

IBM Rational Software Conference 2009
As Real as It Gets!

Real Insights. Real Results.

Kathy Mandelstein

Director of WW Marketing, IBM Rational Software

kmandel@us.ibm.com

Rational. software

Today's Discussion

- Rational Strategy Review
- Our Approach to Real Results
- Time to Get Real
- Innovation Today

The evolution of Rational strategy

***Accelerating
software
development evolution***

- Empowerment
- Modularity
- Communities

***Deliver value efficiently
and effectively in
distributed organizations***

- Enabling governance
- Adopting flexible architectures
- Leveraging communities

***Helping guide you
from the cathedral
to the bazaar***

- Ship early
- Ship often
- Listen to your customers

Rational *strategy in action* over the past year

- **CONTINUED DELIVERING** on the promise and vision of a flexible Jazz architecture
 - ▶ Shipping early, shipping often with a transparent product development on Jazz.net
 - ▶ Delivering 8 Jazz-built products and 18 Jazz-enabled products
- **CONTINUED EXPANDING** Rational communities to listen to our customers and partners
 - ▶ Launched Open Services for Lifecycle Collaboration initiative
- **CONTINUED INVESTING** to evolve current portfolio
 - ▶ New releases of ClearCase and ClearQuest and 73 other C/ALM products in 2008
- **EXTENDED REACH** into systems engineering by integrating Telelogic

Rational strategy in a broader context:

The world needs to get a whole lot smarter

INSTRUMENTED

We now have the ability to measure, sense & see the exact condition of everything.

INTERCONNECTED

People, systems & objects can communicate & interact with each other in entirely new ways.

INTELLIGENT

We can respond to changes quickly & accurately, & get better results by predicting & optimizing for future events.

A smarter planet will require a significant investment in software and systems

- Imagine the amount of *software* necessary to:
 - ▶ Leverage a wealth of information to make more intelligent choices
 - ▶ Take action on energy, the environment and sustainability to deliver a greener world
 - ▶ Manage an interconnected infrastructure with billions of devices
- Success in building a smarter planet is highly dependent on our ability to *manage effective software and systems delivery*

Let's build a smarter planet

Challenges to effective software delivery remain and expand

Individual Challenges

- **Lack of standards** impacts ability to collaborate, automate and report
- Frequent asset updates and **complex dependencies**

Team Challenges

- **Geographically dispersed teams**
- Effective **cross-organizational visibility** and synchronization

Organizational Challenges

- Greater need for **market experimentation**
- **Blind adherence** to process insensitive to potential business trade-offs
- Need for **agility@scale**

Business Challenges

- More granular service functionality and **composite applications**
- **Growing number of assets** including custom, outsourced and packaged

Economic conditions add significant pressure to the reality of software and systems delivery

A new approach to IT delivery models and sourcing options is required that allows IT organizations to be more responsive to the needs of the business.

Barbara Gomolski, Gartner
October, 2008

Companies successfully addressing the challenges [of delivering product innovation from software] are driving higher profitability.

Michelle Boucher, Aberdeen Group
March, 2009

Transformation and innovation will lead recovery. When we come out the other side of this crisis, companies will look different – technology will have been a catalyst in those changes.

