence starting Derby server on localhost.

Explanation

The host name is not provided by the user, hence the System falls back on the default value namely localhost.

Action

Verify that the global.properties/solution.properties file for the following property: com.ibm.di.store.jdbc.host. Ensure the property is not commented out in the file.

CTGDIS883E Derby server port number is not specified, hence starting Derby server on default port 1527.

Explanation

The port number is not provided by the user. The IBM Security Directory Integrator will use 1527 as the default port value.

Action

Verify that the global.properties/solution.properties file for the following property: com.ibm.di.store.jdbc.port. Ensure the property is not commented out in the file.

CTGDIS884I AssemblyLine *AssemblyLine name* is started in simulate mode.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS885E The 'key' or 'value' the desired entry is null.

Explanation

User wants to add a null value either for 'key' or 'value' in the MapEntry.

Action

Make sure both value are not null and try again.

CTGDIS886E Line *line number* is incorrectly formatted in the properties file: *line information*.

Explanation

Lines in properties files should be in the format 'propertyName=propertyValue'

Action

Correct the line indicated in the properties file.

CTGDIS888E The values in the result entry should be of type com.ibm.di.entry.Entry. The value found is: *Java Object*.

Explanation

During the simulation process the Proxy AssemblyLine contains a non-Entry value in its conn attribute. All values which are set to the conn attribute during the execution of the Proxy AssemblyLine must be of type com.ibm.di.entry.Entry.

Action

Correct the logic in the Proxy AssemblyLine and try again.

CTGDIS889E Checkpoint/Restart is no longer supported. Edit the configuration file so that it does not depend on the Checkpoint/Restart functionality.

Explanation

Checkpoint/Restart is no longer supported. As a result, the AssemblyLine was aborted.

Action

Use the Config Editor to look at the AssemblyLine, and then save the config file. Checkpoint/Restart related settings are automatically removed from the configuration when it is saved. Verify that the solution does not need Checkpoint/Restart.

CTGDIS890E The system store 'username' is null.

Explanation

The system store username is not provided.

Action

Check the property 'com.ibm.di.store.jdbc.user' in the global.properties OR solution.properties.

CTGDIS891E The system store 'jdbcdriver' is null.

Explanation

The system store jdbcdriver is not provided.

Action

Check the property 'com.ibm.di.store.jdbc.driver' in the global.properties OR solution.properties.

CTGDIS892E Error calling method '*Method Name*'. Expected '*Java Object*' object for parameter '*Parameter Name*'.

Explanation

An object from an inappropriate type was provided.

Action

Check the JavaDoc documentation for more information about the method.

CTGDIS893E The entry already contains an Attribute object with the name: '*Attribute Name*'.

Explanation

The entry object maps its attributes to unique names, therefor the 'appendChild' method can not append a child if its local name is already registered in the Entry object.

Action

Make sure that the name of the Attribute is not already registered in the Entry. If it is then use the 'setAttribute(name,object)' method to explicitely replace the existing Attribute.

CTGDIS895E Invalid Property name passed to the constructor.

Explanation

The creation of a Property with an empty name or a null name is forbidden.

Action

Make sure that you provide a valid name for the new Property object.

CTGDIS896I Using configuration id '*name*' for a configuration instance loaded from file '*file name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS897I The memory queue *queue name* is being deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS898E The memory queue was unable to store data to the system store.

Explanation

An error was encountered while trying to store data to the system store.

Action

Make sure the database properties are valid and try again.

CTGDIS899E Memory queue was unable to connect to the system store.

Explanation

An error was encountered while trying to connect to the system store.

Action

Make sure the database properties are valid and try again.

CTGDIS900E Memory queue was unable to empty the system store table.

Explanation

An error was encountered while trying to empty the table associated with the memory queue.

Action

Make sure the database properties are valid and try again.

CTGDIS901E Memory queue was unable to create an instance of the system store connector.

Explanation

An error was encountered while trying to create an instance of the system store connector.

Action

Make sure the database properties are valid and try again.

CTGDIS902E Memory queue was unable to read data from the system store.

Explanation

An error was encountered while trying to read data from the system store.

Action

Make sure the database properties are valid and try again.

CTGDIS903E The value specified for parameter Timeout is invalid.

Explanation

The value specified for Timeout is invalid.

Action

Specify an integer value for timeout.

CTGDIS904E The value specified for parameter Watermark is invalid.

Explanation

The value specified for parameter Watermark is invalid.

Action

Specify an integer value for Watermark.

CTGDIS905E The value specified for parameter Page size is invalid.

Explanation

The value specified for parameter Page size is invalid.

Action

Specify an integer value for Page size.

CTGDIS906E The value specified for parameter Percentage memory to use is invalid.

Explanation

The value specified for parameter Percentage memory to use is invalid.

Action

Specify an integer value for Percentage memory use.

CTGDIS907E The value specified for parameter Percentage memory to use is invalid.

Explanation

The value specified for parameter Percentage memory to use is invalid.

Action

Specify a value between 0 and 100 for Percentage memory to use.

CTGDIS908E The HAttribute object cannot have for a child itself or a HAttribute object which is a parent of it.

Explanation

The provided HAttribute object is either the same or one of the parents of the current HAttribute object.

Action

Check the passed child objec and try again.

CTGDIS909E Error deleting file: *file name*

Explanation

The specified file could not be deleted.

Action

Check the file permissions.

CTGDIS910E Error creating directory: *directory name*

Explanation

The specified directory could not be created.

Action

Check the file permissions.

CTGDIS911E Error renaming file: *file name*

Explanation

The specified file could not be renamed.

Action

Check the file permissions.

CTGDIS912E Invalid JavaString extension call: *function name*

Explanation

The provided function name is not supported. The recognized names are 'slice' and 'search'.

Action

Check your internal logic and try again.

CTGDIS913E ALComponent returns bad value for branchType: *AssemblyLine Component*.

Explanation

The branch type is neither IF/ELSE nor LOOP branch.

Action

Check the configuration and if the problem persists contact IBM support.

CTGDIS914E Unable to add object to the end of the queue.

Explanation

An error occurred while adding object to the queue.

Action

Check the configuration and if the problem persists contact IBM support.

CTGDIS915I config

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS916I DebugServer : Error sending config : *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS917I ERROR

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS918I switch

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS919E Unable to process the command because the required Config ID was not specified.

Explanation

The Config ID was missing in the command sent to the server.

Action

If the problem persists contact IBM support.

CTGDIS920E Unable to process the command. A Config name must be specified.

Explanation

The Config name was missing in the command sent to the server.

Action

If the problem persists contact IBM support.

CTGDIS921E Sub command required

Explanation

The sub command was missing in the command sent to the server.

Action

If the problem persists contact IBM support.

CTGDIS922E Must post configuration file to load.

Explanation

The configuration file was not posted to the server, therefore it cannot be saved.

Action

If the problem persists contact IBM support.

CTGDIS923E Unknown command was encountered: *command*.

Explanation

The command sent to the server is unknown. This may indicate a protocol failure.

Action

If the problem persists contact IBM support.

CTGDIS924E Configuration file not found: *file name*.

Explanation

The configuration file was not found.

Action

Verify that the configuration file exists. If the problem persists contact IBM support.

CTGDIS925E Unknown property store name: *property store name*.

Explanation

The named property store was not found.

Action

Verify that the property store exists with the correct name. If the problem persists contact IBM support.

CTGDIS926E Expected 'Entry' root tag got '*tag*'.

Explanation

The XML that was sent to the server had the wrong root tag, it should have been an Entry tag.

Action

If the problem persists contact IBM support.

CTGDIS927I Calling the startAssemblyLine method...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS928E Entry does not contain a valid changelog entry (changes attribute missing) for operation: *type*.

Explanation

The changes attribute 'newrdn' is missing in the entry.

Action

Check the attributes in the entry.

CTGDIS929E Unable to parse changes attribute.

Explanation

The LDIF Parser could not read the entry.

Action

Check the entry.

CTGDIS930W Error creating directory: *directory name*.

Explanation

The specified directory could not be created.

Action

Check the file permissions.

CTGDIS931W Error creating directory: *directory name*.

Explanation

The specified directory could not be created.

Action

Check the file permissions.

CTGDIS932W Cannot delete file: *file name*.

Explanation

See message.

Action

Check the problem file.

CTGDIS933W Cannot rename file: *file name*.

Explanation

See message.

Action

Check the problem file.

CTGDIS934W Cannot rename file: *file name*.

Explanation

See message.

Action

Check the problem file.

CTGDIS935W An Exception occured while trying to close the debugger connection. Exception: *exception*.

Explanation

Before the debugger is close a message is logged. The Exception is due to an error while the message is being printed. The debugger connection is not closed. See the Exception message for more details.

Action

Examine the Exception and try again.

CTGDIS936W An Exception occured while declaring the ''work'' script object. Exception: *exception*.

Explanation

The "work" object might not be available in the script of "On Failure" AssemblyLine hook.

Action

Examine the Exception and try again.

CTGDIS937W An Exception occured while executing the ''On Failure'' AssemblyLine hook. Exception: *exception*.

Explanation

The script of "On Failure" AssemblyLine hook throw an Exception.

Action

Examine the Exception and try again.

CTGDIS938W An Exception occured while building the Link Criteria from the work Entry object. Exception: *exception*.

Explanation

The Link Criteria was not build successfully. It could be due to insufficient data in the AssemblyLine or error in the Link Criteria rules.

Action

Examine the Exception and try again.

CTGDIS939W Cannot declare the name of the AssemblyLine Pool instance as a bean in the Javascript engine. Exception: *exception*.

Explanation

The AssemblyLine Pool instance will not be available for access through script.

Action

Examine the Exception and try again.

CTGDIS940E The AssemblyLine is already being debugged.

Explanation

Cannot attach a debugger to the AssemblyLine, because it is already has a debugger. Only one debugger is allowed per AssemblyLine.

Action

Detach the current debugger of the AssemblyLine. Then attach the new one.

CTGDIS941E Cannot connect to the debugger on host *ip address or host name* and port *TCP port number*.

Explanation

The AssemblyLine will not use the debugger, because a connection cannot established.

Action

Verify that the debugger is running.

CTGDIS942E The argument is not recognized as a document: *object document*.

Explanation

The argument should be a StreamSource, String, Reader, InputStream or File.

Action

Verify the type of the argument.

CTGDIS943W The component ''*name*'' is erroneously placed in the Feed Folder. It will be temporarily moved to the Data Flow Folder.

Explanation

In earlier versions, it was possible to place components in the Feed Folder, even when they were not a Connector in Iterator or Server mode. This is conceptually wrong, and deprecated. To make the AssemblyLine run, the component is temporarily moved to the Data Flow Folder.

Action

Use the Config Editor to look at the AssemblyLine. This will automatically move the Component into the Data Flow section. Verify that the Component has the correct position, and save the AssemblyLine.

CTGDIS944E The provided Property object ("*property name*") is not owned by this Attribute object.

Explanation

The Property belongs to a different Attribute than the one which removeAttributeNode was called on.

Action

Make sure the Property object is removed only from its owner Attribute object.

CTGDIS946E Cannot set debug mode for component ''*component name*''. There is no such component in AssemblyLine ''*AssemblyLine name*''.

Explanation

The specified component name is invalid.

Action

Verify that the component name is consistent with the AssemblyLine configuration.

CTGDIS947E Cannot retrieve debug mode for component ''*component name*''. There is no such component in AssemblyLine ''*AssemblyLine name*''.

Explanation

The specified component name is invalid.

Action

Verify that the component name is consistent with the AssemblyLine configuration.

CTGDIS948E Cannot set debug mode for component ''*component name*''. There is no such component in AssemblyLine ''*AssemblyLine name*''.

Explanation

The specified component name is invalid.

Action

Verify that the component name is consistent with the AssemblyLine configuration.

CTGDIS949E Cannot retrieve debug mode for component ''*component name*''. There is no such component in AssemblyLine ''*AssemblyLine name*''.

Explanation

The specified component name is invalid.

Action

Verify that the component name is consistent with the AssemblyLine configuration.

CTGDIS950I Delta Statistics: Sequence ID: *sequence number* Number of Entries: *number of entries* Number of old Entries: *number old entries*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS951E While getting delta statistics: *error*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS952I Calls: *number of calls*, Errors: *number of errors*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS953I Calls: *number of calls*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS954E Error loading configuration files *file names*. Specifying multiple files requires the -d option.

Explanation

The configuration files specified using the -c commandline option for the ibmdisrv could not be loaded. When specifying multiple files, the -d option must also be used.

Action

Use the -d command line option when specifying multiple files. If only one file was specified, verify that the specified file exists.

CTGDIS955E Error while registering cryptographic provider ''*provider name*''.

Explanation

The default cryptographic provider could not be loaded.

Action

Verify that the provider name is correct. Verify that the jar of the provider is on the classpath. See the Server log to view the specific exception.

CTGDIS956E Cannot use SSL on data channel if SSL on the command channel is not enabled.

Explanation

When the FTP client uses SSL there are two options: to use SSL on the command channel only, or to use it on both the command and data channels. SSL enablement on the data channel alone is not allowed, because of security issues.

Action

Verify that SSL is used on the command channel. If SSL is not needed, neither SSL option may be used.

CTGDIS957E The system encountered an internal error while trying to validate a product license. Message: *message*.

Explanation

An internal error is preventing validation of the product license.

Action

Contact IBM support.

CTGDIS958E The system cannot find an enrolled product license.

Explanation

An enrolled product license could not be found.

Action

In order to use Security Directory Integrator, you need to ensure that a valid license is enrolled. If you experience any problems with licensing, you should contact your IBM representative or authorized dealer for assistance.

CTGDIS959E The evaluation period has expired.

Explanation

The evaluation period for this copy of Security Directory Integrator has now expired.

Action

This copy of Security Directory Integrator is licensed for use for a limited period only. This copy of Security Directory Integrator has now exceeded the licensed period and will no longer execute. You can purchase a full license for unlimited use of the product by contacting your IBM representative or authorized dealer.

CTGDIS960W There are *number of days* days left in the evaluation period.

Explanation

The evaluation period for this copy of Security Directory Integrator has the specified number of days to run until expiry.

Action

This copy of Security Directory Integrator is licensed for use for a limited period only. This copy of Security Directory Integrator will continue to execute for the specified number of days, but will then expire and not execute in the future. You can purchase a full license for unlimited use of the product by contacting your IBM representative or authorized dealer.

CTGDIS961E The evaluation period is invalid.

Explanation

The evaluation period for this copy of Security Directory Integrator is invalid.

Action

This copy of Security Directory Integrator is licensed for use for a limited period only. This copy of Security Directory Integrator appears to have more than the maximum allowed number of days (90) remaining in the evaluation period.

CTGDIS962W Running the AssemblyLine in Simulation mode

Explanation

The AssemblyLine runs in Simulation mode. Most operations will only be simulated.

Action

This can be changed in the Specify Run Options panel in the Config Editor.

CTGDIS963W AssemblyLine *name* cannot be started, because the Config Instance is shutting down.

Explanation

While the Config Instance is shutting down, new AssemblyLines cannot be started.

Action

No action is required.

CTGDIS964I Shutting down the AssemblyLine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS965W AssemblyLine *name* could not be stopped.

Explanation

The AssemblyLine could not be stopped; is there code in the AssemblyLine catching all Exceptions?

Action

If there is code in the AssemblyLine to catch Exceptions, consider rewriting the code to allow the AssemblyLine to be shut down gracefully.

CTGDIS966E The keystore file '*file name*' had the following problem: *error message*

Explanation

There was a problem using the named keystore file.

Action

See the included error message for further details.

CTGDIS967I AssemblyLine started by *thread name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS968E No Failover Connector Name provided

Explanation

Connection failover was specified, but no Failover Connector Name was provided

Action

Specify a Failover Connector Name, or do not use Connection failover.

CTGDIS969E Changelog Entry does not contain a changetype Attribute. The Entry is: *entry*.

Explanation

The changetype attribute is missing in the entry. This attribute is mandatory.

Action

Check the attributes in the entry.

CTGDIS1880W Transactions are not supported by the database.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1881W The specified row locking is not supported by the database.

Explanation

The database does not support the selected transaction isolation level.

Action

Select another row locking option.

CTGDIS1882E Error while loading script *name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1884E Cannot compute the next date

Explanation

The month/day combination in the schedule is not valid.

Action

Change the schedule to use valid dates.

CTGDIS1885E No AssemblyLine specified.

Explanation

No AssemblyLine has been specified for the Scheduler to run.

Action

Specify an AssemblyLine for the Scheduler.

CTGDIS1886I Scheduler started by *thread name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1887I Finished.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1888E No config instance name specified.

Explanation

A remote server was specified, but no config instance name.

Action

Specify a config instance name.

CTGDIS1889E Problem while starting the AssemblyLine: *exception*

Explanation

The AssemblyLine could not be started.

Action

Examine the exception to determine the cause of the problem.

CTGDIS1890E The AssemblyLine did not run long enough, terminating.

Explanation

The AssemblyLine did not run as long as specified in the Min-secs parameter.

Action

Determine the cause of the problem.

CTGDIS1891E Cannot find config instance *id*.

Explanation

The named config instance could not be found.

Action

Determine the cause of the problem.

CTGDIS1892E Problem while starting the Failure AssemblyLine: *exception*

Explanation

The Failure AssemblyLine could not be started.

Action

Examine the exception to determine the cause of the problem.

CTGDIS1893W Cannot locate file *file name* referenced by *component*.

Explanation

The named file could not be found.

Action

Create the file.

CTGDIS1894E Schedule: Incorrect number of fields in *string*.

Explanation

A Schedule must be exactly 6 fields separated by space.

Action

Make sure the schedule consists of 6 fields separated by space.

CTGDIS1895E Schedule field value too large: *value*.

Explanation

The fields in a schedule must be comma separated integers in the following ranges: Month 0-11, day in month 1-31, day in week 1-7, hour 0-23, minute and second 0-59.

Action

Correct the value that is too large.

CTGDIS1896E No AssemblyLine specified.

Explanation

No AssemblyLine name has been specified in a Sequence.

Action

Specify an AssemblyLine name.

CTGDIS1897I Sequence *name* started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1898I Sequence started by *thread name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1899I Rule with priority '*priority*' and name '*name*' requires: *attr names* (+ add, - remove).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1900I Rule with priority '*priority*' and name '*name*' is satisfied.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1901I Rule with priority '*priority*' requires: *attr names* (+ add, - remove).

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1902I Rule with priority '*priority*' is satisfied.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1903E Class type is not provided.

Explanation

No class type provided in the UI of the Component.

Action

Provide the class type in the UI of the Component.

CTGDIS1904E The IT registry meta data is not supported for Naming Rule validation.

Explanation

The IT registry meta data does not provide support for Naming Rules and cannot be used for validation.

Action

Change the configuration of the Component to rely on CDM meta data.

CTGDIS1905E Unable to find configuration for Sequence *name*.

Explanation

The named Sequence cannot be found.

Action

Verify that the configuration file contains the named Sequence.

CTGDIS1906E An error has occurred while decrypting protected property: *exception*

Explanation

See Message.

Action

See the exception message for more information.

CTGDIS1907I Compute changes is not supported for hierarchical entries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1908E Cannot read regression info: *exception*

Explanation

This AssemblyLine was supposed to read regression info from a specified file, but were unable to open the file. Read the attached exception for more information.

Action

Make sure the file name is correct, and that the file has the proper permissions.

CTGDIS1909E Cannot write regression info: *exception*

Explanation

This AssemblyLine was supposed to write regression info to a specified file, but were unable to do so. Read the attached exception for more information.

Action

Make sure the file name is correct, and that the file has the proper permissions.

CTGDIS1910W The regression file does not contain information about this AssemblyLine

Explanation

This AssemblyLine was supposed to read regression info from a file and make a comparison, but the file does not contain information from this AssemblyLine.

Action

Make sure the file name is correct, and that the file contains information from the correct AssemblyLine.

CTGDIS1911W Premature end of regression file at cycle *number*.

Explanation

This AssemblyLine reads regression info from a file and compares to that. There is not enough information in the file, maybe the previous run stopped prematurely.

Action

The AssemblyLine behaves different than before, this could indicate a regression problem.

CTGDIS1912W Not the same information in *Entry name* at *component*, cycle *number*. Old info: *oldinfo*, new info: *newinfo*.

Explanation

This AssemblyLine was supposed to read regression info from a file and compare to that. A difference was found.

Action

The AssemblyLine behaves different than before. This could indicate a regression problem.

CTGDIS1913W This run of the AssemblyLine stopped earlier than the previous run, only *number* cycles completed.

Explanation

This AssemblyLine reads regression info from a file and compares to that. When the AssemblyLine stopped, there was still data in the regression file.

Action

The AssemblyLine behaves different than before, this could indicate a regression problem.

CTGDIS1914I Not initializing a re-used Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1915I Derby Network Server started.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1916W Only able to start or stop Derby Network Server.

Explanation

This command is only able to start or stop a Derby Network Server.

Action

Verify the com.ibm.di.store.jdbc.driver property.

CTGDIS1917I Derby Network Server stopped.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1918W Unable to stop Derby Network Server.

Explanation

The network server could not be stopped, it may not be running.

Action

Look at the Exception to determine the cause of the problem.

CTGDIS1919E No path was found in the SCIM request.

Explanation

The HTTP request path was empty.

Action

Use a correct SCIM request path.

CTGDIS1920E XML is not supported.

Explanation

This SCIM server does not support XML.

Action

Use JSON.

CTGDIS1921E Cannot change *endPoint*.

Explanation

The SCIM request tried to change fixed information.

Action

Fixed information can only be changed in the server configuration files.

CTGDIS1922E Unknown schema *schema*.

Explanation

The SCIM request tried to read an unknown schema.

Action

Only the Users and Groups schemas exist.

CTGDIS1923E Unknown endpoint *endPoint*.

Explanation

The SCIM endpoint was unknown.

Action

Use a correct SCIM endpoint.

CTGDIS1924E The *name* attribute was not specified.

Explanation

The SCIM request to create a new resource must contain the specified attribute. This attribute is used to create the LDAP Distinguished Name.

Action

Add the attribute with the specified name to the request, providing a unique value.

CTGDIS1925E A resource with that *name* attribute already exists.

Explanation

The request tried to create a new resource, using the identifier for a user or group that already exists. This identifier was provided in the attribute with the specified name.

Action

Specify a unique identifier for each user and group.

CTGDIS1926E Could not find the new resource after adding it.

Explanation

The new resource could not be found.

Action

Contact the SCIM administrator.

CTGDIS1927E Unable to find ID: *ID*.

Explanation

The SCIM ID in the request could not be found.

Action

Specify an existing SCIM ID.

CTGDIS1928E The ID was not specified.

Explanation

The request needs a valid ID.

Action

Specify an existing ID.

CTGDIS1929E The file *fileName* was not found.

Explanation

This is an internal server error.

Action

Contact the SCIM administrator.

CTGDIS1930E Cannot connect to the LDAP server.

Explanation

The SCIM server is unable to connect to the backend LDAP server.

Action

Contact the SCIM administrator.

CTGDIS1931E The request did not have a body.

Explanation

The SCIM request requires a body containing information.

Action

Provide a body.

CTGDIS1932E The information in the request body could not be parsed: *exception*

Explanation

The information in the request body could not be parsed by the JSON parser. The exception provides information that may help in understanding the error.

Action

Provide a body in correct JSON format.

CTGDIS1933E An error occurred while parsing JSON in the file *file name*.

Explanation

The information in the specified mapping file could not be parsed by the JSON parser.

Action

Contact the SCIM administrator.

CTGDIS1934I No resource was found using the filter: *filterString*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1935W No resource was found using the search base *base*.

Explanation

The specified search base did not contain any information, probably because no users or groups were created yet.

Action

No action is required.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1936E No CreateDN mapping was found in the mapping file.

Explanation

The mapping file must contain exactly one attribute with a CreateDN mapping, which is used to create an LDAP Distinguished Name. The default is userName for users and displayName for groups.

Action

Contact the SCIM administrator, to correct the UserMapping.json or GroupMapping.json file.

CTGDIS1937E Unable to parse filter at column *number*.

Explanation

The provided filter could not be parsed. The column number indicates approximately where the error occurred.

Action

Correct the search filter.

CTGDIS1938I Unknown attribute: *name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1939I Additional text after end of expression: *text*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1940I An operator was expected.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1941I Unsupported operator: *name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1942I A closing parenthesis was expected, but found: *token*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1943I The value is missing for operator: *operator*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1944I A string value was expected, but found: *token*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1945I Unknown Unicode character expression: *token*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1946I Unexpected end of string value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1947I *attribute name* cannot have the value *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1948I Unsupported operator *operator* for *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1949W Cannot parse URL: *url*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIS1950W Cannot read truststore *filename*. The following error occurred: *exception*.

Explanation

No additional information is available for this message.

CTGDKE211E Cannot rename standard folder.

Explanation

Standard folders cannnot be renamed.

Action

No action is required.

CTGDKE212E Could not obtain remote Session: Session object is null.

Explanation

The remote session must be defined and set before it can be used

Action

Define the remote session parameters

CTGDKE213E The XML document *filename* does not have a root tag of *tag name*.

Explanation

The XML configuration file does not have the MetamergeConfig root tag.

Action

Valid IBM Security Directory Integrator XML configurations must have the MetamergeConfig root tag. Ensure that the XML configuration that you have selected has the MetamergeConfig root tag.

CTGDKE214E The XML document *filename* is newer than version *version number*.

Explanation

The version of the configuration file is not supported in the current version of the IBM Security Directory Integrator Configuration Editor.

Action

Use the latest version of the IBM Security Directory Integrator Configuration Editor tool to load this version of the configuration file.

CTGDKE215W The XML document *filename* is old. Version *version number* expected, version *version number* found. The configuration will be upgraded in memory and used.

Explanation

The version of the configuration file used is older than the expected version.

Action

The older version of the configuration is updated in memory. You need to save the older version as a new different file using the Save as functionality to incorporate the changes made.

CTGDKE216I The old version of the file saved as *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE217E *compound name* could not be found at *context*.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKE218E *compound name* could not be found.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKE219E Parent from which AssemblyLine Component inherits is not present.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKE220E *name* is already used as operation name.

Explanation

This error occured because the user tried to name an operation on the Connector level and an operation with that name already exists.

Action

Specify different name for the operation.

CTGDKE220I Inheriting from *name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKE221W The component name is invalid: *name*. An exception occurred: *exception*

Explanation

Component name cannot be parsed.

Action

Examine the exception and check the configuration.

CTGDKE222W Component *component name* has been renamed to *component name*. This has been corrected in your Config file.

Explanation

The name has been changed as the message indicated.

Action

Nothing needs to be done, the next time the config file is saved from the Config Editor, the new name will be written.

CTGDKE223W The old Component name *component name* has been resolved to *component name*.

Explanation

The component name has been resolved to its new name as the message indicated.

Action

No action is required.

CTGDKE224W The evaluation of parameter *parameter name* in *config item* using expression ''*expression*'' did not return any value.

Explanation

The named parameter did not evaluate to any value.

Action

If the expression uses a property, verify that the property store is well defined and contains the given key. If the expression uses javascript, check the javascript code.

CTGDKE225E The evaluation of parameter *parameter name* in *config item* using expression ''*expression*'' caused an error.

Explanation

Evaluating the named parameter caused an error.

Action

Inspect the logged error and the expression. Verify that the expression is well formed. If the expression uses a property, verify that you have access to the property store. If the expression uses javascript, check the javascript code.

CTGDKE226E Cannot read the config file *file path*.

Explanation

The config file either does not exist or is empty.

Action

Verify that the config file exists at the specified location and is not empty.

CTGDKE227E Translation file *file path* not found.

Explanation

The translation file was not found.

Action

Verify that the translation file exists inside a jar file in the jars folder.

CTGDKE228E Cannot find the Java class, which the reconnect rule refers to. The error is: *exception*

Explanation

The 'exceptionClass' parameter of the reconnect rule references a Java class, which is not available.

Action

Verify that the exception class is on the classpath.

CTGDKE229E '*action name*' is not valid for a value of the 'action' parameter of the reconnect rule. Must be either 'error' or 'reconnect'.

Explanation

The configuration of the reconnect rule is incorrect.

Action

Verify that the configuration is correct.

CTGDKE230E Cannot find configuration for component '*component name*' inside the configuration of AssemblyLine '*AssemblyLine name*'.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDKE231E The provided path : '*path*' does not contain a configuration object.

Explanation

The provided path is not valid

Action

Check the path of the configuration and make sure it is correct.

CTGDKE232E The provided path : '*path*' does not contain configuration a object.

Explanation

The provided path is not valid

Action

Check the path of the configuration and make sure it is correct.

CTGDKE233E The provided path : '*path*' does not contain a configuration object.

Explanation

The provided path is not valid

Action

Check the path of the configuration and make sure it is correct.

CTGDKE234W *Exception message*

Explanation

We log a Security Directory Integrator exception message which has its own explanation.

Action

Examine the Exception message.

CTGDKE235E *name* is not an Attribute Map.

Explanation

The named Attribute Map could not be found.

Action

Specify the name of an existing Attribute Map.

CTGDKN501E Could not load configuration file '*file name*'.

Explanation

The specified file either does not exist or could not be read.

Action

Verify that the the file exists and that you have the required permissions to access the file.

CTGDKN502E Invalid mode: '*mode*'.

Explanation

The specified mode is not recognized.

Action

See the printed usage information and choose from the available modes.

CTGDKN503E Invalid type: '*type*'.

Explanation

The specified type is not recognized.

Action

See the printed usage information and choose from the available types.

CTGDKN504I Property '*property name*' is NULL or empty.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN505E Client QueueManager root folder property '*property name*' not specified in the configuration file.

Explanation

The configuration property is missing.

Action

Check the configuration file.

CTGDKN506I Client MQe configuration successfully completed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN507E Client MQe configuration failed.

Explanation

See the error message.

Action

Check the exception for more details.

CTGDKN508I Certificate renewal for entity '*entity name*' completed successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN509E Client MQe certificate renewal failed.

Explanation

See the error message.

Action

See the exception for more details.

CTGDKN510E Server QueueManager root folder property '*property name*' was not specified in the configuration file.

Explanation

The configuration property is missing.

Action

Check the configuration file.

CTGDKN511I Server MQe configuration successfully completed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN512E Server MQe configuration failed.

Explanation

See the error message.

Action

Check the exception for more details

CTGDKN513I Queue operation successfully completed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN514E The queue operation failed.

Explanation

See message.

Action

Check the exception for more details.

CTGDKN515I Will create Connection for: '*adapter*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN516I A Connection definition with that name is already registered.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN517E Invalid numeric value for property '*property name*': *property value*'.

Explanation

The specified property must contain a numerical value.

Action

Correct the value of the specified property.

CTGDKN518I Building connection admin message...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN519I MQeConfig <configuration file> <mode: *mode1* | *mode2* | *mode3* | *mode4*> <type: *type1* | *type2* | *type3* | *type4*> [queuename [targetQMname [QM_ip_or_hostname comm_port]]]

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN520I Building admin message to create remote queue: '*queue*' ; on QM: apos;*QM*'; adapter: apos;*adapter*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN521E Listener section not specified in QueueManager config.

Explanation

The MQe .ini file must contain a 'Listener' section.

Action

Check the MQe .ini file for errors.

CTGDKN522I Building admin message to create a listener.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN523I Press Enter to send test message...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN524I Message sent.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN525E Could not send test message.

Explanation

See the error message.

Action

Check the exception for additional details.

CTGDKN526I QueueManager terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN527E An unexpected exception occurred.

Explanation

See the error message.

Action

See the exception for more details.

CTGDKN528I Press Enter to receive test message...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN529I Test Failed. Could not receive MQe message. Queue is empty.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN530I Test failed: message received but not of expected type 'TextMessage'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN531I Test failed: message received but text does not match - expected '*msg*', received '*msgTxt*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN532I Test MQe message successfully received.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN533E Could not receive test message.

Explanation

See message.

Action

Check the exception for additional details.

CTGDKN534I Built an admin message to delete a queue.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN535I Queue deleted successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN536I Sending an admin message to QM/queue: *onQMgr*/*AdminQName*; using QM: *QMgrName*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN537I Waiting for a response to the admin message...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN538E No response message received.

Explanation

See message.

Action

No help provided.

CTGDKN539I Action failed: '*error message*'

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN540I Error information: '*error message*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN541I Problematic field: '*field name*' '*field value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN542E The QueueManager is already running.

Explanation

A reinitialization was attempted.

Action

Only one initialization of the MQe Queue Manager is possible.

CTGDKN543I QueueManager config fields:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN544E Failed to add the QM Alias name: '*alias*'

Explanation

An error has occurred while adding the alias for a Queue Manager.

Action

No help provided.

CTGDKN545I Listener port is '*port number*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN546I Listener port was not specified. Using the default value of '*port number*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN547E Unable to create destination directory: '*directory name*'

Explanation

The application could not create the directory.

Action

Check whether you have sufficient privileges.

CTGDKN548I MQe QueueManager .ini file was not specified.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN549I MQe QueueManager Queues folder was not specified.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN550E The file '*file name*' is not a valid MQe configuration file, or does not exist.

Explanation

A required file could not be found.

Action

Check the mqeconfig.props configuration file for incorrect values.

CTGDKN551W Unable to delete the directory: '*directory name*'.

Explanation

The specified directory could not be deleted.

Action

Verify that you have sufficient permissions to access the directory and that the directory exists.

CTGDKN552I Admin request was successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM003I KeyStore certificate password is NULL or empty. Will use keystore password to get private key.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM004I The parameter 'storageNotification' was not specified so no notification servers will be set.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM005E Unable to notify Storage notification server ''*server URL*'' because the format is not valid. The expected format is '<host>:<port>'.

Explanation

See message.

Action

Verify the storage notification servers in the storageNotification parameter are formatted correctly.

CTGDJM006E Unable to notify Storage notification server ''*server URL*'' because the port ''*server URL*'' in the URL is not valid.

Explanation

See message.

Action

Verify that the storage notification servers in the storageNotification parameter are formatted correctly and have valid port numbers.

CTGDJM007E Could not notify the Storage Component at *notification server*. Exception occurred: *exception*

Explanation

Could not connect to Storage Component. The port is not open.

Action

Verify that the storage notification server in the storageNotification parameter are formatted correctly and have valid port numbers.

CTGDJM008W JMS Password Store Connector will start in 'offline' mode: - messages already transferred to the local MQe QueueManager will be retrieved; - if in the meantime the JMS Storage Component is started, any new messages will be transferred and delivered by the Connector.

Explanation

See message.

Action

No action is required.

CTGDJM009I The Storage Component at *notification server* is successfully notified for the Connector startup.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM010E Error closing the notification connection to the Storage Component: *exception*

Explanation

An I/O error occurs when closing the socket.

Action

No action is required.

CTGDJM014I The getNextEntry method received message of type: *class name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM015E Exception while closing queue connection: *exception*

Explanation

If the JMS provider fails to stop message delivery and close the connection due to an internal error.

Action

No action is required.

CTGDJM016E Invalid message type. Received message type of class *class name* but expected class type was TextMessage.

Explanation

The Connector expected TextMessage, but received other message type.

Action

Check messages types on the server

CTGDJM017I 'UpdateType' field retrieved from message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM018I 'UserId' field retrieved from message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM019I 'PasswordCount' field retrieved from message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM020E Incorrect password update message format. Exception occurred: *exception*

Explanation

See message.

Action

Check messages format on the server.

CTGDJM021I 'Passwords' value retrieved from message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM022I Attribute 'Passwords' created with no values.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJM023E Could not parse password update message. Exception occurred: *exception*

Explanation

See message.

Action

Check messages format on the server.

CTGDJM024E Message contains invalid update type: *type*.

Explanation

See message.

Action

No action is required.

CTGDJM025E Unable to use both PKCS7 and the encryption from releases prior to IBM Security Directory Integrator 6.1.1 at the same time.

Explanation

Invalid values for: 'usePkcs7' and 'decryptMessages' parameters. Both are set to TRUE. Only one of them can be chosen at the same time. Either PKCS7 or the encryption from releases prior to IBM Security Directory Integrator can be used but not both at the same time.

Action

See the configuration of the JMS PasswordStore Connector and set only one of these parameters to true. The setting match the ones set at the Store.

CTGDJZ501E Open IdML Function Component accepts only a IBM Security Directory Integrator Entry as input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

Open IdML Function Component expects only a IBM Security Directory Integrator Entry as input. Check the AL logic and try again.

CTGDJZ502E The book '*book name*' is currently in use. Release it, before attempting to use it again.

Explanation

The book with the provided book name is currently in use by another Open IdML Function Component. It will have to release it before this Component can use it.

Action

Check if there is another running AssemblyLine with IdML Components. If the problem persists either provide another book name for your IdML Components or restart the SDI server.

CTGDJZ503E Not all CDM attributes needed for registering an MSS are provided.

Explanation

The attributes required for creating an MSS as specified by the naming policy are not provided.

Action

For creating a MSS the user needs to pass either the 'cdm:MSSName' attribute or both 'cdm:Hostname', 'cdm:ManufacturerName' and 'cdm:ProductName'.

CTGDJZ504E Both a target and a source must be provided, in order to create a relationship.

Explanation

An IdML Relationship connects two IdML Configuration Items, which can perform role of either a target or a source of the Relationship. Therefore, the ids of two CIs must be mapped to these attributes of the Relationship.

Action

Pass correct CI id values for both the 'source' and 'target' attributes.

CTGDJZ505E The IBM DL Certification Tool assessed that book '*book name*' is not a valid IdML document (file name: '*file name*').

Explanation

The Open IdML FC can be configured to validate the generated IdML. If it fails the validation the user is notified with this message.

Action

Verify that the logic of the associated AssemblyLine is correct.

CTGDJZ506E A valid CDM version and MSS's Application Code and Hostname are mandatory for the MSS creation.

Explanation

The CDM version, MSS's Application Code and Hostname must be specified by the user.

Action

Provide the listed information in the FC's configuration panel, or its Output Map (for Application Code and Hostname).

CTGDJZ507E Class '*class name*' cannot be found.

Explanation

The specified class name cannot be found in the CDM meta-data, so its attributes cannot be listed.

Action

Check if the class name is enterer correctly.

CTGDJZ508I Open IdML Function Component has already opened book '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ509I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ510I Open IdML Function Component will work with book: '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ511I The name of the currently used book '*book name*' has been overridden to '*new name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ512I Use an IT registry for the needed meta-data: '*use it registry*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ513I Open IdML Function Component will create a *idml mode* IdML.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ514I The generated IdML will be validated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ515I The MSS''s *param name* has value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ516I The MSS''s *param name* has been overridden to value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ517I The Common Data Model version of the generated IdML will be '*cdm version*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ518I Open IdML Function Component opened book '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ519E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the Open IdML Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDJU101E Unable to read the entry because the 'defaultAttribute' ''*attribute value*'' value was not set in the Entry object.

Explanation

See message.

Action

Specify a valid defaultAttribute parameter in the FC and ensure that each Entry object that is parsed contains that attribute.

CTGDJU102E Unable to read the entry because the Entry object is of an unknown type: ''*object type*''. Specify an object of type 'String', 'File', 'InputStream', or 'Reader'.

Explanation

See message.

Action

Ensure that each Entry object that is parsed is of type String, File, InputStream, or Reader.

CTGDIR101I The properties file ''*file name*'' does not exist and will be ignored.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR102E Unable to modify entry because no key value was provided.

Explanation

The modify entry operation in the Properties Connector failed because no key value was specified.

Action

Specify a key value in the configuration of the Properties Connector.

CTGDIR103W The properties file ''*file name*'' for *property store name* was not found, and will be created if anything is written to it.

Explanation

The named file was not found. The Create flag was set in the configuration for this Properties Connector, so the file will be created if needed.

Action

If the Create flag was erroneously set, the non-existing file may indicate a problem. Verify that the Properties Connector does not need the file to exist, and if necessary, uncheck the Create flag in the configuration.

CTGDIR104E The Certificate ''*certificate name*'' for property file *file name* was not found.

