INTEGRATED SERVICE MANAGEMENT

INTEGRATED SERVICE MANAGEMENT

- **Service architectures tailored by industry**
- **Service lifecycle management**
- **Service dashboards**
- **Unified management of service requests and incidents**
- **Asset management**
- **Automated management**

Asset: turbine bucket

Unit cost: \$5000

in system: 703

Total asset value: \$3,515,000

Maintenance: yes - 4,000 & 24,000 fired hours

Tracking System: Microsoft Excel

Microsoft Excel is a registered trademark of Microsoft Corporation.

Microsoft Excel is a registered trademark of Microsoft Corporation.

- Created reusable components across their lines of business
- Reduced time to market by more than 85%
- Increased new product launches from 15% to 75%

for Design & Delivery

Running Securely and Flawlessly

IBM Integrated Service Management

VISIBILITY.

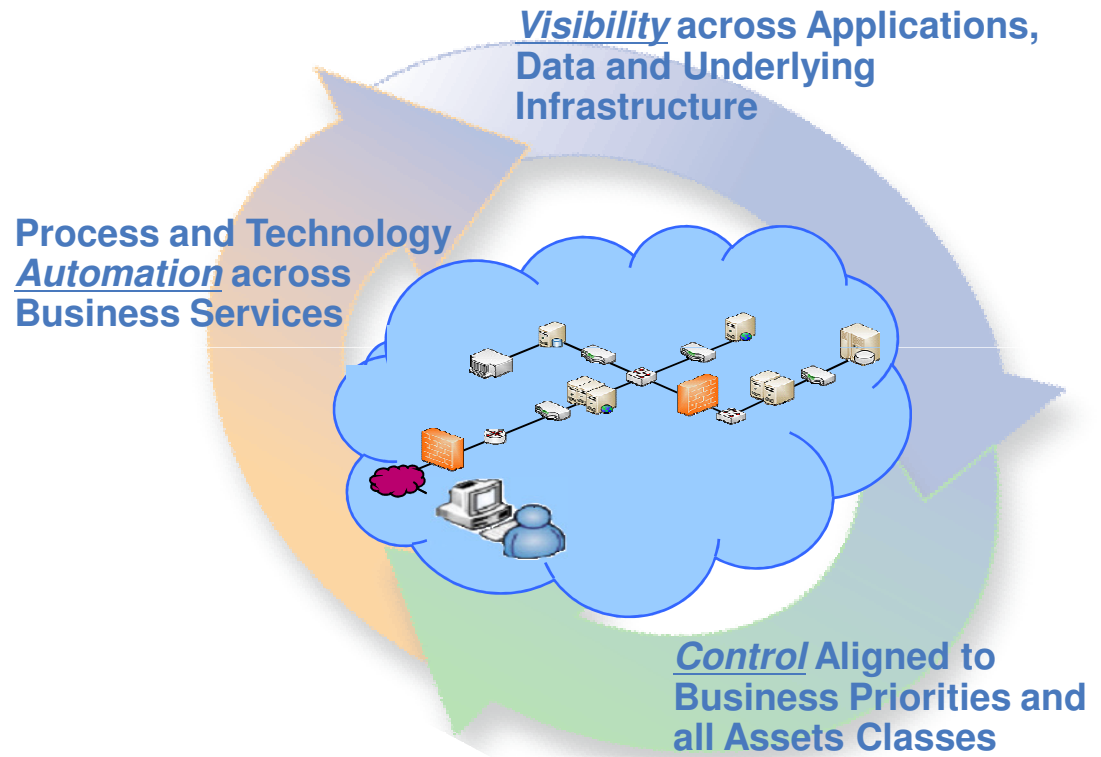

CONTROL.

AUTOMATION.