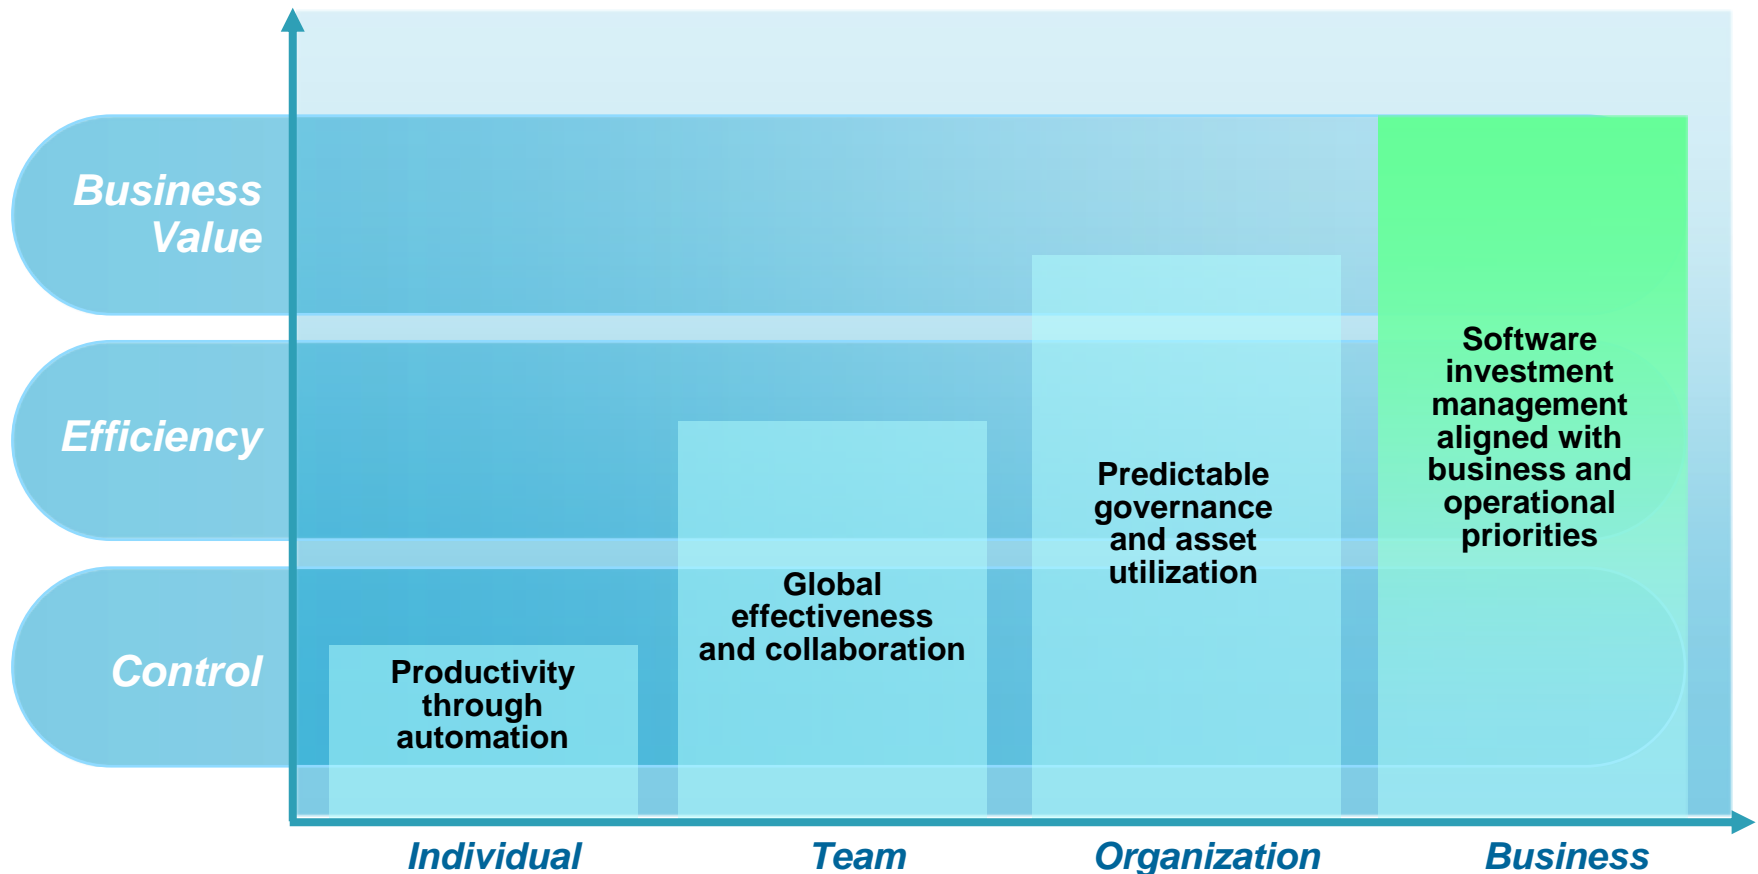

George Colony, Forrester Research,
October, 2008

Rational strategy can bring focus in uncertain times

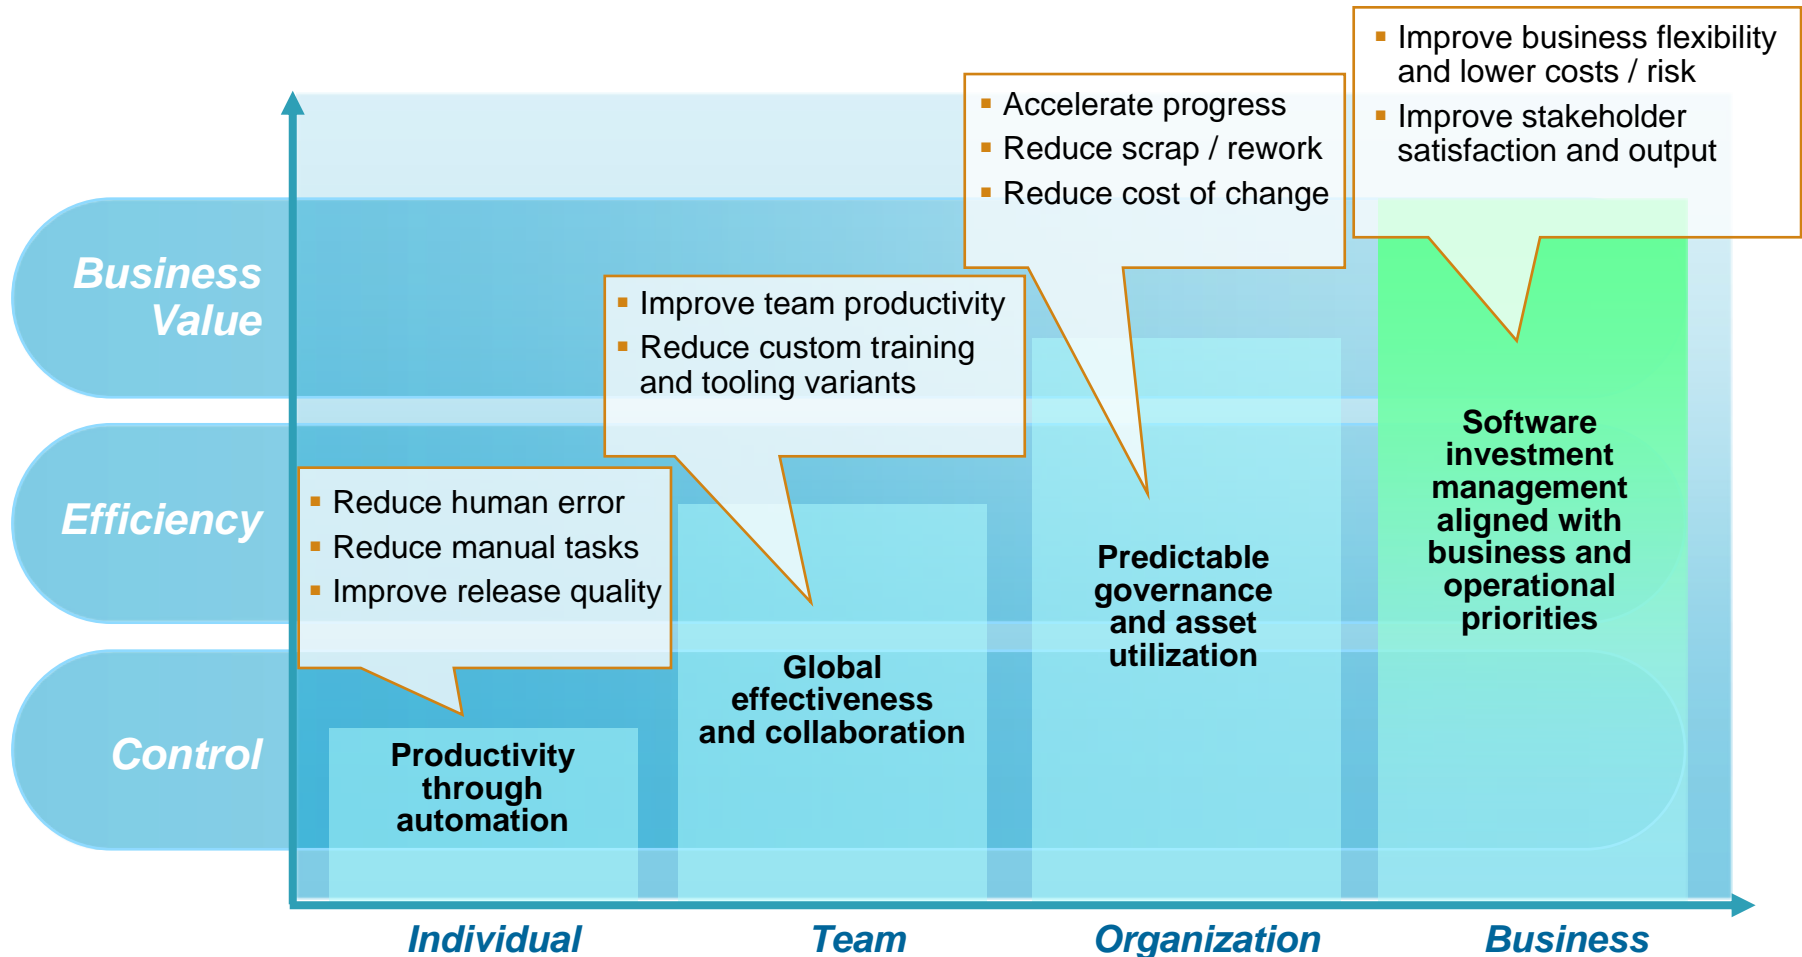

- Provides measured, short-term *Return on Investment*
- Enables longer-term management of *Return on Assets*
- Delivers a platform and processes to make those returns come to life
- Encourages and informs, rather than dictates
- Supports incremental improvement, leading to faster decision making

