

Cosco

Ma Tao, Deputy General Manager

Cosco

Cosco is a global international shipping company. Currently COSCO is in the top 10 among shippers all over the world. And our business covers all the global ports.

Ma Tao, Deputy General Manager

Cosco

I have a lot of systems. Between the systems there are connecting points. After many years of improvisation and accumulation, all the connecting points became a kind of matrix. It's a very convoluted matrix.

Ghen Huaihai, Project Deputy Manager

Cosco

Before, our EDI system was very confusing. We had about 21 major applications to deal with our daily EDI requirement. These applications utilize different operating languages – BC, VC, Java, and other various languages.

Ke Zhang, Software Engineer

Cosco knew they had a problem but they did not know how to solve it

Hui Zhou,

IT Architect

At the beginning we faced great pressure. So everybody worked very hard on this project.

Wendy Zhang

Advisory Sales Specialist, WebSphere

As SSRs, we first try to understand our customer's needs. We discovered that the customer in fact not only needed a platform for a data exchange, but also an application infrastructure which could meet the different requirements of the various enterprises.

Ge Jin

Architect, SOA Service

We propose SOA solutions to Coscom and we tell them that SOA could provide flexible system that they need.

Ma Tao, Deputy General Manager

Cosco

IBM, I can say, is the first company to put forth a SOA philosophy. It has combined our global businesses into a unified model.

Ge Jin

Architect, SOA Service

IBM have technical leadership in SOA and the more important thing is we have a local team to help Coscon transfer IBM technology to Coscon IT environment.

Ghen Huaihai, Project Deputy Manager

Cosco

Not only does IBM care about what we should do within our EDI projects, IBM also cares about the challenges EDI is facing and the role EDI should be playing in the entire industry.

Ma Tao, Deputy General Manager

Cosco

The SOA team has inspired us at Cosco, just as the SOA concept has inspired us. The SOA team is innovative and full of passion.