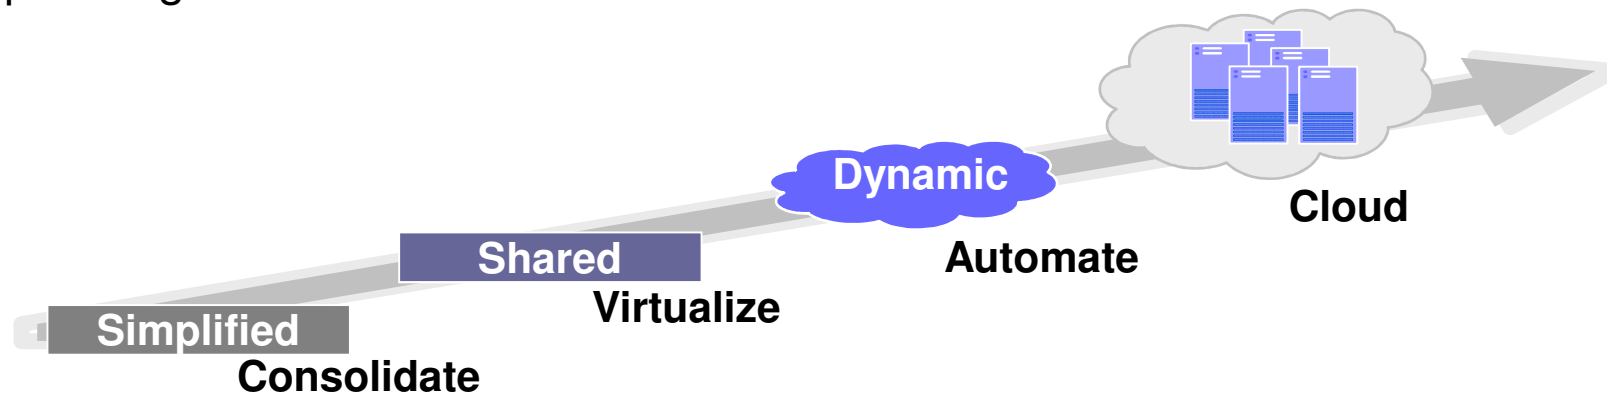

IBM Integrated Service Management

IBM Integrated Service Management

IBM Service Management helps organizations leverage service management principles through tailored combinations of **hardware, software, best practices and consulting** to create best business value in each unique industry. Across the board, IBM Service Management offers exceptional value for customers planning the transformation of their business.

Successful transformations require a secure, consistent and embedded Service Management platform as the foundation

Consolidation

Centralization

Physical Consolidation (e.g. by Virtualization)

Reducing storage/servers with fewer more powerful systems

Data Consolidation & Integration

Centralizes data from different sources. Reduce instances

Application Integration (= Functional Consolidation)

Migrates several applications into fewer applications

Virtualization Makes the best use of resources.

Servers

Reduce hardware acquisition and management costs

Storage

Reduce the complexity and cost of managing SAN-based storage

Application

Run mixed application types and workload patterns to optimize resource utilization and management while enhancing quality of service

Automation

Change, Provision, & Automate

- Shorten Mean-Time to Repair (MTTR)
- Reduce capital and labor costs
- Setup time reduced to hours vs. days
- Increase service delivery quality