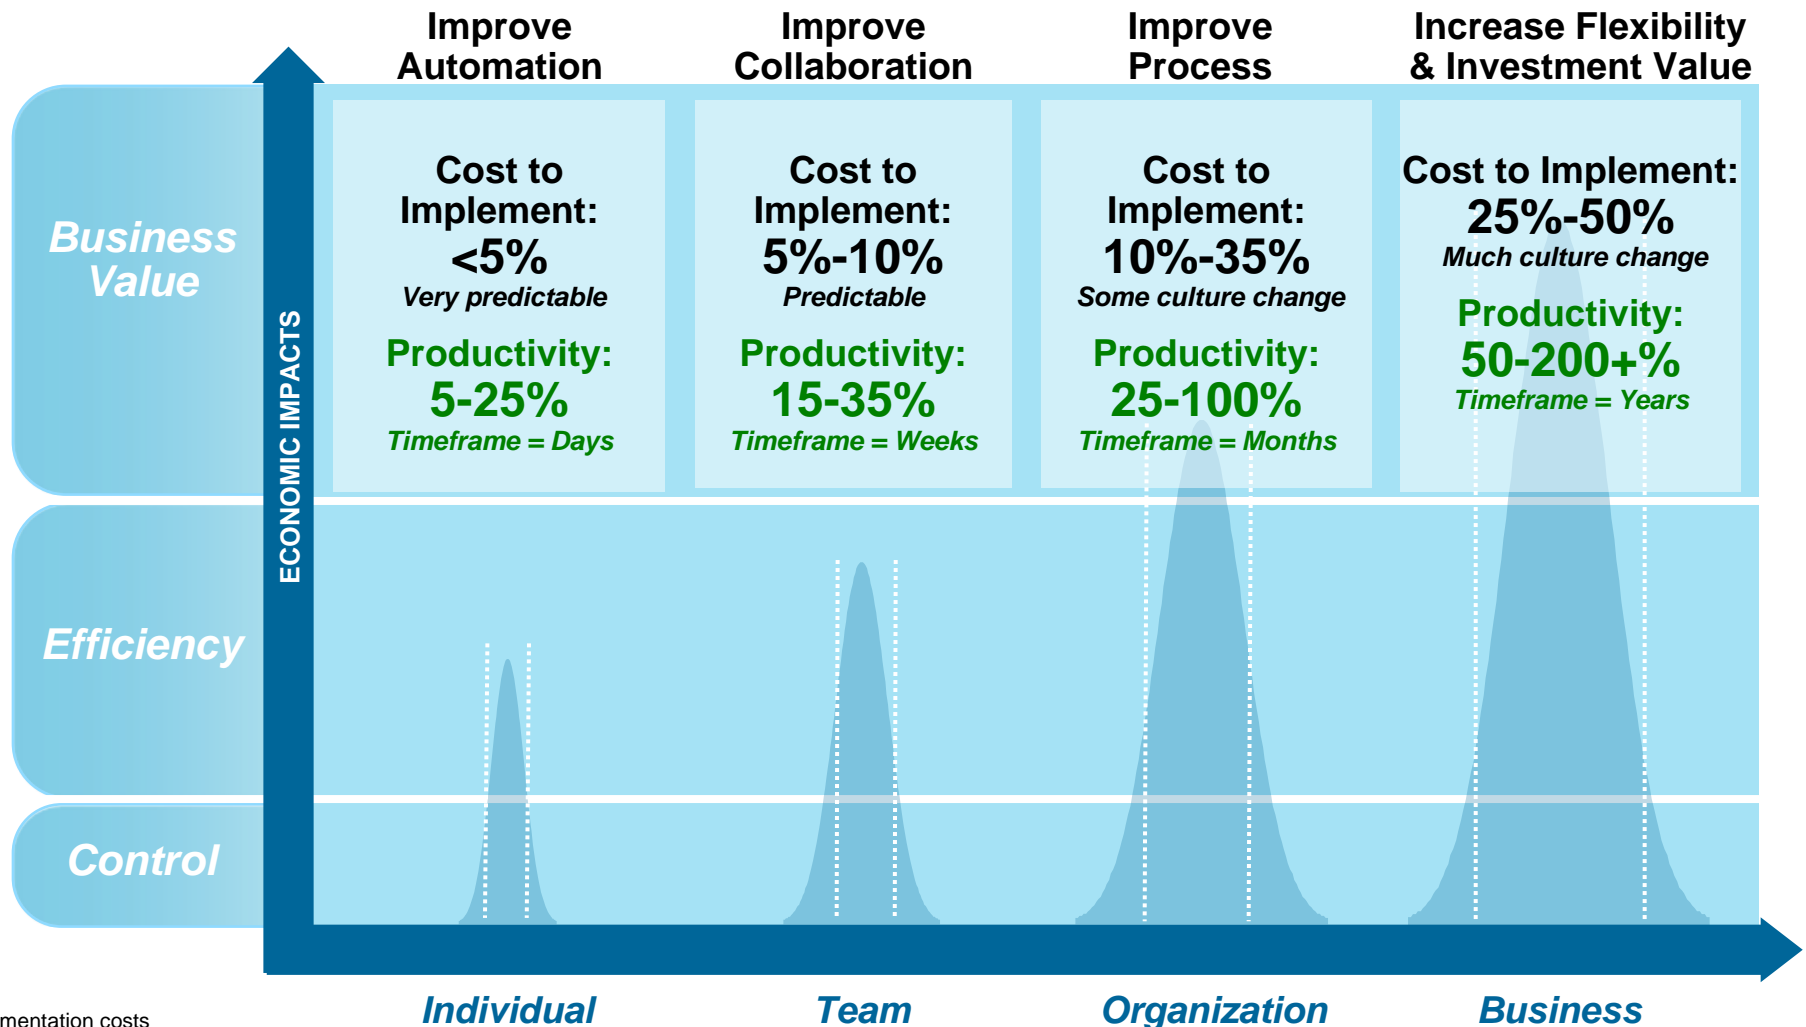

A maturing approach to software and systems delivery based on *measurement*

Realized by continuous improvement on *business* objectives

Invest to manage risks and optimize measured *outcomes*

ECONOMIC IMPACTS

Implementation costs are per person per year

Pragmatic steps we took to mature our own software delivery

-  1 Established business and operational objectives
-  2 Prioritized practices and defined implementation roadmap
-  3 Accelerated practice adoption with Rational products and programs – “Tools, Not Rules”
-  4 Reported, analyzed, and regularly acted on our results