Explanation

The named Certificate was not found in the server keystore, or could not be used to create a Crypto Object. Therefore properties in this file cannot be decrypted.

Action

Verify that the named Certificate exists in the keystore.

CTGDKN001I Proxy stop requested.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN002E Encountered an unknown hostname or IP address.

Explanation

Unexpected internal error has occurred that may be due to the current network configuration settings of the Java Proxy.

Action

Check the Java Proxy configuration and try again.

CTGDKN003E Proxy stop request failed! The server is probably already stopped.

Explanation

This error might be thrown if the proxy's maximum opened connections limit is reached by the time the proxy is requested to stop.

Action

Try to stop the proxy using the 'stopProxy' console utility.

CTGDKN004I Waiting for '*number of threads*' threads to die.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN005I Interrupted while waiting for the other threads to die.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN006E Unable to start the Java Proxy because the Java property '*property name*' was not specified.

Explanation

The specified property was missing and is required.

Action

Verify that the configuration is correct. and try again.

CTGDKN007E Unable to start the Java Proxy. The path to the Java Proxy configuration file is not valid.

Explanation

The path to the Java Proxy configuration file is either missing or not existing.

Action

Verify that the configuration is correct.

CTGDKN008E Unable to start the Java Proxy. The proxy configuration file property was not specified.

Explanation

The 'proxyConfigFile' property does not contain a value

Action

Verify that the configuration is correct.

CTGDKN009E Unable to start the Java Proxy. The server socket could not be created.

Explanation

This indicates an issue in the environment. The specified port is already taken and is in use by another application.

Action

Check the message of the corresponding exception for further details. Verify that the port number is in use and specify an alternate port.

CTGDKN010I The authentication folder is: '*directory name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN011I Plug-in/Proxy authentication successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN012I Plug-in/Proxy authentication failed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN013E An unexpected Input/Output Exception occurred.

Explanation

An unexpected exception has occurred.

Action

Check the exception message for more information.

CTGDKN014I The Java Proxy is shutting down...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN015E An unexpected exception occurred.

Explanation

See the error message.

Action

Check the exception message for more information.

CTGDKN016E Unable to start the Java Proxy. The configuration property 'syncClass' is missing.

Explanation

The syncClass property is missing. The syncClass property is required and is used to specify the Password Store class.

Action

Check the configuration file and ensure the syncClass property is specified.

CTGDKN017E Unable to start the Java Proxy. The Password Store class could not be instantiated.

Explanation

The Password Store class could not be instantiated. This could happen if the specified class name is invalid.

Action

Check the message of the auxiliary exception for more details.

CTGDKN018I Invalid value for '*property name*' property, falling back to the default port '*port number*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN019I Sending Proxy Stop request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN020E Could not connect to '*hostname*' :'*port number*'.

Explanation

The connection with the Java Proxy failed.

Action

Either the Proxy has already been stopped or the connection limit has been reached. Verify the Java Proxy is running.

CTGDKN021I The Java Proxy does not recognize the byte-order mark.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN022W The Proxy Stop request was rejected by the Java Proxy.

Explanation

The proxy did not acknowledge the request.

Action

Check log file of the Java Proxy.

CTGDKN023I The Proxy stop request was sent successfully. The Proxy will react in less than *number of seconds* seconds.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN024I Usage of the StopProxy program:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN025I stopProxy <full path to the configuration file of the Password Synchronizer>

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN026I Received operational code: '*operational code*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN027I Invalid operational code: '*operational code*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN028I Rejecting operation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN029I Invalid data received. The data might contain null characters. The operation for '*operation name*' will be rejected.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN030E Invalid protocol data. Expected 0x00, received: *byte*.

Explanation

The client plug-in is using a protocol which is not recognized by the Java Proxy.

Action

Make sure that the versions of both the client plug-in and the Java Proxy are the same.

CTGDKN031I Reading BOM.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN032I Encoding not found. Using default encoding ('*character set*').

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN033I Found encoding '*character set*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN034I Sending positive response to the client plug-in.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN035I Insufficient input data.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN037E A password file was not created successfully.

Explanation

The proxy sent a notification that it failed to create a password file. The authentication process could not continue.

Action

Ensure the authentication folder has the right file system permissions.

CTGDKN040I Both password files were successfully read.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN041I Sending proxy password.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN044E The authentication process failed. The proxy did not respond as expected.

Explanation

An unknown error occurred on the proxy side during the authentication process.

Action

Ensure the proxy is operating normally. Inspect the proxy log for errors.

CTGDKN045I The password sent by the proxy is valid.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN046E Authentication failed. The password sent by the proxy is not the same as the one that the client generated at the beginning of the authentication process.

Explanation

See the error message.

Action

Verfiy the proxy is operating normally. Inspect the proxy log for errors.

CTGDKN047E The authentication failed: *exception*

Explanation

See the error message.

Action

Inspect the error logs.

CTGDKN049E The password file '*file name*' is missing.

Explanation

The client could not find a password file.

Action

Verify that the proxy is operating normally. Inspect the proxy error log.

CTGDKN050E The password file '*file name*' is of unexpected format.

Explanation

The client does not recognize the format of the password file.

Action

Verify that the proxy is operating normally. Inspect the proxy error log.

CTGDKN051E Authentication failed because a password file could not be created: *exception*

Explanation

See the error message for details.

Action

Make sure the authentication folder has the right file system permissions.

CTGDKN052W Could not delete proxy password file '*file name*'.

Explanation

The proxy password file should be deleted after the client reads the proxy password.

Action

Ensure the authentication folder has the right file system permissions. Verify the specified password file is not left in the authentication folder after the authentication process completes.

CTGDKN053I Proxy password file deleted successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN054E The client did not respond as expected.

Explanation

This is an error in the authentication process. An error might have occurred on the client side.

Action

Inspect the proxy log for errors.

CTGDKN055E The password received from the client does not match the password generated by the proxy in the beginning of the authentication process.

Explanation

See error message.

Action

Inspect the proxy log for errors.

CTGDKN056I Received correct password from client.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN057I Sending password to client.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN059W Could not delete client password file '*file name*'.

Explanation

The client password file should be deleted after the proxy reads the client password.

Action

Ensure the authentication folder has the right file system permissions. Verify the specified password file is not left in the authentication folder after the authentication process completes.

CTGDKN060I Client password file deleted successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN061E The client did not respond as expected.

Explanation

This is an error in the authentication process. An error might have occurred on the client side.

Action

Inspect the proxy log for errors.

CTGDKN062E The client rejected the password sent by the proxy.

Explanation

This is an error in the authentication process.

Action

Inspect the log for errors.

CTGDKN063I The client accepted the password sent by the proxy.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN064E The authentication failed. An exception occurred: *exception*

Explanation

See the error message.

Action

Inspect the error logs.

CTGDKN067E The client password file '*file name*' is missing.

Explanation

The proxy could not find the client password file.

Action

Verify that the client is operating normally. Inspect the client error log.

CTGDKN068E The authentication failed. The proxy does not recognize the format of the client password file.

Explanation

See the error message.

Action

Verify that the client is operating normally. Inspect the client error log.

CTGDKN069E Cannot install IBMJCE provider. An exception occurred: *exception*

Explanation

This is an internal error. The installation may be corrupted.

Action

Verify that the installation is not corrupted.

CTGDKN070E Could not obtain cipher '*cipher name*' implementation from provider '*provider name*': *exception*

Explanation

This is an internal error. Probably the installation is corrupted.

Action

Verify that the installation is not corrupted.

CTGDKN071E Key store file '*file name*' does not exist.

Explanation

The specified key store file could not be found.

Action

Verify that the key store file exists.

CTGDKN072E Failed to open key store file '*file name*': *exception*

Explanation

See the error message.

Action

Verify that the key store password is correct, the key store file is accessible and is not corrupted.

CTGDKN073E Could not find certificate with alias '*certificate alias*' in key store file '*file name*'.

Explanation

A certificate with the specified alias does not exit in the key store.

Action

Verify that the certificate exists.

CTGDKN074E Failed to retrieve certificate with alias '*certificate alias*' from key store file '*file name*': *exception*

Explanation

See the error message. The key store password is not correct or the key store is corrupt.

Action

Verify that the certificate exists and the key store password is correct.

CTGDKN075E Failed to retrieve private key with alias '*private key alias*' from key store file '*file name*': *exception*

Explanation

See the error message. The key store password is not correct, the key password is not correct or the key store is corrupt.

Action

Verify that the private key exists, the key store password is correct and the private key password is correct.

CTGDKN076E Failed to retrieve public key with alias '*alias name*' from key store file '*file name*': *exception*

Explanation

See the error message. The key store password is not correct or the key store is corrupt.

Action

Verify that the public key exists and the key store password is correct.

CTGDKN077E An exception occurred during the encryption operation: *exception*

Explanation

See the error message.

Action

Verify that the configuration is correct.

CTGDKN078E An exception occurred during the decryption operation: *exception*

Explanation

See the error message.

Action

Verify that the configuration is correct.

CTGDKN079I Usage: java com.ibm.di.plugin.idipwsync.EncodePW <password>

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKN080E An unexpected error occurred.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDKN081E Incorrect class specified in the syncClass property.

Explanation

The specified class does not implement the proper interface.

Action

Check the value of the syncClass property in the pwsync.props file.

CTGDKN082I Invalid value for '*property name*' property, falling back to the default retry attempts '*retry attempt*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH501I Initializing QRadar Connector version *version*, LEEF Version supported is *LEEFversion*, syslog output: *boolean*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH502I Closing LEEF file.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH503E Error closing LEEF file: *exception*

Explanation

An Exception was thrown when closing the LEEF file.

Action

Examine the exception for more details about the problem.

CTGDIH504E Too few tabs (min=3) found in line: *line*

Explanation

While reading a LEEF file, a line was found that contained less than 3 tab separated fields.

Action

Verify that the input file is a proper LEEF file.

CTGDIH505E LEEF Version should be *version*, in line *line*

Explanation

While reading a LEEF file, a line was found that did not have the correct LEEF version.

Action

Verify that the input file is a proper LEEF file with the correct version.

CTGDIH506E Required LEEF Header Attribute missing from Output Map: *name*.

Explanation

The output entry did not contain the named attribute. This attribute is required.

Action

Make sure that the output map creates all the required attributes.

CTGDIH507E Attribute devTime missing from Output Map. Custom attributes detected: *attributes*.

Explanation

When the output entry contains custom attributes, the LEEF Header Attribute devTime is required.

Action

Make sure that the output map creates the devTime attribute.

CTGDIH508I Renaming first LEEF file to *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH509I Event number *number*, changing to LEEF file *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH510E The attribute *name* has more than *length* chars: *value*.

Explanation

The named attribute contains too many characters.

Action

Reduce the length of the string.

CTGDIH511E The attribute *name* is not numeric: *value*.

Explanation

The named attribute must be an integer.

Action

Make sure that the attribute is an integer.

CTGDIH512E The attribute *name* has a value *value* which is outside the accepted range *minimum* to *maximum*.

Explanation

The named attribute has a value that is outside the permitted range.

Action

The value should be between the minimum and the maximum.

CTGDIH513E The attribute *name* is not a valid date: *value*.

Explanation

The named attribute must be a valid date.

Action

Make sure that the attribute is a date that can be parsed.

CTGDIH514E The attribute *name* is not a valid IP address: *value*.

Explanation

The named attribute must be a valid IP address.

Action

Make sure that the attribute is a valid IP address.

CTGDIH515E The attribute *name* is not a valid MAC address: *value*.

Explanation

The named attribute must be a valid MAC address. It should consist of 6 parts separated by either : or -, each part should be two hex characters.

Action

Make sure that the attribute is a valid MAC address.

CTGDIH516E The attribute *name* is not a recognized protocol number: *value*.

Explanation

The number used for the protocol was not recognized.

Action

Make sure that the attribute contains a valid protocol number or keyword.

CTGDIH517E The attribute *name* is not a recognized protocol keyword: *value*.

Explanation

The name used for the protocol was not recognized.

Action

Make sure that the attribute contains a valid protocol number or keyword.

CTGDKK001E Missing required parameter: *parameter name*.

Explanation

A required parameter is not specified in the configuration.

Action

Specify the required parameter.

CTGDKK002E Parameter *parameter name* must be a number greater than *number*.

Explanation

The value of the parameter is not appropriate.

Action

Specify a proper value for the parameter in the configuration.

CTGDKK003E Parameter *parameter name* must be a number greater than or equal to *number*.

Explanation

The value of the parameter is not appropriate.

Action

Specify a proper value for the parameter in the configuration.

CTGDKK004E Parameter *parameter name* must be a number less than or equal to *number*.

Explanation

The value of the parameter is not appropriate.

Action

Specify a proper value for the parameter in the configuration.

CTGDKK005E Parameter *parameter name* must be a number.

Explanation

The provided value for the parameter is not a number.

Action

Specify a number value for the parameter.

CTGDKK006E Cannot create connection to Agent Controller.

Explanation

Cannot create connection to the remote host on which the Agent Controller runs.

Action

Verify that the host of the Agent Controller is accessible.

CTGDKK007I Waiting *number of milliseconds* milliseconds for monitoring client...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK008I Monitoring client has arrived.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK009E No monitoring client has arrived.

Explanation

No monitoring client has arrived within the predefined time window.

Action

Make sure a client starts to monitor the Logging Agent, registered by the Connector, before the configured timeout expires.

CTGDKK010I Waiting for monitoring client...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK011I Monitoring client has arrived.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK012I Started monitoring remote agent.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK013I Remote Logging Agent is dead.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK014I Data from dead agent depleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK015I Logging Agent Life Monitoring thread interrupted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK016I Connection to remote AgentController disrupted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK017E Error while processing incoming data from the Logging Agent: *exception*

Explanation

Could not read a Common Base Event out of the incoming data buffer.

Action

Analyze the exception for more information. Check if the remote Logging Agent is functioning properly.

CTGDKK018E Error while processing incoming data from the Logging Agent: *exception*

Explanation

Could not read a Common Base Event out of the incoming character data.

Action

Analyze the exception for more information. Check if the remote Logging Agent is functioning properly.

CTGDKK019W Received invalid data from the remote Logging Agent.

Explanation

The incoming data does not conform to the expected format.

Action

Check if the remote Agent Controller is functioning properly and is compatible with the RAC Connector.

CTGDKK020I Data Processor waiting for data...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKK021E Cannot parse the ConnectionTimeout parameter.

Explanation

An illegal value for the ConnectionTimeout parameter has been passed.

Action

The ConnectionTimeout value must be a positive number.

CTGDJG001I Connector will restart with restored change token: ''*change token*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJG002I Removing processed rows before ''*change token*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJG003I Removed *number of rows* processed rows.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJG004I Connector will wait for ''*seconds*'' seconds. First wait was at ''*number of seconds*'' seconds and last wait was at ''*number of seconds*'' seconds.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJG005I RDBMS Changelog Connector restarting with changeToken *change token*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJG006I RDBMS Changelog Connector restarting at point *restart point*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJG007E The 'Start at' parameter is set to an invalid value ''*parameter value*''.\n The parameter must be greater than 0 and less than *Integer*.

Explanation

The specified value for the "Start at" parameter is not valid. It should point to a valid numeric value for a record position to start the iteration at.

Action

Check the value of the parameter and try again.

CTGDJG008E The 'Start at' parameter is set to an invalid value ''*parameter value*''.\n The parameter must be greater than 0 and less than *Integer*.

Explanation

The specified value for the "Start at" parameter is not valid. It should point to a valid numeric value for a record position to start the iteration at.

Action

Check the value of the parameter and try again.

CTGDJG009E The 'Start at' parameter is set to an invalid value ''*parameter value*''.\n The parameter must be greater than 0 and less than *Integer*.

Explanation

The specified value for the "Start at" parameter is not valid. It should point to a valid numeric value for a record position to start the iteration at.

Action

Check the value of the parameter and try again.

CTGDJC001E The Function Component could not establish a connection to the host.

Explanation

A connection to the target machine is not possible because the hostname specified is not a valid hostname, or because of problems with the network.

Action

Verify that the specified hostname is valid and that the network connection to the target is active and then retry the connection.

CTGDJC002E The remote pathname specified could not be found.

Explanation

The specified remote file or directory does not exist or cannot be accessed.

Action

Verify that the path you specified exists and that it is accessible by remote operations with the proper ACLs.

CTGDJC003E An error occurred when reading from the local file

Explanation

The Function Component could not successfully read the specified file from the local filesystem.

Action

Verify that the local file specified exists and is readable.

CTGDJC004E Pathname cannot be removed.

Explanation

The Function Component could not remove the specified file or directory.

Action

Use the recursive flag on rmdir() to recursively remove directories, or use the force flag for files.

CTGDJC005E An error occurred when accessing the remote filesystem.

Explanation

The Function Component encountered an error when accessing the remote filesystem.

Action

Ensure that that the remote machine is available and can be remotely accessed.

CTGDJC006E A unique service name cannot be found on the target machine.

Explanation

An attempt was made to execute a command on a target machine, but a uniquely-named Windows service could not be created on the remote machine.

Action

All current service names are in use. Stop any unneeded services named trisvc# on the target machine.

CTGDJC007E The native Windows service binary cannot be read.

Explanation

The Function Component cannot find the native Windows binary, TRIsvc.exe, anywhere in the classpath.

Action

The trisvc.exe binary file, which is normally located in RemoteAccess.jar file packaged with the Function Component, cannot be located. Verify that the TRIsvc.exe file is in the JAR file.

CTGDJC008E RSH could not bind to any local privileged port.

Explanation

An rsh operation was attempted but failed because rsh could not bind to a privileged port.

Action

Ensure that the local machine has administrative privileges to open restricted ports.

CTGDJC009E Could not find the remote user RemoteUser.

Explanation

The specified remote username could not be found.

Action

Verify that the specified username exists on the target machine.

CTGDJC010E The specified username is not authorized to run shutdown.

Explanation

This exception is thrown when shutdown is attempted from a non-privileged account.

Action

To execute a command that shuts down the target machine, the username you have supplied must have the appropriate privileges.

CTGDJC011E An error occurred when executing the remote command.

Explanation

The remote command returned a non 0 return code, indicating a failure. This could be a permissions, syntax or path problem.

Action

Verify the remote command is in the current path, the user has permissions to execute the command, and that the command syntax is correct.

CTGDJC012E Unable to execute the command remotely since the Remote Command Line Function Component has not been initialized.

Explanation

An attempt to invoke the Function Component's perform() has occurred before the Function Component has been initialized. Therefore, the Function Component is not able to execute the remote command.

Action

Call the initialize method of the Function Component before attempting to call the perform method.

CTGDJC013E The Function Component can no longer be used as it has been terminated.

Explanation

The Function Component has been terminated. It cannot be used further once the terminate method has been called.

Action

Call the initialize method of the Function Component to prepare it for use. Do not call the terminate method until use of the Function Component is no longer required.

CTGDJC014E No command has been specified to execute. Provide a command on the IBM Security Directory Integrator GUI or as an attribute called 'command.line' in the provided Entry object.

Explanation

The Function Component must be configured with a command that is to be executed remotely. The command should be provided on the IBM Security Directory Integrator GUI or as an entry attribute called 'command.line'.

Action

Specify a command on the IBM Security Directory Integrator GUI or as an attribute called 'command.line' in the provided Entry object.

CTGDJC015E Not all parameters have been provided. Ensure you have provided a hostname and username. For an REXEC or Windows connection you will also need to provide a password. For an SSH connection you have the option of providing a password OR a keystore (with associated passphrase if applicable).

Explanation

Not all required properties have been configured for the Function Component.

Action

Ensure you have provided a hostname and username. For an REXEC or Windows connection you will also need to provide a password. For an SSH connection you have the option of providing a password OR a keystore (with associated passphrase if applicable).

CTGDJC016E The target machine's remote service could not be started.

Explanation

The Function Component could not start the native Windows service binary file (trisvc.exe) on the remote machine.

Action

Ensure that the trisvc.exe binary file has been copied to the target machine.

CTGDJC017E The following internal RXA error message was generated: {0}

Explanation

An error message was generated by the RXA toolkit when attempting to perform the requested operation.

Action

Respond appropriately to the generated RXA message.

CTGDJC018E An Entry object is expected.

Explanation

The object supplied to the perform method of the Remote Command Line Function Component should be of type Entry.

Action

Ensure that the object provided to the perform method is a IBM Security Directory Integrator Entry object.

CTGDJC019E An error occurred when reading the remote file.

Explanation

The Function Component could not successfully read the specified file from the target filesystem.

Action

Verify that the file named on the target exists and is readable.

CTGDJC020E The execution of the requested command has timed out.

Explanation

The timeout duration that you have configured expired before the remote command could be completed.

Action

Re-attempt the operation. If you do not want the remote command to have a time limit then set the timeout configuration field to 0, which will give the operation unlimited time to complete.

CTGDJC021E The specified standard input file does not exist.

Explanation

The path to the standard input file that has been configured for the Remote Command Line Function Component is not correct.

Action

Check the path to the standard input file on the local machine.

CTGDJC022E An invalid connection type has been specified. The valid values for the 'connectionType' parameter are: 'ANY', 'RSH', 'SSH', 'REXEC' and 'WIN'.

Explanation

The value for the 'connectionType' parameter should be one of the following: "ANY", "RSH", "SSH", "REXEC", "WIN".

Action

Verify that the 'connectionType' parameter has been set to an appropriate value. The valid values for this parameter are: "ANY", "RSH", "SSH", "REXEC", "WIN".

CTGDJC023E Could not establish a connection to the target machine with the authorization credentials that were provided.

Explanation

See message.

Action

Verify that the login name and password are valid for the target machine. Retry the connection.

CTGDJC024I An attribute called 'command.line' has been provided in the Input Entry. The value entered for 'command' provided on the configuration screen, ''*value*'', will be disregarded.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC025I Using the remote configuration option ''*option*'' = ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC026I About to remotely execute the command: ''*command*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC027I The command has been executed remotely.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC028I No connection exists.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC029I Starting Initalization of Function Component, ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC030I Finished initalization of Function Component, ''*class name*''. Initialized with value of: ''*boolean*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC031I Initalizing the Function Component parameters.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC032I Initalizing the Function Component option ''*name*'' = ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC033I Finding a suitable protocol to create a connection.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC034I Protocol chosen ''*protocal name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC035I A connection could not be established using the provided parameters. Check the values and try again.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC036I Initializing Function Component parameters done.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC037E A connection to the remote machine does not exist so the specified command cannot be executed.

Explanation

See message.

Action

Verify the provided configuration parameters and initialize the Function Component again before re-attempting to perform the remote execution.

CTGDJC038I Creating a connection using the ''*protocol name*'' protocol to host ''*host name*'' for user ''*user name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC039I Beginning the ''*session name*'' session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC040I Session started successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC041I A suitable protocol could not be found. No connection has been made.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC042I Creating a connection using the RSH protocol with the provided username on the specified host.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC043I Creating a connection using the SSH protocol with the provided username, keystore and passphrase on the specified host.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC044I The file ''*file name*'' could not be found.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC045I You have selected to use 'any' protocol, but no password has been provided. Therefore, only SSH or RSH connections will be attempted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC046I You have selected to use 'any' protocol, but no password or SSH keystore details have been provided. Therefore, only an RSH connection will be attempted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC047I The standard input destination directory on the target machine has been set to ''*directory name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC048I The specified standard input will be used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC049I Standard input has been appended to the specified command. The complete command that will be executed on the remote machine is: ''*command*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC050I The standard input file ''*file name*'' has been successfully transferred to the destination directory ''*directory name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC051I Removing the temporary directory: ''*directory name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC052I The value provided for the input Entry attribute, ''*attribute value*'', is not of the correct type. Therefore, this entry attribute will be disregarded. The value provided should be of type java.lang.String.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC053I A port number has been provided when attempting to create a Windows connection. It is not possible to specify a port number for this type of connection. Therefore, the supplied port will be disregarded.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJC054I Internal RXA Debug Message from RXA method *method name*: ''*message*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKH001E Exception occurred while trying to read property file: *exception*.

Explanation

Review the exception message for more information. This is an internal error.

Action

Contact IBM support.

CTGDJZ601E Rolling IdML Function Component accepts only a IBM Security Directory Integrator Entry as input.

Explanation

At the beginning of the Function Component's execution cycle the input data passed was not a IBM Security Directory Integrator Entry.

Action

Rolling IdML Function Component expects only a IBM Security Directory Integrator Entry as input. Check the AL logic and try again.

CTGDJZ602E Rolling IdML Function Component can be used only for IdML books stored as files (in-memory books are not allowed).

Explanation

This Function Component is used to roll the generated IdML file when a certain condition is met. Therefore, it is not applicable for in-memory IdML books.

Action

Either remove (disable) the Rolling IdML Function Component causing the problem, or change the type of the used IdML book to one stored as file (from the Open IdML Function Component).

CTGDJZ603I The book '*book name*' does not exist or is already closed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ604I The parameter *param name* was initialized with the value: '*value*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ605I Rolling IdML Function Component will work with book: '*book name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ606I The name of the currently used book '*book name*' has been overridden to '*new name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ607E Parameter '*param name*' is not provided.

Explanation

The specified parameter is needed by the Rolling IdML Function Component and must be provided.

Action

Provide a value for this parameter.

CTGDIK101E The SAP ABAP AS BOR Connector has failed to create an instance of the IBM Security Directory Integrator Function Component named ''*Function Component name*''. This failure may have been caused by incorrect installation of the Function Component or incorrect Function Component name.

Explanation

The SAP ABAP AS BOR Connector internally creates and uses an instance of the named Function Component to enable communication to the SAP ABAP AS system. The Connector was unable to create an instance of this Function Component.

Action

To correct this problem, ensure that the named Function Component has been correctly installed. Ensure the jar file containing the Function Component implementation is located in the jars/functions. Check that the SAP Java Connector has been correctly deployed.

CTGDIK102E An error has been detected while initializing the Function Component named ''*Function Component name*''.

Explanation

The SAP ABAP AS BOR Connector internally creates and uses an instance of the named Function Component to enable communication to the SAP ABAP AS system. Before using the function component, the Connector needs to call the initalize method of the Function Component. The Connector initializes the Function Component with the configuration parameter information defined for the Connector.

Action

Ensure that the configuration information defined for the Connector is correct. Check that the SAP Java Connector has been correctly deployed.

CTGDIK103E An XSL transformation has failed. Ensure that a valid XML value has been supplied for the 'sapXml' attribute. The source XSL file name is ''*file name*''.

Explanation

The XSL transformation defined in the named file has returned an empty XML result document.

Action

If the transform has been applied to an XML request document, check that the XML request value is correct.

CTGDIK105E The XSL files for the Connector's putEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode.

Explanation

The putEntry method is called by the AssemblyLine when a Connector has been deployed in AddOnly mode. The SAP User Connector requires XSL stylesheets to process RFC requests and responses executed against the target SAP system. In this case, the Connector was unable to read the required XSL stylesheets that it uses when deployed in AddOnly mode.

Action

Ensure the XSL stylesheet files associated with Add Mode StyleSheets configuration parameter are correct. Try specifying the fully qualified path name of the XSL stylesheets. Ensure the XSL stylesheets have read permissions set.

CTGDIK106E The XSL files for the Connectors' modEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode.

Explanation

The modEntry method is called by the AssemblyLine when a Connector has been deployed in Update mode. The SAP User Connector requires XSL stylesheets to process RFC requests and responses executed against the target SAP system. In this case, the Connector was unable to read the required XSL stylesheets that it uses when deployed in Update mode.

Action

Ensure the XSL stylesheet files associated with Update Mode StyleSheets configuration parameter are correct. Try specifying the fully qualified path name of the XSL stylesheets. Ensure the XSL stylesheets have read permissions set.

CTGDIK107E The XSL files for the Connectors' deleteEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode.

Explanation

The deleteEntry method is called by the AssemblyLine when a Connector has been deployed in Delete mode. The SAP User Connector requires XSL stylesheets to process RFC requests and responses executed against the target SAP system. In this case, the Connector was unable to read the required XSL stylesheets that it uses when deployed in Delete mode.

Action

Ensure the XSL stylesheet files associated with Delete Mode StyleSheets configuration parameter are correct. Try specifying the fully qualified path name of the XSL stylesheets. Ensure the XSL stylesheets have read permissions set.

CTGDIK108E The configured XSL file named ''*file name*'' does not exist.

Explanation

The Connector has attempted to read the named XSL stylesheet file. This file does not exist in the specified location on the file system.

Action

Ensure the XSL stylesheet file name is correct and exists. XSL stylesheet file names are specified using Connector parameters and differ based on the Connector mode.

CTGDIK109E The configured XSL file named ''*file name*'' is not a valid file. A possible cause of this error might be that the configured name is actually a directory.

Explanation

The Connector has attempted to read the named XSL stylesheet file. This file does not exist in the specified location on the file system or is not a valid file.

Action

Ensure the XSL stylesheet file name is correct and exists. XSL stylesheet file names are specified using Connector parameters and differ based on the Connector mode.

CTGDIK110E The configured XSL file named ''*file name*'' is not readable.

Explanation

The Connector has attempted to read the named XSL stylesheet file. This file is not readable.

Action

Ensure the file has read permissions set.

CTGDIK111E The configuration parameter named ''*parameter name*'' is missing

Explanation

The named Connector configuration parameter is missing.

Action

The configured Connector mode requires additional configuration of this parameter. Ensure these values have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. See the the IBM Security Directory Integrator Users Guide for specific details.

CTGDIK112E The Attribute named ''*file name*'' is not present, or does not have a value in the Entry supplied. This attribute must be present in the Connector entry.

Explanation

The named Connector configuration parameter is missing.

Action

Supply a value for the Connector configuration parameter. Refer to the IBM Security Directory Integrator Users Guide for details.

CTGDIK113W No search criteria have been defined for the Connectors' findEntry method. This method will return null to indicate no objects found.

Explanation

Link criteria are typically needed for Connectors in Update, Delete, and Lookup mode. The Link Criteria is used to obtain the current details of a given object instance in the target system.

Action

If the Connector is not behaving as expected, try specifying the Link Criteria. See the IBM Security Directory Integrator Users Guide for details.

CTGDIK114W An XSL transform was performed before calling an SAP RFC. The result of the XSL transform was an empty document. An empty transform result typically occurs when mandatory XPath or Parameters are missing. The RFC call will not be performed.

Explanation

See message.

Action

If the Connector is not behaving an expected, ensure the Connector entry contains the necessary attributes with associated XML values.

CTGDIK115W The XSL transform defined in file ''*file name*'' resulted in an empty XML document. An empty transform result typically occurs when mandatory XPath or Parameters are missing. The RFC call was not performed.

Explanation

See message.

Action

If the Connector is not behaving an expected, ensure the Connector entry contains the necessary attributes with associated XML values.

CTGDIK116W Some application level errors and warnings have been detected while creating the ABAP AS user. The operation may be incomplete.

Explanation

The Connector has received a response from the SAP system which indicates that some request data or application state might be incorrect. This status is typically indicated in the RFC parameter named RETURN.

Action

Ensure the target SAP system and target application are functioning correctly. Ensure the request data values mapped onto the Connector are valid with respect to SAP business logic.

CTGDIK117W Some application level errors and warnings have been detected while deleting the ABAP AS user. The operation may be incomplete.

Explanation

The Connector has received a response from the SAP system which indicates that some request data or application state might be incorrect. This status is typically indicated in the RFC parameter named RETURN.

Action

Ensure the target SAP system and target application are functioning correctly. Ensure the request data values mapped onto the Connector are valid with respect to SAP business logic.

CTGDIK118W Some application level errors and warnings have been detected while updating the ABAP AS user. The operation may be incomplete.

Explanation

The Connector has received a response from the SAP system which indicates that some request data or application state might be incorrect. This status is typically indicated in the RFC parameter named RETURN.

Action

Ensure the target SAP system and target application are functioning correctly. Ensure the request data values mapped onto the Connector are valid with respect to SAP business logic.

CTGDIK119E The Connector detected an exception during initialization. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK120E The Connector detected an exception while performing a schema query. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK121E The Connector detected an exception while adding an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK122E The Connector detected an exception while deleting an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK123E The Connector detected an exception while modifying an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK124E The Connector detected an exception while attempting to find an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK125E The Connector detected an exception while selecting entries in preparation for iterator mode processing. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK126E The Connector detected an exception while iterating through the known entries. The number of entries successfully processed before the exception was *number of entries*. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK127E No XSL style sheet files have been configured for the Connector running in ''*Connector mode*'' mode. This mode requires XSL style sheets to be defined. See the IBM Security Directory Integrator Users Guide for specific details.

Explanation

See message.

Action

Correct the Connector configuration parameters related to XSL stylesheet specifications.

CTGDIK128E Delete mode requires the attribute named 'sapXml' to present if no Link Criteria have been defined.

Explanation

When deleting an object instance from the target system, the Connector performs a lookup of the object attributes. Link Criteria are needed to find the given object instance.

Action

Specify the Link Criteria for the Connector.

CTGDIK129I Adding message to error list: ''*message*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK130I Adding message to warning list: ''*message*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK131I Extracting the return data from element named ''*tag name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK132I Creating AbapErrorInfo object: message=''*message*'', error number=''*error number*'', error flag=''*error flag*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK133I The XML element to return is a table style element: ''*boolean*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK134I The result of pre RFC XSL call is: ''*string*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK135I The result of RFC call is: ''*string*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK136I Executing function for XSL file:: ''*file*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK137I The findEntry method is returning the initialized entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK138I The findEntry method is returning null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK301I Started JCo IDoc Server and listening for requests.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK302E Unable to initialize the Connector. Exception occurred: *exception*

Explanation

See message.

Action

See the exception message for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK303E The ''*parameter name*'' parameter must be set to use the SAP IDocs Connector.

Explanation

A value is required for this RFC Connection parameter for either the RFC Server or RFC Client connection.

Action

Specify the required parameter in the Connector.

CTGDIK304I Optional RFC Connection parameter ''*parameter name*'' set with the value ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK305I Connector configuration parameter ''*parameter name*'' set with the value ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK306I Checking if TID Manager for TID ''*TID*'' is available for processing.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK307E No TID Manager found for TID ''*TID*''.

Explanation

The Connector IDoc Inbound queue has a key of the given transaction identifier but has not had a TID Manager object created.

Action

An internal error occurred. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK308I TID Manager for TID ''*TID*'' is available for processing.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK309W Provided poll time value is 0 or less. Single request will be processed only.

Explanation

The Connector will operate in standard Iterator mode. Only one IDoc request will be processed by the Connector. After all the IDocs have been place in the AssemblyLine as IBM Security Directory Integrator entries, the Connector will return null to exit Iterator mode.

Action

Check that this was an intentional action. If not the poll time must be greater then zero.

CTGDIK310I Polling for next the IDoc request in getNextEntry method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK311E Exception generated while polling.

Explanation

Unexpected error has occurred in Thread.sleep(pollTime).

Action

Restart the AssemblyLine of the Connector.

CTGDIK312E Null Entry found in the Entry list of the TID Manager for TID ''*TID*''.

Explanation

Unexpected error has occurred. Null entries should not be possible in a TID Manager.

Action

An internal error occurred. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK313W No TID provided with this RFM call. Manually removing the TID Manager to complete the TID Management cycle.

Explanation

An RFM request has been processed by the Connector, where no transaction identifier was provided.

Action

No response required. RFM Entry will be place on AL the same as is done for IDoc entries.

CTGDIK314I No Parser Attached to the Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK315I Finished processing TID Manager for TID ''*TID*'' . TID ready for confirmation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK316E The getNextEntry method returned null in Iterator mode with a valid poll time.

Explanation

The modified Iterator mode to act as a Server has failed. Exception has been thrown to prevent standard Iterator mode taking place.

Action

An internal error occurred. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK317W Entry contains no XML attributes to parse.

Explanation

An XML Parser has been attached but there are no XML valued attributes available.

Action

An internal error occurred. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK318I Attempting to parse XML content with attached Parser.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK319W The attached Parser returned a null Entry.

Explanation

A Parser has been attached but no entry with parsed attributes was produced.

Action

Check that an XML Parser was used, and that the parser was configured correctly.

CTGDIK320E Unable to parse the XML. Exception occurred: *exception*

Explanation

See message.

Action

See the exception message for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK321W Exception occurred while generating schema: *exception*

Explanation

See message.

Action

See the exception message for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK322E Unable to start the JCo IDoc Server.

Explanation

The Connector was not able to start the internal JCo IDoc Server.

Action

The problem may be caused by invalid Config parameters. Verify the Config parameters of the Connector are set properly. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK323I Polling for next IDoc request in getNextClient method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK324I The onCheckTID method was called for TID ''*TID*''. . TID Management already in progress for this TID.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK325I The onCheckTID method was called for TID ''*TID*''. TID Management beginning now for this TID. Next handleRequest method call will begin the inbound processing.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK326I TID Manager for TID ''*TID*'' is not yet confirmed. Current status is ''*status*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK327I TID Manager for TID ''*TID*'' is now confirmed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK328I The handleRequest method was invoked. Current TID value is ''*TID*'' . Incoming IDoc list request contains ''*number of IDocs*'' IDocs.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK329E Unable to convert IDoc request into a IBM Security Directory Integrator entry. The writeIDocToTDIEntry method returned null IDoc Entry.

Explanation

The functionality in the Connector that converts a JCoIDoc.Document object to a IBM Security Directory Integrator Entry object has failed.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK330E No value provided for current transaction identifier. This list of IDocs will not be processed.

Explanation

The Connector received a handleRequest method callback without a prior onCheckTID method call.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK331E Current TID ''*TID*'' already has a TID Manager and is being processed. Ignoring this request.

Explanation

The Connector received a second handleRequest method callback for a particular transaction identifier.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK332E No IDoc Entries available. Ignoring request for TID ''*TID*''.

Explanation

The Connector received a handleRequest method callback for a particular transaction identifier but no IDocs were contained in that request.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK333I Created TID Manager for TID ''*TID*'' with ''*number of IDoc entries*'' IDoc entries for processing.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK334E Unable to convert IDoc request into a IBM Security Directory Integrator entry. The Connector received a null JCoIDoc.Document object.

Explanation

The Connector encountered a null IDoc object.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK335I The handleRequest method was invoked. Current TID value is ''*TID value*''. Incoming RFM request is ''*RFM name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK336W No TID received with this RFM request. Defaulting for TID Management processing.

Explanation

The Connector has received a request that contains a SAP client Remote Function Call. No transaction identifier has been provided with the request so the Connector will use a dummy value for the purposes of TID Management.

Action

No response required.

CTGDIK337I RFM as XML: [''*TID*''].

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK338E Unable to convert RFM request into a IBM Security Directory Integrator entry. No RFMs provided in request.

Explanation

The Connector has received a request that should contain a SAP client Remote Function Call, but the Connector was not able to produce a IBM Security Directory Integrator Entry for the RFM.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK339E Unable to convert RFM request into a IBM Security Directory Integrator entry. The JCO.Function object received was null.

Explanation

The Connector has received a request that contained a null JCO.Function object. This should not happen a may indicate a problem in the JCo middleware or the Connector configuration.

Action

The problem may be an issue with the JCo middleware. Verify the JCo middleware is installed properly with all dependent libaries. Attempt to restart the

AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK340I Storing RFM request as XML file ''*file name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK341E Failed to read RFM request XML file ''*file name*'' into IBM Security Directory Integrator Entry. No contents found in file.

Explanation

The Connector stores RFM as a file that contains their XML form as part of RFM processing. This message indicates that no XML content was available from the file.

Action

An internal error occurred. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK342E Failed to process RFM XML file. Exception occurred: *exception*

Explanation

The Connector stores RFM as a file that contains their XML form as part of RFM processing. This message indicates an exception occurred while handling the file.

Action

See the exception message for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK343E An exception occurred. Exception trapped from JCo Server with Program ID of ''*Program ID*'': *exception*

Explanation

The Connector uses an exception listener to trap internal JCo exceptions. The exception message indicates the type of exception trapped.

Action

See the exception message from the JCo Server in the message for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK344E An error was encountered. An error message was trapped from JCo Server with Program ID of ''*Program ID*'': *error message*.