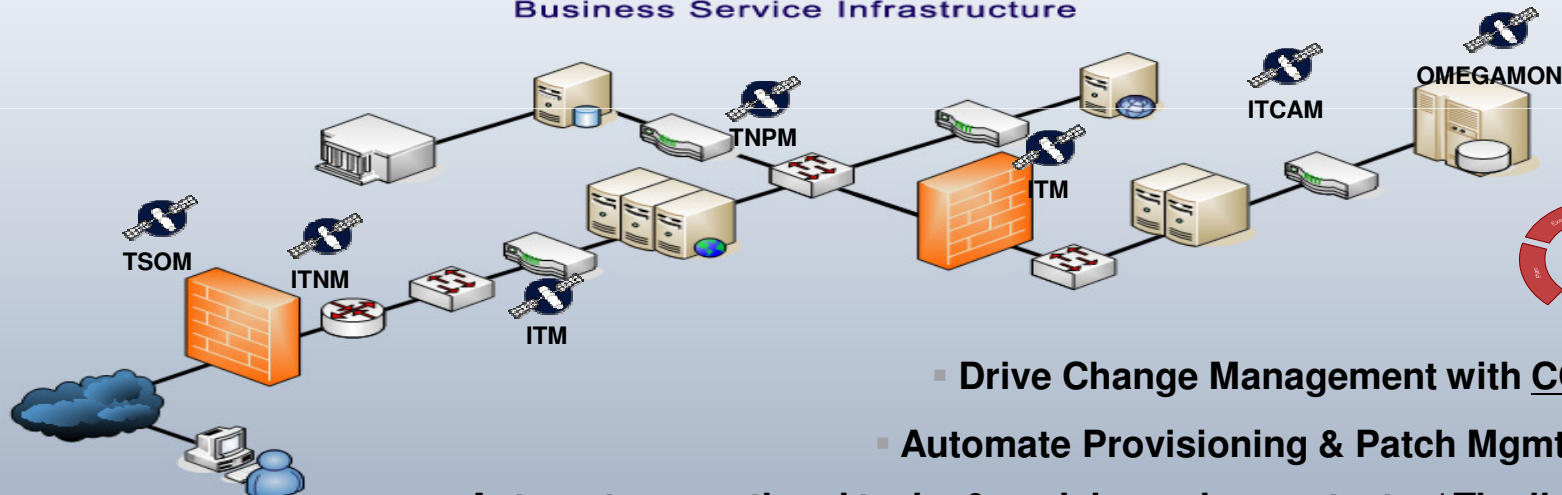

Resource Pool

Actions

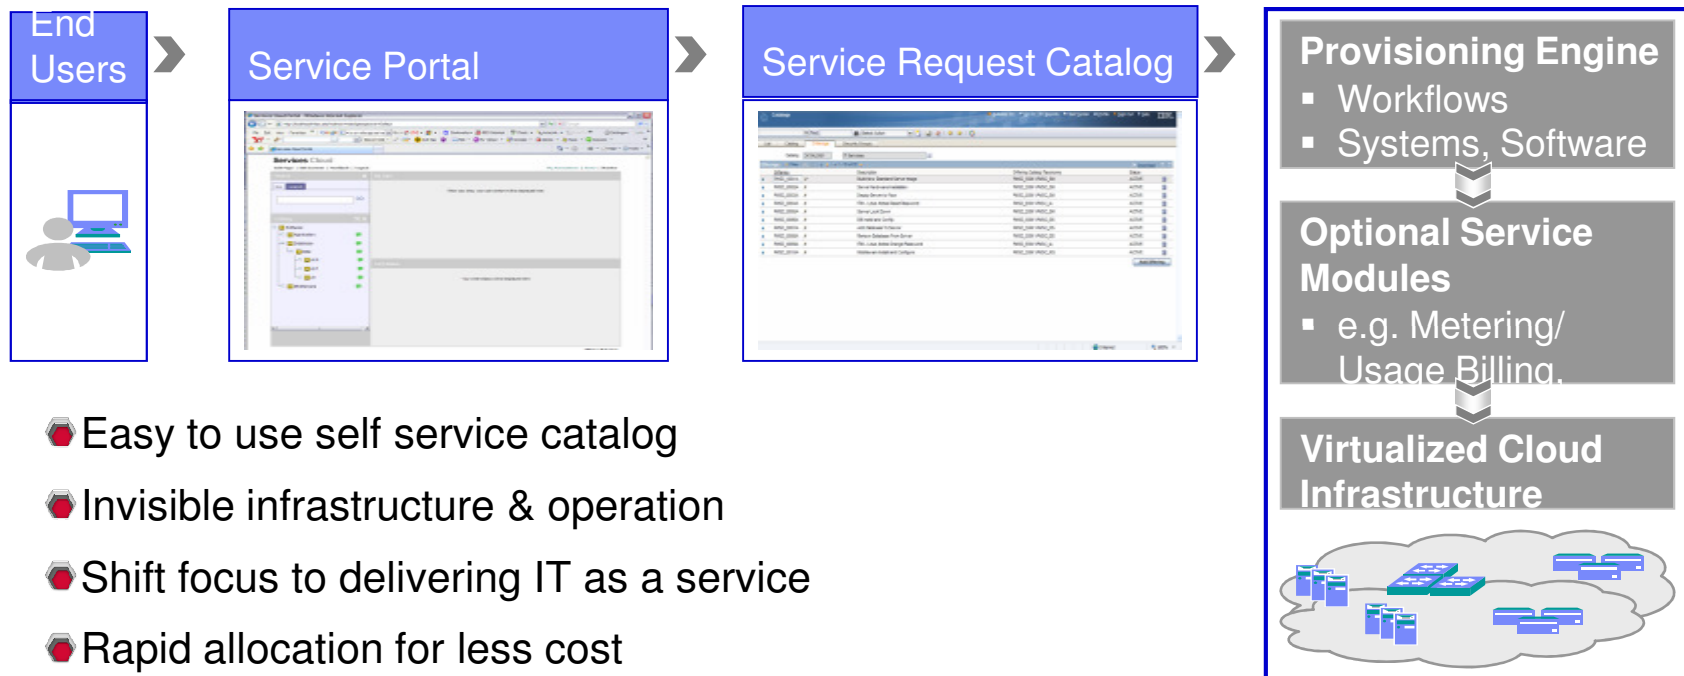

- Increase Server capacity
- Add Redundant Database
- Need WebServer to meet demand
- Manage new resources