Established business and operational objectives

Business Objectives

- Improve market share
- Achieve profit margin
- Reduce time-to-value

Operational Objectives

- Heighten responsiveness and increase linkage to customers
- Innovate to differentiate and capture new value
- Increase quality
- Shorten project development cycle times
- Improve schedule predictability

Prioritized practices and defined implementation roadmap

Change and Release Management

- **Team Change Management**
- Formal Change Management

**Initial Rational
Focus Area**

Requirements Management

- **Shared Vision**
- **Use-Case-Driven Development**
- Requirements Management
- Business Process Sketching

Governance and Compliance

- Risk-Value Lifecycle
- Practice Authoring and Tailoring
- **Performance Measurement**

Agile Core

- **Iterative Development**
- **Two-Level Project Planning**
- **Whole Team**
- **Continuous Integration**
- **Test-Driven Development**

Quality Management

- **Concurrent Testing**
- **Test Management**
- Independent Testing
- Performance Testing
- Application Vulnerability Assessment

Architecture Management

- **Evolutionary Architecture**
- Evolutionary Design
- Component Based Software Architecture
- Design Driven Implementation

Accelerated practice adoption with Rational products

Leveraged Agile Core practices to improve cycle times and predictability

- **Required** adoption of agility@scale
 - ▶ 2,000+ developers, testers, managers
 - ▶ Varying team sizes
 - ▶ Geographically distributed locales
 - ▶ Diverse development contexts
 - from mature products to Web 2.0 apps
- **Embraced** Rational Team Concert
 - ▶ In past year, RTC:
 - Projects grew by 291%
 - Number of users grew by 321%

Accelerated practice adoption with Rational programs

Leveraged Requirements and Change & Release Management practices

Increased customer involvement,
building on “Whole Team” agile practice

- ▶ Design Partner Program growth of 352% since 2006
- ▶ Transparent, iterative development on Jazz.net
 - 5 products available today
 - Over 17,000 participants in Jazz forums
- ▶ VoiCE sessions expanded to India and China
- ▶ Lab Advocacy program has grown 567% since 2005
- ▶ Beta programs doubled in 2008 to 35
 - 12x growth in open beta downloads