Explanation

The Connector uses an error message listener to trap internal JCo error messages when an error is encountered.

Action

See the error message from the JCo Server in the message for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK345I State Change occurred for JCo Server with Program ID of ''*Program ID*''. Previous State: ''*old state*'' New State: ''*new state*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK346I Trace message trapped from JCo Server. Trace Level: ''*trace level*'' Trace Message: ''*trace message*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK347W File was not able to be deleted: ''*file name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK348I Import parameter: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK349I The import parameter is a structure.

Explanation

No additional information is available for this message.

Action

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK368I Input is a structure. Structure records are as follows:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK201E Must call the initialize method first!

Explanation

An attempt to use an uninitialized Function Component has been detected. This error may occur if the initialize method has not be successfully called before calling other Function Component methods. This may also occur if a Function Component method has been called after calling terminate.

Action

Correct the calling code so that initialize method has been successfully called before calling other Function Component methods.

CTGDIK202E Entry Attribute ''*attribute name*'' missing value.

Explanation

A mandatory attribute is missing or is missing a value.

Action

Correct the AssemblyLine mapping or client code so that the named attribute has a value.

CTGDIK203E Entry Attribute ''*attribute name*'' missing value or value does not match expected type. Expected type: ''*document type*''.

Explanation

A mandatory attribute is missing or is missing a value of the correct type.

Action

Correct the AssemblyLine mapping or client code so that the named attribute has a value and its type is as expected. See Users Guide for details.

CTGDIK204E Entry attribute ''*attribute name*'' must be one of 'xmlDomDocument', 'xmlString', or 'multiValuedAttributes'.

Explanation

See message.

Action

Correct the AssemblyLine mapping or client code.

CTGDIK205E Entry object expected.

Explanation

The object type passed the Function Components perform method was not a IBM Security Directory Integrator Entry.

Action

Correct the client code.

CTGDIK206E Must call initialize() first.

Explanation

An attempt has been made to use an uninitialized Function Component.

Action

Correct the client code. Ensure the initialize method is called before using the Function Component. Ensure the Function Component is not use after calling its terminate method.

CTGDIK207E Function cannot be reused once terminate() has been called.

Explanation

An attempt has been made to use the Function Component after its terminate method has been called.

Action

Correct the client code. Ensure the initialize method is called before using the Function Component. Ensure the Function Component is not use after calling its terminate method.

CTGDIK208E ''*class name*'' != ''*class name*''.

Explanation

The classname does not match the expected classname.

Action

Correct the AssemblyLine attribute mapping or client code.

CTGDIK209E Mandatory RFC parameter named ''*field name*'' has not been supplied.

Explanation

RFC modules in SAP often define mandatory import and table parameters. The parameters must be present when calling the RFC.

Action

For the RFC being called, use transaction SE37 in the target SAP system to determine the mandatory RFC parameters. Correct the AssemblyLine attribute mapping or client code.

CTGDIK210E Length of supplied value for field ''*field name*'' exceeds maximum length ''*field length*''.

Explanation

The length of the value supplied for the named RFC parameters or table parameter field exceeds the maximum length defined by the RFC in the target SAP system.

Action

For the RFC being called, use transaction SE37 in the target SAP system to determine the length of the given RFC parameter or table parameter field. Correct the AssemblyLine attribute mapping or client code.

CTGDIK211E ''*class name*'' does not equal ''*class name*''.

Explanation

The classname does not match the expected classname.

Action

Correct the AssemblyLine attribute mapping or client code.

CTGDIK212E Mandatory RFC parameter named ''*field name*'' has not been supplied.

Explanation

RFC modules in SAP often define mandatory import and table parameters. The parameters must be present when calling the RFC.

Action

For the RFC being called, use transaction SE37 in the target SAP system to determine the mandatory RFC parameters. Correct the AssemblyLine attribute mapping or client code.

CTGDIK213E No such function named ''*function name*''.

Explanation

The entry attributes and values represent an RFC request for an RFC module that does not exist in the target SAP system, or has not been released.

Action

Ensure the RFC exists on the target SAP system. Ensure the RFC name is correctly specified in the entry.

CTGDIK214E The remove method is not implemented.

Explanation

See message.

Action

See the Users Guide.

CTGDIK215E The Function Component detected an exception while attempting to disconnect. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure the network between the Function Component and SAP is available.

CTGDIK216E Connection pool ''*pool name*'' already exists. The message is: ''*exception*''.

Explanation

See message.

Action

Restart the AssemblyLine.

CTGDIK217E No more connections available in ''*pool name*''. The message is: ''*exception*''.

Explanation

See message.

Action

Restart the AssemblyLine.

CTGDIK218E Unable to establish a connection using ''*pool name*''. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure the network is available. Ensure the target SAP system is available.

CTGDIK219E Unable to execute RFC ''*function name*''. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure the RFC on the target SAP system is functioning correctly.

CTGDIK220E Communication error with SAP ABAP Application Server. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure the network is available. Ensure the target SAP system is available.

CTGDIK221W Trouble invoking ''*function name*''. The function has been retried apos;'*number of retries*'' times.

Explanation

See message.

Action

Ensure the network is available. Ensure the target SAP system is available.

CTGDIK222E Trouble invoking ''*function name*''. The function has been retried apos;'*number of retries*'' times. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure the network is available. Ensure the target SAP system is available.

CTGDIK223E Unable to create DOM parser. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure IBM Security Directory Integrator has been correctly installed.

CTGDIK224E Unable to parse DOM parser. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure IBM Security Directory Integrator has been correctly installed.

CTGDIK225E Unable to read DOM parser. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure Security Directory Integrator has been correctly installed.

CTGDIK226E Failed to prepare parameters for RFC. The message is: ''*exception*''.

Explanation

See message.

Action

Ensure the AssemblyLine attribute mapping or client code has correctly initialized the entry for the Function Component.

CTGDIK227I Executing function for XSL file:: ''*file*''. Multiple elements with name ''*element name*'' are present in the structure type. Using the element in first position following the preorder traversal.

CTGDIK001E The SAP ABAP Application Server User Registry Connector failed to create an instance of the Security Directory Integrator Function Component ''*Function Component Name*''. This failure may have been caused by incorrect installation of the Function Component or an incorrect Function Component name.

Explanation

The SAP ABAP Application Server User Registry Connector internally creates and uses an instance of the named Function Component to enable communication to the SAP ABAP AS system. The Connector was unable to create an instance of this Function Component.

Action

To correct this problem, ensure that the named Function Component has been correctly installed. Ensure the jar file containing the Function Component implementation is located in the jars/functions. Check that the SAP Java Connector has been correctly deployed.

CTGDIK002E An error has been detected while initializing the Function Component ''*Function Component name*''.

Explanation

The SAP ABAP Application Server User Registry Connector internally creates and uses an instance of the named Function Component to enable communication to the SAP ABAP AS system. Before using the Function Component, the Connector needs to call the initialize method of the Function Component. The Connector initializes the Function Component with the configuration parameter information defined for the Connector.

Action

Ensure that the configuration information defined for the Connector is correct. Check that the SAP Java Connector has been correctly deployed.

CTGDIK003E An XSL transformation has failed. Ensure that a valid XML value has been supplied for the 'sapUserXml' attribute. The source XSL file name is ''*file name*''.

Explanation

The XSL transformation defined in the named file has returned an empty XML result document.

Action

If the transform has been applied to an XML request document, check that the XML request value is correct.

CTGDIK005E The XSL files for the Connectors' putEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode.

Explanation

The putEntry method is called by the AssemblyLine when a Connector has been deployed in AddOnly mode. The SAP User Connector requires XSL stylesheets to process RFC requests responses executed against the target SAP system. In this case, the Connector was unable to read the required XSL stylesheets that it uses when deployed in AddOnly mode.

Action

Ensure the XSL stylesheet files associated with Add Mode StyleSheets configuration parameter are correct. Try specifying the fully qualified path name of the XSL stylesheets. Ensure the XSL stylesheets have read permissions set.

CTGDIK006E The XSL files for the Connectors' modEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode.

Explanation

The modEntry method is called by the AssemblyLine when a Connector has been deployed in Update mode. The SAP User Connector requires XSL stylesheets to process RFC requests responses executed against the target SAP system. In this case, the Connector was unable to read the required XSL stylesheets that it uses when deployed in Update mode.

Action

Ensure the XSL stylesheet files associated with Update Mode StyleSheets configuration parameter are correct. Try specifying the fully qualified path name of the XSL stylesheets. Ensure the XSL stylesheets have read permissions set.

CTGDIK007E The XSL files for the Connectors' deleteEntry method have not been configured. Ensure these files have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode.

Explanation

The deleteEntry method is called by the AssemblyLine when a Connector has been deployed in Delete mode. The SAP User Connector requires XSL stylesheets to process RFC requests responses executed against the target SAP system. In this case, the Connector was unable to read the required XSL stylesheets that it uses when deployed in Delete mode.

Action

Ensure the XSL stylesheet files associated with Delete Mode StyleSheets configuration parameter are correct. Try specifying the fully qualified path name of the XSL stylesheets. Ensure the XSL stylesheets have read permissions set.

CTGDIK008E The configured XSL file named ''*file name*'' does not exist.

Explanation

The Connector has attempted to read the named XSL stylesheet file. This file does not exist in the specified location on the file system.

Action

Ensure the XSL stylesheet file name is correct and exists. XSL stylesheet file names are specified using Connector parameters and differ based on the Connector mode.

CTGDIK009E The configured XSL file named ''*file name*'' is not a valid file. A possible cause of this error might be that the configured name is actually a directory.

Explanation

The Connector has attempted to read the named XSL stylesheet file. This file does not exist in the specified location on the file system or is not a valid file.

Action

Ensure the XSL stylesheet file name is correct and exists. XSL stylesheet file names are specified using Connector parameters and differ based on the Connector mode.

CTGDIK010E The configured XSL file named ''*file name*'' is not readable.

Explanation

The Connector has attempted to read the named XSL stylesheet file. This file is not readable.

Action

Ensure the file has read permissions set.

CTGDIK011E The configuration parameter named ''*file name*'' is missing. The configured Connector mode requires additonal configuration of this parameter. Ensure these values have been configured. If this error continues, try removing and adding the Connector to the AssemblyLine in the correct mode. See the IBM Security Directory Integrator Users Guide for specific details.

Explanation

The named Connector configuration parameter is missing.

Action

Supply a value for the Connector configuration parameter. Refer to the IBM Security Directory Integrator Users Guide for details.

CTGDIK012E The Attribute named ''*attribute name*'' is not present, or does not have a value, in the Entry supplied. This attribute must be present in the Connector entry.

Explanation

See message.

Action

Modify the Connector attribute mappings or client code. See the IBM Security Directory Integrator Users Guide for details regarding supported Connector attributes and values.

CTGDIK013W No search criteria have been defined for the Connectors'' findEntry method. This method will return null to indicate no objects found.

Explanation

Link criteria a typically needed for Connectors in Update, Delete, and Lookup mode. The Link Criteria is used to obtain the current details of a given object instance in the target system.

Action

If the Connector is not behaving as expected, try specifying the Link Criteria. See the IBM Security Directory Integrator Users Guide for details.

CTGDIK014W An XSL transform was performed before calling an SAP RFC. The result of the XSL transform was an empty document. An empty transform result typically occurs when mandatory XPath or Parameters are missing; for example, sapUserName. The RFC call will not be performed.

Explanation

See message.

Action

If the Connector is not behaving an expected, ensure the Connector entry contains the necessary attributes with associated XML values.

CTGDIK015W The XSL transform defined in file ''*file name*'' resulted in an empty XML document. An empty transform result typically occurs when mandatory XPath or Parameters are missing, e.g. sapUserName. The RFC call was not performed.

Explanation

See message.

Action

If the Connector is not behaving an expected, ensure the Connector entry contains the necessary attributes with associated XML values.

CTGDIK016W Some application level errors and warnings have been detected while creating the SAP ABAP AS user. The operation may be incomplete.

Explanation

The Connector has received a response from the SAP system which indicates that some request data or application state might be incorrect. This status is typically indicated in the RFC parameter named RETURN.

Action

Ensure the target SAP system and target application are functioning correctly. Ensure the request data values mapped onto the Connector are valid with respect to SAP business logic.

CTGDIK017W Some application level errors and warnings have been detected while deleting the SAP ABAP AS user. The operation may be incomplete.

Explanation

The Connector has received a response from the SAP system which indicates that some request data or application state might be incorrect. This status is typically

indicated in the RFC parameter named RETURN.

Action

Ensure the target SAP system and target application are functioning correctly. Ensure the request data values mapped onto the Connector are valid with respect to SAP business logic.

CTGDIK018W Some application level errors and warnings have been detected while updating the SAP ABAP AS user. The operation may be incomplete.

Explanation

The Connector has received a response from the SAP system which indicates that some request data or application state might be incorrect. This status is typically indicated in the RFC parameter named RETURN.

Action

Ensure the target SAP system and target application are functioning correctly. Ensure the request data values mapped onto the Connector are valid with respect to SAP business logic.

CTGDIK019E The Connector detected an exception during initialization. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK020E The Connector detected an exception while performing a schema query. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK021E The Connector detected an exception while adding an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK022E The Connector detected an exception while deleting an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK023E The Connector detected an exception while modifying an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK024E The Connector detected an exception while attempting to find an entry. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK025E The Connector detected an exception while selecting entries in preparation for iterator mode processing. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK026E The Connector detected an exception while iterating through the known entries. The number of entries successfully processed before the exception was *number of entries*. The message is: ''*exception*''.

Explanation

See message.

Action

See exception stack trace. Check for earlier errors or warnings in the log.

CTGDIK027E No XSL style sheet files have been configured for the Connector running in ''*Connector mode*'' mode. This mode requires XSL style sheets to be defined. See the IBM Security Directory Integrator Users Guide for specific details.

Explanation

See message.

Action

Correct the Connector configuration parameters related to XSL stylesheet specifications.

CTGDIK028I The findEntry method is returning null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK029I The findEntry method is returning the initialized entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK030I The findEntry method is returning null.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK031I Adding message to error list: ''*message*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK032I Adding message to warning list: ''*message*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK033I Extracting the return data from element named ''*tag name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK034I Creating AbapErrorInfo object: message=''*message*'', error number=''*error number*'', error flag=''*error flag*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK035I The XML element to return is a table style element: ''*boolean*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK036I The result of pre RFC XSL call is: ''*string*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK037I The result of RFC call is: ''*string*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK038I Executing function for XSL file: ''*file*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDII201E The SCIM server URL is not specified.

Explanation

The required parameter for SCIM server URL (ServerURL) is not specified in the SCIM Connector.

Action

Specify the SCIM server URL parameter in the connector.

CTGDII202E The SCIM resource endpoint is not specified.

Explanation

The resource endpoint parameter is not specified in the SCIM connector, and the provided entry does not have an endpoint attribute.

Action

Specify the resource endpoint parameter in the connector, or use an endpoint attribute in the conn entry.

CTGDII203E The ID attribute is missing in the conn entry.

Explanation

The provided conn entry does not contain an ID attribute. The ID attribute is required for the attempted operation.

Action

Specify an ID attribute in the conn entry.

CTGDII204E Unsupported operator in link criteria.

Explanation

The link criteria should only use operators that can be used in a SCIM filter.

Action

Use another operator in the link criteria.

CTGDIR001W Unable to load script libraries. The Script Connector has no associated MetamergeConfig object.

Explanation

The current configuration for this Connector is not an instance of BaseConfiguration object.

Action

No action is required.

CTGDIR002E Operation 'selectEntries' failed in Script Connector: ''*error message*''.

Explanation

The method 'selectEntries' returns an exit code error.

Action

Check the method 'selectEntries' in the Script Connector.

CTGDIR003E Operation 'getNextEntry' failed in Script Connector: ''*error message*''.

Explanation

The method 'getNextEntry' returns an exit code error.

Action

Check the method 'getNextEntry' in the Script Connector.

CTGDIR004E Operation 'modEntry' failed in Script Connector: ''*error message*''.

Explanation

The method 'modEntry' returns an exit code error.

Action

Check the method 'modEntry' in the Script Connector.

CTGDIR005E Operation 'deleteEntry' failed in Script Connector: ''*error message*''.

Explanation

The method 'deleteEntry' returns an exit code error.

Action

Check the method 'deleteEntry' in the Script Connector.

CTGDIR006E Operation 'findEntry' failed in Script Connector: ''*error message*''.

Explanation

The method 'findEntry' returns an exit code error.

Action

Check the method 'findEntry' in the Script Connector.

CTGDIR007E Operation 'putEntry' failed in Script Connector: ''*error message*''.

Explanation

The method 'putEntry' returns an exit code error.

Action

Check the method 'putEntry' in the Script Connector.

CTGDIR008E Operation 'queryReply' failed in Script Connector: ''*error message*''.

Explanation

The method 'queryReply' returns an exit code error.

Action

Check the method 'queryReply' in the Script Connector.

CTGDIR009E Operation 'querySchema' failed in Script Connector: ''*error message*''.

Explanation

The method 'querySchema' returns an exit code error.

Action

Check the method 'querySchema' in the Script Connector.

CTGDIR010I Script Connector configured to execute script: *script*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIR011I The Script Connector will keep its global state.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJT101E The Scripted FC failed because the getUI method returned an unknown GUI object type: ''*object type*''.

Explanation

The function getUI returned GUI object not instance of Component.

Action

Check the function 'getUI(fc)' of the ScriptedFC.

CTGDJT001I Declaring the user functions.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJT002I Declaring my configuration.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJT003I Declaring the input and output streams.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJT004I Executing the following script: ''*script*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJT005E Required Connector parameter 'script' is not set.

Explanation

The specified Connector parameter script is required, but not set.

Action

Set the Connector parameter script.

CTGDJT006W Unable to load script libraries. The Script Connector has no associated MetamergeConfig object.

Explanation

See message.

Action

Verify script libraries can be accessed and loaded.

CTGDJT007E Script Parser encountered error while reading entry: ''*error*''

Explanation

See message.

Action

Check the script. There is an error in the script, because exitcode status is not OK.

CTGDJT008E Script Parser encountered error while writing entry: ''*error*''

Explanation

There is an error in the script, because exitcode status is not OK.

Action

Check the script.

CTGDJT009E Script Parser encountered error while querying schema: ''*error*''

Explanation

There is an error in the script, because exitcode status is not OK.

Action

Check the script.

CTGDIF001E The perform method of the Function Component was not passed an object of type com.ibm.di.entry.Entry. This object is not a valid parameter to pass to perform method.

Explanation

A parameter of type different from com.ibm.di.entry.Entry was passes to the perform method.

Action

Verify that the parameter being manually passed to the perform method of Function Component (for example from a Script Component) is an object of type com.ibm.di.entry.Entry.

CTGDIF002E The Entry Attribute ''*attribute name*'' is not present in the Entry.

Explanation

The required Entry Attribute is not present in the IBM Security Directory Integrator Entry.

Action

Verfiy the specified Entry Attribute is properly mapped to the connection Entry.

CTGDIF003E The required Function Component parameter ''*parameter name*'' is not set.

Explanation

The specified required Function Component parameter is not set.

Action

Set the specified Function Component parameter.

CTGDIF004E The following Function Component parameter was not set or its corresponding Entry Attribute was not mapped: ''*parameter name*''.

Explanation

See message.

Action

Set the specified Function Component parameter or make sure the corresponding Entry Attribute is mapped.

CTGDIF005I The parameter *parameter name* was initialized with the value: ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD001E Unable to read custom script from file: *property*.

Explanation

See message.

Action

Check access to the custom script file.

CTGDKD002E Invalid value specified for 'api.remote.naming.port': ''*parameter value*''.

Explanation

The naming port must be a number, in the range 1..65535.

Action

Check the property 'api.remote.naming.port' in the global.properties file, and assign it a proper value.

CTGDKD003I Will use default value for 'api.remote.naming.port': ''*port*''.

Explanation

The naming port is not defined in the global.properties file, and a default value is used.

Action

Check the property 'api.remote.naming.port' in the global.properties file, and assign it a proper value.

CTGDKD004E Could not create RMI custom socket factories. Exception occurred: *exception*

Explanation

Review the exception to find further details on the error.

Action

Check the SSL properties in the global.properties file.

CTGDKD005E Could not get localhost IP address.

Explanation

No IP address for the host could be found.

Action

Review the exception to find further details on the error.

CTGDKD006E Server API not initialized.

Explanation

Review the previous exception to find further details on the error.

Action

No action is required.

CTGDKD007I Secure RMI socket factories created successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD008I Remote Session Factory object bound to name 'SessionFactory'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD009E Could not create SessionFactory. Exception occurred: *exception*

Explanation

Could not initialize the Server API for remote access. Could not create an instance of the factory that is used to access the Server API.

Action

Review the exception to find further details on the error.

CTGDKD010E Could not bind RemoteSessionFactory.

Explanation

See message.

Action

Check the remote session factory name.

CTGDKD011E Unable to get TombstonesConfig. Exception occurred: *exception*

Explanation

Review the exception to find further details on the error.

Action

Check the configuration file.

CTGDKD012I RMI Registry started on port: *port number*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD013I Successfully connected to RMI Registry: *existing registry*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD019E Could not create RMI Registry:

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDKD020E Server cryptography is already initialized.

Explanation

This is an internal error.

Action

Contact IBM support.

CTGDKD021E LDAP Authentication initialization error.

Explanation

Exception caught on initialization of the LDAP Authenticator.

Action

No action is required.

CTGDKD022E LDAP Authentication initialization error: *exception*

Explanation

Exception caught on initialization of the LDAP Authenticator.

Action

Review the exception to find further details on the error.

CTGDKD023I Remote API Engine successfully initialized. SSL and Client Authentication are enabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD024I Remote API successfully started on port:*port*, bound to:'SessionFactory'. SSL and Client Authentication are enabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD025E Unable to initialize ScriptEngine:

Explanation

The APIAuthenticator constructor could not initialize ScriptEngine.

Action

Review the exception to find further details on the error.

CTGDKD026E Custom authentication is disabled.

Explanation

See message.

Action

Verify the property 'api.custom.authentication' in the global.properties file.

CTGDKD027E Script error:

Explanation

Review the exception to find further details on the error.

Action

Check the custom script provided.

CTGDKD028I Authentication failed for user: *username*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD029E Missing configuration property: api.config.folder.

Explanation

See message.

Action

Check the property 'api.config.folder' in the global.properties file.

CTGDKD030E Unable to get canonical path of the 'api.config.folder' property value: *path*. Exception occurred: *exception*.

Explanation

An IOException was encountered while getting canonical path.

Action

Check the property api.config.folder in the global.properties file and ensure the file path is correct.

CTGDKD031E Invalid value specified for 'api.config.lock.timeout': ''*paramater value*''. Exception occurred: *exception*

Explanation

An NumberFormatException was encountered while parsing string to int.

Action

Check the property 'api.config.lock.timeout' in the global.properties file.

CTGDKD032I Will use default value for 'api.config.lock.timeout': *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD034E Invalid folder path: ''*path*''.

Explanation

The path is a file.

Action

Check the property 'api.config.folder' in the global.properties file.

CTGDKD035E Invalid folder path: ''*path*''

Explanation

The path is a file.

Action

Check the property 'api.config.folder' in the global.properties file.

CTGDKD036E Configuration ''*path*'' is already checked out.

Explanation

See message.

Action

Check in the configuration first.

CTGDKD037E Configuration ''*path*'' is password protected.

Explanation

An PasswordException is encountered while loading configuration.

Action

Provide password for the configuration.

CTGDKD038E Error while loading configuration ''*path*''.

Explanation

An Exception is encountered while loading configuration.

Action

Review the exception to find further details on the error.

CTGDKD039E Configuration ''*path*'' is already checked out.

Explanation

See message.

Action

Check in the configuration first.

CTGDKD041E Configuration ''*path*'' is not checked out.

Explanation

The reason for exception might be timeout expired.

Action

Check the configuration first.

CTGDKD042E Configuration ''*path*'' is not checked out.

Explanation

The reason for exception might be timeout expired.

Action

Check out the configuration first.

CTGDKD043E Configuration file ''*path*'' already exists.

Explanation

See message.

Action

Give other name of configuration or confirm overwriting.

CTGDKD044E Configuration ''*path*'' is already checked out.

Explanation

See message.

Action

Check in the configuration first.

CTGDKD045E Could not load configuration ''*path*''.

Explanation

An Exception is encountered while loading configuration.

Action

Review the exception to find further details on the error.

CTGDKD046E recurseDirs: Invalid folder path: ''*directory*''.

Explanation

The path must be a valid directory.

Action

Check the folder path.

CTGDKD047E Internal error: NULL user ID in configuration registry for ''*path*''.

Explanation

See message.

Action

Check the name of the configuration.

CTGDKD048I The Config ''*file path*'' was locked by the user ''*user ID*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD049I The Config ''*file path*'' lock was released.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD050I The Config ''*file path*'' lock time was reset.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD051E Unable to save the Config because the configuration path ''*file path*'' could not be set.

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDKD052E Unable to save the Config ''*file path*''.

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDKD053E Unable to save the Config ''*file path*'' because the Config is not committable.

Explanation

See message.

Action

No action is required.

CTGDKD054I Stopped Config instance ''*file path*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD055E Unable to stop Config instance ''*file path*''. The Config instance was not found.

Explanation

See message.

Action

No action is required.

CTGDKD056I Reloaded Config instance ''*file path*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD057E Unable to reload Config instance ''*file path*''. An exception was encountered: *exception*

Explanation

See message.

Action

No action is required.

CTGDKD058E Unable to reload Config instance ''*file path*''. The Config instance was not found.

Explanation

See message.

Action

No action is required.

CTGDKD059E Automatic unlock thread of the configuration registry was interupted. An exception was encountered: *exception*

Explanation

See message.

Action

No action is required.

CTGDKD060E Automatic unlock thread of the configuration registry encountered a fatal exception: *exception*

Explanation

See message.

Action

No action is required.

CTGDKD061E Automatic unlock thread of the configuration registry could not stop Config instance ''*Config instance ID*''. An exception was encountered: *exception*

Explanation

See message.

Action

No action is required.

CTGDKD062I The Config instance ''*Config instance ID*'' was automatically unlocked.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD063E Absolute path provided : *path* expecting relative.

Explanation

See message.

Action

No action is required.

CTGDKD065E Path provided : *path* is not allowed.

Explanation

See message.

Action

Provide a relative path.

CTGDKD066E Config Instance is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD067E Config Instance is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD068E AssemblyLine is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD069E Config Instance for AssemblyLine ''*AssemblyLine*'' not registered.

Explanation

See message.

Action

No action is required.

CTGDKD070E AssemblyLine is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD071E On AL terminate: Config Instance for AssemblyLine ''*AssemblyLine*'' not registered.

Explanation

See message.

Action

No action is required.

CTGDKD072E EventHandler is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD073E Config Instance for EventHandler ''*EventHandler*'' not registered.

Explanation

See message.

Action

No action is required.

CTGDKD074E EventHandler is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD075E On EventHandler terminate: Config Instance for EventHandler ''*EventHandler*'' not registered.

Explanation

See message.

Action

No action is required.

CTGDKD076E Trigger is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD077E Config Instance for Trigger ''*trigger name*'' not registered.

Explanation

See message.

Action

No action is required.

CTGDKD078E Trigger is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD079E On EH terminate: Config Instance for Trigger ''*trigger name*'' not registered.

Explanation

See message.

Action

No action is required.

CTGDKD080E Listener object is NULL.

Explanation

See message.

Action

No action is required.

CTGDKD081E Error on handleEvent method: *exception*

Explanation

See message.

Action

No action is required.

CTGDKD082E Error on handleEvent method: *exception*

Explanation

See message.

Action

No action is required.

CTGDKD083E Event type is NULL.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDKD084I Not authorized to perform this operation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD085E Username is null. Authentication failed.

Explanation

See message.

Action

Provide a valid username.

CTGDKD086E Password is null. Authentication failed.

Explanation

See message.

Action

Provide a valid password.

CTGDKD087I Performing search for full DN for ''*username*'' with filter: *filter*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD088I Using LDAP SSL connection.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD089E Authentication failed for ''*username*''. Exception occurred: *exception*

Explanation

See message.

Action

Provide a valid username and password.

CTGDKD090I LDAP Authentication succeeded for ''*username*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD097E Error while creating search context: *exception*

Explanation

There are some possible reasons: the settings in the configuration file as well as the LDAP server could not be running.

Action

Check the settings in the configuration file and whether the LDAP server is running.

CTGDKD098E More than one search result found. Authentication failed for ''*username*''.

Explanation

See message.

Action

Provide unique username.

CTGDKD099E Full DN not found. Authentication failed for ''*username*''.

Explanation

See message.

Action

Provide valid username.

CTGDKD100E Missing property ''*property*''.

Explanation

The LDAP Host name is not set.

Action

Check the settings in the configuration file.

CTGDKD101E Missing property ''*property*''.

Explanation

See message.

Action

Ensure the port and other settings are correct.

CTGDKD102E Unable to create search context.

Explanation

See message.

Action

Check the settings in the configuration file.

CTGDKD103E AuthenticationException: Unable to parse ErrorCode : *error code*

Explanation

See message.

Action

No action is required.

CTGDKD104I User not authenticated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD105I Configuration already exists.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

Action

No action is required.

CTGDKD309E SSL client authentication is disabled.

Explanation

When connecting to a remote IBM Security Directory Integrator Server over SSL, either SSL Client authentication or LDAP/Custom Authentication must be used. Connections using the createSession() API will not succeed because the server has SSL client authentication disabled.

Action

Verify the authentication mechanism configured for the server and enable it in the client before attempting to create another session with the server. Try using the createSession(username,password) API which uses LDAP/Custom Autentication. Refer to the Security related chapters in the IBM Security Directory Integrator Installation and Administrator Guide for more information.

CTGDKD310E Unable to get userId.

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD435I Remote API successfully started on port:*port*, bound to:'SessionFactory'. SSL and Client Authentication are disabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD436E The desired custom class can not be found.

Explanation

See message.

Action

Pass a valid class name.

CTGDKD437E The desired custom method can not be found.

Explanation

See message.

Action

Pass a valid method name.

CTGDKD438E Exception occured in the invoked custom method.

Explanation

See message.

Action

No action is required.

CTGDKD439E Method does not have access to the definition of the specified custom class.

Explanation

See message.

Action

No action is required.

CTGDKD440E This method does not support invocations of methods with null value parameters.

Explanation

See message.

Action

Use the other invokeCustom method.

CTGDKD441E The custom method invocation is not turned on.

Explanation

See message.

Action

Turn on custom method invocation from global.properties file. Change api.custom.method.invoke.on property to true.

CTGDKD442E No classes are allowed for custom invocation.

Explanation

See message.

Action

Allow invocation of custom classes from global.properties file. Change api.custom.method.invoke.allowed.classes property.

CTGDKD443E The desired class is not allowed for invocation: *class name*.

Explanation

See message.

Action

Allow invocation of the class from global.properties file. Change api.custom.method.invoke.allowed.classes property.

CTGDKD444I Allowed classes for custom invocation: *class names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD445I Custom method invocation is set to *boolean value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD446I Usage: -input <input file> -output <output file> -mode <*operation mode*|*operation mode*|*operation mode*|*operation mode*> -keystore <keystore file> -storepass <keystore password> -alias <encryption key alias> [-keypass <key password>] [-transformation <encryption transformation>] [-storetype <keystore type>] [-cryptoproviderclass <security provider used for encryption>]

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD447E The provided file is not an encrypted IBM Security Directory Integrator Config file.

Explanation

The IBM Security Directory Integrator Config file signature is either missing or corrupted.

Action

Ensure the provided file is a valid encrypted IBM Security Directory Integrator config file.

CTGDKD458E Error on retrieving tombstone records:

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDKD459W The Solution Name '*Solution Name*' of the configuration '*file name*' is not a valid file name. The configuration instance id and Solution Name will be changed to: '*Solution Name*'.

Explanation

When a configuration has a defined Solution Name, the name used as the configuration instance id by the IBM Security Directory Integrator Server. The configuration id is used to store certain artifacts, such as system logs, on the file system of the IBM Security Directory Integrator Server. The Solution Name in the configuration file was not valid file name. The IBM Security Directory Integrator Server has modified the Solution Name internally so that it can be used as a configuration id.

Action

Provide a valid Solution Name in the configuration file.

CTGDKD461I The Configuration Registry parsed file '*file name*' and found Solution Name '*name*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD462E Solution Name '*Solution Name*' is already in use by configuration '*file name*'.

Explanation

No two configurations are allowed to have the same Solution Name within the same IBM Security Directory Integrator Server.

Action

Ensure that no two configurations have the same Solution Names.

CTGDKD463W The IBM Security Directory Integrator Server detected the Solution Name '*Solution Name*' from a client in the token '*token name*'.

Explanation

The Server encountered a client utility that prefixes the Solution Names with the path of the configuration folder.

Action

No response is necessary.

CTGDKD464E Solution Name '*name*' of configuration '*file name*' coincides with the name of file '*file name*'.

Explanation

For security reasons, Solution Names are not allowed to coincide with names of existing files.

Action

Ensure the Solution Name of the configuration is not the same as the path of an existing file.

CTGDKD465W Password protected configuration detected in file ' *file name*'. The configuration will be only be accessible through its file name.

Explanation

The Server API is unable to extract Solution Names for password protected configurations present in the configuration codebase folder.

Action

No response is necessary.

CTGDKD466I Unable to parse the file '*file name*'. The file will not be processed and will not be added as a valid configuration.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD467W Password protected configuration detected '*name*'. The Solution Name will be ignored and may already be used by another configuration.

Explanation

The Server API is unable to extract Solution Names for password protected configurations present in the configuration folder. The Solution Name will be ignored and may already be used by another configuration.

Action

Verify no configurations loaded on the server have the same Solution Name.

CTGDKD468E Invalid value specified for 'api.config.load.timeout': ''*paramater value*''. Server API will use the default value of this property.

Explanation

A NumberFormatException was encountered while converting the parameter from a String to an Integer.

Action

Ensure the api.config.load.timeout property in the global.properties is valid.

CTGDKD469W The configuration could not be loaded in the time specified in 'api.config.load.timeout': property.

Explanation

Server API is unable to load configuration in the timeout interval specified in 'api.config.load.timeout': property.

Action

No response is necessary.

CTGDKD470E Error while broadcasting audit notification. The event type was not specified in the event.

Explanation

The event could not be sent because it has no specified type.

Action

Set type of the event before attempting to send the event.

CTGDKD471E A password was not specified or was invalid for the encrypted file.

Explanation

See message.

Action

Provide a valid password.

CTGDKD472E The specified Run Name ''*name*'' cannot be used as a configuration instance id because it contains one or more of the following symbols: \ / : * ? '' < > |.

Explanation

Each Run Name is used as a configuration instance id. Configuration instance ids are used as file names to store certain instance-related entities such as system logs. That is why a Run Name must be a valid file name.

Action

Specify a run name that does not contain slashes or colons.

CTGDKD473I User ''*user name*'' cannot be successfully looked up in the directory context. No group search was performed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD474E The required attribute ''*attribute name*'' is not specified.

Explanation

The attribute is required in order to search for the groups of the LDAP user, but the attribute is not set to a value.

Action

Specify an appropriate value for this attribute in global.properties or solution.properties or turn off the LDAP group support.

CTGDKD475E No search base was specified for the group search option. Assign a value to the property ''*property name*''.

Explanation

The attribute is required in order to search for the groups of the LDAP user, but the attribute is not set to a value.

Action

Specify a valid base for the group searches.

CTGDKD476I The attempt at direct binding for the LDAP group ''*group name*'' has failed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD477I The value for 'api.remote.naming.port': ''*port*'' is in the reserved range of port numbers.

Explanation

The naming port has a value between 1 and 1023. Port numbers in that range are reserved for special purposes.

Action

Check the property 'api.remote.naming.port' in the global.properties/ solution.properties file, and assign it a proper value.

CTGDKD478E User Registry could not parse CONFIG identifier ''*name*''. Exception occurred: *exception*

Explanation

The User Registry could not derive a configuration instance id from the specified CONFIG identifier.

Action

Verify that the CONFIG identifier is either an absolute file name or is acceptable for a configuration instance run name.

CTGDKD479E The file cannot be deleted, because it is currently checked out.

Explanation

Someone holds a lock over the file (possibly editing it at the moment). The file cannot be deleted until the lock is released.

Action

Verify that the file is not checked out.

CTGDKD480E Cannot delete file '*file name*'.

Explanation

A file system error occurred while deleting the file. Possibly the file does not exist.

Action

Verify that the file exists. Verify the file system permissions of the IBM Security Directory Integrator Server process over the file.

CTGDKD481E Error occurred while reading the configuration: *exception*

Explanation

A problem was encountered while reading the configuration in order to obtain its Solution Name. Possibly the configuration syntax is incorrect.

Action

Verify that the configuration is valid.

CTGDKD482E No SSL socket is associated with the current thread.

Explanation

SSL socket is null.

Action

No action is required.

CTGDKD483E SSL socket session is NULL.

Explanation

A problem was encountered while retrieving SSL socket session.

Action

Check the connection settings.

CTGDKD484E SSL session certificate chain is empty.

Explanation

No certificates were found for this SSL session.

Action

Check the connection settings.

CTGDKD486E Required property is missing: *propery key*

Explanation

There is no value for the provided key in the property map.

Action

No action is required.

CTGDKD489E Unable to create socket: *exception*

Explanation

See the error message.

Action

Check host name and port number and if the problem persits contact IBM support.

CTGDKD492E No socket is associated with the current thread.

Explanation

Socket is null.

Action

No action is required.

CTGDKD493E Unrecognized Callback.

Explanation

See error trace.

Action

No action is required.

CTGDKD494E One of the listeners for AssemblyLine events threw an exception: '*exception*'.

Explanation

See the message of the exception.

Action

No action is required.

CTGDKD495E One of the listeners for AssemblyLine events threw an unexpected exception: '*exception*'. Will unregister that listener.

Explanation

Unexpected error occurred while notifying one of the AssemblyLine listeners. Probably the process of a remote listener was terminated. See the message of the exception.

Action

No action is required.

CTGDKD496W One of the listeners for logged messages threw an unexpected exception: '*exception*'. Will unregister that listener.

Explanation

Unexpected error occurred while notifying one of the log listeners. Probably the process of a remote listener was terminated. See the message of the exception.

Action

No action is required.

CTGDKD497E Listener object is NULL.

Explanation

A listener object is required.

Action

Make sure a non-null listener is passed to the API.

CTGDKD498E Listener object is NULL.

Explanation

A listener object is required.

Action

Make sure a non-null listener is passed to the API.

CTGDKD499E Cannot unregister the specified listener because it has not been registered.

Explanation

Listener objects are associated with the Server API handle. You cannot unregister a listener that was registered in another handle.

Action

Use the same Server API handle to unregister the listener that you used to register it in the first place.

CTGDKD500E Listener object is NULL.

Explanation

A listener object is required.

Action

Make sure a non-null listener is passed to the API.

CTGDKD501E Cannot unregister the specified listener because it has not been registered.

Explanation

Listener objects are associated with the Server API handle. You cannot unregister a listener that was registered in another handle.

Action

Use the same Server API handle to unregister the listener that you used to register it in the first place.

CTGDKD502E Listener object is NULL.

Explanation

A listener object is required.

Action

Make sure a non-null listener is passed to the API.

CTGDKD503E Cannot unregister the specified listener because it has not been registered.

Explanation

Listener objects are associated with the Server API handle. You cannot unregister a listener that was registered in another handle.

Action

Use the same Server API handle to unregister the listener that you used to register it in the first place.

CTGDKD504E Listener object is NULL.

Explanation

A listener object is required.

Action

Make sure a non-null listener is passed to the API.

CTGDKD505E Cannot unregister the specified listener because it has not been registered.

Explanation

Listener objects are associated with the Server API handle. You cannot unregister a listener that was registered in another handle.

Action

Use the same Server API handle to unregister the listener that you used to register it in the first place.