Business Service Infrastructure

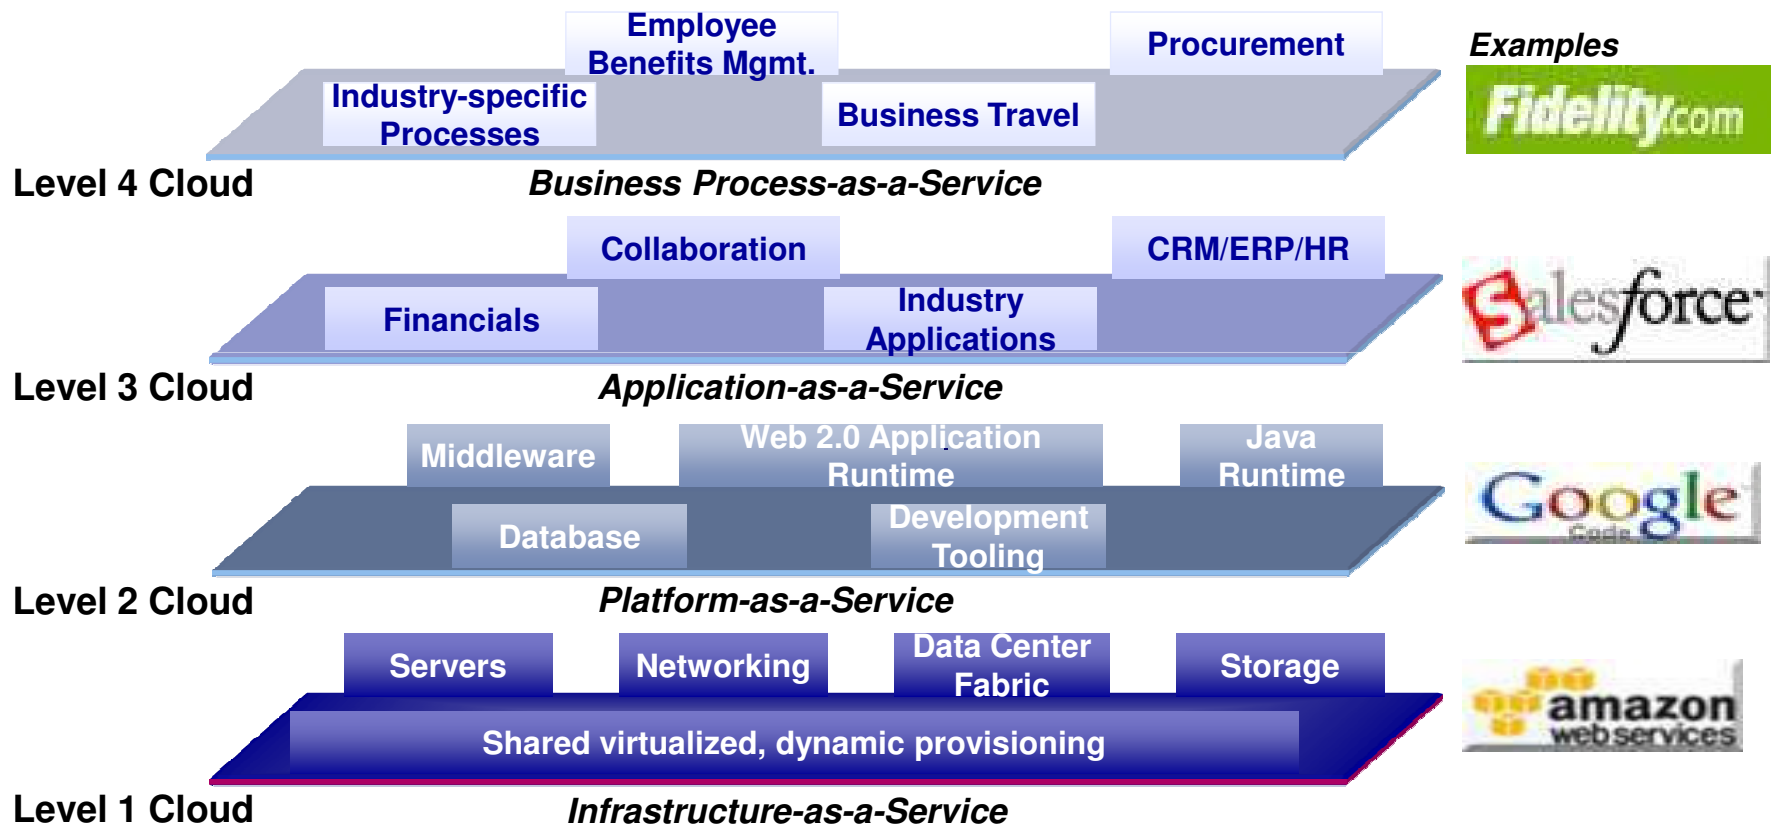

- Drive Change Management with CCMDB.
- Automate Provisioning & Patch Mgmt (TPM)
- Automate operational tasks & enrich service context w/ Tivoli Impact