Reported, analyzed, and regularly acted on our results

Aggregated data from multiple sources to provide new insight

Executive and Operational Dashboards

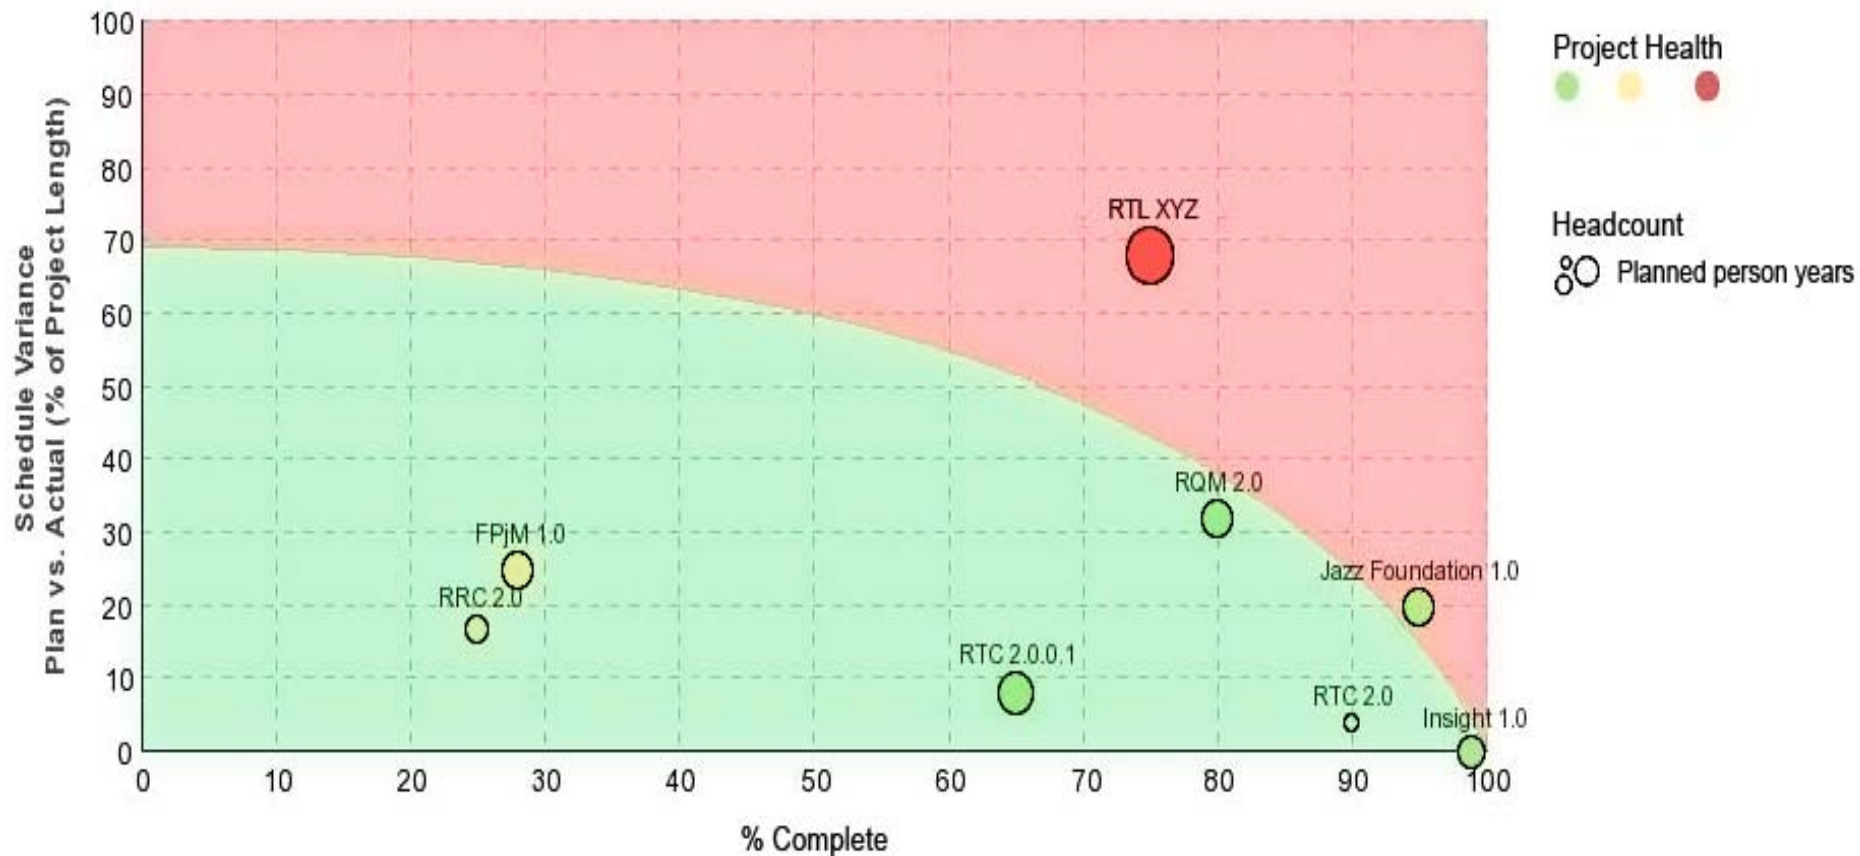

Jazz Integration Architecture: *Using REST Open Services / ODBC / XML*

Data Sources: *Quantitative and Qualitative*

Obtain a single view of project health across Rational

Quickly identify delivery issues that need immediate attention

Align business and operational measures

Drill down into real-time data from disparate source repositories

Segment	Product	Revenue Year-To-Date (M)	Revenue % of Plan	Pipeline (M)	Release	eGA Plan	eGA Outlook	eGA Plan-Outlook	Headcount (PY)	Project Health	Overall Profit Margin	Overall Market Share

Pragmatic steps we took to mature our own software delivery

- 1 Established business and operational objectives
- 2 Prioritized practices and defined implementation roadmap
- 3 Accelerated practice adoption with Rational products and programs – “Tools, Not Rules”
- 4 Reported, analyzed, and regularly acted on our results

Started next incremental improvement

Rational's next incremental improvement

Focus on Quality and Requirements Management practices

- Extend transparent development on Jazz.net
 - ▶ Further improve products and enhance the way we engage with you

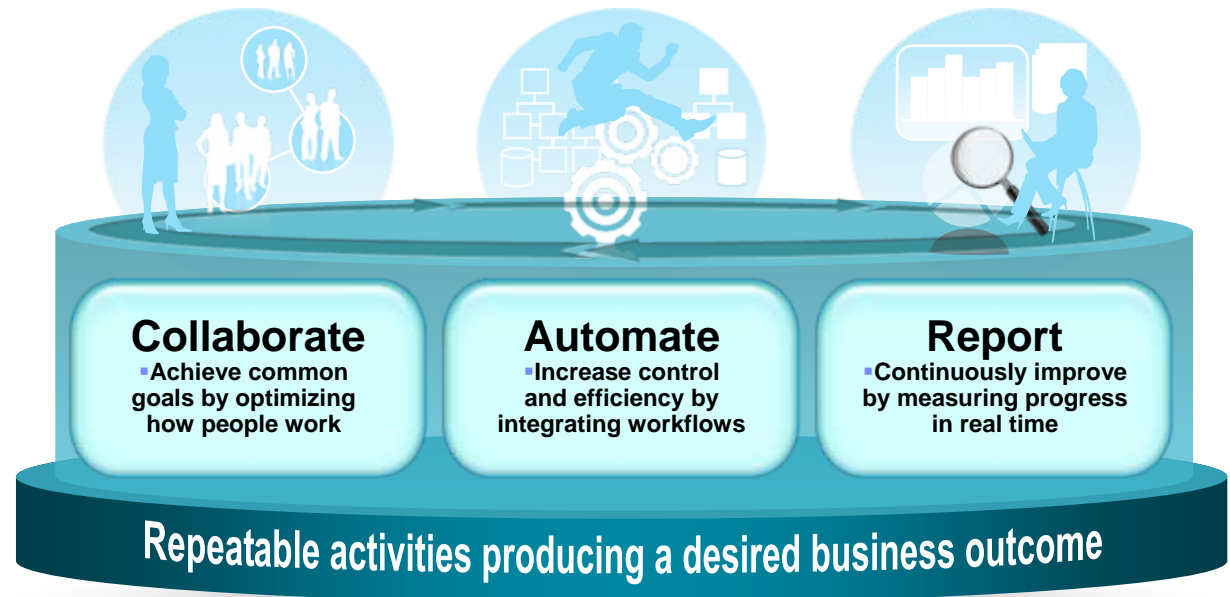

- Further engage community in the design of products
 - ▶ Leverage Rational Requirements Composer capabilities such as storyboards and domains of expertise