CTGDKD506E A communication error occurred while sending a log message to remote listener: *exception*

Explanation

Could not send message to remote log listener. It is possible that the remote listener has died or there are network problems.

Action

Review the exception to find further details on the error.

CTGDKD507E Out of Server Ports

Explanation

The range of server ports specified by the property api.remote.server.ports was exhausted.

Action

Increase the range of ports.

CTGDKD508I Remote API successfully started on port:*port* IP:*ip*, bound to:'SessionFactory'. SSL and Client Authentication are enabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD509I Remote API successfully started on port:*port* IP:*ip*, bound to:'SessionFactory'. SSL is enabled and Client Authentication is disabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKD510I Remote API successfully started on port:*port* IP:*ip*, bound to:'SessionFactory'. SSL and Client Authentication are disabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJU001I Simple Parser read in an entry: ''*entry value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJU002I Simple Parser wrote out a string: ''*entry value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJU003E Unable to process entry read because a line read in was not in the key:value pair format: ''*line*''

Explanation

See message.

Action

Ensure the lines sent to the Simple Parser are in the key:value pair format.

CTGDJP501I Parsing XML response from the server.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP502I Configuration parameters: *params*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP503I New MxConnIterator instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP504I New MxConnAddOnly instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP505I New MxConnLookup instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP506I New MxConnUpdate instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP507I New MxConnDelete instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP508I Selecting entries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP509I Creating entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP510I Performing search.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP511I Updating entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP512I Deleting entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP513I Receiving HTTP response message.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP514I XML character validation enabled.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP515I Sending HTTP message: *message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP516I XML message after validation: *message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP517I Can not close file stream.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP518I Can not load properties from file: *file*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP519I Configuration parameters from file on classpath: *params*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP520I Loading properties from file: *file*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP521I Configuration parameters from file in solution folder: *params*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP522I Configuration parameters from file specified as system property: *params*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP523I Clearing configuration parameters.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP524I Select MBO

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP525I Schema cache has been cleared.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP526E Unsupported Link criteria operator.

Explanation

The operator used for matching is not supported by the Connector.

Action

Change Link criteria operators.

CTGDJP527E The following unique keys are not specified: *keys*.

Explanation

All unique keys must be specified when adding, updating or deleting an entry.

Action

Specify all unique keys.

CTGDJP528E The HTTP server did not returned "HTTP OK".

Explanation

The HTTP server returned a response code other than 200.

Action

Check configuration parameters.

CTGDJP529E Sending message timed out.

Explanation

See message.

Action

Change value of Timeout parameter.

CTGDJP530E Can not send HTTP request.

Explanation

An I/O operation has been interupted or failed.

Action

Check network or server availability.

CTGDJP531E Invalid value for Timeout parameter.

Explanation

Timeout parameter have to be greater or equal to zero.

Action

Change the value of the Timeout parameter.

CTGDJP532E List of target URLs is empty.

Explanation

See message.

Action

Check Base URLs parameter.

CTGDJP533E Parameter not defined: *param*.

Explanation

Parameter's value is either empty or contains only whitespace characters.

Action

Specify parameter's value.

CTGDJP534W Unable to send HTTP request.

Explanation

Could not send HTTP message to any of the target URLs.

Action

Check Base URLs parameter.

CTGDJP535E Not supported encoding: *encoding*.

Explanation

See message.

Action

No action is required.

CTGDJP536W Can not read the HTTP error message.

Explanation

Can not obtain detailed error message about failed HTTP request.

Action

No action is required.

CTGDJP537E Can not load XML template.

Explanation

See message.

Action

No action is required.

CTGDJP538E Can not parse received XML.

Explanation

See message.

Action

No action is required.

CTGDJP539E Parameter not defined: *param*.

Explanation

The value of this parameter is either empty or contains only whitespace characters.

Action

Specify parameter's value.

CTGDJP540W Can not read file: *file*. Exception occurred: *exception*

Explanation

See message.

Action

Verify the file exists and has the right permission.

CTGDJP541W Can not load resource: *resource*. Exception occurred: *exception*

Explanation

See message.

Action

Verify the resource exists.

CTGDJP542E Schema does not contain MBO: *mbo*.

Explanation

See message.

Action

Check MBO name.

CTGDJP543E Can not obtain schema for object structure: *mos*.

Explanation

See message.

Action

Regenerate XSD files for object structure.

CTGDJP544E Illegal schema element: *name*.

Explanation

Entry or Link Criteria contains another MBO.

Action

No action is required.

CTGDJP545E Illegal schema element for Link criteria: *name*.

Explanation

Link criteria name is defined as XML attribute. Only XML elements are allowed.

Action

Check Link criteria.

CTGDJP546E Element not found: *name*.

Explanation

The specified element can not be found in the schema.

Action

No action is required.

CTGDJP547E No configuration is specified.

Explanation

The configuration of the Connector has not been initialized.

Action

Specify all configuration parameters in the Connector.

CTGDJP548E Unsupported Link criteria type.

Explanation

See message.

Action

Change the type of the used Link criteria.

CTGDJP549E Invalid value for Page size parameter.

Explanation

Page size parameter has to be greater than zero.

Action

Change Page size parameter's value.

CTGDJP550E The '*name*' attribute exceeds the maximum allowed size: *size*.

Explanation

Length of attribute or link criteria value exceeds the maximum allowed size for this type of field.

Action

Review and change entry or link criteria.

CTGDJP551E The value is not a valid boolean: *value*.

Explanation

The value can not be converted to a valid boolean.

Action

Check value.

CTGDJP552E The string does not contain a boolean: *value*.

Explanation

The string can not be parsed as a boolean.

Action

Check string.

CTGDJP553E The value is not a valid date: *value*.

Explanation

The value can not be converted to a valid date.

Action

Check value.

CTGDJP554E The string does not contain a parsable date: *value*.

Explanation

The string can not be parsed as a date.

Action

Check string.

CTGDJP555E The value is not a valid double: *value*.

Explanation

The value can not be converted to a valid double.

Action

Check value.

CTGDJP556E The string does not contain a parsable double: *value*.

Explanation

The string can not be parsed as a double.

Action

Check string.

CTGDJP557E The value is not a valid integer: *value*.

Explanation

The value can not be converted to a valid integer.

Action

Check value.

CTGDJP558E The string does not contain a parsable integer: *value*.

Explanation

The string can not be parsed as an integer.

Action

Check string.

CTGDJP559E The value is not a valid long: *value*.

Explanation

The value can not be converted to a valid long.

Action

Check value.

CTGDJP560E The string does not contain a parsable long: *value*.

Explanation

The string can not be parsed as a long.

Action

Check string.

CTGDJP561I Can not find a Maximo exception.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP562I The unique attribute: *attributeName* has a value of '*originalValue*'. It cannot be changed to *userValue*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP563E Unique attribute '*attribute*' is not provided.

Explanation

No attribute with this name is provided in the entry.

Action

Assign a value to the attribute (empty string is also supported).

CTGDJP564I Target URL: *url*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ001I Simple XML Parser will request validating Parser.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ002I Simple XML Parser will request namespace aware Parser.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ003I Simple XML Parser will not indent output.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ004I Simple XML Parser turned off Deferred DOM.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ005I Simple XML Parser could not turned off Deferred DOM.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ006E Failed to read XML because input stream was not found. The input or output modes of the Simple XML Parser may not be valid.

Explanation

See message.

Action

Check the input and output modes of the Simple XML Parser.

CTGDJZ007E Failed to write XML because output stream was not found. The input or output modes of the Simple XML Parser may not be valid.

Explanation

See message.

Action

Check the input and output modes of the Simple XML Parser.

CTGDJZ008I Initializing XML Input Document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ009I Initializing XML Output Document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ010I The XML document has no children. The top level tag name in the document is ''*tag name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ011I The XML document has ''*number of children*'' children.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ012E Simple XML Parser failed to initialize because XML document read in has no document root.

Explanation

The Simple XML Parser can only parse XML documents that have a document root.

Action

Verify that the XML document being read has a document root.

CTGDJZ013E Expected child item at index ''*index number*''.

Explanation

The node for this index is null.

Action

Check the content of XML file.

CTGDJZ014I The XML Child node has no children so its being skipped.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ015W SAX Parse Warning: line:*line number*, uri:*uri*, message:*message*.

Explanation

See message.

Action

No action is required.

CTGDJH001E Connector could not return entry because an unknown class type was encountered: ''*object type*''

Explanation

The SNMP Connector was trying to return an entry but the class type was unknown.

Action

No action is required.

CTGDJH002I Connector listening for SNMP traps only.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH003E The 'snmpOID' parameter must be set to use the SNMP Connector.

Explanation

The required parameter snmpOID was not specified in the SNMP Connector.

Action

Specify the snmpOID parameter in the Connector.

CTGDJH004I Getting the next SNMP entry. Comparing response OID ''*OID*'' of the entry with configured walkOID parameter ''*OID*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH005E Connector could not get next SNMP entry because a bad PDU was received from the SNMP Server. Error occurred: *exception*

Explanation

The SNMP Connector was trying to retrieve the next entry for the SNMP server but failed because a bad PDU was received.

Action

Verify that the SNMP Server the Connector is receiving data from is still running.

CTGDJH006I Ignoring unsupported link criteria name: ''*link criteria*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH007I Search criteria for entry search: OID=''*OID*'' version=''*version*'' host=''*hostname*'' port=''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH008E Connector could not add entry because set request to SNMP Server failed. Error occurred: *error message*

Explanation

The SNMP Connector was trying to add an entry to the SNMP server but failed because the set request failed.

Action

Verify that the SNMP Server the Connector trying to add the entry to is still running and that the entry being added is valid. Also, review the message from SNMP Server for additional detail on why the error occurred.

CTGDJH009I Will send request to get entry with OID ''*OID*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH010E Connector could not get next SNMP entry because a bad PDU was received from the SNMP Server. Error occurred: *exception*

Explanation

The SNMP Connector was trying to retrieve the next entry for the SNMP server but failed because a bad PDU was received.

Action

Verify that the SNMP Server the Connector is receiving data from is still running.

CTGDJH011I Empty queue, waiting for data for ''*number of seconds*'' seconds.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH012I Empty queue, waiting for data with no timeout value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH013I Trap received: *trap*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH101I Initializing with the provided java.net.DatagramPacket object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH102E The 'udp.port' parameter must be set to use the SNMP Server Connector.

Explanation

The required parameter udp.port was not specified in the SNMP Server Connector.

Action

Specify the udp.port parameter in the Connector.

CTGDJH103E Invalid 'udp.port' parameter set in the the SNMP Server Connector: ''*parameter value*''.

Explanation

The required parameter udp.port was specified in the JMX Connector but was set to an invalid value.

Action

Specify a valid value for the udp.port parameter in the Connector.

CTGDJH104I Waiting for SNMP packets on UDP port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH105I Connector terminated by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH106I Connector terminating by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH107I Receiving Connection from ''*hostname*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH108I Receiving Connection from ''*hostname*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH109I Ignoring add request for community ''*community name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH110I Response PDU on add entry request i ''*PDU*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH111I The SNMP error code ''*error code*'' has an illegal value. The error code value will be changed to 5.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH112I Terminate server request received.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH113I Creating dummy connection using IP Address ''*IP Address*'' and port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH114W Encountered an IOException on unblocking the SNMP Server Connector's server socket: *exception*

Explanation

See message.

Action

No action required.

CTGDJH115I SNMP Server Connector is already terminating. Not sending termination request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH116I Sending termination request to SNMP Server Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJH117W Unable to add one or more attributes to the entry. Exception occurred: *exception*

Explanation

See message.

Action

No action required.

CTGDJV001E Failed to read XML because input stream was not found. The input or output modes of the SOAP Parser may not be valid.

Explanation

See message.

Action

Check the input and output modes of the SOAP Parser.

CTGDJV002E XML document has no <SOAP-ENV:Body> element.

Explanation

The SOAP message is not valid.

Action

Check the input SOAP message for node <SOAP-ENV:Body>.

CTGDJV003E <SOAP-ENV:Body> tag has no elements.

Explanation

The SOAP message is not valid.

Action

The SOAP tag <SOAP-ENV:Body> must have at least an element.

CTGDJV004I The method parseXML returns: *node name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV005I SOAP Call: *node name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV006I The element *node name* has no value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV007I The element *node name* has no value.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV008I *prefix* DOCUMENT node type.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV009I *prefix* Node Name: *node name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV010I *prefix* Node Value: *node value*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJV011I *prefix* Node type is not recognized.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKL001E Unable to process the batch message because an unknown type was encountered: *class name*.

Explanation

The batch message contains an object that is neither request, nor response.

Action

Edit the batch message so that it contains only requests or responses.

CTGDKL002W The Base64 decoding has not finished successfully for the entry with the following attributes: *entry attributes*.

Explanation

An exception occurred while decoding attributes

Action

Check that the binaryAttributes parameter of the Parser is set correctly.

CTGDKL003E Unable to process the request because an unknown request type was received: *class name*.

Explanation

The request type is unknown to the Parser or the object is not a request at all.

Action

Edit the batch message so that it contains only valid requests.

CTGDKL004E Unknown response type: *class name*.

Explanation

The response type is unknown to the Parser or the object is not a response at all.

Action

Edit the batch message so that it contains only valid responses.

CTGDKL005E Unable to complete the *operation name* request. The *operation name* request must contain exactly one <pso> element.

Explanation

The modify, lookup or delete request does not specify pso.

Action

Edit the request in order to be compliant with the SPML v2 specification.

CTGDKL006E Unable to process the entry. The entry is missing required Attribute: *attribute name*.

Explanation

The IBM Security Directory Integrator Entry does not contain an Attribute that is required.

Action

Add the missing Attribute to the IBM Security Directory Integrator Entry.

CTGDKL007E Unknown operation type: *SPML v2 operation*.

Explanation

The SPML v2 operation type is neither request, nor response.

Action

Edit the IBM Security Directory Integrator Entry so that it represents a valid operation.

CTGDKL008E Unable to process the request because an unknown request was received: *SPML v2 request*.

Explanation

The request is unknown to the Parser or is not valid SPML v2 request.

Action

Edit the IBM Security Directory Integrator Entry so that it represents a valid request.

CTGDKL009E Unknown response : *SPML v2 response*.

Explanation

The response is unknown to the Parser or is not valid SPML v2 response.

Action

Edit the IBM Security Directory Integrator Entry so that it represents a valid response.

CTGDKL010W An error occurred while flushing the batch message: *exception*

Explanation

Refer to the exception message for more information.

Action

Check the configuration of the Parser.

CTGDKL011I Base64 decoding attribute: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKL012I Base64 decoding attribute: *attribute name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKL013E Unable to complete the *operation name* request. The *operation name* request must contain a <psoID ID> attribute.

Explanation

The modify, lookup, or delete request does not specify 'psoID ID' attribute correctly.

Action

Edit the request in order to be compliant with the SPML v2 specification. Note that 'psoID ID' declaration is case sensitive.

CTGDID001E Required Connector parameter 'connectionType' is not set.

Explanation

The specified Connector parameter connectionType is required, but not set.

Action

Set the Connector parameter connectionType.

CTGDID002E Required Connector parameter 'url' is not set.

Explanation

The Connector parameter url is required, but not set.

Action

Set the Connector parameter url.

CTGDID003E The 'connectionType' parameter is set to an invalid value ''*parameter value*''.

Explanation

See message.

Action

Should specify a valid connectionType parameter in the Connector.

CTGDID004I Server Notification Event received: ''*event name*''

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDID005E Unable to add entry. Entry missing required attribute 'event.type'.

Explanation

The specified Connector attribute event.type is not provided in the work Entry.

Action

Verify the attributes in the work Entry. The attribute event.type must not have null values.

CTGDID006E Unable to add entry. Entry missing required attribute 'event.id'.

Explanation

The specified Connector attribute event.id is not provided in the work Entry.

Action

Verify the attributes in the work Entry. The attribute event.id must not have null values.

CTGDJO001I The 'deliveryMode' parameter is set to *delivery mode*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO002E Unable to initialize Connector because a connection to the directory server could not be established or the search at base DN *DN* was not valid.

Explanation

See message.

Action

Verify the directory server is running and that the ldapSearchBase parameter is set to a valid value.

CTGDJO003W Cannot set starting change number to ''*change number*''.

Explanation

The change number specified in the nsChangenumber parameter could not be used to set the starting change number.

Action

Verify that the nsChangenumber parameter is set to a valid change number.

CTGDJO004I Starting with change number set to ''*change number*'' and the 'iteratorStateKey' was set to ''*state value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO005I Connector has timed out and is waiting for next changed entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO006I LDAP search query set to ''*filter*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO007I Attempting to find entry with attribute changenumber equal to ''*change number*'' using the LDAP base DN of ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO008I Found entry with attribute changenumber equal to ''*change number*'' using the LDAP base DN of ''*DN*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO009I Unable to find entry with attribute change number equal to ''*change number*'' using the LDAP base DN of ''*DN*''. Skipping to try the next entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO010I Will continue but caught a PartialResultException while getting the next search result: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO011E Entry does not contain a valid changelog entry (changes attribute missing) for operation: *type*.

Explanation

The changes attribute 'newrdn' is missing in the entry.

Action

Check the attributes in the entry.

CTGDJO012E Unable to parse changes attribute.

Explanation

The LDIF Parser could not read the entry.

Action

Check the entry.

CTGDJO014E Could not retrieve last change number.

Explanation

The method getLastChangeNumber could not retrieve the last change number. The value must be a number.

Action

Check the attribute 'lastchangenumber' in the entry.

CTGDJO015E Could not store the change number value in System Store: *exception*

Explanation

See message.

Action

Check the system store.

CTGDJO016I Current change number value is: *change number*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO017I A namingException is thrown: *xxception*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO018I notificationReceived: *event*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO019E An exception is encountered when executing the method 'callEventFunction': *exception*

Explanation

See message.

Action

Analyse the exception.

CTGDJO020I Block for notifications ...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJO021W Thread interupted: *exception*

Explanation

An InterruptedException is encountered when executing the method 'blockForNotifications'.

Action

No action is required.

CTGDJO022E Restart info does not contain 'changeNumber' attribute.

Explanation

See message.

Action

Check the attribute 'changeNumber' in the entry.

CTGDJO023W Exception occurred while terminating the Connector: *exception*

Explanation

See message.

Action

No action is required.

CTGDJO024W The iterator state key is not specified. No state will be stored. The Start At parameter's value will be used.

Explanation

See message.

Action

Specify the iterator state key if you want the state of the changelog connector to be saved.

CTGDIH601I Listening on port *portnumber*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH001E Required Connector parameter ''*parameter name*'' is not set.

Explanation

The specified Connector parameter is required, but not set.

Action

Set the Connector parameter.

CTGDIH002E The 'connectionType' parameter is set to an invalid value ''*parameter value*''.

Explanation

See message.

Action

Specify a valid connectionType parameter in the Connector.

CTGDIH101E The System Store Connector cannot initialize because the create table statement is missing.

Explanation

The System Store Connector cannot initialize because it cannot determine the proper "create table" statement for the database it is configured to use.

Action

Check the createTable parameter and make sure the proper "create table" statement is specified.

CTGDIH102W Unable to set the commit mode in the System Store Connector to ''*commit mode*''. Continuing, but a valid value should be set for the 'pesCommit' parameter.

Explanation

See message.

Action

Verify that the pesCommit parameter in the System Store Connector is set to a valid value. See the IBM Security Directory Integrator Reference Guide for information on valid parameter values for the System Store Connector.

CTGDIH103W An exception was encountered while terminating the System Store Connector: *exception*

Explanation

See message.

Action

No action is required.

CTGDIH104I Entry found without a value for the key attribute ''*attribute name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH105E Required Connector parameter 'keyAttribute' is not set.

Explanation

The specified Connector parameter keyAttribute is required, but not set.

Action

Set the Connector parameter keyAttribute.

CTGDIH106E Unable to add the entry because a null Entry object was passed into the putEntry method.

Explanation

See message.

Action

Verify that the entries being passed into the putEntry method are valid and are not null.

CTGDIH107E Unable to add entry because DML Operations are not allowed on the table ''*table name*''

Explanation

An attempt was made to add an entry on a table where DML Operations are not allowed. DML Operations are not allowed on the following tables: Delta, CPR, Property store or the Systable.

Action

Verify that the table the entry is added to is not one of the following types of tables: Delta, CPR, Property store or the Systable. The dbTableName parameter is where the table name is configured in the System Store Connector.

CTGDIH108E Unable to modify entry because DML Operations are not allowed on the table ''*table name*''.

Explanation

An attempt was made to modify an entry on a table where DML Operations are not allowed. DML Operations are not allowed on the following tables: Delta, CPR, Property store or the Systable.

Action

Verify that the table the entry is being modified in is not one of the following types of tables: Delta, CPR, Property store or the Systable. The dbTableName parameter is where the table name is configured in the System Store Connector.

CTGDIH109E Unable to delete entry because DML Operations are not allowed on the table ''*table name*''.

Explanation

An attempt was made to delete an entry on a table where DML Operations are not allowed. DML Operations are not allowed on the following tables: Delta, CPR, Property store or the Systable.

Action

Verify that the table the entry is being delete from is not one of the following types of tables: Delta, CPR, Property store or the Systable. The dbTableName parameter is where the table name is configured in the System Store Connector.

CTGDIH110E Unable to modify the entry because a null Entry object was passed into the modEntry method.

Explanation

See message.

Action

Verify that the entries being passed into the modEntry method are valid and are not null.

CTGDIH111E The entry cannot be added because the keyAttribute attribute ''*attribute name*'' in the entry has a value of NULL.

Explanation

Attempted to add an entry that did not have the required keyAttribute attribute.

Action

Verify the entries being passed to the System Store Connector have the keyAttribute attribute set and that the System Store Connector is configured with the correct keyAttribute parameter.

CTGDIH112E The entry cannot be modified because the keyAttribute attribute ''*attribute name*'' in the entry has a value of NULL.

Explanation

Attempted to modify an entry that did not have the required keyAttribute attribute.

Action

Verify the entries being passed to the System Store Connector have the keyAttribute attribute set and that the System Store Connector is configured with the correct keyAttribute parameter.

CTGDIH113E Unable to modify the entry because of a search key mismatch. The search criteria supplied was ''*attribute name*'' and the keyAttribute configured in the Connector is ''*attribute name*''.

Explanation

Tried to search for an entry with a search criteria that did not match the configured keyAttribute of the System Store Connector.

Action

Verify the search criteria is scoped to match on the same keyAttribute parameter that is configured in the System Store Connector.

CTGDIH114I Preparing and executing the query SQL statement to find an entry: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH115W Prepared SQL statement to find entry failed: *exception*

Explanation

See message.

Action

No action is required.

CTGDIH116W The prepared SQL statement to delete an entry will not be used. Exception encountered: *exception*

Explanation

See message.

Action

No action is required.

CTGDIH117E The selectEntries method failed. Cannot execute SQL Statement: *SQL statement*.

Explanation

Error occurred while executing the specified SQL statement.

Action

Specify correct SQL Statement.

CTGDIH118I No more entries to retrieve from SQL search results.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH119E Cannot build where clause (Advanced Link Mode).

Explanation

See message.

Action

No action is required.

CTGDIH120I Attempting to build an entry in the System Store Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH121I Saving Meta Data. Saving column ''*column name*'' of column type ''*column type*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH122I Retrieving attribute value based on the column name ''*column name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH123I Retrieved attribute of type 'CHAR/VARCHAR': ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH124I Retrieved attribute of type 'LONGVARBINARY'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH125I Retrieved attribute of type 'DECIMAL/INTEGER': ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH126I Retrieved NULL value for INT: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH127I Retrieved attribute value of type 'OBJECT': ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH128I Set value of attribute ''*attribute name*'' to ''*attribute value*''. The class type of the attribute is ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH129I Set value of attribute ''*attribute name*'' to ''*attribute value*''. The class type of the attribute is 'basic'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH130I Set value of attribute ''*attribute name*'' to 'null'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH131I Successfully built an entry in the System Store Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH132I Preparing to set prepared SQL statement value with attribute name ''*attribute name*'' and attribute value ''*attribute value*''. The index is set to ''*index*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH133E No Meta Data description for attribute being set in the prepared SQL statement: ''*attribute name*''.

Explanation

The user tried to get the type of a column that does not exists.

Action

Specify an attribute name that matches a column name in the Meta Data.

CTGDIH134W Set prepared SQL statement value for attribute to null: index=''*index*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH135W Java Class name of attribute value: ''*class name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH136I Type of attribute value: ''*attribute value type*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH137I Set 'LONGVARCHAR' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH138I Set 'VARCHAR' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH139I Set 'OTHER' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH140I Set 'INTEGER/TINYINT/SMALLINT' value: ''*value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH141W Exception caught while parsing Integer from 'INTEGER/TINYINT/SMALLINT' value: ''*exception*''

Explanation

The value being parsed is not an Integer.

Action

No action is required.

CTGDIH142I Set value for an unhandled type ''*type*'' as a string on column ''*column name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH143W SQL warning encountered from prepared SQL statement: *warning message*

Explanation

See message.

Action

No action is required.

CTGDIH144I findEntry method will use SQL statment: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH145I deleteEntry method will use SQL statment: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH146I The delete operation returned *return code*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH147I selectEntries method will use SQL statment: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH148I No entries from selectEntries method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH149I Prepared statement: *SQL statement*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIH150E The table name is not specified.

Explanation

The field "Table Name" in the Connector configuration is empty.

Action

Provide the table name.

CTGDIH151E Error: *error message* occured while creating the table *Table Name*.

Explanation

The error occured while creating the table in the system store DB.

Action

Take the necessary action as per the exception.

CTGDIH152E The table name does not begin with a letter.

Explanation

The "Table Name" must start with a letter.

Action

Provide a table name starting with a letter.

CTGDIH153E The table name is not alphanumeric.

Explanation

The "Table Name" must only contain letters, digits or underscore.

Action

Provide a valid table name.

CTGDIH154W An exception occured while trying to close the database connection: *exception message*

Explanation

A database access error may had occured. See the exception message for details.

Action

No action required.

CTGDIH155W The following sql exception has occured while using PreparedStatement *exception message*

Explanation

A database access error may had occured. See the exception message for details.

Action

No action required.

CTGDIK401E Invalid ENTRY type: *Entry Type*.

Explanation

The Connector was configured to use an Entry Type that is not supported.

Action

Reconfigure the Connector to use a valid Entry Type.

CTGDIK402E Missing ENTRY type. Entry type is null.

Explanation

The Connector was configured to use no Entry Type.

Action

Set the Entry Type in the Connector.

CTGDIK403E Invalid ISAM configuration file: *file name*.

Explanation

The Connector was configured to use an invalid ISAM Configuration File.

Action

Reconfigure the Connector to use a valid ISAM Configuration File.

CTGDIK404E Could not log on to ISAM.

Explanation

The Connector was configured to use invalid ISAM credentials.

Action

Ensure the ISAM ID and ISAM Password configuration parameters of the Connector are set to valid values.

CTGDIK405E Could not query ISAM Domains.

Explanation

The Connector was unable to query ISAM for a list of valid Domains.

Action

Ensure you have configured the ISAM JRTE correctly, and that all Configuration parameters are correct. If the problem persists, contact IBM support.

CTGDIK406E Could not shutdown ISAM *object name*.

Explanation

The Connector was unable to shutdown ISAM.

Action

Ensure you have configured the ISAM JRTE correctly, and that all Configuration parameters are correct. Ensure your ISAM Server is operational and available. If the problem persists, contact IBM support.

CTGDIK407E Could not retrieve entries for: *object name*.

Explanation

The Connector was unable to retrieve entries for the target object.

Action

Ensure the Connector to is configured to use the correct Entry Type. If the problem persists, contact IBM support.

CTGDIK408E Could not retrieve next entry for: *object name*.

Explanation

The Connector was unable to retrieve the next entry for the target object.

Action

Ensure the Connector to is configured to use the correct Entry Type. If the problem persists, contact IBM support.

CTGDIK409E Could not find entries for: *object name*.

Explanation

The Connector was unable to find entries for the target object.

Action

Ensure the Connector to is configured to use the correct Entry Type. If the problem persists, contact IBM support.

CTGDIK410E There was an error while creating: *object name*.

Explanation

The Connector was unable to create an entry of the configured Entry Type.

Action

Check the HashMap object returned from the TAMConnectorException.getFailed method for more details on the error. Ensure the Connector is configured to use the correct Entry Type. If the problem persists, contact IBM support.

CTGDIK411E There was an error while updating: *entry name*.

Explanation

The Connector was unable to modify an entry of the configured Entry Type.

Action

Check the HashMap object returned from the TAMConnectorException.getFailed method for more details on the error. Ensure the Connector is configured to use the correct Entry Type. If the problem persists, contact IBM support.

CTGDIK412E Could not delete entry for: *entry name*.

Explanation

The Connector was unable to delete an entry of the configured Entry Type.

Action

Ensure the Connector is configured to use the correct Entry Type. If the problem persists, contact IBM support.

CTGDIK413E Unable to interface with the ISAM server. The following invalid message was retrieved by ISAM while processing an exception thrown by ISAM: *invalid message*.

Explanation

The Connector has tapped a ISAM exception while interfacing with ISAM. The message type attached to the exception message is invalid message.

Action

See the logs for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK414E Unable to interface with the ISAM server. The following error message was retrieved by ISAM while processing an exception thrown by ISAM: *error message*.

Explanation

The Connector has tapped a ISAM exception while interfacing with ISAM. The message type attached to the exception message is error message.

Action

Ensure the Connector to is configured correctly, and that the ISAM Server is operational. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK415E Unable to interface with the ISAM server. While retrieving the cause of an exception thrown by ISAM, an internal exception has occured.

Explanation

The Connector has trapped an underlying Java Exception while attempting to find the cause for a previous ISAM exception.

Action

Check the logs for details. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK416E Unable to complete the operation. The attribute *attribute name* was missing.

Explanation

The Connector was attempting an operation for a specific Entry Type and was missing an attribute.

Action

Make sure that the required attribute for the respective Entry Type is available. If the problem persists, contact IBM support.

CTGDIK417E Connector search failed. An unsupported search criteria was specified.

Explanation

The Connector was attempting to search/find with unsupported search criteria.

Action

Verify the search criteria for the respective Entry Type is valid.

CTGDIK418E Deleting policy failed. User name is not specified.

Explanation

The Connector was attempting to delete a Policy without a valid User Name.

Action

Make sure that the User Name is valid for the Policy being deleted. If the problem persists, contact IBM support.

CTGDIK419E Invalid Resource Type: *resource type*.

Explanation

The Connector was attempting an operation with an invalid resource type.

Action

Ensure the resource type is valid for the Entry Type. If the problem persists, contact IBM support.

CTGDIK420E Admin Group *group name* is reserved and cannot be deleted.

Explanation

The Connector was attempting to delete a Group that is reserved.

Action

Unreserve the Group before attempting to delete it.

CTGDIK421E Admin User *user name* is reserved and cannot be deleted.

Explanation

The Connector was attempting to delete a User that is reserved.

Action

Unreserve the User before attempting to delete it.

CTGDIK422E Error while loading the group *group name*.

Explanation

The Connector could not load the Group specified.

Action

Confirm the Group exists in ISAM. If the problem persists, contact IBM support.

CTGDIK423E No Credentials Exist for User: *user name*.

Explanation

The Connector could not find credentials for the User specified.

Action

Confirm the User credentials exist in ISAM.

CTGDIK424E Operation Code *operation code* not supported.

Explanation

The Connector does not support the operation code specified.

Action

Change to a supported operation code.

CTGDIK425I Shutting down connection to ISAM.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK426I Initializing PDAdmin for application: *ISAM program ID*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK427I Creating a ISAM Context: *context name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK428I Retrieving data for entries with the entry type *entry type* and the attribute value *attribute value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK429I The groups for the user: *group names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK430I Importing User: *user name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK431I Adding User: *user name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK432I The groups to add: *group names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK433I The groups to delete: *group names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK434I Removing User: *user name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK435I The users to add: *user names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK436I The users to delete: *user names*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK437I Removing members from Group: *group name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK438I Adding members to Group: *group name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK444I Removing Domain: *domain name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK445I Creating SSO Credential: *credential name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK446I Deleteing SSO Credential: *credential name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK447I Refer to Users Guide, or initialize the Connector first.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIK448E No valid value found for the following Connector Configuration Parameter: *Config Param Name*.

Explanation

The Connector was configured with a Configuation Parameter that either had no value, or the value specified was invalid.

Action

Reconfigure the Connector to use valid values for all required Configuration Parameters.

CTGDIK449E Unable to interface with the ISAM server. The following invalid context message was retrieved by ISAM while processing an exception thrown by ISAM: *invalid context message*.

Explanation

The Connector has tapped a ISAM exception while interfacing with ISAM. The message type attached to the exception message is invalid context.

Action

See the logs for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDIK450E Unable to interface with the ISAM server. The following unknown message type was retrieved by ISAM while processing an exception thrown by ISAM: *unknown message*.

Explanation

The Connector has tapped a ISAM exception while interfacing with ISAM. The message type attached to the exception message is unknown.

Action

See the logs for additional information on how to respond. Attempt to restart the AssemblyLine containing this Connector. If the problem persists, contact IBM support.

CTGDJI001I Listening for TCP SSL connections on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI002I Listening for TCP connections on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI003E The 'tcpHost' parameter must be set to use the TCP Connector in client mode.

Explanation

The required parameter tcpHost was not specified in the TCP Connector. The parameter is required in client mode.

Action

Specify the tcpHost parameter in the Connector.

CTGDJI004I Connecting to TCP host ''*hostname*'' over SSL on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI005I Connecting to TCP host ''*hostname*'' on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI006I Waiting for incoming connection on port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI007I Incoming connection established from ''*IP Address*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI008E The 'tcpPort' parameter must be set to use the TCP Connector in client mode.

Explanation

The required parameter tcpPort was not specified in the TCP Connector. The parameter is required in client mode.

Action

Specify the tcpPort parameter in the Connector.

CTGDJI009I Interrupted while waiting for incoming connection. Closing the server socket.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI101E The 'tcp.port' parameter must be set to use the TCP Server Connector.

Explanation

The required parameter tcp.port was not specified in the TCP Server Connector.

Action

Specify the tcp.port parameter in the Connector.

CTGDJI102I Exiting initialization early because Connector already initialized with a java.net.Socket object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI103I Using the provided java.net.Socket object for TCP client session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI104I Listening for TCP SSL connections on port ''*port number*''. The backlog connections allowed is set to ''*number of connections*'' connections and client authentication is set to ''*boolean*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI105I Listening for TCP connections on port ''*port number*''. The backlog connections allowed is set to ''*number of connections*'' connections.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI106I Connector terminated by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI107I Connector terminating by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI108I Incoming connection established from ''*IP Address*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI109I Terminate server request received.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI110I Creating dummy connection using IP Address ''*IP Address*'' and port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI111W Encountered an IOException on unblocking the TCP Server Connector's server socket: *exception*

Explanation

See message.

Action

No action required.

CTGDJI112I TCP Server Connector is already terminating. Not sending termination request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJI113I Sending termination request to TCP Server Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW001E Select a Solution View to delete.

Explanation

No Solution View was selected for deletion.

Action

Select at least one Solution View and click Delete.

CTGDIW002W Delete Solution View *Solution View name*?

Explanation

Confirm the deletion of Solution View. This cause all Solution View related information to be deleted.

Action

Choose OK to delete the Solution View, or CANCEL to abort.

CTGDIW003E Unable to delete Solution View *Solution View name*. This might happen if Action Manager rules are configured for this Solution View. See error logs for more details.

Explanation

The delete of Solution View failed. This might have occurred because the specified Solution View might not exist or might have been deleted by another user. Also, if Action Manager rules are configured for this Solution View, then Solution View cannot be deleted. Some other internal error could also have occurred. See the error logs for the details.

Action

If Action Manager rules are configured for this Solution View, then the Solution View cannot be deleted. In such a case, go to the Action Manager configuration screen and delete all the Action Manager rules for this Solution View and then delete the Solution View from the Manage Solution View panel.

CTGDIW004E Select a Solution View to manage.

Explanation

No Solution View was selected for Manage ACL operation.

Action

Select at least one Solution View and click Manage ACL.

CTGDIW005E Select a Solution View to modify.

Explanation

No Solution View was selected for Modify operation.

Action

Select at least one Solution View and click Modify.

CTGDIW006E The session with remote server for the Solution View could not be established.

Explanation

A session could not be established with the remote IBM Security Directory Integrator server associated with this Solution View. Editing a Solution View is not possible unless the remote IBM Security Directory Integrator server is running, and the associated Config instance is also loaded on the remote server.

Action

Check the remote server associated with this Solution View. Ensure the the remote API engine is running on the remote server. Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW007E The Config instance associated with the Solution View is not loaded on the server.

Explanation

Editing a Solution View is not possible unless the remote IBM Security Directory Integrator server is Running, and the associated Config instance is also loaded on the remote server. In this case, the server session was established, but the associated Solution View was not loaded on it.

Action

Check the remote server associated with this Solution View. Ensure that the required Config instance is loaded on the remote server.

CTGDIW008E The Solution View *Solution View name* already exists.

Explanation

A Solution View with the same name already exists in the Administration and Monitoring Console. Duplicate Solution View names are not allowed.

Action

Specify a unique Solution View name.

CTGDIW009E It is mandatory to select a Config instance.

Explanation

You must select at least one Config instance in order to create a Solution View.

Action

Select a Config instance. If no Config instance is visible, then select a running IBM Security Directory Integrator server which has Config instances loaded, or load the remote IBM Security Directory Integrator server with the required Config instance before proceeding with Solution View creation.

CTGDIW010E It is mandatory to select at least one AssemblyLine.

Explanation

You must select at least one AssemblyLine in order to create a Solution View.

Action

Select at least one AssemblyLine and proceed. If no AssemblyLines are visible, then select a Config instance which has AssemblyLines or load an appropriate Config instance before proceeding with Solution View creation.

CTGDIW011E Select a Health AssemblyLine or check the None checkbox.

Explanation

It is required to select one Health AssemblyLine or explicitly state that no health AssemblyLine for this Solution View. If neither is done, then the user cannot continue with Solution View creation.

Action

Select a Health AssemblyLine or check the None checkbox.

CTGDIW012I The Solution View *Solution View name* has been successfully created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW013E The Solution View could not be created. Check the logs for errors.

Explanation

Unable to create the Solution View in the Administration and Monitoring Console database. An internal error might have occurred, or an associated data element might have been deleted from the database.

Action

See the error logs. Also try creating the Solution View again.

CTGDIW014E The Config instance associated with the Solution View *Solution View name* is not loaded on the server.

Explanation

The user selected a Solution View whose associated Config instance is not loaded on the server. Managing property store of a Solution View is not possible unless the associated Config instance is loaded on the IBM Security Directory Integrator server.

Action

Load the associated Config instance on the remote server and try again.

CTGDIW015I The current Solution View has been set to: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW016E Select a Config instance to reload.

Explanation

It is mandatory to select a running Config instance and click Reload. The user did not select any Config instance.

Action

Select a loaded Config instance and click Reload.

CTGDIW017I Config Instance *Config instance ID* successfully reloaded.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW018E Error occurred while reloading Config instance *Config instance ID* .

Explanation

Unable to reload the Config instance on the remote IBM Security Directory Integrator Server. This might have occurred because the remote IBM Security Directory Integrator server might no longer be running, or the remote Config instance might have been unloaded. Check the error logs for more information.

Action

Check the error logs for more information, or try again.

CTGDIW019E The Config *Config path* is not loaded on the server. Only loaded Configs can be reloaded.

Explanation

Unable to reload the Config instance on the remote IBM Security Directory Integrator Server. This occurred because the selected Config is not loaded on the remote server. Only loaded Configs can be reloaded.

Action

Select a loaded Config and click on Reload. Alternatively, select a Config that is not loaded, and click on Load.

CTGDIW020E Select a Config to load.

Explanation

It is mandatory to select a Config that is not loaded and click Load. The user did not select any Configs.

Action

Select a Config that is not loaded and click Load.

CTGDIW021E Select a Config instance to unload.