Service Management of the Cloud

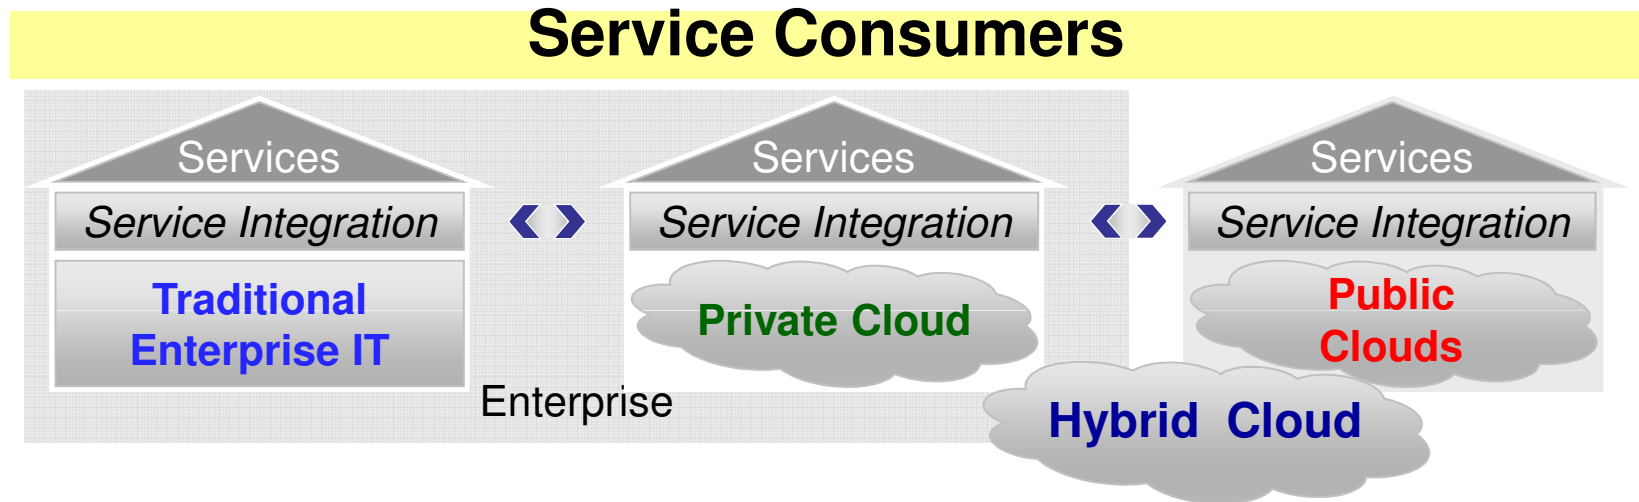

- Easy to use self service catalog
- Invisible infrastructure & operation
- Shift focus to delivering IT as a service
- Rapid allocation for less cost
- Services which can be metered and billed

Four Major Categories of Cloud Computing Services Are Emerging

Cloud Computing Services are Being Delivered

Using Three Coexisting Delivery Models

Client owned and managed.

Access defined by client.

.... Customization, efficiency,
resiliency, security and privacy

Service provider owned and managed.

Access by subscription.

.... Standardization, capital preservation,
flexibility and time-to-deploy

GOVERNANCE

Sample Cloud offerings from Tivoli

IBM Service Management

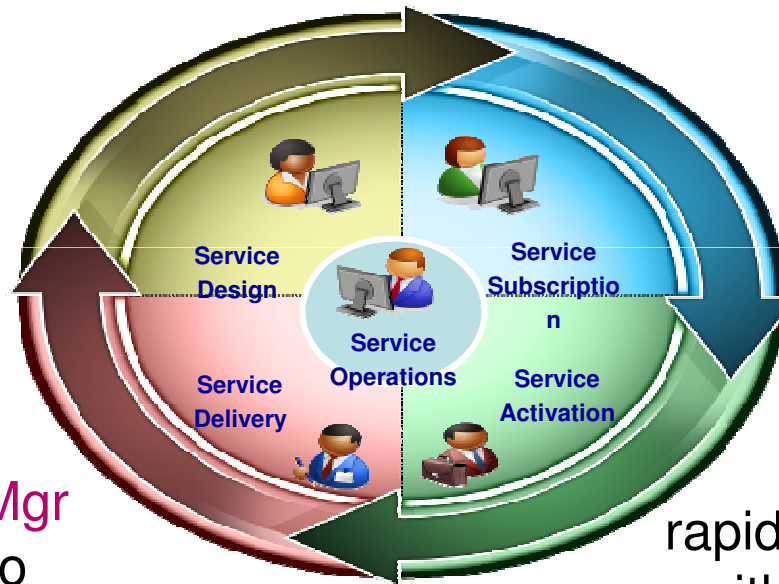

For clients seeking to design
highly customized
cloud services

IBM Tivoli

Service Automation Mgr

For clients seeking to
deliver cloud services with
more platform and
virtualization options