- Build on bootstrapping of Rational Quality Manager
 - ▶ Incorporated key feedback from SVT organization to drive version 1.0.1 and 2.0 capabilities
 - ▶ Expand use of RQM 2.0 to all Rational test teams
 - ▶ Publish and share RQM tests

Rational experience demonstrates incremental improvement in software delivery

- Experience the same results
- We can help
 - ▶ We offer an incremental improvement framework (MCIF)
 - ▶ We deliver a real-time collaborative platform (Jazz)

Time to Get Real – Starting Today

**GET REAL
TEAMS**

Align teams to business and operational objectives

**GET REAL
INSIGHTS**

Gain insights to incrementally improve software and systems delivery

**GET REAL
RESULTS**

Measure, monitor and steer to desired results

How does one change and improve?

Where do we start?

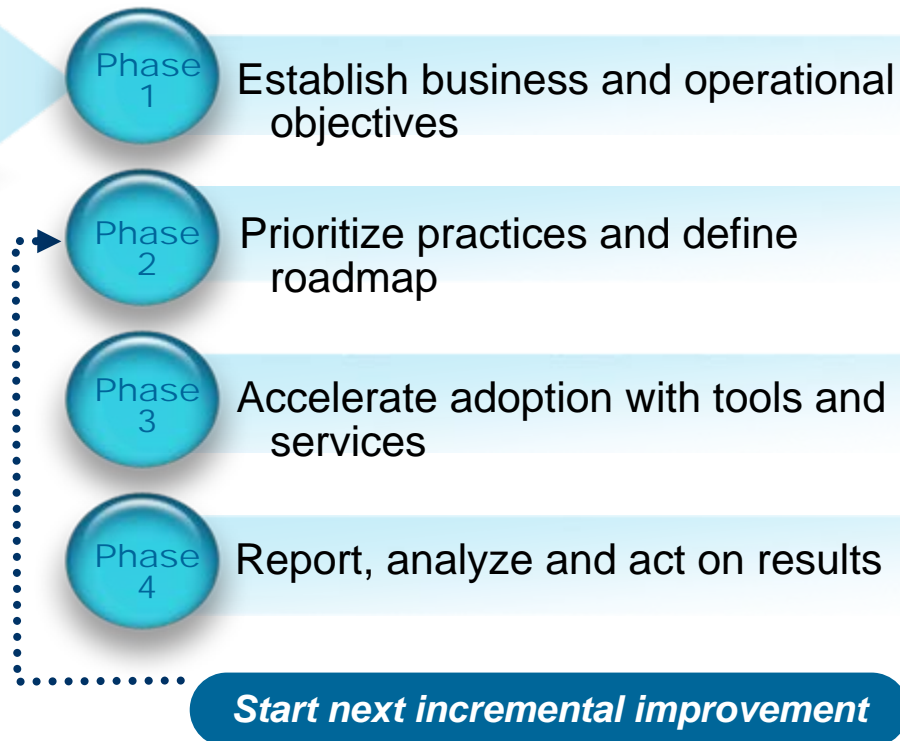

Drive business innovation and reduce costs through measured and continuous process improvement

Measured Capability Improvement Framework

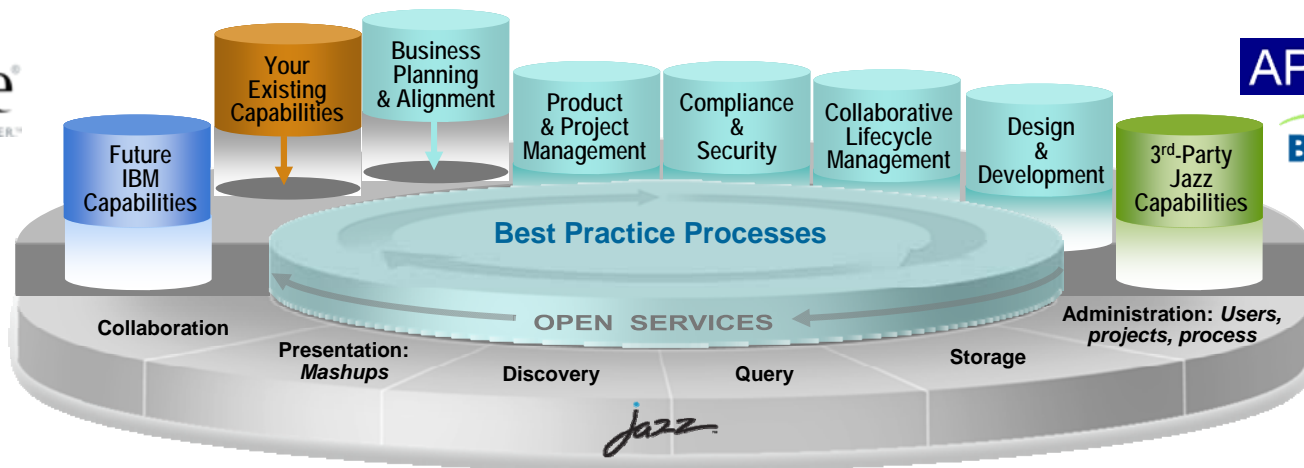

Captures over 10 years of Rational experiences in incremental adoption

- Used in over 80 IBM agile projects
- Used in conjunction with RUP, XP, Scrum and other processes
- Demonstrated in the Rational Executive Dashboard