Explanation

It is mandatory to select a loaded Config instance and click Unload. The user did not select any Configs.

Action

Select a loaded Config instance and click Unload.

CTGDIW022E Error occurred while trying to unload the Config instance *Config instance ID*.

Explanation

An error occurred while trying to unload the Config instance on the remote server. This might have occurred because the Administration and Monitoring Console was unable to contact the remote server or the Config instance might not be loaded on the remote server. See the error logs for more details.

Action

See the error logs for more details, or try again.

CTGDIW023E The Config *Config instance ID* is not loaded on the server. Only a loaded Config can be unloaded.

Explanation

The user tried to unload a Config that is not loaded on server. Only loaded Configs can be unloaded.

Action

See the error logs for more details, or try again by selecting a loaded Config.

CTGDIW024E Error occurred while trying to load the Config *Config path* .

Explanation

An error occurred while trying to load the Config on the remote server. This might have occurred because the Administration and Monitoring Console was unable to contact the remote server or the Config path might have changed. It can also occur if the specified Config is password protected, and no password was specified in the Config Password field, or an incorrect password was specified in the Config Password field. It might also occur if the selected file is not a valid IBM Security Directory Integrator Config file. See the error logs for more details.

Action

Ensure that the remote Config is valid and that the path is correct. Also ensure that for password protected Configs, the correct password is supplied in the Config Password field. See the error logs for more details, or try again.

CTGDIW025E The Config *Config instance ID* is already loaded on the server.

Explanation

Cannot load an already loaded Config. Only Configs that are not loaded can be loaded.

Action

Select a Config that is not loaded to perform the Load operation.

CTGDIW026E Select a group.

Explanation

A group must be selected to assign a role. If no groups exist in the list, then create groups first and then assign roles.

Action

Select an existing group, or create new ones before assigning roles.

CTGDIW027E Select a role.

Explanation

A group must be assigned a role.

Action

Select a role.

CTGDIW028E Unable to set role for group *group name*

Explanation

Unable to set the role for the user requested group. This might have occurred because the associated Config instance might have been deleted or renamed, or the group might have been deleted or renamed, or an internal error occurred. See the error logs for more details.

Action

See the error logs, or try again.

CTGDIW029I The role for group *group name* has been successfully updated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW030E Select a user.

Explanation

A user must be selected to assign a role. If no user exist in the list, then create users first and then assign roles.

Action

Select an existing user, or create new ones before assigning roles.

CTGDIW031E Select a role.

Explanation

A user must be assigned a role.

Action

Select a role.

CTGDIW032E Unable to set role for user *user name*

Explanation

Unable to set the role for the requested user. This might have occurred because the associated Config instance might have been deleted or renamed, or the user might have been deleted or renamed, or an internal error occurred. See the error logs for more details.

Action

See the error logs, or try again.

CTGDIW033I The role for user *user name* has been successfully updated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW034E Select a Health AssemblyLine or check the None checkbox.

Explanation

It is required to select one Health AssemblyLine or explicitly specify no health AssemblyLine for this Solution View. The user cannot continue with Solution View modify until a health AssemblyLine is selected, or no health AssemblyLine is specified.

Action

Select a Health AssemblyLine of check the None checkbox.

CTGDIW035I The Solution View has been successfully updated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW036E The Solution View could not be updated. Check the logs for errors.

Explanation

An error occurred while updating the Solution View details in database. This might have occurred because another user modified or deleted the Solution View.

Action

Check the error logs or try editing the Solution View again.

CTGDIW037E It is mandatory to select at least one AssemblyLine.

Explanation

A Solution View must have at least one AssemblyLine.

Action

Select at least one AssemblyLine and proceed. If no AssemblyLines are visible, then select a Config instance which has AssemblyLines or load an appropriate Config instance before proceeding with Solution View editing.

CTGDIW038E Select members to remove access.

Explanation

The user did not select any members whose access to the particular Solution View must be removed. It is mandatory to select at least one member and click Remove.

Action

Select at least one member and click Remove.

CTGDIW039E Unable to remove members. See error logs for details.

Explanation

An internal error occurred because of which the access of the selected members could not be removed. This might have occurred because the selected Solution View might have been deleted or the database might have been in an inconsistent state.

Action

See error logs or try again.

CTGDIW040E Select a server to delete.

Explanation

The error occurred because the user clicked the Delete without selecting a server from the list. The user needs to specify which server to delete.

Action

Select a IBM Security Directory Integrator server from the list and click Delete.

CTGDIW041W Deleting a server will also delete all Solution Views and other information associated with this server. Do you really want to delete the server *server name* ?

Explanation

Deleting a server results in deletion of all Solution Views associated with this server from the Administration and Monitoring Console. Any information associated with those Solution Views will also be deleted to maintain database referential consistency. The deletion of the server information is permanent.

Action

If you want to delete the server, click OK, otherwise click Cancel.

CTGDIW042E Unable to delete server *server name*. Check the logs for errors.

Explanation

An internal error occurred because of which the server could not be deleted. This might have occurred because another process might have modified or already deleted the server. Check the error logs for details.

Action

Check the error logs or try again.

CTGDIW043E Update failed for property *property name*.

Explanation

An internal error occurred and the specified property value could not be updated. This might have occurred because another process might have modified or already deleted the proerty. Check the error logs for details.

Action

Check the error logs or try again.

CTGDIW044E Unable to add property *property name*.

Explanation

An internal error occurred because of which the specified property could not be added. Check the error logs for details.

Action

Check the error logs or try again.

CTGDIW045E Select a property to delete.

Explanation

The user did not select any property and hit delete. It is mandatory to select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW046W Delete property *property name*?

Explanation

Confirmation from user about whether he really wishes to delete the specified property.

Action

If you want to delete the property, click OK, otherwise click Cancel.

CTGDIW047E Select a property to modify.

Explanation

The user clicked Modify without selecting a property. Select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW048E Select a property to modify.

Explanation

The user did not select any property and hit Modify. It is mandatory to select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW049E Select a property to delete.

Explanation

The user clicked Delete without selecting a property. Select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW050W Delete property *property name*?

Explanation

Confirm that you want to delete the specified property.

Action

If you want to delete the property, click OK, otherwise click Cancel.

CTGDIW051E Select a property to modify.

Explanation

The user did not select any property and click Modify. It is mandatory to select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW052E Select a property to delete.

Explanation

The user clicked Delete without selecting a property. Select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW053W Delete property *property name*?

Explanation

Confirm that you want to delete the specified property.

Action

If you want to delete the property, click OK, otherwise click Cancel.

CTGDIW054E Select a property to modify.

Explanation

The user clicked Modify without selecting a property. Select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW055E Select a property to delete.

Explanation

The user clicked Delete without selecting a property. Select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW056W Delete property *property name*?

Explanation

Confirm that you want to delete the specified property.

Action

If you want to delete the property, click OK, otherwise click Cancel.

CTGDIW057E Select a property to modify.

Explanation

The user clicked Modify without selecting a property. Select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW058E Select a property to delete.

Explanation

The user clicked Delete without selecting a property. Select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW059W Delete property *property name*?

Explanation

Confirm you want to delete the specified property.

Action

If you want to delete the property, click OK, otherwise click Cancel.

CTGDIW060E The current password for user *user name* is incorrectly entered.

Explanation

The user supplied incorrect value of the current password. The current password must be supplied correctly to change the password.

Action

Specify the current user password.

CTGDIW061E The new passwords do not match.

Explanation

To change the password, the new password and confirm password values should be the same. This is to ensure that the user is sure of what the new password is.

Action

Specify the same password in the New Password and Confirm Password fields.

CTGDIW062E Unable to change password.

Explanation

An internal error occurred which prevented the change of password. See the error logs for more information.

Action

See the error logs or try again.

CTGDIW063E Unable to change password. User *user name* not found.

Explanation

An internal error occurred which prevented the change of the password. Most likely, this user was deleted and hence the password could not be changed.

Action

See the error logs or try again.

CTGDIW064I Password for user *user name* changed successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW065E Group already exits: *group name*

Explanation

The user entered the name of a group that already exists. Duplicate groups are not allowed.

Action

Enter a unique group name and try again.

CTGDIW066E Illegal character encountered in group name.

Explanation

The user entered an illegal character (for example, single quotes) in the group name.

Action

Enter a unique group name without any illegal characters.

CTGDIW067E Unable to add group. Check the logs for errors.

Explanation

An internal error prevented the creation of the specified group. Check the error logs for more details.

Action

Check the error logs or try again.

CTGDIW068E No users selected.

Explanation

No users were selected to be added to this group as members. At least one user has to be selected.

Action

Select at least one user to become a member, or click Cancel.

CTGDIW069E Group *group name* does not exist.

Explanation

Members could not be added to the group because the group does not exist any more. Another user might have deleted this group. Check the logs for more details.

Action

Check the error logs or try again.

CTGDIW070E Select a group to modify.

Explanation

The user clicked Modify without selecting a group. Select a group before clicking Modify.

Action

Select a group from the list and click Modify.

CTGDIW071E Select a group to delete.

Explanation

The user clicked Delete without selecting a group. Select a group before clicking Delete.

Action

Select a group from the list and click Delete.

CTGDIW072W Delete group *group name*?

Explanation

Confirm the deletion of group. This cause all group related information to be deleted.

Action

Choose OK to delete the group, or CANCEL to abort.

CTGDIW073E Group *group name* does not exist.

Explanation

The group does not exist any more. Another user might have deleted this group. Check the logs for more details.

Action

Check the error logs or try again.

CTGDIW074E Group *group name* does not exist.

Explanation

The group could not be updated because it no longer exists. Another user might have deleted this group. Check the error logs for details.

Action

Check the error logs or try again.

CTGDIW075E No members selected.

Explanation

No members were selected to be deleted from this group. At least one user has to be selected.

Action

Select at least one user for deleting.

CTGDIW076W Remove selected members from group?

Explanation

Confirm the user wants to remove the selected members from the group.

Action

If you want to remove the members, click OK, otherwise click Cancel.

CTGDIW077E Group *group name* does not exist.

Explanation

The group does not exist any more. Another user might have deleted this group. Check the logs for more details.

Action

Check the error logs or try again.

CTGDIW078E Passwords do not match.

Explanation

To add a new user, the new password and confirm password values should be the same. This is to ensure that the user is sure of what the new password is.

Action

Specify the exact same password in the New Password and Confirm Password fields.

CTGDIW079E User already exits: *user name*

Explanation

You entered the name of a user that already exists. Duplicate users are not allowed.

Action

Enter a unique user name and try again.

CTGDIW080E Illegal character encountered in user name.

Explanation

You entered an illegal character (for example single quotes) in the user name.

Action

Enter a unique user name without any illegal characters.

CTGDIW081E Unable to add user. Check the logs for errors.

Explanation

An internal error prevented the creation of the specified user. Check the error logs for more details.

Action

Check the error logs or try again.

CTGDIW082E Select a user to modify.

Explanation

The user clicked Modify without selecting a user. Select a user before clicking Modify.

Action

Select a user from the list and click Modify.

CTGDIW083E Select a user to delete.

Explanation

The user clicked Delete without selecting a user. Select a user before clicking Delete.

Action

Select a user from the list and click Delete.

CTGDIW084W Delete user *user name*?

Explanation

Confirm the deletion of user. This cause all user related informationto be deleted.

Action

Choose OK to delete the user, or CANCEL to abort.

CTGDIW085E User *user name* does not exist.

Explanation

The user does not exist any more. Another operator might have deleted this user. Check the logs for more details.

Action

Check the error logs or try again.

CTGDIW086E Passwords do not match.

Explanation

For a user, the new password and confirm password values should be the same. This is to ensure that the user is sure of what the new password is.

Action

Specify the exact same password in the New Password and Confirm Password fields.

CTGDIW087E User *user name* does not exist.

Explanation

The user does not exist any more. Another operator might have deleted this user. Check the logs for more details.

Action

Check the error logs or try again.

CTGDIW088E Unable to modify user. Check the logs for errors.

Explanation

An internal error occurred which prevented the user from being updated. Check the logs for error.

Action

Check the error logs or try again.

CTGDIW089E SSL Key store file is not specified.

Explanation

The user specified SSL key store related properties without specifying the key store file.

Action

Either delete the SSL key store properties(such as password,etc) or specify the key store file name.

CTGDIW090E SSL Trust store file is not specified.

Explanation

The user specified SSL trust store related properties, without specifying the trust store file.

Action

Either delete the SSL trust store properties(such as password,etc) or specify the trust store file name.

CTGDIW091E Unable to add the server. The IBM Security Directory Integrator Server ID *Server ID* duplicates the Server ID already assigned to another server having the same hostname and port number.

Explanation

The attributes Hostname, Server ID and Port should be unique for each IBM Security Directory Integrator server entry. A new IBM Security Directory Integrator Server cannot be added if this constraint is violated.

Action

Change the Server ID of the server that need to be added or delete the existing entry in the Administration and Monitoring Console and try again. The Server ID can be changed by editing the global.properties or solution.properties and by setting the com.ibm.di.server.id property.

CTGDIW092E Unable to establish connection with the server.

Explanation

Unable to establish connection with the server. This might be because the server is down, or the Remote Server API engine is not running on the remote server or the connection settings to the server are incorrect.

Action

Verify the server is running, and the Remote Server API engine is also running. Also confirm if the hostname, port and authentication details are correct.

CTGDIW093I Connection successfully established.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW094E Select a server to shutdown.

Explanation

The error occurred because the user clicked the Shutdown without selecting a server from the list. The user needs to specify which server to shutdown.

Action

Select a IBM Security Directory Integrator server from the list and click Shutdown.

CTGDIW095W If this server is shut down, then all users connected or working with this server will get disconnected. Also, any AssemblyLines or Config instances on this server will be shut down. Do you really want to shutdown the server *server name*?

Explanation

Shutting down a IBM Security Directory Integrator server results in the unloading of all Config instances and AssemblyLines running on this server.

Action

If you want to shut down the server, click OK, otherwise click Cancel.

CTGDIW096E Unable to shutdown server *server name*.

Explanation

An error occurred and the server could not be shutdown. Either the session could not be estabilised, or there was a server API failure. Check the logs for errors.

Action

Check the logs for errors, or try again.

CTGDIW097E The Config instance associated with the Solution View *Solution View name* is not loaded on the server.

Explanation

The user selected a Solution View whose associated Config instance is not loaded on the server. Generating a Solution View report is not possible unless the associated Config instance is loaded on the IBM Security Directory Integrator server.

Action

Load the associated Config instance on the remote server and try again.

CTGDIW098E Select an AssemblyLine to start.

Explanation

The user clicked on Start AssemblyLine without selecting any AssemblyLine. It is mandatory to specify which AssemblyLine to start.

Action

Select an AssemblyLine and click Start AL.

CTGDIW099E The AssemblyLine *AssemblyLine name* is already running.

Explanation

The user chose to start an AssemblyLine that is already running.

Action

Select a stopped AssemblyLine and clicked Start AL.

CTGDIW100E The AssemblyLine *AssemblyLine name* could not be started. Check the logs for errors.

Explanation

Due to an internal error, or remote IBM Security Directory Integrator server error, the starting of the specified AssemblyLine failed.

Action

Check the error logs or try again.

CTGDIW101E Select an AssemblyLine to stop.

Explanation

The user clicked on Stop AssemblyLine without selecting any AssemblyLine. It is mandatory to specify which AssemblyLine to stop.

Action

Select a running AssemblyLine and click Stop AL.

CTGDIW102E The AssemblyLine *AssemblyLine name* is already stopped.

Explanation

The user chose to stop an AssemblyLine that is already stopped.

Action

Select a running AssemblyLine and click Stop AL.

CTGDIW103W Stop AssemblyLine *AssemblyLine name*?

Explanation

Confirm stopping of the AssemblyLine.

Action

If you want to stop the selected AssemblyLine click Ok otherwise click Cancel.

CTGDIW104E The AssemblyLine *AssemblyLine name* could not be stopped. Check the logs for errors.

Explanation

Due to an internal error the specified AssemblyLine could not be stopped on the remote IBM Security Directory Integrator server.

Action

Check the error logs or try again.

CTGDIW105E Select an AssemblyLine to view component information.

Explanation

The user clicked View Components without selecting a AssemblyLine. Select a AssemblyLine before clicking View Components.

Action

Select an AssemblyLine and click View Components.

CTGDIW106E Unable to obtain Connector information for AssemblyLine *AssemblyLine name*.

Explanation

Unable to obtain handle to AssemblyLine object. See error logs for details.

Action

Check the Config containing this AssemblyLine is loaded on the server, and try again.

CTGDIW107E Select a property to modify.

Explanation

The user did not select any property and click Modify. It is mandatory to select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW108E Select a property to delete.

Explanation

The user clicked Delete without selecting a property. Select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW109W Delete property *property name*?

Explanation

Confirmation the user wants to delete the specified property.

Action

If you want to delete the property, click OK, otherwise click Cancel.

CTGDIW110E Select a Solution View to view its server information.

Explanation

No Solution View was selected for Server Information task.

Action

Select at least one Solution View and click IBM Security Directory Integrator Server Information menu option.

CTGDIW111E The session with remote server for the Solution View could not be established.

Explanation

A session could not be established with the remote IBM Security Directory Integrator server associated with this Solution View. Cannot view Server information if the server is not running.

Action

Check the remote server associated with this Solution View. Ensure the the remote API engine is running on the remote server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW112I Server shutdown successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW113E Could not shutdown server.

Explanation

The server could not be shutdown. See the error logs for more details.

Action

Check the error logs or try again.

CTGDIW114E Select a Solution View to view its details.

Explanation

No Solution View was selected for viewing its monitor details.

Action

Select at least one Solution View and click Solution View Details menu option.

CTGDIW115W The Config instance associated with the Solution View *Solution View name* is not loaded on the server.

Explanation

The currently selected Solution View is not loaded on the server. This is not an error, but implies that any AssemblyLine associated with this Solution View would also not be running on the server. This might also be because the Administration and Monitoring Console was not able to establish a connection with the remote

IBM Security Directory Integrator Server (because the server is unreachable, or the remote server API engine is not reachable).

Action

This is just for operator information, and does not in any way indicate any error, or unusual condition. You need not take any action, unless you determine the Solution View should have been in a running condition. In that case, the you may choose to load the Config first, or check the logs for errors, or check the Action Manager for any error runs, or view the tombstones for last run statistics, or verify the IBM Security Directory Integrator server itself is running and the remote Server API engine is also running.

CTGDIW116E Select an AssemblyLine to view Tombstones.

Explanation

The user clicked View Tombstones without selecting any AssemblyLine.

Action

Select an AssemblyLine and click View Tombstones.

CTGDIW117E Could not obtain an instance of Tombstone Manager. It might not be running on the remote server.

Explanation

The Administration and Monitoring Console was unable to obtain a connection to the Tombstone Manager on the remote server.

Action

Verify the tombstone manager is configured to be running. Check the error logs for the exact error. Start the tombstone manager on the remote IBM Security Directory Integrator server and try again.

CTGDIW118E Select a log file to view.

Explanation

The user clicked on View without selecting a log file.

Action

Select a log file to view.

CTGDIW119E Unable to connect to IBM Security Directory Integrator server associated with Solution View *Solution View name*. Cannot clean up logs for this Solution View.

Explanation

The Administration and Monitoring Console was unable to connect to the server associated with the Solution View. Logs cannot be deleted for Solution View if the server is not running.

Action

Ensure that the remote IBM Security Directory Integrator server is up and running, with the Remote Server API engine on. Also check the settings of the server in the Administration and Monitoring Console to ensure that all information required to make a connection by the Administration and Monitoring Console is correctly made available.

CTGDIW120E There were errors while cleaning up logs for Solution view *Solution View name*.

Explanation

An errors occurred while firing cleanup logs on IBM Security Directory Integrator server. Check the error logs for more details.

Action

View the error logs for more details, or try again.

CTGDIW121I Cleanup logs for Solution View *Solution View name* completed successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW122E An error occurred while saving your preferences.

Explanation

An errors occurred while saving your preferences. See the error logs for details.

Action

View the error logs for more details, or try again.

CTGDIW123I Your preferences have been successfully saved.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW124E Unable to create a rule in database. See error logs for details.

Explanation

Unable to create an entry in the Administration and Monitoring Console database for this rule. See the error logs for more information.

Action

View the error logs for more details, or try again.

CTGDIW125E Unable to create/update rule in database. See error logs for details.

Explanation

Unable to update the rule and trigger information in the Administration and Monitoring Console database. See the error logs for more information.

Action

View the error logs for more details, or try again.

CTGDIW126E No Property name specified for trigger.

Explanation

The property name is mandatory for the On Property trigger. The current Solution View has no properties chosen, and therefore the Property Name field is empty.

Action

Modify the Solution View to contain at least one property so that the On Property trigger can be specified. Otherwise, choose a different trigger.

CTGDIW127E No Rule selected for delete.

Explanation

The user did not select any rule and click Delete. It is mandatory to select a rule before clicking Delete.

Action

Select a rule from the table to delete.

CTGDIW128W Deleting a rule will delete all information associated with this rule, including the run history of this rule from database. Do you really want to delete the *rule name* rule?

Explanation

Confirm the deletion of the selected Action Manager Rule. The user may choose to Disable rather than Delete the rule.

Action

If you want to delete the rule, click OK, otherwise click Cancel. If the operator wants to keep the Rule in database, but not run the rule, Disable the rule, instead of Deleting the rule.

CTGDIW129E Unable to delete the rule from database. Ensure that some other rule is not associated with this rule. Also, check the error logs.

Explanation

Unable to delete the rule from the Administration and Monitoring Console database. This might happen because another rule depends on this rule (when an action is configured to execute, or enable/disable this rule). See the error logs for more information.

Action

View the error logs for more details, or try again. Ensure that there is no other rule, that executes or enables/disables this rule in one of its actions. If that is the case, then delete that action or rule before deleting the current rule.

CTGDIW130E It is mandatory to select at least one Action.

Explanation

The user clicked OK without selecting any action.

Action

Select an action on the page, and click OK, otherwise click CANCEL.

CTGDIW131E For the Copy property action, the source and destination properties are the same: *property name*. Select different propery names.

Explanation

For the Copy Property Action, the user chose the same property names for Copy From and Copy To. These must be different properties.

Action

Select different properties in Copy property value action, or clear the action.

CTGDIW132E One or more actions could not be stored. See the logs for errors.

Explanation

One or more actions could not be stored in database. See the error logs for details, and the list of actions in the previous page, to see the actions which were stored.

Action

See the error logs, or try again.

CTGDIW133E Select an Action to move.

Explanation

The user chose to change the execution order of an action, without selecting any actions from the list.

Action

Select an action and then choose to move it up or down the order.

CTGDIW134E Unable to move the chosen action. See logs for more information.

Explanation

An error occurred while performing the move operation. See the error logs for details.

Action

See the error logs, or try again.

CTGDIW135E Select an Action to delete.

Explanation

The user chose to delete an action, without selecting any actions from the list.

Action

Select an action and then choose to delete it.

CTGDIW136E Unable to delete the chosen action. See logs for more information.

Explanation

An error occurred while performing the delete operation. See the error logs for details.

Action

See the error logs, or try again.

CTGDIW137W Delete action *action name*?

Explanation

Confirm deletion of the selected Action.

Action

If you want to delete the action, click OK, otherwise click Cancel.

CTGDIW138E Either an event type or an event source must be specified.

Explanation

For the received event trigger, one of the two - event type or event source - must be specified. The user did not specify either.

Action

Specify either the event type or the event source. Otherwise select a different trigger condition. See the com.ibm.di.api.remote.Session.addEventListener() API for more details.

CTGDIW139E Value for the property has not been specified in trigger.

Explanation

For the On property trigger, the value field is mandatory. The user did not specify this value.

Action

Specify the property value. Otherwise select a different trigger condition.

CTGDIW140E Attribute name or value not specified.

Explanation

For the query AssemblyLine result trigger, the Attribute name and Value fields are mandatory. The user did not specify the attribute name or the attribute value.

Action

Specify the attribute name and the value. Otherwise select a different trigger condition.

CTGDIW141E Illegal interval value specified. Value must be greater than zero.

Explanation

For the Time since last execution trigger, the interval value must be greater than zero. The user entered an illegal value, or did not modify the value.

Action

Specify a valid interval value.

CTGDIW142E Insufficient rights to perform Solution View management for the selected Solution View.

Explanation

The user chose to perform a Solution View modification with insufficient rights for the chosen Solution View. The user must have Config admin privilege to perform

this operation, or must be the console administrator.

Action

Select an authorized Solution View, or login using a user id with appropriate authority. Alternatively, login as Console Administrator and then try again.

CTGDIW143E Insufficient rights to perform Config administration (load/unload/reload) task for the selected Config instance *Config instance*.

Explanation

The user chose to perform a Config load, unload or reload without having Config admin privilege to any associated Solution View. Only when a user has Config admin privilege to a particular Solution View which is associated with the chosen Config instance, can the user perform the load, unload or reload operation for that Config instance. Otherwise, the user must be the console administrator.

Action

Select an authorized Config instance, or login using a user id with appropriate authority. Alternatively, login as Console Administrator and then try again.

CTGDIW144E Insufficient rights to view details for Solution View *Solution View name*.

Explanation

The user chose to view the details of a Solution View without having any rights associated with the Solution View. The user must have some rights associated (whether reader, execute, admin or Config_admin) for the chosen Solution View. Otherwise, the user must be the console administrator.

Action

Select an authorized Solution View, or login using a user id with appropriate authority. Alternatively, login as Console Administrator and then try again.

CTGDIW145E Insufficient rights to view server information for Solution View *Solution View name*.

Explanation

The user chose to view the server information of a Solution View without having any rights associated with the Solution View. The user must have some rights associated (whether reader, execute, admin or Config_admin) for the chosen Solution View. Otherwise, the user must be the console administrator.

Action

Select an authorized Solution View, or login using a user id with appropriate authority. Alternatively, login as Console Administrator and then try again.

CTGDIW146I The Administration and Monitoring Console has been set up for LDAP Authentication. User and Group addition (or modification) is not supported via the Administration and Monitoring Console for external LDAP servers.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW147E Illegal value specified for Action Manager Log Rotate rate (days). Minimum is 1 day.

Explanation

The Action Manager Log rotate rate is used to delete logs older than the specified number of days. This value must be a positive integer greater than or equal to 1.

Action

Enter a valid value satisfying the above criteria for Action Manager Log Rotate rate (in days).

CTGDIW148E Select an Action to modify.

Explanation

The user chose to modify an action, without selecting any actions from the list.

Action

Select an action and then choose to modify it.

CTGDIW149E The action could not be updated. See the logs for errors.

Explanation

The action information could not be updated in database. See the error logs for details, and the list of actions in previous page, to see the ones which successfully got stored.

Action

See the error logs, or try again.

CTGDIW150E No Rule selected for modify.

Explanation

The user did not select any rule and clicked Modify. It is mandatory to specify which rule to modify.

Action

Select a rule from the table to modify.

CTGDIW151E The Action Manager Rule status could not be updated. See the logs for errors.

Explanation

The Action Manager Rule status could not be updated in database. See the error logs for details.

Action

See the error logs, or try again.

CTGDIW153I Instance of AMCConfigManager class created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW154I In createConfigViewMethod(). Parameters received: Solution View Name: *Solution view name* Solution View Desc: *description* Server ID: *server ID* Exposed AssemblyLines: *list of AssemblyLines* Is Health AssemblyLine specified: *boolean* Selected Health AssemblyLine: *Health AssemblyLine name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW155E Unable to insert into CONFIG_VIEW_MASTER table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW156E Unable to obtain CV_ID (primary key) value for Solution view *Solution view name*

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW157E Unable to insert into CONFIG_VIEW_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW158E Unable to insert into CONFIG_VIEW_HEALTH_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW159I In updateConfigView() method. Parameters received: Solution View ID: *Solution view ID* Exposed AssemblyLines: *list of AssemblyLines* Is Health AssemblyLine specified: *boolean* Selected Health AssemblyLine: *Health AssemblyLine name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW160I Deleting AssemblyLine details.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW161I Deleting IBM Security Directory Integrator Properties.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW162I Deleting Health AssemblyLine details.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW163I Insert into CONFIG_VIEW_AL_DETAILS table the exposed AssemblyLines.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW164E Unable to insert into CONFIG_VIEW_HEALTH_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while updating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW165E Unable to insert into CONFIG_VIEW_HEALTH_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while updating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW166I Instance of AMCTDIServerManager class created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW167E Unable to delete server from TDI_SERVER_MASTER table from database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while attempting to delete a IBM Security Directory Integrator server entry from database.

Action

See the accompanying exception for more details. Try again.

CTGDIW168W Unable to set the amc.session.timeout value. Value obtained from amc.properties file: *session timeout value*.

Explanation

The Administration and Monitoring Console encountered an error while setting the Administration and Monitoring Console session timeout value. This may have happened because the session timeout was not specified correctly.

Action

Check the amc.properties file for the value of amc.session.timeout variable.

CTGDIW169W Unable to set the monitor.refresh.rate value. Value obtained from amc.properties file: *monitor refresh rate*.

Explanation

The Administration and Monitoring Console encountered an error while setting the Administration and Monitoring Console monitor.refresh.rate. This may have happened because the refresh rate was not specified correctly.

Action

Check the amc.properties file for the value of monitor.refresh.rate variable.

CTGDIW170W Unable to determine the monitor.startup value. Value obtained from amc.properties file: *boolean*.

Explanation

The Administration and Monitoring Console encountered an error while setting the Administration and Monitoring Console monitor.startup value. This may have happened because the boolean value was not specified correctly.

Action

Check the amc.properties file for the value of monitor.startup variable. It must be a boolean indicating whether monior page will be startup page or not.

CTGDIW171E An error occurred while attempting to read the amc.properties file.

Explanation

See message.

Action

Check the location of amc.properties file. See the accompanying exception trace. Ensure that the file is not corrupted / truncated.

CTGDIW172E An error occurred while attempting to read the amc.properties file.

Explanation

See message.

Action

Check the location of amc.properties file. See the accompanying exception trace. Ensure that the file is not corrupted / truncated.

CTGDIW173E An error occurred while attempting to read the amc.properties file.

Explanation

See message.

Action

Check the location of amc.properties file. See the accompanying exception trace. Ensure that the file is not corrupted / truncated.

CTGDIW174E An error occurred while attempting to read the amc.properties file.

Explanation

See message.

Action

Check the location of amc.properties file. See the accompanying exception trace. Ensure that the file is not corrupted / truncated.

CTGDIW175E An error occurred while attempting to write to the amc.properties file.

Explanation

See message.

Action

Check that the amc.properties file is not locked by another application. See the accompanying exception trace.

CTGDIW176E Unable to clear logs for AssemblyLine *AssemblyLine name* in Config *Config*.

Explanation

The Administration and Monitoring Console was unable to clean log files associated with the above mentioned AssemblyLine and Config.

Action

See the accompanying exception trace. Also check the remote Config logs. Try again.

CTGDIW177E Unable to clear logs for AssemblyLine *AssemblyLine name* in Config *Config*.

Explanation

The Administration and Monitoring Console was unable to clean log files associated with the above mentioned AssemblyLine and Config.

Action

See the accompanying exception trace. Also check the remote Config logs. Try again.

CTGDIW178E Unable to get system log for Solution view: *Solution View ID*

Explanation

The Administration and Monitoring Console was unable to obtain a handle to the System Log from the remote server API for the above mentioned Solution view. For this reason, the Cleanup log functionality was not completed.

Action

See the accompanying exception trace. Also check the remote Config logs. Try again.

CTGDIW179W Unable to get status of Action Mangaer Rules for Solution view id: *Solution View ID*

Explanation

Due to some internal error, the Administration and Monitoring Console was unable to get rule status information from the AM_RUN_HISTORY table in database.

Action

See the accompanying exception trace. Try again.

CTGDIW180E Unable to update AM_RULES_MASTER while trying to update status.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to update Action Manager rule status information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW181E Unable to update AM_RULES_MASTER while trying to update status.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to update Action Manager rule status information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW182E Unable to add Action Manager rule into database. Rule Name: *Rule Name* Rule Description: *Description* Solution View ID: *Solution View ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to add Action Manager rule information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW183E Unable to obtain the AM_ID (primary key) for the recently added rule.

Explanation

Most probably, due to an internal database error the Administration and Monitoring Console was unable to obtain the ID for the recently added Action Manager rule.

Action

See the accompanying exception trace. Try again.

CTGDIW184E Unable to add Action Manager rule into database. Rule Name: *Rule Name* Rule Description: *Description* Solution View ID: *Solution View ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to add Action Manager rule information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW185E Unable to read Action Manager rule from AM_RULES_MASTER table for rule: *Rule Name*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to read Action Manager rule information from the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW186E No rows were updated in AM_RULES_MASTER while trying to update trigger type.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to update the Action Manager trigger type information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW187E No rows were updated in AM_RULES_MASTER while trying to update trigger type.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to update the Action Manager trigger type information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW188E Unable to read Action Manager rule from AM_RULES_MASTER table for rule: *Rule ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to read Action Manager rule information from the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW189E No rows were updated in AM_RULES_MASTER while trying to update Rule name: *Rule Name* Rule Description: *Description* Trigger type: *Trigger type*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to update the Action Manager information in the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW190E Unable to insert data into trigger configuration tables.

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to insert information into Action Manager Trigger tables.

Action

See the accompanying exception trace. Try again.

CTGDIW191E Unable to store rule or trigger information.

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to store rule or trigger into Action Manager related tables.

Action

See the accompanying exception trace. Try again.

CTGDIW192E Unable to store rule or trigger information. Some error occurred. The parameters passed to code were: Rule ID: *Rule ID* Rule Name: *Rule Name* Rule Description: *Description* Trigger Type: *Trigger Type* Parameter 1:*value* Parameter 2:*value* Parameter 3: *value* Parameter 4: *value*

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to store rule or trigger into Action Manager related tables.

Action

See the accompanying exception trace. Try again.

CTGDIW193E Unable to Delete rule: *Rule ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to delete Action Manager rule information from the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW194E Some error occurred while attempting to delete rule: *Rule ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to delete Action Manager rule information from the AM_RULES_MASTER table.

Action

See the accompanying exception trace. Try again.

CTGDIW195E Unable to store Action information. Some error occurred. The parameters passed to code were: Rule ID: *Rule ID* Action Type: *Action Type* Parameter 1:*value* Parameter 2:*value* Parameter 3: *value* Parameter 4: *value*

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to store action information in database.

Action

See the accompanying exception trace. Try again.

CTGDIW196E Unable to read action information for rule: *Rule ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to read action information for the specified rule.

Action

See the accompanying exception trace. Try again.

CTGDIW197E Unable to modify execution order of specified action.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to modify the execution order of the specified action.

Action

See the accompanying exception trace. Try again.

CTGDIW198E Unable to modify execution order of specified action. The parameters passed were: Rule ID: *Rule ID* Direction: *Direction* Action ID:*Action ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to modify the execution order of the specified action.

Action

See the accompanying exception trace. Try again.

CTGDIW199E Unable to delete the specified action. The parameters passed were: Rule ID: *Rule ID* Action ID:*Action ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to delete the specified action.

Action

See the accompanying exception trace. Try again.

CTGDIW200E Unable to insert row into AM_UPDATE_DETAILS table.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to make an entry in the AM_UPDATE_DETAILS table. This table is used by Action Manager to monitor real-time updates to rules.

Action

See the accompanying exception trace. Try again.

CTGDIW201E Unable to obtain action details for Rule: *Rule ID* and Action: *Action ID*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to obtain action details for the specified Rule and Action.

Action

See the accompanying exception trace. Try again.

CTGDIW202E Unable to obtain rule details for rule: *Rule ID*

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to obtain rule details.

Action

See the accompanying exception trace. Try again.

CTGDIW203E Error while obtaining Solution View Status.

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to obtain the status of Solution View.

Action

See the accompanying exception trace. Try again.

CTGDIW204E Error while obtaining status of AssemblyLines.

Explanation

Due to a IBM Security Directory Integrator server API error, the Administration and Monitoring Console was unable to determine the AssemblyLine details. This may occur if the log4j jar file, or some other jars are not present in the the Administration and Monitoring Console classpath or incompatible libraries are present in the Administration and Monitoring Console (or Remote IBM Security Directory Integrator server).

Action

See the accompanying exception trace. Also check the version of the remote IBM Security Directory Integrator server. Ensure that correct library files (jars) are present in the Administration and Monitoring Console and remote IBM Security Directory Integrator server's classpath.

CTGDIW205E Unable to store user preferences for user: *user name*

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to store the user's preferences.

Action

See the accompanying exception trace. Try again.

CTGDIW206E Unable to get Action Manager Details for Solution View: *Solution View ID*

Explanation

Due to an internal error, the Administration and Monitoring Console was unable to query the AM_LOGS, AM_RULES_MASTER for the Action Manager rules associated with this Solution View.

Action

See the accompanying exception trace. Try again.

CTGDIW207E Unable to delete data from AM_LOGS table.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to delete data from AM_LOGS table.

Action

See the accompanying exception trace.

CTGDIW208W Unable to convert the monitor.refresh.rate value to integer.

Explanation

The Administration and Monitoring Console encountered an error while reading the Administration and Monitoring Console monitor.refresh.rate. This may have happened because the refresh rate was not specified correctly.

Action

Check the amc.properties file for the value of monitor.refresh.rate variable.

CTGDIW209E Could not obtain an instance of Tombstone Manager for Solution View:*Solution View name*. It might not be running on the remote server.

Explanation

The Administration and Monitoring Console was unable to obtain a connection to the Tombstone Manager on the remote server.

Action

Verify the tombstone manager is configured to be running. Check the error logs for the exact error. Start the tombstone manager on the remote IBM Security Directory Integrator server and try again.

CTGDIW210E No log files found for AssemblyLine: *AssemblyLine name* and Config: *Config*

Explanation

The Administration and Monitoring Console was unable to find any log files associated with the specified AssemblyLine.

Action

Verify that a logger is attached to the specified AssemblyLine and that there are log files present. Try again.

CTGDIW211E No log files found for AssemblyLine: *AssemblyLine name* and Config: *Config*

Explanation

The Administration and Monitoring Console was unable to find any log files associated with the specified AssemblyLine.

Action

Verify that a logger is attached to the specified AssemblyLine and that there are log files present. See the accompanying exception. Try again.

CTGDIW212E Unable to display contents of Log File: *Log file name* of AssemblyLine: *AssemblyLine name* in Config: *Config*

Explanation

The Administration and Monitoring Console was unable to find any log files associated with the specified AssemblyLine.

Action

Verify that a logger is attached to the specified AssemblyLine and that there are log files present. See the accompanying exception. Try again.

CTGDIW213E Unable to retrieve tombstones for AssemblyLine: *AssemblyLine* in Config: *Config*

Explanation

The Administration and Monitoring Console was unable to obtain Tombstones for the specifed AssemblyLine due to some internal error.

Action

Check if the tombstone manager is running. See the accompanying exception. Try again.

CTGDIW214W Unable to find group: *group name*

Explanation

While loading the Modify Group screen, the Administration and Monitoring Console was unable to find the specified group details in database. It may have been modified or deleted already.

Action

Check the logs, and try again.

CTGDIW215W Error closing database statement.

Explanation

The Administration and Monitoring Console encountered an error while attempting to close a database statement. This may have occurred because of an underlying JDBC or Database error.

Action

See the exception logs for details.

CTGDIW216W Error closing database ResultSet.

Explanation

The Administration and Monitoring Console encountered an error while attempting to close a database ResultSet. This may have occurred because of an underlying JDBC or Database error.

Action

See the exception logs for details.

CTGDIW217W Error closing database connection.

Explanation

The Administration and Monitoring Console encountered an error while attempting to close a database connection. This may have occurred because of an underlying JDBC or Database error.

Action

See the exception logs for details.

CTGDIW218W Message with programmer's Key: *key string* not found.

Explanation

The Administration and Monitoring Console was unable to find a message for the specified key in its properties file.

Action

No user action needed.