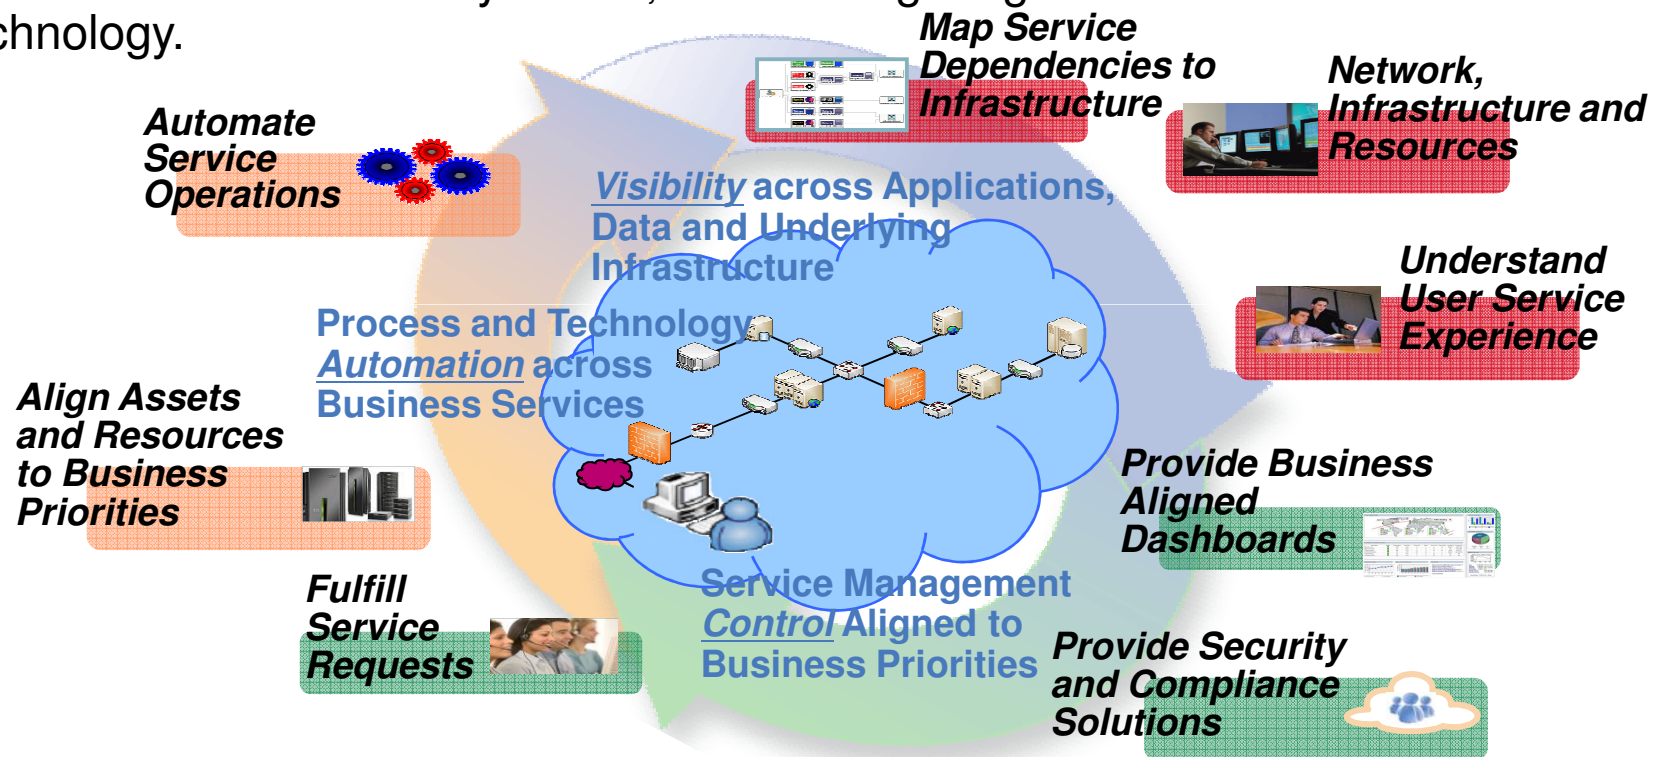

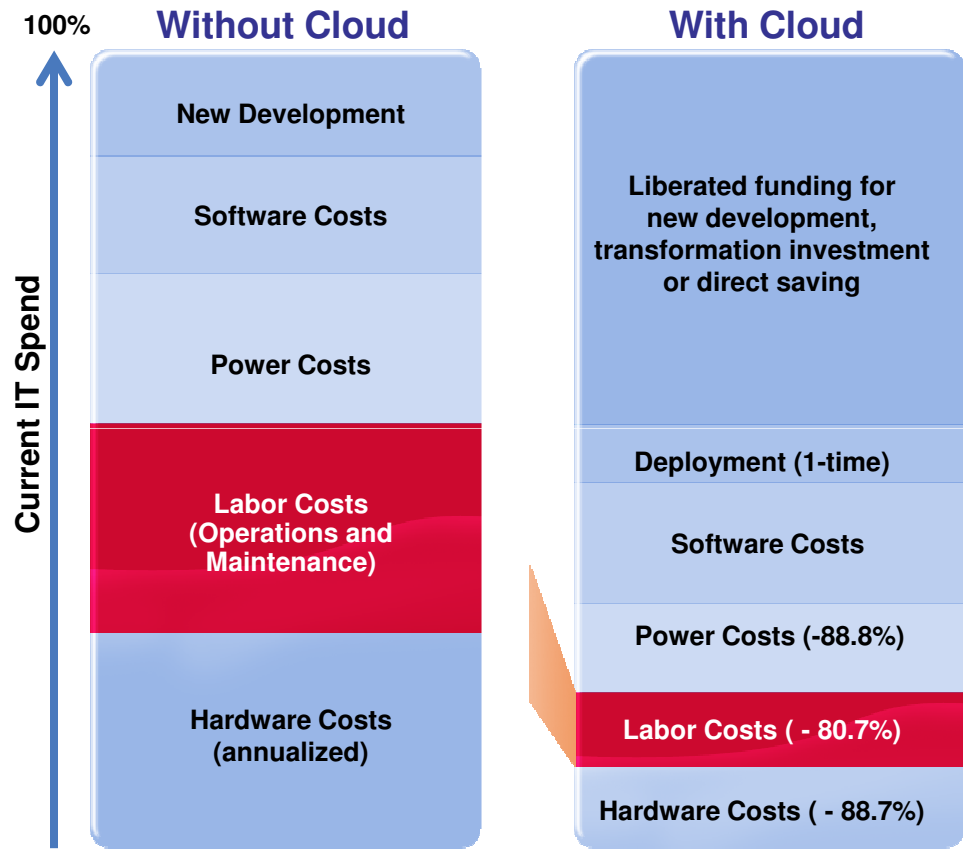

IBM CloudBurst

For clients seeking to
rapidly active cloud services
with a **fixed configuration**

Cloud – Why Tivoli

IBM Tivoli offers the solutions and expertise to transform the world's intelligent global infrastructure to accelerate