CTGDIW219W Some error occurred while evaluating the user's role. User: *User Name* Solution View ID: *Solution View ID*

Explanation

The Administration and Monitoring Console was unable to determine the role of the user because of some internal error.

Action

See the accompanying logs.

CTGDIW220W Some error occurred while evaluating the user's role. User: *User Name*

Explanation

The Administration and Monitoring Console was unable to determine the role of the user because of some internal error.

Action

See the accompanying logs.

CTGDIW221W Unable to obtain authorized Config instances. User: *User ID*

Explanation

The Administration and Monitoring Console was unable to determine the authorized configs for the user.

Action

See the accompanying logs.

CTGDIW222I An instance of DBConnectionFactory class created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW223W Illegal value specified for Action Manager Log Rotate rate (days). Unable to convert to integer. Current value specified for am.logrotate: *value*

Explanation

The Action Manager Log rotate rate is used to delete logs older than the specified number of days. This value must be a positive integer greater than or equal to 1. On error, the default is set to 10 days.

Action

Enter a valid value satisfying the above criteria for Action Manager Log Rotate rate (in days).

CTGDIW224I The Administration and Monitoring Console database: *database details*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW225I Derby network server already running.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW226I Unable to ping Derby network server. Attempting to start.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW227W Table does not exist: *table name*

Explanation

A required table was not found in the database by the Administration and Monitoring Console. The Administration and Monitoring Console will attempt to create the database. This usually happens when the Administration and

Monitoring Console database is created for the first time, or the database settings have been changed in amc.properties.

Action

No user response needed, unless the table creation is unexpected. In that case, check if the database settings in amc.properties are correct. If in doubt, mention the complete path of the database in amc.properties.

CTGDIW228W Table created: *table name*

Explanation

A required table was not found in the database by the Administration and Monitoring Console. The Administration and Monitoring Console will attempt to create the database. This usually happens when the Administration and Monitoring Console database is created for the first time, or the database settings have been changed in amc.properties.

Action

No user response needed, unless the table creation is unexpected. In that case, check if the database settings in amc.properties are correct. If in doubt, mention the complete path of the database in amc.properties.

CTGDIW229I The Administration and Monitoring Console Database has been shutdown.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW230W An error occurred while attempting the Administration and Monitoring Console DB shutdown.

Explanation

Some error occurred while attempting to shutdown the Administration and Monitoring Console database.

Action

Check the accompanying exception trace for more information.

CTGDIW231I LDAP user filter: *search filter string*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW232I LDAP user tree base DN: *base DN*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW233E An error occurred while attempting to obtain all LDAP users for the Administration and Monitoring Console.

Explanation

An error occurred while attempting to obtain all LDAP users.

Action

Check the LDAP settings in amc.properties file. Also see the accompanying exception.

CTGDIW234I LDAP user filter: *search filter string*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW235I LDAP user tree base DN: *base DN*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW236W More than one result obtained for username: *user name*

Explanation

While attempting to determine valid the Administration and Monitoring Console user (in LDAP), the Administration and Monitoring Console obtained more than one user satisfying the search criteria. Only one user must be obtained.

Action

Check the LDAP settings in amc.properties file. Also see the accompanying exception.

CTGDIW237E Valid user not found (in LDAP): *user name*

Explanation

The Administration and Monitoring Console was unable to obtain the specified user in LDAP.

Action

Check the LDAP settings in amc.properties file. Also see the accompanying exception.

CTGDIW238E Unable to bind to LDAP server with user: *user name*

Explanation

The Administration and Monitoring Console was unable to bind to the specified LDAP server with the passed username and password.

Action

Check the username and password on the LDAP server. Check the LDAP settings in amc.properties file. Also see the accompanying exception.

CTGDIW239I LDAP group filter: *search filter string*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW240I LDAP group tree base DN: *base DN*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW241E An error occurred while attempting to obtain all LDAP groups for the Administration and Monitoring Console.

Explanation

An error occurred while attempting to obtain all LDAP groups.

Action

Check the LDAP settings in amc.properties file. Also see the accompanying exception.

CTGDIW242I Obtaining members of group *Group DN*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW243E An error occurred while attempting to obtain all members of LDAP group: *Group DN*

Explanation

An error occurred while attempting to obtain all members of the specified LDAP group.

Action

Check the LDAP settings in amc.properties file. Also see the accompanying exception.

CTGDIW244E LDAPHostname attribute not specified in amc.properties.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW245W No value specified for LDAPBindID variable in amc.properties file. Attempting to bind as anonymous user.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW246E An error occurred while creating LDAP search context.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file. See accompanying exception.

CTGDIW247E LDAPHostname attribute value not specified in amc.properties or is invalid. Value: *Attribute value*

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW248E LDAPPort attribute value not specified in amc.properties or is invalid. Value: *Attribute value*

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW249E LDAPAdminUId attribute value not specified in amc.properties or is invalid. Value: *Attribute value*

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW250E LDAPAdminPwd attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW251E LDAPServerType attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW252E LDAPBindID attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW253E LDAPBindPassword attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW254E LDAPSuffix attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW255E LdapUserPrefix attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW256E LDAPUserSuffix attribute value not specified in amc.properties or is invalid.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW257W LDAPsslEnabled attribute value not specified in amc.properties or is invalid. Setting SSL to false.

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW258W Unable to obtain membership for user:*user DN*

Explanation

See message.

Action

Check the LDAP settings in amc.properties file.

CTGDIW259I Instance of TDISessionFactory class created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW260W The api.Config.folder property is not set on the remote server.

Explanation

The api.Config.folder attribute which points to the directory containing configs exposed for remote use is not set on the IBM Security Directory Integrator server. Because of that, the Administration and Monitoring Console will not be able to get the list of stopped configs on the remote server.

Action

Set the api.Config.folder property on the remote IBM Security Directory Integrator server's global.properties file if you want the Administration and Monitoring Console to also list the stopped configs.

CTGDIW261I Trying to establish connection to: Server: *hostname* Port: *port*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW262I Attempting to use Custom Authentication with username: *username*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW263I Unable to establish connection to: Server: *hostname* Port: *port*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW264W Console administrator *username* login failed.

Explanation

Console administrator login failed because of incorrect password.

Action

Specify the correct password.

CTGDIW265W User *username* login failed.

Explanation

Login failed because of incorrect username or password.

Action

Specify the correct password.

CTGDIW266E An error occurred while loading Navigation XML file.

Explanation

The console files seem to be corrupted.

Action

Check the XML files in IBMAppConfig folder for corruption. Contact IBM Support.

CTGDIW267W Unable to set the amc.session.timeout value. Value obtained from amc.properties file: *session timeout value*. Web server's default value will be applicable.

Explanation

The Administration and Monitoring Console encountered an error while setting the Administration and Monitoring Console session timeout value. This may have happened because the session timeout was not specified correctly. It must be an integer

Action

Check the amc.properties file for the value of amc.session.timeout variable.

CTGDIW268E An error occurred while trying to read the Console Admin Password file.

Explanation

The Administration and Monitoring Console encountered an error while trying to read the Console Administrator's password file.

Action

Check the console_passwd file or replace it with the original, uncorrupted file.

CTGDIW269I Obtaining handle to amc.properties file.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW270E Unable to initialize LDAP properties. Switching to the Administration and Monitoring Console database based authentication.

Explanation

The Administration and Monitoring Console encountered an error while trying to initialize LDAP properties, and therefore has switched to normal the Administration and Monitoring Console database based authentication.

Action

Check the LDAP properties and error logs for LDAP related issues. Restart the Administration and Monitoring Console after modifying amc.properties.

CTGDIW271I LDAP properties initialized. The Administration and Monitoring Console authentication source is set to LDAP.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW272E An error occurred while attempting to read the amc.properties file.

Explanation

See message.

Action

Check the location of amc.properties file. See the accompanying exception trace. Ensure that the file is not corrupted / truncated. The Administration and Monitoring Console will not be able to run unless this issue is resolved.

CTGDIW273E Unable to initialize DBConnectionFactory.

Explanation

The Administration and Monitoring Console was unable to initialize the Administration and Monitoring Console Database.

Action

Check the JDBC properties of amc.properties file. See the accompanying exception trace. Ensure that the file is not corrupted / truncated. The Administration and Monitoring Console will not be able to run unless this issue is resolved.

CTGDIW274I Administration and Monitoring Console initialization complete.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW275I Administration and Monitoring Console Shutdown.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW276I Calling CSA render with URL: *URL*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW277E Select a server to modify.

Explanation

The error occurred because the user clicked the Modify button without selecting a server from the list. The user needs to specify which server to modify.

Action

Select a IBM Security Directory Integrator server from the list and click Modify.

CTGDIW278E Incompatible version of remote IBM Security Directory Integrator server. Remote server version: *version number*

Explanation

The error occurred because the user attempted to work with a remote IBM Security Directory Integrator server which is incompatible with the Administration and Monitoring Console.

Action

Connect to a compatible IBM Security Directory Integrator server version. Check the error logs.

CTGDIW279W The remote IBM Security Directory Integrator server is of version *version number*. Some of the features of the Administration and Monitoring Console will not be available or will not work correctly with this server version.

Explanation

The Administration and Monitoring Console displayed an incompatible server version warning.

Action

It is recommended to use the same version of IBM Security Directory Integrator server as the version of the Administration and Monitoring Console.

CTGDIW280I Thread created for cleanup of Action Manager related logs.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW281E AssemblyLine required to create or update the Start AssemblyLine Action.

Explanation

The user did not select any AssemblyLines. It is mandatory to select an AssemblyLine.

Action

Enter an AssemblyLine.

CTGDIW282E AssemblyLine is required to create or update the Stop AssemblyLine Action.

Explanation

The user did not select any AssemblyLines. It is mandatory to select an AssemblyLine.

Action

Enter an AssemblyLine.

CTGDIW283E Notify event actions could not be stored. See the logs for errors.

Explanation

Notify event action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW284E Enable/Disable rule action could not be stored. See the logs for errors.

Explanation

Enable/Disable rule action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW285E Start AssemblyLine action could not be stored. See the logs for errors.

Explanation

Start AssemblyLine action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW286E Stop AssemblyLine action could not be stored. See the logs for errors.

Explanation

Stop AssemblyLine action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW287E Modify Property action could not be stored. See the logs for errors.

Explanation

Modify Property action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW288E Write Log action could not be stored. See the logs for errors.

Explanation

Write Log action could not be stored in database. See the error logs for details, and the list of actions in the previous page, to see the actions which were stored.

Action

See the error logs, or try again.

CTGDIW289E Execute rule action could not be stored. See the logs for errors.

Explanation

Execute rule action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW290E Copy property value action could not be stored. See the logs for errors.

Explanation

Copy property value action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW291E The Notify event action could not be updated. See the logs for errors.

Explanation

The Notify event action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW292E The Enable/Disable Rule action could not be updated. See the logs for errors.

Explanation

The Enable/Disable Rule action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW293E The Start AssemblyLine action could not be updated. See the logs for errors.

Explanation

The Start AssemblyLine action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW294E The Stop AssemblyLine action could not be updated. See the logs for errors.

Explanation

The Stop AssemblyLine action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW295E The Modify Property action could not be updated. See the logs for errors.

Explanation

The Modify Property action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW296E The Write Log action could not be updated. See the Administration and Monitoring Console logs for errors.

Explanation

The Write Log action information could not be updated in the Administration and Monitoring Console database. To see the list of actions which were successfully stored go to the previous the Administration and Monitoring Console panel. See the Administration and Monitoring Console logs for more information on the error.

Action

See the error logs, or try again.

CTGDIW297E The Execute Rule action could not be updated. See the logs for errors.

Explanation

The Execute Rule action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW298E The Copy property Value action could not be updated. See the logs for errors.

Explanation

The Copy property value action information could not be updated in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW299E Select a Tombstone entry from the table to view Tombstone details.

Explanation

The user clicked View Details without selecting any tombstone entry from the table.

Action

Select a Tombstone entry from the table to view details.

CTGDIW300E Unable to determine Action Manager Status.

Explanation

The Administration and Monitoring Console was unable to determine Action Manager status. There was some database error while retrieving the Action Manager status.

Action

See the Administration and Monitoring Console logs for error details and try again.

CTGDIW301E Click on Clear menu option to clear Action Manager Triggered Status.

Explanation

Click on Clear menu option to clear Action Manager Triggered Status and set it to Action Manager not triggered state.

Action

Click on Clear menu option to clear Action Manager Triggered Status.

CTGDIW302E Unable to obtain input parameters for AssemblyLine *AssemblyLine name*.

Explanation

Unable to obtain handle to AssemblyLine object. This may happen if the Config instance associated with the AssemblyLine is not loaded on the server.

Action

See the Administration and Monitoring Console logs for error details. Check the Config containing this AssemblyLine is loaded on the server, and try again.

CTGDIW303I There are no input parameters needed for the chosen AssemblyLine Operation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW304E The AssemblyLine *AssemblyLine name* could not be started. Check the logs for errors.

Explanation

Due to an internal error, or remote IBM Security Directory Integrator server error, the starting of the specified AssemblyLine failed. This might also happen if the AssemblyLine was already started by some other process.

Action

Check the error logs or try again.

CTGDIW305E The specified Entry string in AssemblyLine Input parameter panel is incorrectly constructed: *string*

Explanation

An Entry string in the AssemblyLine operation input paramters has to be of the format: Entry[attr1:value1;attr2:value2;attr3:value3]. Use a semicolon to seperate attribute-value pairs and use a colon to seperate an attribute from its value. Example: Entry[ldapserver:myserver.com]
Entry[ldapserver:myserver.com;ldapport:389]
Entry[ldapserver:myserver.com;ldapserver:anotherserver.com;ldapport:389] (This is an example of a multi valued attribute). The Administration and Monitoring Console encountered an entry string that could not be parsed as per the above format.

Action

Enter the Entry string in the required format.

CTGDIW306E An error occured while attempting to parse the string: *string*.

Explanation

An Entry string in the AssemblyLine operation input paramters has to be of the format: Entry[attr1:value1;attr2:value2;attr3:value3]. Use a semicolon to seperate attribute-value pairs and use a colon to seperate an attribute from its value. Example: Entry[ldapserver:myserver.com]
Entry[ldapserver:myserver.com;ldapport:389]
Entry[ldapserver:myserver.com;ldapserver:anotherserver.com;ldapport:389] (This is an example of a multi valued attribute). The Administration and Monitoring Console encountered an entry string that could not be parsed as per the above format.

Action

Enter the Entry string in the required format and try again.

CTGDIW307E An error occured while attempting to parse the string: *string*.

Explanation

An Entry string in the AssemblyLine operation input paramters has to be of the format: Entry[attr1:value1;attr2:value2;attr3:value3]. Use a semicolon to seperate attribute-value pairs and use a colon to seperate an attribute from its value. Example: Entry[ldapserver:myserver.com]
Entry[ldapserver:myserver.com;ldapport:389]
Entry[ldapserver:myserver.com;ldapserver:anotherserver.com;ldapport:389] (This is an example of a multi valued attribute). The Administration and Monitoring Console encountered an entry string that could not be parsed as per the above format.

Action

Enter the Entry string in the required format and try again.

CTGDIW308E Unable to obtain input parameters for AssemblyLine *AssemblyLine name*.

Explanation

Unable to obtain handle to AssemblyLine object. This may happen if the Config instance associated with the AssemblyLine is not loaded on the server. See error logs for details.

Action

Check the Config containing this AssemblyLine is loaded on the server, and try again.

CTGDIW309E AssemblyLine required to create or update Start AssemblyLine Action.

Explanation

The user did not mention any AssemblyLines. AssemblyLine Operations cannot be discovered or configured without specifying an AssemblyLine to work with.

Action

Enter an AssemblyLine.

CTGDIW310E The session with the chosen remote server could not be established.

Explanation

A session could not be established with the remote IBM Security Directory Integrator server. Discovering AssemblyLine operations is not possible until the specified IBM Security Directory Integrator server is running, and the Config instance is loaded on that server.

Action

Ensure the the remote API engine is running on the remote server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW311E The Config *Config* is not loaded on the server. The Config needs to be loaded for the Administration and Monitoring Console to discover the AssemblyLine operations. Do you want to Load the Config?

Explanation

The chosen Config is not loaded on the server. Discovering AssemblyLine operations is not possible until the specified Config instance is loaded on the server.

Action

Click OK if you want the specified Config to be loaded, or Cancel to return to the previous screen.

CTGDIW312E Error occurred while trying to start the Config *Config path*.

Explanation

An error occurred while trying to start the Config on the remote server. This might have occurred because the Administration and Monitoring Console was unable to contact the remote server or the Config path might have changed. It can also occur if the specified Config is password protected, and no password was specified in the Config Password field, or an incorrect password was specified in the Config Password field. It might also occur if the selected file is not a valid IBM Security Directory Integrator Config file. See the error logs for more details.

Action

Ensure that the remote Config is valid and that the path is correct. Also ensure that for password protected Configs, the correct password is supplied in the Config Password field. See the error logs for more details, or try again.

CTGDIW313E The AssemblyLine *AssemblyLine name* is not present in the specified Config. Available AssemblyLines: *AssemblyLine list* .

Explanation

The specified AssemblyLine does not exist.

Action

Specify a valid AssemblyLine name.

CTGDIW314E No operations exposed in AssemblyLine *AssemblyLine name*.

Explanation

The specified AssemblyLine does not expose any AssemblyLine operations.

Action

Specify an AssemblyLine that contains operations.

CTGDIW315E Select an operation from the list.

Explanation

The user must select an operation from the list to proceed.

Action

Select one of the available operations or press Cancel to return to the previous screen.

CTGDIW316I There are no input parameters needed for the chosen AssemblyLine Operation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW317E An error occured while attempting to parse the string: *string*.

Explanation

An Entry string in the AssemblyLine operation input paramters has to be of the format: Entry[attr1:value1;attr2:value2;attr3:value3]. Use a semicolon to seperate attribute-value pairs and use a colon to seperate an attribute from its value. Example: Entry[ldapserver:myserver.com]
Entry[ldapserver:myserver.com;ldapport:389]
Entry[ldapserver:myserver.com;ldapserver:anotherserver.com;ldapport:389] (This is an example of a multi valued attribute). The Administration and Monitoring Console encountered an entry string that could not be parsed as per the above format.

Action

Enter the Entry string in the required format and try again.

CTGDIW318E An error occured while attempting to parse the string: *string*.

Explanation

An Entry string in the AssemblyLine operation input paramters has to be of the format: Entry[attr1:value1;attr2:value2;attr3:value3]. Use a semicolon to seperate attribute-value pairs and use a colon to seperate an attribute from its value. Example: Entry[ldapserver:myserver.com]
Entry[ldapserver:myserver.com;ldapport:389]
Entry[ldapserver:myserver.com;ldapserver:anotherserver.com;ldapport:389] (This is an example of a multi valued attribute). The Administration and Monitoring Console encountered an entry string that could not be parsed as per the above format.

Action

Enter the Entry string in the required format and try again.

CTGDIW319E A Config is required to create or update Start AssemblyLine Action.

Explanation

The user did not enter any Configs. It is mandatory for Start AssemblyLine Action to select a Config.

Action

Enter a Config.

CTGDIW320E A Config is required to create or update Stop AssemblyLine Action.

Explanation

The user did not enter any Configs. It is mandatory to select a Config for Stop AssemblyLine Action.

Action

Enter a Config.

CTGDIW321E Select an AssemblyLine to view Logs.

Explanation

The user clicked View Logs without selecting any AssemblyLine.

Action

Select an AssemblyLine and click View Logs.

CTGDIW322E The On property trigger is not supported for Solution Views on IBM Security Directory Integrator 6.0 servers. Select a different trigger.

Explanation

IBM Security Directory Integrator Properties were introduced in IBM Security Directory Integrator 6.1. Therefore, triggers on property values are not supported for Solution Views created for remote IBM Security Directory Integrator 6.0 servers.

Action

Select a different trigger, or use a Solution View created on IBM Security Directory Integrator 6.1 server or above.

CTGDIW323E The Copy IBM Security Directory Integrator Property value Action is not supported for Solution Views on IBM Security Directory Integrator 6.0 servers.

Explanation

IBM Security Directory Integrator Properties were introduced in IBM Security Directory Integrator 6.1. Therefore, actions on properties are not supported for Solution Views created for IBM Security Directory Integrator 6.0 servers.

Action

Select a different action, or use a Solution View created on IBM Security Directory Integrator 6.1 server or above.

CTGDIW324E The Modify IBM Security Directory Integrator Property Action is not supported for Solution Views on IBM Security Directory Integrator 6.0 servers.

Explanation

IBM Security Directory Integrator Properties were introduced in IBM Security Directory Integrator 6.1. Therefore, actions on properties are not supported for Solution Views created for IBM Security Directory Integrator 6.0 servers.

Action

Select a different action, or use a Solution View created on IBM Security Directory Integrator 6.1 server or above.

CTGDIW325E The Notify event Action is not supported for IBM Security Directory Integrator 6.0 Solution Views.

Explanation

The sendEventNotification API for sending events remotely to a IBM Security Directory Integrator Server was introduced in IBM Security Directory Integrator 6.1. Notify event action is therfore not supported for Solution Views on IBM Security Directory Integrator 6.0 servers.

Action

Select a different action, or use a Solution View created on IBM Security Directory Integrator 6.1 server or above.

CTGDIW326E The IBM Security Directory Integrator server corresponding to the selected Solution View is not running. It is mandatory for the remote IBM Security Directory Integrator server to be running for adding rules.

Explanation

Creation of rules in the Administration and Monitoring Console requires that the version of the IBM Security Directory Integrator server be known. The Administration and Monitoring Console can determine the server version only for running IBM Security Directory Integrator servers. For this reason, it is mandatory that the remote IBM Security Directory Integrator server be running for creating/editing rules for the Solution View. Depending on the server version, certain features are enabled or disabled in the Administration and Monitoring Console.

Action

Verify that the remote IBM Security Directory Integrator server corresponding to the Solution View is running.

CTGDIW327E The IBM Security Directory Integrator server corresponding to the selected Solution View is not running.It is mandatory for the remote IBM Security Directory Integrator server to be running for editing rules.

Explanation

Editing of rules in the Administration and Monitoring Console requires that the version of the IBM Security Directory Integrator server be known. The Administration and Monitoring Console can determins the server version only for running IBM Security Directory Integrator servers. For this reason, it is mandatory that the remote IBM Security Directory Integrator server be running for creating/editing rules for the Solution View. Depending on the server version, certain features are enabled or disabled in the Administration and Monitoring Console.

Action

Verify that the remote IBM Security Directory Integrator server corresponding to the Solution View is running.

CTGDIW328E The IBM Security Directory Integrator server corresponding to the selected Solution View is a IBM Security Directory Integrator 6.0 server. IBM Security Directory Integrator Properties feature is not available in IBM Security Directory Integrator 6.0 Solution Views.

Explanation

IBM Security Directory Integrator Properties were introduced in IBM Security Directory Integrator 6.1. For this reason, the Administration and Monitoring Console does not support properties feature.

Action

Select a Solution View that corresponds to a IBM Security Directory Integrator 6.1 or later server version.

CTGDIW329E Unable to obtain the SERVER_ID (primary key) for the recently added server.

Explanation

Most probably, due to an internal database error the Administration and Monitoring Console was unable to obtain the ID for the recently added Server.

Action

See the accompanying exception trace. Try again.

CTGDIW330E Unable to insert row into AM_SERVER_UPDATE_DETAILS table.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to make an entry in the AM_SERVER_UPDATE_DETAILS table. This table is used by Action Manager to monitor real-time updates to servers registered with the Administration and Monitoring Console.

Action

See the accompanying exception trace. Try again.

CTGDIW331E Could not obtain an instance of Tombstone Manager. It might not be running on the remote server.

Explanation

The Administration and Monitoring Console was unable to obtain a connection to the Tombstone Manager on the remote server.

Action

Verify the tombstone manager is configured to be running. Check the error logs for the exact error. Start the tombstone manager on the remote IBM Security Directory Integrator server and try again.

CTGDIW332E No AssemblyLines found in Config. Atleast one AssemblyLine must be present to create a Solution View.

Explanation

There are no AssemblyLines in the specified Config. Atleast one AssemblyLine must be present in the Config for creating a new Solution View.

Action

Choose a Config that has at least one AssemblyLine and try again.

CTGDIW333E Unable to read the AssemblyLine information from Config.

Explanation

The Administration and Monitoring Console was unable to read the AssemblyLine information from the Config. This may have occured because of some internal error in IBM Security Directory Integrator.

Action

Check the Administration and Monitoring Console logs and try again.

CTGDIW334E Unable to get published Solution details from Config.

Explanation

The Administration and Monitoring Console was unable to read the published Solution information from the Config. This may have occured because of some internal error in IBM Security Directory Integrator, or if the Config was corrupted, or if the solution was not published correctly.

Action

Check the Solution details of the Config in Config Editor. Also check the Administration and Monitoring Console logs and try again.

CTGDIW335I Simple create of Solution View *Solution View name* successful.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW336E The Solution View could not be created. Check the logs for errors.

Explanation

The Administration and Monitoring Console was unable to quick create the Solution View in the Administration and Monitoring Console database. If Simple Create from a solution was chosen, then one of the following may have occured: 1) The solution details could not be read by the Administration and Monitoring Console. 2) The AssemblyLines exposed in Solution, do not exist in Config. Alternatively, an internal error may have occured in the Administration and Monitoring Console due to which the Administration and Monitoring Console was unable to read the Config details or a database error may have occured.

Action

See the Administration and Monitoring Console logs for more details. Also try creating the Solution View again.

CTGDIW337I Detected remote IBM Security Directory Integrator Server version *version number*. Skipping Select Properties step.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW338I Creating Solution View *Solution View name* from Published Solution. Config Instance ID: *Config ID*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW339E Unable to determine AssemblyLines in Config.

Explanation

The Administration and Monitoring Console was unable to determine the AssemblyLines in the Config. This may occur if the Config is corrupted, or if there are no AssemblyLines in the Config.

Action

See the Administration and Monitoring Console logs for more details. Check the Config file in CE. Also try creating the Solution View again.

CTGDIW340E No AssemblyLines found in solution. Cannot create Solution View from solution.

Explanation

There are no AssemblyLines exposed in the solution. A Solution View cannot be created unless there is at least one AssemblyLine in the solution.

Action

Modify the solution in Config Editor to expose at least one AssemblyLine and try again. Alternatively try creating the Solution View manually.

CTGDIW341E None of the AssemblyLines exposed in the solution exist in Config. Cannot create Solution View from solution.

Explanation

None of the AssemblyLines exposed in the solution actually exist in the Config. This could occur if the AssemblyLines in Config were removed or modified after creating the solution in Config Editor. The Administration and Monitoring Console cannot create a Solution View with AssemblyLines that are not actually found in the Config.

Action

Modify the solution in Config Editor to expose at least one valid AssemblyLine and try again. Alternatively try creating the Solution View manually.

CTGDIW342E Unable to insert into CONFIG_VIEW_MASTER table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW343E Unable to obtain CV_ID (primary key) value for Solution View *Solution View name*

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW344E Unable to insert into CONFIG_VIEW_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW345E Unable to obtain handle to IBM Security Directory Integrator Properties objects.

Explanation

See message. The Administration and Monitoring Console encountered an internal IBM Security Directory Integrator Properties related error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW346E Unable to insert into CONFIG_VIEW_HEALTH_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW347E Unable to determine AssemblyLines in Config.

Explanation

The Administration and Monitoring Console was unable to determine the AssemblyLines in the Config. This may occur if the Config is corrupted, or if there are no AssemblyLines in the Config.

Action

See the Administration and Monitoring Console logs for more details. Check the Config file in CE. Also try creating the Solution View again.

CTGDIW348E Unable to insert into CONFIG_VIEW_MASTER table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW349E Unable to obtain CV_ID (primary key) value for Solution View *Solution View name*

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW350E Unable to insert into CONFIG_VIEW_AL_DETAILS table in database.

Explanation

See message. The Administration and Monitoring Console encountered an internal database error while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW351E Unable to get a handle to IBM Security Directory Integrator Properties object.

Explanation

See message. The Administration and Monitoring Console encountered an internal error related to IBM Security Directory Integrator Properties while creating a Solution View.

Action

See the accompanying exception for more details. Try again.

CTGDIW352E Unable to establish connection to the remote IBM Security Directory Integrator Server. Viewing of AssemblyLine tombstones, AssemblyLine Logs and Manage Properties functionality will not be available.

Explanation

The Administration and Monitoring Console was unable to connect to the remote IBM Security Directory Integrator Server associated with the Solution View. View AssemblyLine Tombstones, View AssemblyLine Logs and Manage Properties functionality will not be available.

Action

Check the remote server associated with this Solution View. Ensure the the remote API engine is running on the remote server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW353W Solution is disabled in Config *config instance*.

Explanation

The chosen Config has its solution disabled. The Administration and Monitoring Console cannot create a Solution View based on a disabled solution.

Action

If a Solution View is required to be created using a published solution, then specify a config that has a solution that has not been disabled. Alternatively, from the Config Editor, enabled the solution checkbox for the Config.

CTGDIW354E Rule with name *Rule Name* already exists for this Solution View.

Explanation

A rule with the same name already exists for this Solution View. Duplicate rule names are not allowed for the same Solution View.

Action

Specify a unique rule name.

CTGDIW355E Polling Interval not specified.

Explanation

For the Query AssemblyLine result trigger, the Polling Interval is mandatory. The user did not specify the Polling Interval.

Action

Specify the Polling Interval.

CTGDIW356W Select the log file(s) to delete.

Explanation

Select the log file(s) which are to be deleted. The user has not selected a single log file.

Action

Delete the log file by selecting the check boxes opposite the log file names that are to be deleted.

CTGDIW357W Delete the selected logs?

Explanation

All the log files which are selected will be deleted on clicking on the "Ok" button.

Action

The confirmation dialog with a warning message is displayed since deletion of logs is an irreversible action. The log files are permanently deleted from the file system. All the selected log files for the configuration will be deleted from the servers system_logs directory if the "OK" button is clicked. However if the user wants to cancel the action, the user can click on the "Cancel" button.

CTGDIW358E Error occurred while deleting the log files.

Explanation

An error has occurred while deleting the log files for the AssemblyLine.

Action

An error has occurred while deleting the log files. For determining the actual reason for this error refer the IBM Security Directory Integrator server's log file.

CTGDIW359E Error *error message* occurred while deleting the log files.

Explanation

An error has occurred while deleting the log files for the AssemblyLine. The reason for the error is mentioned in the IBM Security Directory Integrator server's log file.

Action

An error has occurred while deleting the log files. The log message gives the reason for the error.

CTGDIW360W All the selected log files were not deleted.

Explanation

Due to some error, all the selected log files were not deleted.

Action

Due to some error, all the selected log files were not deleted. For details on which log files were not deleted refer the server log file.

CTGDIW361W The log files which were not deleted are : *log file names*

Explanation

Due to some error, all the selected log files were not deleted.

Action

Due to some error, all the selected log files were not deleted.

CTGDIW362W Delete log is not supported for IBM Security Directory Integrator Server version *version number*

Explanation

The delete log feature and API was added in IBM Security Directory Integrator 7.0 release. It is not supported by earlier IBM Security Directory Integrator server versions.

Action

The delete log functionality makes a call to an API which is present with only IBM Security Directory Integrator 7.0 server. Hence the functionality is not available for the earlier IBM Security Directory Integrator server versions.

CTGDIW363W A session could not be established with the remote IBM Security Directory Integrator server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

Explanation

A new IBM Security Directory Integrator server cannot be added because the Administration and Monitoring Console was unable to establish connection with the server. This might be because the server is down, or the Remote Server API engine is not running on the remote server or the connection settings to the server are incorrect.

Action

Ensure the the remote API engine is running on the remote server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW364W A session could not be established with the remote IBM Security Directory Integrator server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

Explanation

The Server ID cannot be changed because the Administration and Monitoring Console was unable to establish connection with the server. The inability to establish a connection could be caused by any of these three conditions: The server could be down. The Remote Server API engine may not be running on the remote

server. The connection settings to the server may be incorrect.

Action

Ensure the the remote API engine is running on the remote server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW365W Decimal digits cannot be entered in the field *filed name*.

Explanation

A user cannot enter decimal values in the specified field.

Action

The user should enter only whole numbers,that is integers in the specified field.

CTGDIW366W Do you want to change the ServerID of *server name* from *Old Server ID* to *server id*?

Explanation

Associating the Server ID of a IBM Security Directory Integrator Server with a different instance could invalidate the Solution Views and rules for this server.

Action

If you want to change the Server ID, click OK, otherwise click Cancel.

CTGDIW367E Unable to change the ServerID. A IBM Security Directory Integrator Server entry with the same Server ID, Hostname and Port has been already added. Check the logs for errors.

Explanation

The attributes Hostname, Server ID and Port should be unique for each IBM Security Directory Integrator server entry. A new IBM Security Directory Integrator Server cannot be added if this constraint is violated.

Action

Change the Server ID of the server that need to be added or delete the existing entry in the Administration and Monitoring Console and try again. The Server ID can be changed by editing the global.properties or solution.properties and by setting the com.ibm.di.server.id property.

CTGDIW368E Incorrect config password. Could not load the Config *Config path* .

Explanation

An incorrect password is specified for the password protected config.

Action

Ensure that for password protected Configs, the correct password is supplied in the Config Password field. Specify the correct password and try again.

CTGDIW369E The Administration and Monitoring Console is unable to obtain ISC role information.

Explanation

The Administration and Monitoring Console is unable to obtain role information because of an internal error.

Action

See the accompanying exception for more details.

CTGDIW370E The AssemblyLine *AssemblyLine name* is already running.

Explanation

The user chose to start an AssemblyLine in a simulate mode that is already running.

Action

Select a stopped AssemblyLine and click Start AssemblyLine in simulate mode.

CTGDIW371E The AssemblyLine *AssemblyLine name* could not be started. Check the logs for errors.

Explanation

Due to an internal error, or remote IBM Security Directory Integrator server error, the starting of the specified AssemblyLine failed.

Action

Check the error logs or try again.

CTGDIW372E Select an AssemblyLine to start.

Explanation

The user clicked on Start AssemblyLine in simulate mode without selecting any AssemblyLine. It is mandatory to specify which AssemblyLine to start.

Action

Select an AssemblyLine and click Start AssemblyLine in simulate mode.

CTGDIW373E The AssemblyLine *AssemblyLine name* is already running.

Explanation

The user chose to start an AssemblyLine that is already running.

Action

Select a stopped AssemblyLine and click Start AL

CTGDIW374E The AssemblyLine *AssemblyLine name* could not be started. Check the logs for errors.

Explanation

Due to an internal error, or remote IBM Security Directory Integrator server error, the starting of the specified AssemblyLine failed.

Action

Check the error logs or try again.

CTGDIW375E Select an AssemblyLine to start.

Explanation

The user clicked on Start AssemblyLine without selecting any AssemblyLine. It is mandatory to specify which AssemblyLine to start.

Action

Select an AssemblyLine and click Start AL.

CTGDIW376E The AssemblyLine *AssemblyLine name* is already running.

Explanation

The user chose to start an AssemblyLine in a simulate mode that is already running.

Action

Select a stopped AssemblyLine and click Start AssemblyLine in simulate mode.

CTGDIW377E The AssemblyLine *AssemblyLine name* could not be started. Check the logs for errors.

Explanation

Due to an internal error, or remote IBM Security Directory Integrator server error, the starting of the specified AssemblyLine failed.

Action

Check the error logs or try again.

CTGDIW378E Select an AssemblyLine to start.

Explanation

The user clicked on Start AssemblyLine in simulate mode without selecting any AssemblyLine. It is mandatory to specify which AssemblyLine to start.

Action

Select an AssemblyLine and click Start AssemblyLine in simulate mode.

CTGDIW379E An error has occurred while reading the stash file: *exception* .

Explanation

The specified error has occurred while reading the stash file.

Action

See the exception for more information.

CTGDIW380E No password has been found in the Administration and Monitoring Console stash file.

Explanation

The Administration and Monitoring Console stash file must contain the password of the Administration and Monitoring Console keystore (and optionally the password of the key).

Action

Provide a password in the stash file.

CTGDIW381I The key password is not present in the stash file. The keystore password will be used.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW382E Unable to recover the key from the keystore *keystore*. Exception occurred: *exception*

Explanation

The Administration and Monitoring Console was not able to retrieve the entry from the keystore.

Action

Ensure that the keystore is valid and is not corrupted.

CTGDIW383E The keystore *keystore* has no entry for the alias *alias*.

Explanation

The keystore does not have an entry corresponding to the alias provided.

Action

Ensure that the keystore is correct and is not corrupted.

CTGDIW384E The key store password is NULL or empty.

Explanation

This error occurs when the key store password passed to the createStashFile method is null or an empty string.

Action

Specify valid key store password

CTGDIW385E Stash file already read.

Explanation

This error occurs when trying to read the stash file more than once.

Action

Check the configuration and if the problem persists contact IBM support.

CTGDIW386E Stash file *file name* not found.

Explanation

This error occurs when trying to read the stash file but the specified file is not present in the Administration and Monitoring Console web application.

Action

The Administration and Monitoring Console war file needs to be bundled with a new stash file and deployed.

CTGDIW387E Input Stream is NULL.

Explanation

This error occurs when the input stream passed to the readArray method is null.

Action

Contact IBM support.

CTGDIW388E The key password or keystore password failed a size validation check. Unable to read in the key password or the keystore password from the stash file.

Explanation

The correct size of the key password or keystore password was determined before reading their values from the stash file. The size of one of the values read in did not match the specified size and failed the validation check.

Action

Verify that the stash file is valid and has not been corrupted. Verify the stash file has not been changed by a user or process while the application was running.

CTGDIW389E Output Stream is NULL.

Explanation

This error occurs when the output stream passed to the writeArray method is null.

Action

Contact IBM support.

CTGDIW390E Byte array is NULL.

Explanation

This error occurs when the byte array passed to the writeArray method is null.

Action

Contact IBM support.

CTGDIW391E Encrypted password data too long: *length*.

Explanation

This error occurs when the byte array passed to the writeArray is longer than 255 characters.

Action

Contact IBM support.

CTGDIW392E No Provider specified for the stash file.

Explanation

Specify the provider to be used by the stash file.

Action

Refer the usage of the stash file command.

CTGDIW393I Stash file *file name* has been created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW394I Could not create stash file. Exception occurred: *exception*

Explanation

See message.

Action

See the exception message for more information.

CTGDIW395I Usage: StashFile keyStorePassword [keyPassword [securityProviderClass]]

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW396E The Administration and Monitoring Console failed to initialize the encrypt/decrypt keystore.

Explanation

The keystore used for encryption/decryption was not initialized correctly because of the exception.

Action

See the exception message for more information.

CTGDIW397E Select a property to modify.

Explanation

The user clicked Modify without selecting a property. Select a property before clicking Modify.

Action

Select a property from the list and click Modify.

CTGDIW398E Select a property to delete.

Explanation

The user did not select a property and press delete. You must select a property before clicking Delete.

Action

Select a property from the list and click Delete.

CTGDIW399E Delete property *property name*?

Explanation

Confirm you want to delete the specified property.

Action

If you want to delete the property, click OK, otherwise, click Cancel.

CTGDIW400E Config is not specified for the config load trigger.

Explanation

The config load trigger type requires a config.

Action

Specify config in trigger.

CTGDIW401E Config is not specified for the Config unload trigger.

Explanation

The config unload trigger type requires a config.

Action

Specify config in trigger.

CTGDIW402E Decimal digits cannot be entered in the *Interval* field.

Explanation

A user cannot enter decimal values in the specified field.

Action

The user should enter only whole numbers, that is integers in the specified field.

CTGDIW403E Illegal interval value specified. Value must be greater than zero.

Explanation

For the Timer trigger, the interval value must be greater than zero. The user entered an illegal value, or did not modify the value.

Action

Specify a valid interval value.

CTGDIW404E Failed to retrieve trigger details. Refer to the logs for additional information.

Explanation

An error occured while retrieving the action manager trigger details. Please check the logs for additional information.