innovation, connect people, provide an effective & creative service delivery model, and leverage a global network of skills and technology.

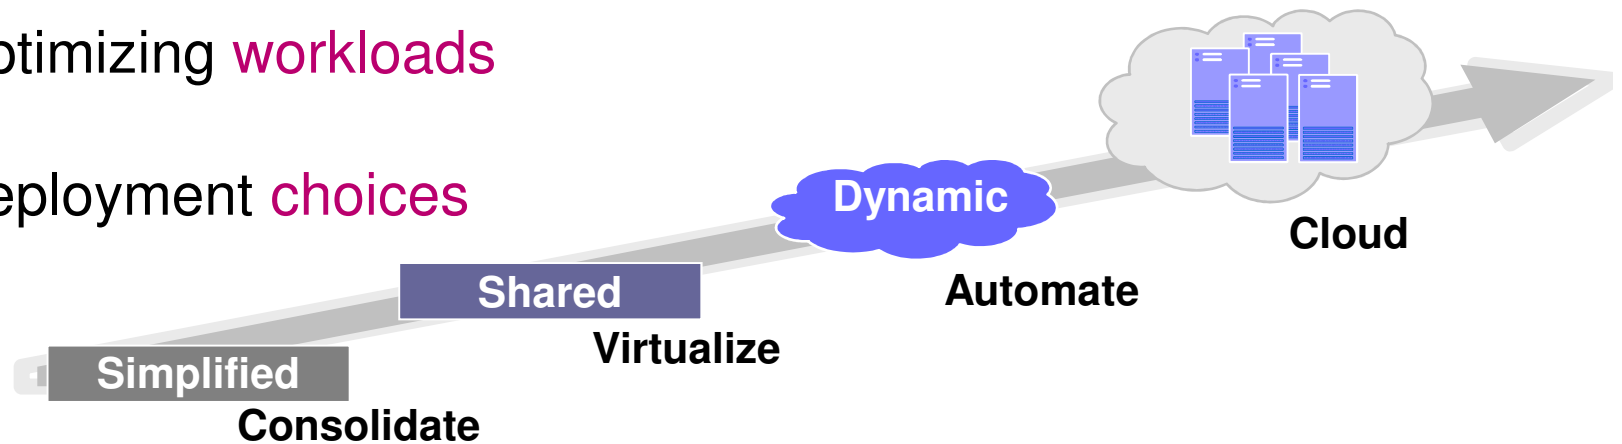

IBM Today is ...

... about delivering **service management**

... about optimizing **workloads**

... about deployment **choices**