Action

Check if Action Manager is running. Check logs for additional information.

CTGDIW405E Failed to retrieve trigger thread details. Refer to the logs for additional information

Explanation

An error occured while retrieving the Action Manager trigger thread details. Please check the logs for additional information.

Action

Check if Action Manager is running. Check logs for additional information.

CTGDIW406E Not able to establish session with the action manager.

Explanation

An error occured while estblishing session with Action Manager. Please check the logs for additional information.

Action

Check if Action Manager is running. Check logs for additional information.

CTGDIW407E Failed to retrieve the Acton Manager boot time. Refer to the logs for additional information.

Explanation

Refer to the logs for additional information.

Action

Check if Action Manager is running. Check the logs for additional information.

CTGDIW408E The selected Solution View is marked for auto update. Ensure that auto update is disabled to modify the Solution View.

Explanation

Editing a Solution View is not possible if the Solution View is marked for auto update.

Action

Disable Auto Update for the Solution View by selecting "Disable Auto Update" from the context menu.

CTGDIW409I The selected Solution View has been refreshed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW410E The selected Solution View could not be refreshed. Check the logs for errors.

Explanation

The Administration and Monitoring Console was unable to refresh the Solution View in the Administration and Monitoring Console database. One of the following may have occured: 1) The solution details could not be read by the Administration and Monitoring Console. 2) The AssemblyLines exposed in the Solution do not exist in the Config. 3) Alternatively, an internal error may have occured in the Administration and Monitoring Console. The internal error may have rendered the Administration and Monitoring Console unable to read the Config details, or a database error may have occured

Action

See the the Administration and Monitoring Console logs for more details. Also try refreshing the Solution View again.

CTGDIW411E The trigger value for the local Action Manager variable has not been specified.

Explanation

For the On local variable trigger, the value field is mandatory. The user did not specify this value.

Action

Specify the trigger value for the Action Manager local variable.

CTGDIW412E Modify local variable action could not be stored. See the logs for errors.

Explanation

Modify local variable action could not be stored in database. To see which actions were stored successfully, go to the previous Administration and Monitoring Console window. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW413E The Modify local variable action could not be updated. See the logs for errors.

Explanation

The Modify local variable action information could not be updated in the database. To see which actions were stored successfully, go to the previous Administration and Monitoring Console window. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW414E Name or value for the local variable has not been specified in trigger.

Explanation

For the local variable, the name and initial value field is mandatory. The user did not specify these values.

Action

Specify the name and the initial value for the local variable.

CTGDIW415E The local variable name already exists.

Explanation

Local variable names must be unique. The name specified by the user already exists.

Action

Specify a different name for the local variable or remove the existing one.

CTGDIW416E Select a local variable to delete.

Explanation

No local variable was selected for deletion.

Action

Select a local variable and click Delete.

CTGDIW417E Select a local variable to modify.

Explanation

No local variable was selected for editing.

Action

Select a local variable and click Modify.

CTGDIW418I Rule *rule Name* executed successfully. The following actions were executed: *actions list*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW419E Rule *rule Name* execution failed. Refer to the logs for additional information.

Explanation

Some action may not have executed successfully. Refer to the logs for more information.

Action

Some action may not have executed successfully. Refer to the logs for more information.

CTGDIW420E The Administration and Monitoring Console was unable to obtain running config instances for the local IBM Security Directory Integrator Server.

Explanation

The Administration and Monitoring Console was unable to otain running config instances for the local IBM Security Directory Integrator server. Ensure that at least one config instance is running on the local IBM Security Directory Integrator server.

Action

See the Administration and Monitoring Console logs for more details.

CTGDIW421I Solution View *Solution View name* created successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW422E A unkown error has occurred. See error logs for more details.

Explanation

The Administration and Monitoring Console was unable to create a Solution View or to redirect control to the Simple Create window. One of the following may have occured: 1) Config instances are not loaded on the local IBM Security Directory Integrator server. 2) The AssemblyLines exposed in Solution, do not exist in Config. 3) A Solution View with a similar name already exists. 4) Alternatively, an internal error may have occured in the Administration and Monitoring Console. The internal error may have rendered the Administration and Monitoring Console unable to read the Config details, or a database error may have occured.

Action

See the error logs, or try again.

CTGDIW423E An exception occurred while verifying the Action Manager status. Refer to the logs for additional information.

Explanation

Check if the action manager RMI service is started on the host and port mentioned in the amc.properties. For additional information refer to the logs.

Action

Refer to the logs for additional information.

CTGDIW424I No thread statistics data were retrieved from Action Manager. This could occur because there are no rules configured in Action Manager.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW425I None of the Action Manager rules was triggered in the time interval *time interval*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW426W The Action Manager RMI Host is not set in the amc.properties file. As a result the default host *hostname* will be used.

Explanation

The am.api.host property is not set in the amc.properties file. The Administration and Monitoring Console is using the default host that is localhost.

Action

Set the am.api.host property in the amc.properties file.

CTGDIW427W The Action Manager RMI Port is not set in the amc.properties file. As a result the default port *port number* will beused.

Explanation

The am.api.port property is not set in the amc.properties file. The Administration and Monitoring Console is using the default port.

Action

Set the am.api.port property in the amc.properties file.

CTGDIW428W Not able to establish a connection with the Action Manager. Action Manager Session is null.

Explanation

The Action Manager might not be running. Or the host and port specified in the amc.properties file may be incorrect.

Action

Verify if the action manager is running on the same host and port as specified in the amc.properties file.

CTGDIW429E An exception occurred while triggerring the rule *rule name*. Refer to the logs for additional information.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW430E An exception occurred while initializing the AMStatus Bean. Refer to the logs for additional information.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW431E The RMI object *remote object name* is not bound to the RMI Registry.

Explanation

The RMI remote object name is not the same.

Action

Verify whether the name of the remote object which is bound to the registry is the same as the one mentioned in exception.

CTGDIW432E The RMI registry is not reachable on host: *host* and port: *port*. The error message is *error*

Explanation

The RMI registry might be started on a different host and port. Therefore, the Administration and Monitoring Console is not able to connect to the Action Manager RMI Registry.

Action

Verify that the Action Manager RMI Registry is started on the correct host and port as expected by the Administration and Monitoring Console.

CTGDIW433E The RMI URL is malformed: *url*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW434I The rollback action for the rule *rule name* has completed successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW435I The rollback action for the rule *rule name* failed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW436E The rollback action for the rule *rule name* failed. Refer to the logs for additional information.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW437E A config file is required to start a config using the run name.

Explanation

Selecting a config file is mandatory.

Action

Select a config file.

CTGDIW438E Error occurred while trying to load the config *Config path*.

Explanation

An error occurred while trying to load the config on the remote server. This might have occurred because the Administration and Monitoring Console was unable to

contact the remote server or because the config path might have changed. An error might also occur if the selected file is not a valid IBM Security Directory Integrator config file or if a config is already started using the run name that has been specified. See the error logs for more details.

Action

Ensure that the remote config is valid and that the path is correct. Also try using a different config run name. See the error logs for more details.

CTGDIW439E Incorrect or no config password. Could not load the property stores associated with config *Config path* .

Explanation

No password or an incorrect password is specified for the password protected config.

Action

Ensure that for password protected configs, the correct password is supplied in the Config Password field. Specify the correct password and try again.

CTGDIW440E Error occurred while trying to load the config *Config path* to display the property stores associated with it..

Explanation

An error occurred while trying to load the config on the remote server. This might have occurred because the Administration and Monitoring Console was unable to contact the remote server or because the config path might have changed. An error might also occur if the selected file is not a valid IBM Security Directory Integrator config file. See the error logs for more details.

Action

Ensure that the remote config is valid and that the path is correct. See the error logs for more details.

CTGDIW441E Insufficient rights to perform config load task. for the selected Config instance *Config instance*.

Explanation

The user chose to perform a config load without having config admin privilege to any associated Solution View. Only when a user has config admin privilege to a particular Solution View which is associated with the chosen config instance, can the user perform the load operation for that config instance. Otherwise, the user must be the console administrator.

Action

Select an authorized config instance, or login using a user id with appropriate authority. Alternatively, login as Console Administrator and then try again.

CTGDIW442E Action of type 'Send email' could not be stored. See the logs for errors.

Explanation

Send email action could not be stored in database. To see which actions were stored successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW443E Action of type 'Send email' could not be updated. See the logs for errors.

Explanation

The Send email action could not be updated in database. To see which actions were updated successfully, go to the previous panel of the Administration and Monitoring Console. See the Administration and Monitoring Console logs for error details.

Action

See the error logs, or try again.

CTGDIW444E The recipient email address is invalid.

Explanation

The recipient email address is invalid.

Action

Provide a valid email address for the recipient.

CTGDIW445W Do you want to delete the tombstones for the AssemblyLine *AssemblyLine name* ?

Explanation

A confirmation is requested from the user if the selected tombstones are to be deleted.

Action

If the tombstones are to be deleted click OK. If you do not want to delete the tombstones click Cancel.

CTGDIW446E Unable to load the amc.properties file.

Explanation

See message.

Action

See the Administration and Monitoring Console logs for error details.

CTGDIW447E The Administration and Monitoring Console is unable to delete AssemblyLines associated with the Solution View.

Explanation

The Administration and Monitoring Console is unable to delete AssemblyLines associated with the Solution View.

Action

See the Administration and Monitoring Console logs for error details.

CTGDIW448W Do you want to delete the tombstones with GUID *GUID*?

Explanation

A confirmation is requested from the user whether the selected tombstone is to be deleted.

Action

If the tombstone is to be deleted click OK and if not click Cancel.

CTGDIW449E An error occurred while deleting the tombstones: *error*. Refer to the exception stack trace for more details.

Explanation

There was an error while deleting the tombstone(s).

Action

There was an error while deleting the tombstone(s). Refer to the exception stack trace in logs for more details.

CTGDIW450I The properties file *file name* loaded successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW451I Administration and Monitoring Console database type property set to *database type*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW452I The Administration and Monitoring Console is connected to database *database name* on host *host name* using port *port number*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW453I The jdbc driver *driver name* is loaded successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW454I The conf directory path: *directory path*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW455I Loading schema file *file name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW456W The property amc.db.type is not set and hence setting the database type to *file name*.

Explanation

The property amc.db.type is not set, hence defaulting to the default database type.

Action

Ensure the amc.db.type property is set to a valid value.

CTGDIW457W The properties file *file name* does not exist.

Explanation

The property amc.db.type is not set and will be set to the default database type.

Action

Ensure the amc.db.type property is set to a valid value.

CTGDIW458I The database handler class *class name* is used for parsing the XML file and constructing the SQL queries.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW459E No handler found for database *database type* in the properties file *file name*.

Explanation

The database type specified in the amc.db.type property in the amc.properties is not spported by the Administration and Monitoring Console.

Action

The valid database types supported by the Administration and Monitoring Console are Derby, DB2, Oracle and MS SQL Server.

CTGDIW460I DBUtils initialized successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW461I The handler class *class name* is initialized successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW462E The handler class *class name* cannot be found.

Explanation

The handler class cannot be loaded because it was not found in the classpath.

Action

The handler class cannot be found in the classpath, hence it cannot be loaded. Ensure that the handler class is present in the classpath.

CTGDIW463E The handler class *class name* cannot be accessed.

Explanation

See message.

Action

The handler class cannot be accessed because of some security issues. Refer to the logs for additional information.

CTGDIW464E The handler class *class name* cannot be initialized.

Explanation

See message.

Action

The handler class cannot be initialized. Refer to the logs for additional information.

CTGDIW465E An error occurred while parsing the XML file: *error message*.

Explanation

See message.

Action

Refer to the logs for additional information.

CTGDIW466E The XML file *file name* cannot be found.

Explanation

See message.

Action

Refer to the logs for additional information.

CTGDIW467I The SQL Query executed successfully: *SQL query*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW468W The SQL query execution failed: *SQL query*.

Explanation

See message.

Action

Refer to the logs for additional information.

CTGDIW469I SQL query *SQL query* not executed as the database object already exists.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW470E An rrror occurred while initializing the Administration and Monitoring Console database.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW471E An error occurred while inserting the default local server. Refer to the stack trace for more details.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW472E An exception was encountered while processing the XML data.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW473E None of the tombstones have been deleted from the selected delete criteria.

Explanation

No tombstones were deleted matching the specified delete criteria.

Action

Verify whether the tombstone manager is running or verify that the delete criteria specified is valid.

CTGDIW474I Number of tombstones deleted successfully : *number of tombstones*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW475I The Administration and Monitoring Console database XML file path is *file path*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW476I Successfully loaded the jdbc driver *class name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW477I The property amc.db.type is not set in the amc.properties file. Defaulting to Derby Database type.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW478I The database type is set to *type name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW478E Unable to update the database with the values specified in the checkboxes.

Explanation

Due to an internal database error, the Administration and Monitoring Console was unable to update the values of checkboxes in the database.

Action

See the accompanying exception trace for more information and try again.

CTGDIW479W No log files found for AssemblyLine: *AssemblyLine name* and Config: *Config name*

Explanation

The Administration and Monitoring Console was unable to find any log files associated with the specified AssemblyLine.

Action

Verify that a logger is attached to the specified AssemblyLine and that there are log files present. See the accompanying exception and try again.

CTGDIW480W Select the log file(s) to delete.

Explanation

Select the log file(s) which are to be deleted. The user has not selected a single log file.

Action

Delete the log file by selecting the check boxes opposite the names of the log files that are to be deleted.

CTGDIW481W Unable to delete the following log files: *file names*.

Explanation

An error occurred and some of the selected log files were not deleted.

Action

An error occurred and some of the selected log files were not deleted.

CTGDIW482E An error occurred while deleting the log files.

Explanation

An error has occurred while deleting the log files for the AssemblyLine.

Action

An error occurred while deleting the log files. Refer the log file of the IBM Security Directory Integrator server for more information.

CTGDIW483E An error occurred while deleting the log files: *error message*.

Explanation

An error occurred while deleting the log files for the AssemblyLine. The reason for the error is mentioned in the IBM Security Directory Integrator server log file.

Action

An error has occurred while deleting the log files. Refer the error message more information.

CTGDIW484W Delete the selected logs?

Explanation

All the log files which are selected will be deleted on clicking the "Delete" button.

Action

The confirmation window displaying a warning message is displayed because deleting logs is an irreversible action. The log files are permanently deleted from the file system. All the selected log files for the configuration will be deleted from the servers system_logs directory if you click "OK" button. Click "Cancel" button to cancel the action.

CTGDIW485W An error occurred while displaying the log files.

Explanation

An error occurred while displaying the log files.

Action

Refer to the exception stack trace in logs for more details and try again.

CTGDIW486W An error occurred while displaying the log files.

Explanation

An error occurred while displaying the log files.

Action

Refer to the exception stack trace in logs for more details and try again.

CTGDIW487E Unable to establish connection to the remote IBM Security Directory Integrator Server. Log management functionality is not available for the selected Solution View.

Explanation

The Administration and Monitoring Console was unable to connect to the remote IBM Security Directory Integrator Server associated with the Solution View. Log management functionality is not available for the selected Solution View.

Action

Check the remote server associated with this Solution View. Ensure that the remote API engine is running on the remote server. The Administration and Monitoring Console must be able to connect and establish a session with the remote IBM Security Directory Integrator server before it can continue with the current task.

CTGDIW488I This Solution View belongs to a server prior to IBM Security Directory Integrator version 7.0. The user cannot see the log file listing. All log files satisfying the deletion criteria will be deleted when you click delete.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW489W A username and password or keystore and keystore password must be specified in order to log into the remote computer.

Explanation

The user credentials in the form of username and password or keystore and keystore password are required for logging in to the target computer.

Action

Provide the username and password or keystore and keystore password for enabling communication with the target computer.

CTGDIW490W The selected action *action name* is not supported.

Explanation

The selected action is not supported by the Administration and Monitoring Console.

Action

The selected action is not supported by the Administration and Monitoring Console.

CTGDIW491E The Solution View could not be created. Check the logs for errors.

Explanation

The Solution View could not be created. Check the logs for errors.

Action

See the Administration and Monitoring Console logs for more details.

CTGDIW492W The Parent User Task manager object is null and cannot display the panels.

Explanation

The parent utm object is required in order to display the panels. The object is null the panels cannot be displayed.

Action

See the Administration and Monitoring Console logs for more details.

CTGDIW493E The sender email address is invalid.

Explanation

The sender email address is invalid.

Action

Provide a valid email address for the sender.

CTGDIW494I No healthAL details for Solution View: *Solution View name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW495E An error while rolling back database transaction : *error*

Explanation

Check logs for additional information.

Action

Check logs for additional information.

CTGDIW496E The command length exceeds the database column width.

Explanation

The database column length for saving the command is 800 characters. If the command length exceeds 800 characters the Administration and Monitoring Console will not be able to save the command in the database.

Action

Modify the command such that the length of the command is less than 800 characters.

CTGDIW497I The AssemblyLine *Solution View name* has no tombstones to be deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW498E An error *error* occurred while initializing the Adinistration and Monitoring Console security.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW499E An error *error* occurred while connecting to Action Manager.

Explanation

Verify if Action Manager is running on the port specified in amc.properties file.

Action

Verify if Action Manager is running on the port specified in amc.properties file.

CTGDIW500E An error *error* occurred while writing the SQL file.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW501I Inside the tokenizeSQLCommands method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW502I The total number of sql queries generated is *number of sql queries*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW503I The handler property name for getting the handler class is *property name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW504I Loaded the *file name* file.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIW505W The configuration file *file name* does not exist.

Explanation

Administration and Monitoring Console is not able to load the XML file containing the database schema.

Action

Refer to the logs for additional information.

CTGDIW506E An error occurred while reading the configuration XML file *file name*.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW507E An error occurred while closing the input stream.

Explanation

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

Action

Refer to the logs for additional information.

CTGDIW613E The selected tombstone entry does not exist.

Explanation

The tombstone entry no longer exists in the database. It may have been removed by another application.

Action

Refresh the panel. Check any error logs.

CTGDIW614E A thread in waiting/sleeping/paused state is interrupted by another thread.

Explanation

The tombstone entry no longer exists in the database. It may have been removed by another application.

Action

Refresh the panel. Check any error logs.

CTGDIW615E An error occurred while getting the server id for IBM Security Directory Integrator server on host *host* and port *port*: *error*

Explanation

The tombstone entry no longer exists in the database. It may have been removed by another application.

Action

Refresh the panel. Check any error logs.

CTGDIW616E Conversion of string *string* to *number type* failed

Explanation

The tombstone entry no longer exists in the database. It may have been removed by another application.

Action

Refresh the panel. Check any error logs.

CTGDIW617E An error occurred while deleting the tombstones.

Explanation

There was a remote API error while deleting the tombstone(s).

Action

Ensure that the remote server is running and try again.

CTGDIW618W Any changes to JDBC or SSL properties will need require a manual restart of the Administration and Monitoring Console. Apply changes to console properties?

Explanation

Confirm updation of console properties.

Action

If you want to save the changes to console properties, click OK, otherwise click Cancel.

CTGDIW619E An error occurred while reading properties using Server API.

Explanation

There was a remote API error while reading properties.

Action

Ensure that the remote server is running and try again.

CTGDIW620E An error occurred while accessing AssemblyLine information using Server API.

Explanation

There was a remote API error.

Action

Ensure that the remote server is running and try again.

CTGDIW621E An error occurred while accessing Config information using Server API.

Explanation

There was a remote API error.

Action

Ensure that the remote server is running and try again.

CTGDIW622E An error occurred while closing file stream.

Explanation

An error occurred while closing file stream.

Action

Check error message and try again.

CTGDIW623E An error occurred while rolling back database transaction : *error*

Explanation

Check logs for additional information.

Action

Check logs for additional information.

CTGDIW624E An error while rolling back database transaction : *error*

Explanation

Check logs for additional information.

Action

Check logs for additional information.

CTGDIW625E Select an Action Manager log to delete.

Explanation

No Action Manager logs were selected for deletion.

Action

Select an Action Manager log for deletion.

CTGDIW626E The End Date is earlier than the Start Date.

Explanation

See the error message.

Action

Select the End Date to be after the Start Date.

CTGDIW627E Unable to find group: *string*.

Explanation

An error occurred while retrieving the specified group, used for setting user privileges.

Action

Check logs for additional information, more specifically SQLExceptions. A problem may have occured with the database used to store group information.

CTGDIW628I SDI servers earlier than 7.1 version does not support graceful shutdown.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB001W The command did not complete successfully. See previous messages or error logs for details.

Explanation

One or more errors occurred during the execution of the command.

Action

Check the previous messages displayed by the tdisrvctl command, or look at the error logs for more details.

CTGDJB002E Unknown value passed for '-op' option.

Explanation

An illegal operation parameter was passed.

Action

Check the tdisrvctl command usage for allowed options.

CTGDJB003E The server *hostname* does not support Tombstones. Tombstone support is not available in pre-6.1 servers.

Explanation

The tdisrvctl command tried obtaining Tombstones from a pre-6.1 server. Tombstone support has been introduced from v6.1 onward.

Action

Connect to a version 6.1 or later server for viewing Tombstones.

CTGDJB004E Incorrect command usage.

Explanation

The tdisrvctl command was invoked by passing unsupported command line options, or unexpected end of argument list was encountered or there was an incorrect usage of the command line options.

Action

Check the tdisrvctl command usage and try invoking the tdisrvctl command with valid arguments.

CTGDJB005E Unable to get Tombstone manager.

Explanation

The tdisrvctl command was unable to connect to the Tombstone manager in the remote server. Probable reason being that the Tombstone feature was incorrectly configured on the server.

Action

Check the remote server API and Tombstone manager settings on the remote server and try executing the tdisrvctl command again.

CTGDJB006E Only a single Config can be specified.

Explanation

The tdisrvctl command was invoked by passing multiple Configs as a parameter to an option which allows only a single Config to be specified.

Action

Invoke the tdisrvctl command by passing only a single Config at a time.

CTGDJB007E No value specified for *option name* option.

Explanation

The tdisrvctl command was invoked by passing an option whose value had not been specified. The value is also required.

Action

Check the tdisrvctl command usage, and invoke the tdisrvctl command again with the correct option and associated value.

CTGDJB008E Only a single AssemblyLine can be specified.

Explanation

The tdisrvctl command was invoked by passing multiple AssemblyLines as a parameter to an option which allows only a single AssemblyLine to be specified.

Action

Invoke the tdisrvctl command by passing only a single AssemblyLine at a time. Check the tdisrvctl command usage.

CTGDJB010E The value for the age option has to be an integer greater than zero (days).

Explanation

The tdisrvctl command was invoked by passing a non-integer or a negative value for the age (in days) option.

Action

Invoke the tdisrvctl command by passing a valid integer (greater than 0) for the specified option of Tombstone.

CTGDJB011E Conflicting Tombstone option passed. Use keyword 'all' or specify a set of Tombstone attributes.

Explanation

The tdisrvctl command with Tombstone option was invoked with contradictory options. Cannot ask for 'all' attributes and 'specific' attributes together.

Action

Either specify the specific Tombstone attibutes that should be displayed, or ask to be shown all attributes. Not both. See tdisrvctl command usage.

CTGDJB012E The 'all' keyword should be the last argument passed.

Explanation

The tdisrvctl command with Tombstone option was invoked with incorrect options. The 'all' keyword has to be the last argument passed.

Action

See the tdisrvctl command usage.

CTGDJB014E The *option switch* option is mandatory.

Explanation

The tdisrvctl command was invoked with a mandatory option not specified.

Action

See the tdisrvctl command usage.

CTGDJB015E Could not locate Config *Config name*.

Explanation

Unable to locate the Config specified by user.

Action

Check whether the Config name specified is correct and exists on the remote machine.

CTGDJB016I Connected to server *hostname and port*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB017I Config started: *Config name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB018I Config already running: *Config name*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB019E Could not start Config: *Config name*

Explanation

Unable to start Config. An internal error occurred because the remote IBM Security Directory Integrator server was not properly setup or the configuration was incorrect. This may also occur because the configuration file was password protected, and the user did not specify a password in the tdisrvctl command. Also, if the Config path is incorrect or not fully qualified, tdisrvctl will not be able to locate the Config.

Action

See the tdisrvctl command error logs for help. Verify the configuration on remote server is properly set up. Additionally, verify the Config file is password protected. If so, then specify the password in the tdisrvctl start option using the -e switch. Also, ensure that the fully qualified path of the Config file is mentioned exactly as it appears on the remote machine.

CTGDJB020I AssemblyLine running: *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB021I AssemblyLine started: *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB022E AssemblyLine *AssemblyLine name* not found.

Explanation

Unable to find user specified AssemblyLine. The Assembly Name passed may be incorrect or misspelled.

Action

Check whether the AssemblyLine specified exists in the configuration on the remote server.

CTGDJB023E Could not start AssemblyLines on the server *hostname and port*.

Explanation

Some exceptions occurred while starting the AssemblyLines.

Action

Check whether the Configurations and AssemblyLines are correctly set up on the remote server. Also check the tdisrvctl error logs for more information on the errors.

CTGDJB028E The Config *Config name* is not loaded.

Explanation

The user specified stopping of components of a configuration which is already not loaded on the server.

Action

Check whether the Configuration name is correct. Also check the tdisrvctl error logs for more information on the errors.

CTGDJB029I Config stopped: *Config name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB030E Could not stop Config: *Config name*.

Explanation

Some exceptions occurred while stopping the configuration.

Action

Check the tdisrvctl error logs for more information on the errors.

CTGDJB031I AssemblyLine stopped: *AssemblyLine name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB032E Could not stop AssemblyLine: *AssemblyLine name*.

Explanation

Some exceptions occurred while stopping the AssemblyLine.

Action

Check the tdisrvctl error logs for more information on the errors.

CTGDJB033E AssemblyLine already stopped: *AssemblyLine name*.

Explanation

The user specified AssemblyLine is already not running.

Action

Check the tdisrvctl error logs for more information on the errors.

CTGDJB034E Error occurred while stopping AssemblyLines.

Explanation

Some exceptions occurred while stopping the AssemblyLines.

Action

Check the tdisrvctl error logs for more information on the errors.

CTGDJB039E Cannot connect to server *hostname and port*.

Explanation

Unable to connect to server. This error might occur for one or more of the following reasons: If the server is not running, or the machine on which the server is running is not accessible, or the remote server API engine over RMI is not running, or if remote server API accepts only SSL connections, and the SSL parameters / certificates in the trust and key stores may be incorrect.

Action

Check the tdisrvctl error logs for more information on the reason for connection errors. Try connecting again.

CTGDJB040I The server *hostname and port* has been shutdown.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB041I Config *Config name* reloaded.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB042E Config *Config name* is not running.

Explanation

The user tried reloading a Config that is not running / loaded. Only already loaded Configs can be reloaded. If the Config is not loaded, then start the Config instead of trying to reload it.

Action

Give the tdisrvctl -op start command instead of reload command, or check the name of the Config.

CTGDJB043E One or more Configs could not be reloaded on the server *hostname and port*. Check the previous messages or error logs for details.

Explanation

There were some errors encountered while reloading Configs. One or more Configs failed to reload.

Action

Check the tdisrvctl command error logs for details on the errors.

CTGDJB044I All the specified Configs have been successfully reloaded on the server *hostname and port*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB045E The *operator switch* option occurred more than once.

Explanation

The tdisrvctl command was invoked with the same parameter passed more than once. Options can be passed only once. Fox example, the user may have passed the '-h' option twice, which is not allowed.

Action

Pass each option only once.

CTGDJB046E Unknown option *operator switch* encountered.

Explanation

The tdisrvctl command was invoked with an unknown option.

Action

See the tdisrvctl command usage and invoke the command with the allowed options only.

CTGDJB047E The *operator switch* option was not specified. This is a mandatory option.

Explanation

The tdisrvctl command was invoked without specifying the -op option.

Action

See the tdisrvctl command usage and invoke the command with the correct and mandatory options specified.

CTGDJB048E It is mandatory to specify Config. 'all' keyword is not allowed with -c option.

Explanation

Instead of passing the Config name, the user asked for ALL Configs. This is not allowed. User must specify the configuration name.

Action

Specify the explicit Config name when invoking the tdisrvctl command. See tdisrvctl command usage.

CTGDJB049I Usage: tdisrvctl [general_options] -op operation [operation_specific_options] general_options: -h host remote server IP address or hostname(default is localhost) -K keystore name of the SSL key database file -p port port number(default is 1099) -P key_pwd key file password -s dir Specifies the working directory where the solution directory is located. -T truststore name of the SSL trust store database file -u userID username(for custom authentication) -v run in verbose mode -w user_pwd user password(for custom authentication) -W trust_pwd trust file password -? display command usage operation: event send custom notification event prop manage Config properties queryop query an AssemblyLine for operations reload reload running Configs report generate Config report or list Configs on remote server shutdown shut down the server srvinfo view IBM Security Directory Integrator server information status view status of Configs or AssemblyLines start start specific Config or AssemblyLines stop stop specific Config or AssemblyLine tombstone view Tombstone entries for specific Config or AssemblyLine deletetombstone delete a tombstone entry debug debug components in a running AssemblyLine To get help for a specific operation: tdisrvctl -op operation -?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB050I The usage for reload operation is: tdisrvctl [general_options] -op reload -c config_list where: -c config_list comma separated list of Configs to reload

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB051I The usage for shutdown operation is: tdisrvctl [general_options] -op shutdown [-o return_code] [-f] where: -o return_code shutdown server with specified return code -f force a controlled shutdown and exit all AssemblyLines

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB052I The usage for srvinfo operation is: tdisrvctl [general_options] -op srvinfo

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB053I The usage for status operation is: tdisrvctl [general_options] -op status [-c config_list | all] [-r AL_list | all] [-listen] where: -c config_list comma separated list of Configs or keyword 'all' -r AL_list comma separated list of ALs or keyword 'all' -listen start receiving the logs of a running Config or AssemblyLine Example: To see the status of all loaded Configs and ALs tdisrvctl [general_options] -op status To see the status of all running ALs tdisrvctl [general_options] -op status -r all To see the status of all components of a particular loaded Config tdisrvctl [general_options] -op status -c Config.xml -r all Note: - The keyword 'all' indicates all Configs or AssemblyLines. - The -listen option requires exactly one Config or AssemblyLine to be specified.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB054I The usage for the start operation is: tdisrvctl [general_options] -op start -c config [-e password] [-r AL_list | all] [-s] [-r AL_list -alop opname [{attr1:value1;attr2:value2;attrN:valueN}]| -f filename] [-m config_run_name -o storeName1=value1, storeName2=value2, storenameN=valueN] [-t] [-listen] [-sync] where: -c config name of config to start -e password password of the config file if it is password protected -r AL_list comma separated list of AssemblyLines to start or keyword 'all' -s simulate mode run AssemblyLine in simulate mode -alop opname AssemblyLine operation with required attributes and their values -f filename filename to specify the operations -m config run name run name of config -o property file list comma separated list of property store names and values -t start a temporary Config -listen receive the logs of the specified Config or AssemblyLine -sync execute AssemblyLine synchronously Note: - The -c option is mandatory. - The keyword 'all' indicates all AssemblyLines. - The -t option expects the Config specified in the -c option to be located on the client machine. - The -listen option requires exactly one Config or AssemblyLine to be specified. - The -listen option executes an AssemblyLine synchronously. There is no need to combine it with the -sync option. - The -sync option requires exactly one AssemblyLine to be specified.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB055I The usage for stop operation is: tdisrvctl [general_options] -op stop -c config [-r AL_list | all] [-f] where: -c config name of Config -r AL_list comma separated list of ALs to stop or keyword 'all' -f force a controlled shutdown of AssemblyLines Note: - The -c option is mandatory. - The keyword 'all' indicates all AssemblyLines.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB056I The usage for tombstone operation is: tdisrvctl [general_options] -op tombstone -c config [-r AL_name] [-age n] [[attribute_list] | all] where: -age n display tombstone record for the last 'n' days (default is 1 day) -c config name of Config -r AL_name name of Aseembly Line all show all Tombstone attributes attribute_list: -ct component type -cn component name -cfg configuration name -guid Tombstone entry's guid -et event type -ex exit code -stime component's start time -ctime Tombstone create time -desc error description -um user message -stat statistics (valid for ALs only) Example: To see the last 2 days Tombstone entries (all attributes) for Config C1.xml tdisrvctl [general_options] -op tombstone -c C1.xml -age 2 all Note: - The -c option is mandatory. - Only one of the -r or -t option is allowed. Not both.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB057E The Config *Config name* is not loaded on the server *hostname and port*.

Explanation

A Config that is not loaded on the server was specified for the 'report' option. Reports can only be generated if the specified Config is loaded on the server.

Action

Check that the Config name specified is correct and that the Config is loaded on the server. Use the tdisrvctl 'status' option to obtain a list of the currently loaded Configs on the server. Alternatively, load the Config on the server and then fire the tdisrvctl command with the 'report' option.

CTGDJB058I The Config folder on server *hostname and port* is empty.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB059I The usage for report operation is: tdisrvctl [general_options] -op report [-c config | -l] where: -c config name of the Config whose report is to be generated -l list the Configs in the remote server's Config folder Note: - The specified Config must be already loaded on the remote server. - Only one of the -c or -l option is allowed. Not both.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB060E The server *hostname* does not support 'config' folder. The 'config' folder support is not available in pre-6.1 servers.

Explanation

The tdisrvctl command tried obtaining Config listing from a pre-6.1 server. 'config' folder support has been introduced from v6.1 onwards.

Action

Connect to a v6.1 or later server for obtaining listing of Configs in the 'config' folder.

CTGDJB061I The usage for event operation is: tdisrvctl [general_options] -op event -e event_name [-s source] [-d data] where: -e event_name name of the event to send -s source the name of the source invoking the event (default tdisrvctl) -d data the data (message) to be passed to an event listener (default is null) Note: - All events sent from tdisrvctl (-e option) are automatically prefixed by the string "user". Example: To send an event "user.process.X.completed" from "admin" tdisrvctl -h hostname -op event -e "process.X.completed" -s admin -d "Admin triggered event".

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB062I The event *event name* successfully sent.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB063I The usage for prop operation is: tdisrvctl [general_options] -op prop -c config [-l] | [[-o store] [[-g key | all] | [-s key=value [-e]] | [-d key]]] where: -c config name of the Config to use -l list all the configured property stores -o name of the property store to use -g key get the value of the specified key (or keyword 'all' implying get all keys) -s key=value set the key to the specified value -e encrypt the value when putting in the store (can be used with -s option only) -d key delete the specified key from the store Note: - The -c option is mandatory. The specified Config should be a loaded Config on the remote server. - The -l, -g, -s, and -d options are mutually exclusive, and cannot be used together. - The -e option can be used with only the -s option. - The -o option is mandatory when using the -d option. Examples: To list all property stores for Config C1.xml tdisrvctl -op prop -c C1.xml -l To get all properties for Config C1.xml tdisrvctl -op prop -c C1.xml -g all To get all properties for Config C1.xml from store MyStore tdisrvctl -op prop -c C1.xml -o MyStore -g all To set a property MY_PROP to value MY_VALUE for Config C1.xml in store MyStore and mark it as protected tdisrvctl -op prop -c C1.xml -o MyStore -s "MY_PROP=MY_VALUE" -e

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB064E Only one of the options -l, -g, -s, and -d can be specified. They cannot occur together.

Explanation

The tdisrvctl command was invoked with options that are not allowed together. For example, the -l option is used for specifying the list of property stores, and hence cannot be used along with the -o option.

Action

See the usage of the tdisrvctl "prop" option and invoke the command with the appropriate arguments passed.

CTGDJB065E The property store (-o option) is not specified.

Explanation

The tdisrvctl command prop option was invoked without specifying the property store (-o option).

Action

See the usage of the tdisrvctl "prop" option and invoke the command with the appropriate arguments passed.

CTGDJB066E Property store *property store name* does not exist.

Explanation

The tdisrvctl command prop option was invoked with a property store name that does not exist (or was misspelled).

Action

Fire the tdisrvctl command with prop option and -l switch to see the list of available property stores.

CTGDJB067I The property key *property key* does not exist.

Explanation

The tdisrvctl command prop option was invoked with a property key name that does not exist (or was misspelled).

Action

Check the property key name, or view all the available properties by using the -g option with the "all" keyword.

CTGDJB068E The server *hostname* does not support remote client event notification. This feature is not available in pre-6.1 servers.

Explanation

The tdisrvctl command was used to send an event notification to a pre-6.1 server. User event notification support has been introduced from v6.1 onwards.

Action

Connect to a v6.1 or later server for sending remote client event notifications.

CTGDJB069E The server *hostname* does not support common APIs for IBM Security Directory Integrator Property management. This feature is not available in pre-6.1 servers.

Explanation

The tdisrvctl command was used for property store management of a pre-6.1 server. Common APIs for IBM Security Directory Integrator property store management were introduced from version 6.1 onwards.

Action

Connect to a version 6.1 or later server for remote IBM Security Directory Integrator property store management.

CTGDJB070I The property *key name* has been set and committed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB071I The property *key name* successfully deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB072I The usage for query operation is: tdisrvctl [general_options] -op queryop -c config -r AL_name where: -c config name of a loaded configuration -r AL_name valid AssemblyLine in the specified configuration

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB073I Return Code: *return code*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB074I Determining whether Tombstone is supported.

Explanation

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB109E Unable to determine server version. Cannot continue.

Explanation

The tdisrvctl utility was unable to determine the IBM Security Directory Integrator server version. It needs to know this to detect whether Tombstone Manager is present or not.

Action

Check the remote IBM Security Directory Integrator server version that you are connecting to using tdisrvctl. The tombstone support has been introduced in the IBM Security Directory Integrator 6.0 version of the product.

CTGDJB110E Unable to obtain Tombstones.

Explanation

Some exception occured while trying to obtain tombstones. This could be because of some error in connecting to the remote IBM Security Directory Integrator server, or because of some other error while communicating with the IBM Security Directory Integrator server.

Action

Check the error logs for other error messages, or try again.

CTGDJB111E Invalid age: *age value*.

Explanation

The tdisrvctl command was invoked by passing a non-integer or a negative value for the age (in days) option.

Action

Invoke the tdisrvctl command by passing a valid integer (greater than 0) for the specified option of Tombstone.

CTGDJB112E Error while processing shutdown return code.

Explanation

There was an error in converting the shutdown code into an integer value.

Action

Ensure that the passed shutdown code is an integer value.

CTGDJB113E Unable to determine server version. Cannot continue.

Explanation

The tdisrvctl utility was unable to determine the server version, so as to detect if event notification APIs are supported in this particular server release or not.

Action

Connect to a v6.1 or later server for sending remote client event notifications.

CTGDJB114E Error while trying to obtain list of property stores for Config: *Config name*.

Explanation

The tdisrvctl utility encountered an internal error while trying to obtain the list of configured property stores from the remote IBM Security Directory Integrator server. This may have occured because the property store list in the remote server has got corrupted, or maybe an incompatible version of the remote IBM Security Directory Integrator server is being used.

Action

Check if the property stores list can be correctly seen in the ibmditk. Also, check the Problem Determination Guide for problems related to the property store. Ensure that the version of tdisrvctl and the version of the remote IBM Security Directory Integrator server match. The property store feature has been introduced in version 6.1 of IBM Security Directory Integrator.

CTGDJB115E Error while trying to obtain list of property stores for Config: *Config name*.

Explanation

The tdisrvctl utility encountered an internal error while trying to obtain the list of configured property stores from the remote IBM Security Directory Integrator server. This may have occured because the property store list in the remote server has got corrupted, or maybe an incompatible version of the remote IBM Security Directory Integrator server is being used.

Action

Check if the property stores list can be correctly seen in the ibmditk. Also, check the Problem Determination Guide for problems related to the property store. Ensure that the version of tdisrvctl and the version of the remote IBM Security Directory Integrator server match. The property store feature has been introduced in version 6.1 of IBM Security Directory Integrator.

CTGDJB116E Error while trying to obtain property for Config:*Config name*.

Explanation

The tdisrvctl utility encountered an internal error while trying to obtain the properties of a particular store from the remote IBM Security Directory Integrator

server. This may have occured because the property store list in the remote server has got corrupted, or maybe an incompatible version of the remote IBM Security Directory Integrator server is being used.

Action

Check if the property values can be correctly seen in the ibmditk. Also, check the Problem Determination Guide for problems related to the property store. Ensure that the version of tdisrvctl and the version of the remote IBM Security Directory Integrator server match. The property store feature has been introduced in version 6.1 of IBM Security Directory Integrator. Also have a look at the output messages of the tdisrvctl command.

CTGDJB117E Error while trying to set property for Config:*Config name*.

Explanation

The tdisrvctl utility encountered an internal error while trying to set a property in a particular store in the remote IBM Security Directory Integrator server. This may have occured because the property store in the remote server has got corrupted, or maybe an incompatible version of the remote IBM Security Directory Integrator server is being used.

Action

Check if the property values can be correctly set in the ibmditk. Also, check the Problem Determination Guide for problems related to the property store. Ensure that the version of tdisrvctl and the version of the remote IBM Security Directory Integrator server match. The property store feature has been introduced in version 6.1 of IBM Security Directory Integrator. Also have a look at the output messages of the tdisrvctl command. Try again.

CTGDJB118E Error while trying to delete property ''*key name*'' for Config:*Config name*

Explanation

The tdisrvctl utility encountered an internal error while trying to delete a property in a particular store in the remote IBM Security Directory Integrator server. This may have occured because the property store in the remote server has got corrupted, or maybe an incompatible version of the remote IBM Security Directory Integrator server is being used. This would also happen in-case the particular property store is READ-ONLY.

Action

Check if the property values can be correctly set in the ibmditk. Also, check the Problem Determination Guide for problems related to the property store. Ensure that the version of tdisrvctl and the version of the remote IBM Security Directory Integrator server match. The property store feature has been introduced in version 6.1 of IBM Security Directory Integrator. Also have a look at the output messages of the tdisrvctl command. Ensure that the particular property store is not READ-ONLY. Try again.

CTGDJB119E The KEY=VALUE format should have been specified for *property key and value*

Explanation

The tdisrvctl command was invoked incorrectly.

Action

See the command usage and try again. Very double quotes are used to group arguments that have spaces.

CTGDJB120E Unable to retrieve server information.

Explanation

The tdisrvctl utility encontered an internal error while trying to obtain the remote IBM Security Directory Integrator server host details.

Action

Ensure that the remote IBM Security Directory Integrator server is of version 6.0 or above. Also ensure that there are no connection errors while connecting to IBM Security Directory Integrator server, and the IBM Security Directory Integrator server has its remote server API engine is turned on.

CTGDJB121E Error while sending custom event notification: event name=*event name*, event source=*event source*, event data=*event data*.

Explanation

The tdisrvctl utility encountered an error while trying to send a custom notification event.

Action

Have a look at the log trace, or the server logs to find out the problem. Ability to send custom notification was added in IBM Security Directory Integrator version 6.1. Ensure that you are using a compatible version of IBM Security Directory Integrator server. Try sending the event again.

CTGDJB122E Unable to get the Config info or stop the Config.

Explanation

The tdisrvctl utility was unable to obtain handle to the remote Config to stop.

Action

Check the exception, or previous messages. Also have a look at the server logs. Try again.

CTGDJB123E Unable to get details for AssemblyLines.

Explanation

The tdisrvctl utility was unable to get details for AssemblyLines. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured. The AssemblyLine or the Config could also be corrupted.

Action

Check the exception trace, or the command output. Also check the server logs. Try again.

CTGDJB125E Unable to get list of all running Configs.

Explanation

The tdisrvctl utility encountered an error while trying to obtain the list of all running configs. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured.

Action

Ensure that the tdisrvctl and remote IBM Security Directory Integrator server versions match. Also look into the exception trace and the server logs. Try again.

CTGDJB126E Unable to get list of all Configs.

Explanation

An internal error occured while trying to obtain the list of all configs. This occurred because of m_Session.listAllConfigurations() method threw an error.

Action

Ensure that the tdisrvctl and remote IBM Security Directory Integrator server versions match. Also look into the exception trace and the server logs. Try again.

CTGDJB127E Error while getting assembly line details.

Explanation

The tdisrvctl utility was unable to get details for AssemblyLines. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured. The AssemblyLine or the Config could also be corrupted.

Action

Check the exception trace, or the command output. Also check the server logs. Try again.

CTGDJB128E Error while getting Connector library details.

Explanation

The tdisrvctl utility was unable to get details for Connector Library. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured. The Config could also be corrupted.

Action

Check the exception trace, or the command output. Also check the server logs. Try again.

CTGDJB129E Error while getting Parser library details.

Explanation

The tdisrvctl utility was unable to get details for Parser Library. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured. The Config could also be corrupted.

Action

Check the exception trace, or the command output. Also check the server logs. Try again.

CTGDJB130E Error while getting script library details.

Explanation

The tdisrvctl utility was unable to get details for Script Library. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured. The Config could also be corrupted.

Action

Check the exception trace, or the command output. Also check the server logs. Try again.

CTGDJB131E Error while getting function library details.

Explanation

The tdisrvctl utility was unable to get details for Function Library. This may happen because the IBM Security Directory Integrator server version does not match the tdisrvctl utility version, or some other internal server error occured. The Config could also be corrupted.

Action

Check the exception trace, or the command output. Also check the server logs. Try again.

CTGDJB132E Unable to determine server version. Cannot continue.

Explanation

The tdisrvctl utility was unable to determine the server version, so as to detect if config folder feature is supported in this particular server release or not.

Action

Connect to a v6.1 or later server for viewing configs in the config folder.

CTGDJB133E Unable to get list of all Configs.

Explanation

An internal error occured while trying to obtain the list of all configs. This occurred because of Session.listAllConfigurations() method threw an error.

Action

Ensure that the tdisrvctl and remote IBM Security Directory Integrator server versions match. Also look into the exception trace and the server logs. Try again.

CTGDJB134E Error while retrieving list of loaded Configs.

Explanation

An internal error occured while trying to obtain the list of all loaded configs on the remote IBM Security Directory Integrator server. This occured because Session.getConfigInstances() method threw an error.

Action

Ensure that the tdisrvctl and remote IBM Security Directory Integrator server versions match. Also look into the exception trace and server logs. Try again.

CTGDJB135W Already reached the end of argument list.

Explanation

While parsing the arguments, the tdisrvctl utility encountered an unexpected end of arguments.

Action

Check the command usage and try again.

CTGDJB136I Argument at index *index*: *value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB137I Configuration: *configuration name*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB138E AssemblyLine *AssemblyLine name* not found.

Explanation

Unable to find user specified AssemblyLine. The Assembly Name passed may be incorrect or misspelled.

Action

Check whether the AssemblyLine specified exists in the configuration on the remote server.

CTGDJB139I No operations exposed by the AssemblyLine.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB140E The Config *Config name* is not loaded.

Explanation

The Config specified for the 'queryop' option is not loaded on the server.

Action

Verify the Config name is correct.

CTGDJB141E The server *hostname* does not support deletion of tombstones. Delete tombstone support is not available in pre-7.0 servers.

Explanation

The tdisrvctl command tried deleting tombstones from a pre-7.0 server. Deletion of tombstones has been introduced from v7.0 onward.

Action

Connect to a version 7.0 or later server for deleting tombstones.

CTGDJB142I The usage for the tombsone deletion operation is: tdisrvctl [general_options] -op deletetombstone -guid 'GUID # ' where: -guid 'GUID # ' is the unique identifier for the tombstone to be deleted. Note: - GUID for a tombstone can be obtained by viewing a tombstone

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB143I Tombstone with guid *GUID* successfully deleted.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB144I Temp configs cannot be run with password specified.

Explanation

The tdisrvctl command was invoked by specifying the -t (temp config) option in a combination with the -e (password) option, but temp configs cannot be started with a password.

Action

Remove either the -t or -e option in order to successfully run the command.

CTGDJB145E It is mandatory to specify an AssemblyLine name. '*keyword*' keyword is not allowed.

Explanation

Instead of passing the AssemblyLine name, the user asked for ALL AssemblyLines. This is not allowed. User must specify the AssemblyLine name.

Action

Specify the explicit AssemblyLine name when invoking the tdisrvctl command. See tdisrvctl command usage.

CTGDJB146E Option '*option*' is not allowed for operation '*option*'.

Explanation

The user specified an option which is not supported for the specified operation.

Action

See tdisrvctl command usage.

CTGDJB147I Listening for AssemblyLine messages...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB148I Listening for Config messages...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB149I In debugComponents method.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB150E The AssemblyLine *AL name* is not running.

Explanation

The user specified debugging of components of an AssemblyLine that is not running on the server.

Action

Check whether the AssemlyLine name is correct. Also check the tdisrvctl error logs for more information on the errors.

CTGDJB151E Could not set debug mode to *component name* component.

Explanation

The user specified a component that does not exist in the specified AssemblyLine.

Action

Check whether the component name is correct. Also check the tdisrvctl error logs for more information on the errors.

CTGDJB152I The usage for the debug operation is: tdisrvctl [general_options] -op debug -c config -r assembly_line [-alc al_component] -on/off where: -c config config instance ID -r assembly_line name of the AssemblyLine -alc al_component name of the AssemblyLine component -on flag to enable debug mode -off flag to disable debug mode Note: - The -c and -r options are mandatory and require exactly one Config/AssemblyLine to be specified. - If -alc option is not specified all components in the specified AssemblyLine will be affected. Examples: To view the Debug mode value of the components in the AssemblyLines of a specified Config tdisrvctl -op report -c config To enable the debug mode for all components in the running AssemblyLine al2 tdisrvctl -op debug -c config_name -r al2 -on To disable the debug mode for specified components in the running AssemblyLine al3 tdisrvctl -op debug -c config_name -r al3 -alc fread,httpServer,myconn -off

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB153I AssemblyLine *AssemblyLine name* completed successfully. Statistics: *AssemblyLine statistics*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB154I AssemblyLine *AssemblyLine name* failed with exception: *exception* Statistics: *AssemblyLine statistics*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB155I Last AssemblyLine Entry: *Entry object*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJB156W Could not retrieve last AssemblyLine Entry: *exception*

Explanation

The last Entry of the executed AssemblyLine cannot be retrieved from the Server. Probably it contains Attribute values which do not implement the java.io.Serializable interface.

Action

Check the configuration of the AssemblyLine.

CTGDKI001I The 'java.naming.factory.initial' is set to 'com.ibm.dsml2.jndi.DSML2InitialContextFactory'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIU001E Invalid day of the month, ''*day*'', was entered for the schedule time. Only 1-31 are valid days of the month.

Explanation

Specified a day of the month that was not valid for the schedule time in the Timer Connector. Valid days of the month that can be specified are 1-31.

Action

Specify a day of the month that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU002E Invalid day of month, ''*day*'', was entered for the schedule time in February. Only 1-29 are valid days of the month in February.

Explanation

Specified a day of the month that was not valid for the schedule time in February in the Timer Connector. Valid days of the month that can be specified are 1-29 for February.

Action

Specify a day of the month in February that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU003E Invalid day of month, ''*day*'', was entered for the schedule time in month ''*month*''. Only 1-30 are valid days of the months in April, June, September, or November.

Explanation

Specified a day of the month that was not valid for the schedule time in the Timer Connector. Valid days of the month that can be specified are 1-30 for April, June, September, or November.

Action

Specify a day of the month that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU004E Invalid day of the month, ''*day*'', was entered for the schedule time. Only 1-31 are valid days of the month.

Explanation

Specified a day of the month that was not valid for the schedule time in the Timer Connector. Valid days of the month that can be specified are 1-31.

Action

Specify a day of the month that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU005E Invalid month, ''*month*'', was entered for the schedule time. Only 0-11 are valid months.

Explanation

Specified a month that was not valid for the schedule time in the Timer Connector. Valid months that can be specified are 0-11.

Action

Specify a month that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU006E Invalid day of week, ''*day of week*'', was entered for the schedule time. Only 1-7 are valid days of the week.

Explanation

Specified a day of week that was not valid for the schedule time in the Timer Connector. Valid day of week that can be specified are 1-7.

Action

Specify a day of week that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU007E Invalid hour, ''*hour*'', was entered for the schedule time. Only 0-23 are valid hours.

Explanation

Specified a hour that was not valid for the schedule time in the Timer Connector. Valid hour that can be specified are 0-23.

Action

Specify a hour amount that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU008E Invalid minute, ''*minute*'', was entered for the schedule time. Only 0-59 are valid minutes.

Explanation

Specified a minute that was not valid for the schedule time in the Timer Connector. Valid minutes that can be specified are 0-59.

Action

Specify a minute amount that is valid. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU009I The 'schedule' parameter converted to the masked format: ''*masked schedule*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIU010E The 'schedule' parameter must be set to use the Timer Connector.

Explanation

The required parameter schedule was not specified in the Timer Connector.

Action

Specify the schedule parameter in the Connector.

CTGDIU011E Bad syntax for specified for the schedule. Valid syntax: <month> <mday> <dayofweek> <hour> <minute>

Explanation

Invalid syntax was specified for the schedule in the Timer Connector.

Action

Specify a valid syntax for the schedule. The contents of the schedule, month, weekday, hours, and day parameters should be reviewed to ensure valid parameters have been set for the schedule time.

CTGDIU012I Next run of Timer Connector will be at ''*timestamp*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIU013I Sleeping for *number of seconds* seconds. Will wake up at ''*timestamp*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIU014I Sleeping for *number of seconds* seconds.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP651I The connector will try to reprocess message: *msgID*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP652I The connector will delete message: *msgID*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP653I An HTTP client connection failed with error: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP654I Error checking task failed with error: *exception*

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP655W Message: *msgID* from External system: *extSys* is with status 'HOLD'.

Explanation

The IF server could not reprocess an output queue message flagged with error.

Action

Set Action on error parameter to Retry/Delete or manually retry/delete the message from Message Reprocessing application.

CTGDJP656E The *variable name* parameter must be set to use the Connector.

Explanation

This error occurs if the required parameters for the connector are empty.

Action

Set the required parameters for the connector.

CTGDJP657E The *variable name* parameter must be set to a valid number.

Explanation

This error occurs if the parameter value is not valid.

Action

It should be a valid number.

CTGDJP658E The *variable name* parameter value must be within *Minimum Value* to *Maximum Value*.

Explanation

This error occurs if the parameter value is not within minimum and maximum values defined.

Action

The parameter value should be with in minimum and maximum values defind.

CTGDJP601I New MxConnIterator instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP602I New MxConnSync instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP603I New MxConnDelete instance created.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP604I Performing search.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJP605E Missing attribute for root MBO: *mboName*.

Explanation

The provided entry does not contain an Attribute for the root MBO.

Action

Check the provided entry.

CTGDKO001E Unable to open '*file name*' for modification. An exception occurred: *exception info*

Explanation

The file indicated in the error message that must be altered by the Update Installer cannot be opened.

Action

Contact IBM support.

CTGDKO002E Error closing '*file name*'. An exception occurred: *exception info*

Explanation

An error occurred while closing a file. If the file was being read, this error may be ignored. If the file was being written, all of the data may not have been written correctly.

Action

Inspect the file mentioned in the error message for correctness.

CTGDKO003E Usage: ACSIIFileUpdate file search replacement [LINE|TEXT]

Explanation

An incorrect call was made to ASCIIFileUpdate.

Action

If this message is seen while running the Update Installer, contact IBM support.

CTGDKO004E Unable to find '*file name*'.

Explanation

The file indicated in the error message that must be altered by the Update Installer cannot be found.

Action

Contact IBM support.

CTGDKO005E Error reading '*file name*'. An exception occurred: *exception info*

Explanation

The file indicated in the error message is not altered.

Action

Run the Update Installer again.

CTGDKO006E Error reading from input stream. An exception occurred: *exception info*

Explanation

An error occurred while reading the input stream from an opened file. The operation being performed did not complete.

Action

Run the Update Installer again.

CTGDKO007E Error processing file '*file name*'. An exception occurred: *exception info*

Explanation

The file indicated in the error message could not be read. The operation being performed did not complete.

Action

Run the Update Installer again.

CTGDKO008E Unable to create script file '*file name*'. An exception occurred: *exception info*

Explanation

An error occurred while trying to create a temporary script for execution.

Action

Inspect the accompanying exception information to fix the error and run the Update Installer again.

CTGDKO009E Error while executing an operating system command. An exception occurred: *exception info*

Explanation

An error occurred while executing a shell script.

Action

Inspect the accompanying exception information to fix the error and run the Update Installer again.

CTGDKO010W While executing an operating system command, a non-zero return code was returned. Return code=*return code*; Message: *message*

Explanation

A non-zero return code was found while executing a shell script.

Action

Inspect the additional information in the message. If this information indicates a fatal error, run the Update Installer again.

CTGDKO011I *component* already has this fix applied and will not be updated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO012E Unable to process fix file '*file name*'.

Explanation

The Update Installer was unable to process the fix file specified.

Action

Ensure the file specified is correct and exists. If so, contact IBM support.

CTGDKO013E The specified install directory '*directory*' does not exist.

Explanation

The Update Installer was unable to find the specified install directory.

Action

Contact IBM support.

CTGDKO014E No .registry file was found in the install directory, the file was empty, or it could not be read.

Explanation

The Update Installer was unable to find the .registry file in the install directory.

Action

Ensure the directory specified is correct and contains the .registry file. If it does, contact IBM support.

CTGDKO015E Unable to open the .registry file for writing.

Explanation

The fix has been applied, but the .registry file could not be updated.

Action

Reapply the fix, or update the .registry file manually.

CTGDKO016E Unable to create file or directory '*file or directory name*' when extracting from '*file name*'.

Explanation

A file or directory could not be created.

Action

Ensure that permissions are correct and there is enough space on the system and run the Update Installer again.

CTGDKO017E Unable to extract '*file name*' from '*zip file*'. An exception occurred: *exception info*

Explanation

An error occurred while attempting to extract a file from an archive.

Action

Inspect the exception information to fix the problem. If the problem persists, contact IBM support.

CTGDKO018E File '*file name*' does not exist in archive '*zip file*'.

Explanation

A file that should be present in the indicated archive cannot be found.

Action

Contact IBM support.

CTGDKO019E Unable to process .registry file in install directory '*directory*'.

Explanation

The .registry file in the indicated install directory could not be processed.

Action

See other messages issued for futher information.

CTGDKO020I Unable to rollback; there are no fixes applied to this installation.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO021I Rolling back '*fix name*' using backup directory '*directory*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO022E Unable to create backup directory '*directory*' for fix '*fix name*'.

Explanation

The directory which will be used for backup files for this fix cannot be created.

Action

Ensure that permissions are correct and there is enough space on the sytstem. Create the directory manually or run the Update Installer again.

CTGDKO023I Applying fix '*fix name*' using backup directory '*directory*'.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO024E The current fix cannot be applied because '*prereq*' is a pre-requisite.

Explanation

The installation is missing a pre-requisite fix.

Action

Apply the pre-requisite fix and run the Update Installer for this fix again.

CTGDKO025I The fix specified is already installed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO026I Backup directories will not be cleared, because the current fix is being applied to previously missing components.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO027I Updating *component*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO028E Unrecognized component '*component*' in fix.

Explanation

The fix is applied, but the fix file contains information about a component that is not valid.

Action

Contact IBM support.

CTGDKO029E During application of a fix to the Embedded Web Platform component, a required JAR file was not found.

Explanation

The fix file indicated and update to the Embedded Web Platform, but the JAR file which contains that fix cannot be found.

Action

Contact IBM support.

CTGDKO030I Usage: applyUpdates (-queryreg | -rollback | -update fix_file.zip [-clean [-silent]] | -queryfix fix_file.zip -enroll lum_file.zip -?

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO031I Backup directories will not be cleared, because this fix is not a fixpack.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKO032E The level of the current installation is '*level*'. The level must be between '*number*' and '*number*' to apply this fix.

Explanation

The current installation is not at an appropriate level to apply this fix.

Action

If the level of the current installation is greater than the maximum level, this fix does not need to be applied. Otherwise, bring the current installation up to the required level before installing this fix.

CTGDKO033I During installation of this fixpack, existing backup directories will be deleted.Are you sure you want to continue? [Y/N]:

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ815I Registering class for XML QName ''*XML qualified name*''...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ816I Completed registering class for XML QName.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ817E Cannot process SOAP response message: HTTP Content-type header is missing.

Explanation

The content type of the resource that is referenced is unknown. The URL of the web service provider cannot be used to get the content type.

Action

Specify valid URL of the web service provider.

CTGDIZ818E Unsupported content type *content type*.

Explanation

The web service provider has set up content type that is not supported.

Action

Ensure the web service provider has set up valid content type.

CTGDIZ819E The org.w3c.dom.Node passed is null.

Explanation

An attribute that represents the SOAP body or the SOAP header is missing.

Action

Specify attributes tha represent the SOAP body and SOAP header in the entry.

CTGDIZ820E Parameters must not be empty.

Explanation

WSDL URL and operation name must be specified.

Action

Specify WSDL URL and operation name.

CTGDIZ821E SOAP operation ''*operation name*'' not found in WSDL ''*WSDL URL*''.

Explanation

SOAP operation was not found in the WSDL.

Action

Specify WSDL file that defines an operation.

CTGDIZ822E WSDL filename must not be empty!

Explanation

The required parameter wsdlFile was not specified in the Axis Easy Web Service Server Connector.

Action

Specify the wsdlFile parameter in the Connector.

CTGDIZ823E Could not close file stream.

Explanation

An I/O error occurred.

Action

Contact IBM support.

CTGDIZ824E The object has not been created properly.

Explanation

Internal error has occurred.

Action

Contact IBM support.

CTGDIZ825E Parameter ''*parameter name*'' of operation ''*operation name*'' is of an unsupported type: ''*parameter type*''.

Explanation

The operation specifies parameter of Java type that cannot be mapped to xsd type.

Action

Ensure the operation has no parameters of unsuported type.

CTGDIZ826E Great-Grandparent config is not an instance of AssemblyLineConfig: *class name*.

Explanation

Great-Grandparent config is not an instance of AssemblyLineConfig.

Action

Contact IBM support.

CTGDIZ827I The web service operation is *name of operation*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ828E Error response received while invoking SOAP web service. The server returned: *HTTP response code*.

Explanation

The HTTP server hosting the SOAP web service returned an error response code.

Action

Examine the response code. Verify the web service is operational.

CTGDJL001W The 'PageSize' parameter set to an invalid value ''*parameter value*''. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid PageSize parameter in the Connector if the default value is not wanted.

CTGDJL002W The 'PageSize' parameter was missing. The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid PageSize parameter in the Connector if the default value is not wanted.

CTGDJL003W The 'PageSize' parameter is set to ''*parameter value*'' which is out of range. Valid range is between 1-''*number*'' The default value ''*parameter value*'' will be used instead.

Explanation

See message.

Action

Specify a valid PageSize parameter in the Connector if the default value is not wanted.

CTGDJL004I Modifying global group entry. The supplied member list is empty so all group members will be removed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJL005I Modifying local group entry. The supplied member list is empty so all group members will be removed.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ301I SOAP Body: ''*SOAP body*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ302E Invalid value for 'returnXMLType': *parameter value*.

Explanation

See message.

Action

Specify a valid 'returnXMLType' parameter in the Function Component.

CTGDIZ303E Invalid value for 'inputXMLType': *parameter value*.

Explanation

See message.

Action

Specify a valid 'inputXMLType' parameter in the Function Component.

CTGDIZ304E The required parameter 'headerAndBodyTagsPresent' is missing.

Explanation

See message.

Action

Specify a valid 'headerAndBodyTagsPresent' parameter in the Function Component.

CTGDIZ305E Entry Attribute ''*attribute name*'' is missing.

Explanation

See message.

Action

Check the attributes in the entry.

CTGDIZ306I Unwrapped SOAP Body Object: *object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ307I Unwrapped SOAP Header Object: *object*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ308I SOAP Header: *SOAP Header*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ309E Could not parse unwrapped SOAP Body.

Explanation

See message.

Action

Check the SOAP message.

CTGDIZ310E The SOAP Header element must be namespace qualified.

Explanation

All immediate child elements of the SOAP Header element must be namespace-qualified.

Action

Check the SOAP message.

CTGDIZ311I The namespace URI of the DOM Element: *namespaceURI*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ312I The name of the DOM Element: *elementName*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ313I The value of the DOM Element: *elementValue*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ314I SOAP Message: *SOAP message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ315E The WrapSoap Function Component received an invalid object: *object*.

Explanation

The parameter of the perform method must be an object instance of Entry.

Action

Invoke the method perform with a parameter instance of Entry.

CTGDIZ316E The WrapSoap Function Component was passed an object of incorrect type. Exception occurred: *exception*

Explanation

The type of object expected by the WrapSoap Function Component depends on the value of the "Input the SOAP Body and Header As" configuration parameter. If a "String" is specified as the value of this parameter then the object passed must be an instance of java.lang.String. If "DOMElement" is specified, then an object of org.w3c.dom.Element must be passed.

Action

Pass the correct type of object to the perform method of WrapSoap Function Component.

CTGDIZ101I Exiting initialization early because Connector already initialized with a java.net.Socket object.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ102I Using the provided java.net.Socket object for client session.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ103E The 'inputType' parameter is set to an invalid value ''*parameter value*''.

Explanation

See message.

Action

Specify a valid inputType parameter in the Connector.

CTGDIZ104I The parameter 'inputType' is set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ105E The 'returnXMLType' parameter is set to an invalid value ''*parameter value*''.

Explanation

See message.

Action

Specify a valid returnXMLType parameter in the Connector.

CTGDIZ106I The parameter 'returnXMLType' is set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ107E Required Connector parameter 'useSSL' is not set.

Explanation

The specified Connector parameter useSSL is required, but not set.

Action

Set the Connector parameter useSSL.

CTGDIZ108E Required Connector parameter 'tcpPort' is not set.

Explanation

The specified Connector parameter tcpPort is required, but not set.

Action

Set the Connector parameter useSSL.

CTGDIZ109I The parameter 'useSSL' is set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ110I The parameter 'tcpPort' is set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ111I The parameter 'requireClientAuth' is set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ113E Called the getNextClient method and Connector is not configured as a server session. Use the getNextEntry method to retrieve the next client request.

Explanation

See message.

Action

Call the getNextEntry to retrieve the next client request.

CTGDIZ114I Connector terminated by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ115I Connector terminating by external request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ116I Terminate server request received.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ117I Creating dummy connection using IP Address ''*IP Address*'' and port ''*port number*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ118I Connector is already terminating. Not sending termination request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ119I Sending termination request to Connector.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ120E Unable to terminate the Connector. No server Connector available or this Connector is no longer accepting connections.

Explanation

See message.

Action

Check the status of Server Connector.

CTGDIZ121E Called the getNextEntry and Connector is not configured as server session. Use the getNextClient method to retrieve the next client request.

Explanation

See message.

Action

Call the getNextClient to retrieve the next. client request.

CTGDIZ122I Processing a request for the hosted WSDL.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ123I Processing a SOAP request.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ124I Processed SOAP request: ''*SOAP request*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ125W The '$operation' Attribute of the op-entry has not been set because there is no context or the context is not an AssemblyLine object.

Explanation

This can happen when this Connector is used outside the context of an AssemblyLine, for example, in script.

Action

Use this Connector only in the context of an AssemblyLine (i.e. by inserting the Connector in the AssemblyLine from the Config Editor), if the operation name needs to be available.

CTGDIZ126W The operation name cannot be extracted from the SOAP request message.

Explanation

The Connector could not find the XML element with the SOAP operation name in the first child of the SOAP Body element. Often this means that the SOAP request message was a generic Document style message, which is not associated with a SOAP operation.

Action

The web service client must use either RPC-style or Document Wrapped style SOAP request messages, if the Entry/AssemblyLine needs to be tagged with the operation name.

CTGDIZ127I Connector response HTTP status code set to ''*status code*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ128I Connector response content type set to ''*content typet*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ129I Connector response content length set to ''*content length*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ130I Connector response set to ''*response value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ131E Child of the Body element has not been found.

Explanation

The SOAP message has empty Body or Envelope tags or the message is ivalid.

Action

Check the SOAP message.

CTGDIZ132I Starting output of HTTP request headers...

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ133I *content length* set to ''*content length value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ134I *content type* set to ''*content type value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ135I *content location* set to ''*content location value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ136I *soap action* set to ''*soap action value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ137I *host name* set to ''*host name value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ138I End of output of HTTP request headers.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ139I HTTP method set to ''*HTTP Request*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ140I Requested HTTP resource set to ''*file name*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIZ141E Unexpected end of data while reading.

Explanation

See message.

Action

No action is required.

CTGDIZ142E Bad Request.

Explanation

The request is neither GET nor POST request.

Action

See message.

CTGDIZ143E The authentication method is not recognized.

Explanation

See message.

Action

Use another authentication method.

CTGDIZ144W The parameter 'requireClientAuth' is missing and is set to its default value: ''*parameter value*''.

Explanation

The specified Connector parameter requireClientAuth is required, but not set. The reason might be a creation of the configuration with old IBM Security Directory Integrator 6.0 ConfigEditor, which does not have the parameter. Thus a default value is set.

Action

No action is required.

CTGDJZ101I XML SAX Parser thread running.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ102E XML SAX Parser only supports input.

Explanation

XML SAX Parser does not write, for now only reading is accepted.

Action

Use XML SAX Parser for reading and parsing only.

CTGDJZ103E There is no input stream provided to XML SAX Parser.

Explanation

The initialization of SaxContentHandler thread fails.

Action

Check the input stream (file).

CTGDJZ104E The XML SAX Parser parameter Read Timeout value has to be a positive number.

Explanation

See message.

Action

Enter a positive number for the read timeout parameter.

CTGDJZ105E The XML SAX Parser parameter Read Timeout value has to be number.

Explanation

See message.

Action

Type in a positive number read timeout parameter.

CTGDJZ106E Unable to read the Entry. Exception *exception class* occurred: *exception*

Explanation

An InterruptedException is encountered when the method readEntry is trying to read the next entry in the XML document.

Action

No action is required.

CTGDJZ107E Exceeded the stipulated wait period.

Explanation

There was no entry in the queue during the stipulated wait period.

Action

No action is required.

CTGDJZ108E The Entry from the queue is a message.class = *class name*, message = *message*.

Explanation

The next message from the queue is an instance of the class Exception.

Action

Analyse the exception.

CTGDJZ109E The method WriteEntry is not supported by the XML SAX Parser.

Explanation

See message.

Action

Use XML SAX parser only for reading and parsing.

CTGDJZ110I XML SAX Parser terminated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ111I Inside the isGroupTag method: tag=*tag*, groupTag=*group tag*.

CTGDJZ128I SAX Parse Warning:line:*line number*, ID:*ID*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ201I Parser will request namespace aware Parser.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ202I Parser will request validating Parser.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ203I Parser will not indent output.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ204E No output XSL file specified.

Explanation

There is no output XSL file to transform internal format to the original format.

Action

Specify the output XSL file parameter.

CTGDJZ205E Trying to write XML with no output stream.

Explanation

The output stream is null.

Action

Check the output mode.

CTGDJZ206I Initialize Output Document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ207E Trying to read XML with no input stream.

Explanation

The input stream is null.

Action

Check the input modes.

CTGDJZ208I Initialize Input Document.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ209E No input XSL file specified.

Explanation

There is no input XSL file to transform the original format to the internal format.

Action

Specify the input XSL file parameter.

CTGDJZ210E The input XSL document has no root.

Explanation

Each XSL document must have a root tag.

Action

Check the root tag in the input XSL file.

CTGDJZ211E The XSL document has no children: *tag name*.

Explanation

The XSL document must have children elements.

Action

Check the children elements in the input XSL file.

CTGDJZ212I The XSL document has *number of children* children elements.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ213E Cannot parse the input XSL.

Explanation

The input XSL object is not an instance of String or StringReader.

Action

Check the validity of the XSL file.

CTGDJZ214E DOM node processing not supported.

Explanation

Cannot generate DOM input or output.

Action

No action is required.

CTGDJZ215E Expected child item at index ''*index number*''.

Explanation

The node for this index is null.

Action

Check the content of XSL file.

CTGDJZ216I The XML Child node has no children so its being skipped.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDJZ217E The XSL does not conform to the defined format.

Explanation

Expect the node name to be 'Attribute'.

Action

Verify the content of XSL.

CTGDJZ218E XSL does not conform to the defined format.

Explanation

Expect the node name to be 'Value'.

Action

Verify the content of XSL.

CTGDJZ220E Incorrect node type.

Explanation

The node type must be TEXT_NODE, CDATA_SECTION_NODE or ELEMENT_NODE.

Action

Check the content of XSL.

CTGDJZ221I SAX Parse Warning: line:*line number*, ID:*ID*, message:*message*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE001I Connector could not set the starting change number to ''*change number*''. The 'nsChangenumber' parameter will be ignored.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE002I The starting change number is ''*change number*'' and the 'iteratorStateKey' parameter is set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE003I Entry not found in change log with change number of ''*change number*'' and the 'ldapSearchBase' set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE004I Skipping entry with change number of ''*change number*'' and will try next entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE005I Timeout waiting for next changed entry.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE006E Could not retrieve last change number.

Explanation

The 'lastchangenumber' attribute is missing or its value is not a parsable string representing a long value.

Action

Make sure the z/OS LDAP Server is properly configured.

CTGDIE007W Unable to store the change number value ''*change number*'' in the System Store. Exception encountered: *exception*

Explanation

The System Store could be configured incorrectly.

Action

Make sure that the System Store is configured correctly.

CTGDIE008E Unable to parse entry because the entry is not a valid change log entry. The 'changes' and 'newrdn' attributes are missing. The entry operation was set to ''*operation type*''.

Explanation

Your z/OS LDAP Server could be configured incorrectly.

Action

Make sure that your z/OS LDAP Server is properly configured.

CTGDIE009E Unable to parse the change log 'changes' attribute. See the exception message for more information.

Explanation

An error has occured while the LDIF Parser was parsing the change log 'changes' attribute. The syntax of the change log information retrieved from the z/OS LDAP Server is probably invalid.

Action

Make sure that your z/OS LDAP Server is properly configured.

CTGDIE010E Restart info does not contain the attribute 'changeNumber'.

Explanation

An internal error occurred. The Checkpoint/Restart feature failed.

Action

Contact IBM support.

CTGDIE011I Reading entry in change log with change number of ''*change number*'' and the 'ldapSearchBase' set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE012I Found entry in change log with change number of ''*change number*'' and the 'ldapSearchBase' set to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDIE013W The iterator state key is not specified. No state will be stored. The Start At parameter's value will be used.

Explanation

See message.

Action

Specify the iterator state key if you want the state of the changelog connector to be saved.

CTGDKB001I Parameter ''*parameter name*'': *parameter value*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB002E Required parameter missing: ''*parameter name*''.

Explanation

See message.

Action

Specify the required parameter in the Function Component.

CTGDKB003E Parameter ''*parameter name*'' is too long: ''*parameter value*''. The maximum length of the parameter is *length*.

Explanation

See message.

Action

Specify the parameter with a valid length.

CTGDKB004I ATB_OK code is: *integer*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB005I APPC conversation successfully allocated.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB006E Could not allocate APPC conversation; return code:*return code*.

Explanation

See message.

Action

No action is required.

CTGDKB007E The perform method of the Function Component failed because the method was not passed an Entry object. Non-Entry objects are not supported.

Explanation

See message.

Action

Verify the perform method of the Function component is passed an Entry object.

CTGDKB008E Unable to retrieve the command output of the TSO command. The conversion failed and the C layer execute returned NULL.

Explanation

See message.

Action

No action is required.

CTGDKB009E Invalid data returned from C layer: *output*.

Explanation

See message.

Action

No action is required.

CTGDKB010I No output returned by the TSO command.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB011I Command to execute: *command*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB012E Could not execute TSO command. The command returned return code: *return code*.

Explanation

See message.

Action

Review the return code to determine the proper response.

CTGDKB013I TSO command output: *command output*.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB014I Conversation deallocated successfully.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB015W Error on deallocating the conversation during termination: *error code*.

Explanation

See message.

Action

No action is required.

CTGDKB016E Error message: *error message*.

Explanation

See message.

Action

Review the exception to find further details on the error.

CTGDKB017I Parameter ''*parameter name*'' was transformed from ''*parameter value*'' to ''*parameter value*''.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

CTGDKB018I Parameter ''*parameter value*'' transformed to upper case.

Explanation

No additional information is available for this message.

Action

Consult the Maintenance and Problem Determination Guide for suggestions for assessing system health.

Notices

This information was developed for products and services offered in the U.S.A. IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing
IBM Corporation
North Castle Drive
Armonk, NY 10504-1785 U.S.A.

For license inquiries regarding double-byte character set (DBCS) information, contact the IBM Intellectual Property Department in your country or send inquiries, in writing, to:

Intellectual Property Licensing
Legal and Intellectual Property Law
IBM Japan, Ltd.
19-21, Nihonbashi-Hakozakicho, Chuo-ku
Tokyo 103-8510, Japan

The following paragraph does not apply to the United Kingdom or any other country where such provisions are inconsistent with local law :

INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Some states do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement might not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

Any references in this information to non-IBM Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this IBM product and use of those Web sites is at your own risk.

© Copyright IBM Corp. 2006, 2014

IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Licensees of this program who wish to have information about it for the purpose of enabling: (i) the exchange of information between independently created programs and other programs (including this one) and (ii) the mutual use of the information which has been exchanged, should contact:

IBM Corporation
2Z4A/101
11400 Burnet Road
Austin, TX 78758 U.S.A.

Such information may be available, subject to appropriate terms and conditions, including in some cases payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement or any equivalent agreement between us.

Any performance data contained herein was determined in a controlled environment. Therefore, the results obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurement may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

All statements regarding IBM's future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

All IBM prices shown are IBM's suggested retail prices, are current and are subject to change without notice. Dealer prices may vary.

This information is for planning purposes only. The information herein is subject to change before the products described become available.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.

COPYRIGHT LICENSE:

This information contains sample application programs in source language, which illustrate programming techniques on various operating platforms. You may copy, modify, and distribute these sample programs in any form without payment to

IBM, for the purposes of developing, using, marketing or distributing application programs conforming to the application programming interface for the operating platform for which the sample programs are written. These examples have not been thoroughly tested under all conditions. IBM, therefore, cannot guarantee or imply reliability, serviceability, or function of these programs. You may copy, modify, and distribute these sample programs in any form without payment to IBM for the purposes of developing, using, marketing, or distributing application programs conforming to IBM's application programming interfaces.

Each copy or any portion of these sample programs or any derivative work, must include a copyright notice as follows:

© (your company name) (year). Portions of this code are derived from IBM Corp. Sample Programs. © Copyright IBM Corp. _enter the year or years_. All rights reserved.

If you are viewing this information in softcopy form, the photographs and color illustrations might not be displayed.

Trademarks

IBM, the IBM logo, and ibm.com® are trademarks or registered trademarks of International Business Machines Corp., registered in many jurisdictions worldwide. Other product and service names might be trademarks of IBM or other companies. A current list of IBM trademarks is available on the Web at "Copyright and trademark information" at www.ibm.com/legal/copytrade.shtml.

Adobe, Acrobat, PostScript and all Adobe-based trademarks are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States, other countries, or both.

IT Infrastructure Library is a registered trademark of the Central Computer and Telecommunications Agency which is now part of the Office of Government Commerce.

Intel, Intel logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.

Linux is a trademark of Linus Torvalds in the United States, other countries, or both.

Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

ITIL is a registered trademark, and a registered community trademark of the Office of Government Commerce, and is registered in the U.S. Patent and Trademark Office.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Java and all Java-based trademarks and logos are trademarks or registered trademarks of Oracle and/or its affiliates.

Cell Broadband Engine is a trademark of Sony Computer Entertainment, Inc. in the United States, other countries, or both and is used under license therefrom.

Linear Tape-Open, LTO, the LTO Logo, Ultrium, and the Ultrium logo are trademarks of HP, IBM Corp. and Quantum in the U.S. and other countries.