Unifying platform: Jazz

Operationalize capability improvement

Phases 1 & 2: From business value to practices

Establishing an improvement roadmap

■ Executive Business Value Workshop

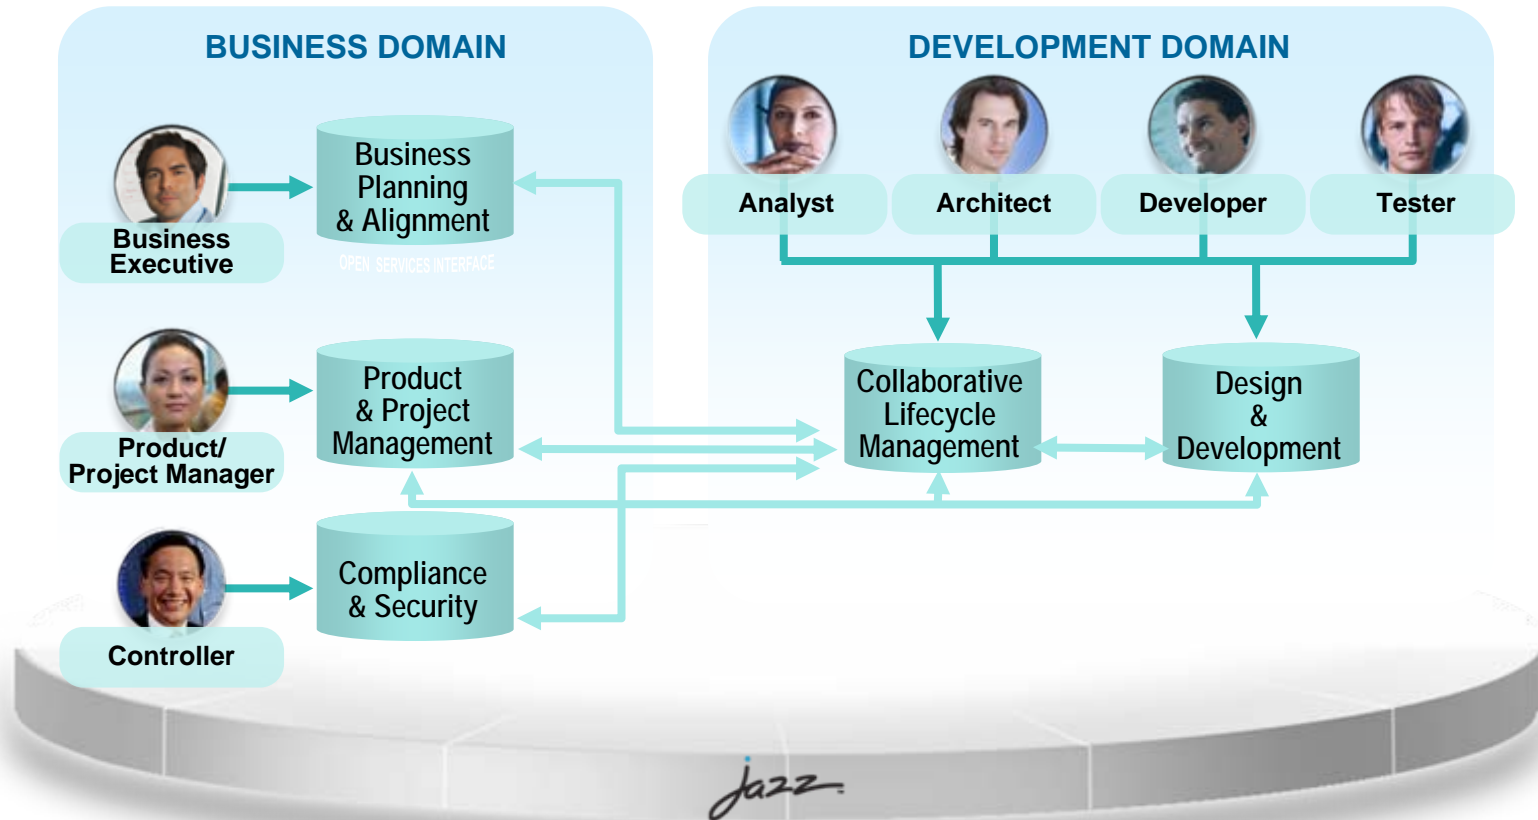

- ▶ Service offering to explore business and operational objectives and delivery strategies

■ Health Assessment

- ▶ Service offering that assesses current health of target projects and organizations
- ▶ Provides a measurable and incremental improvement roadmap

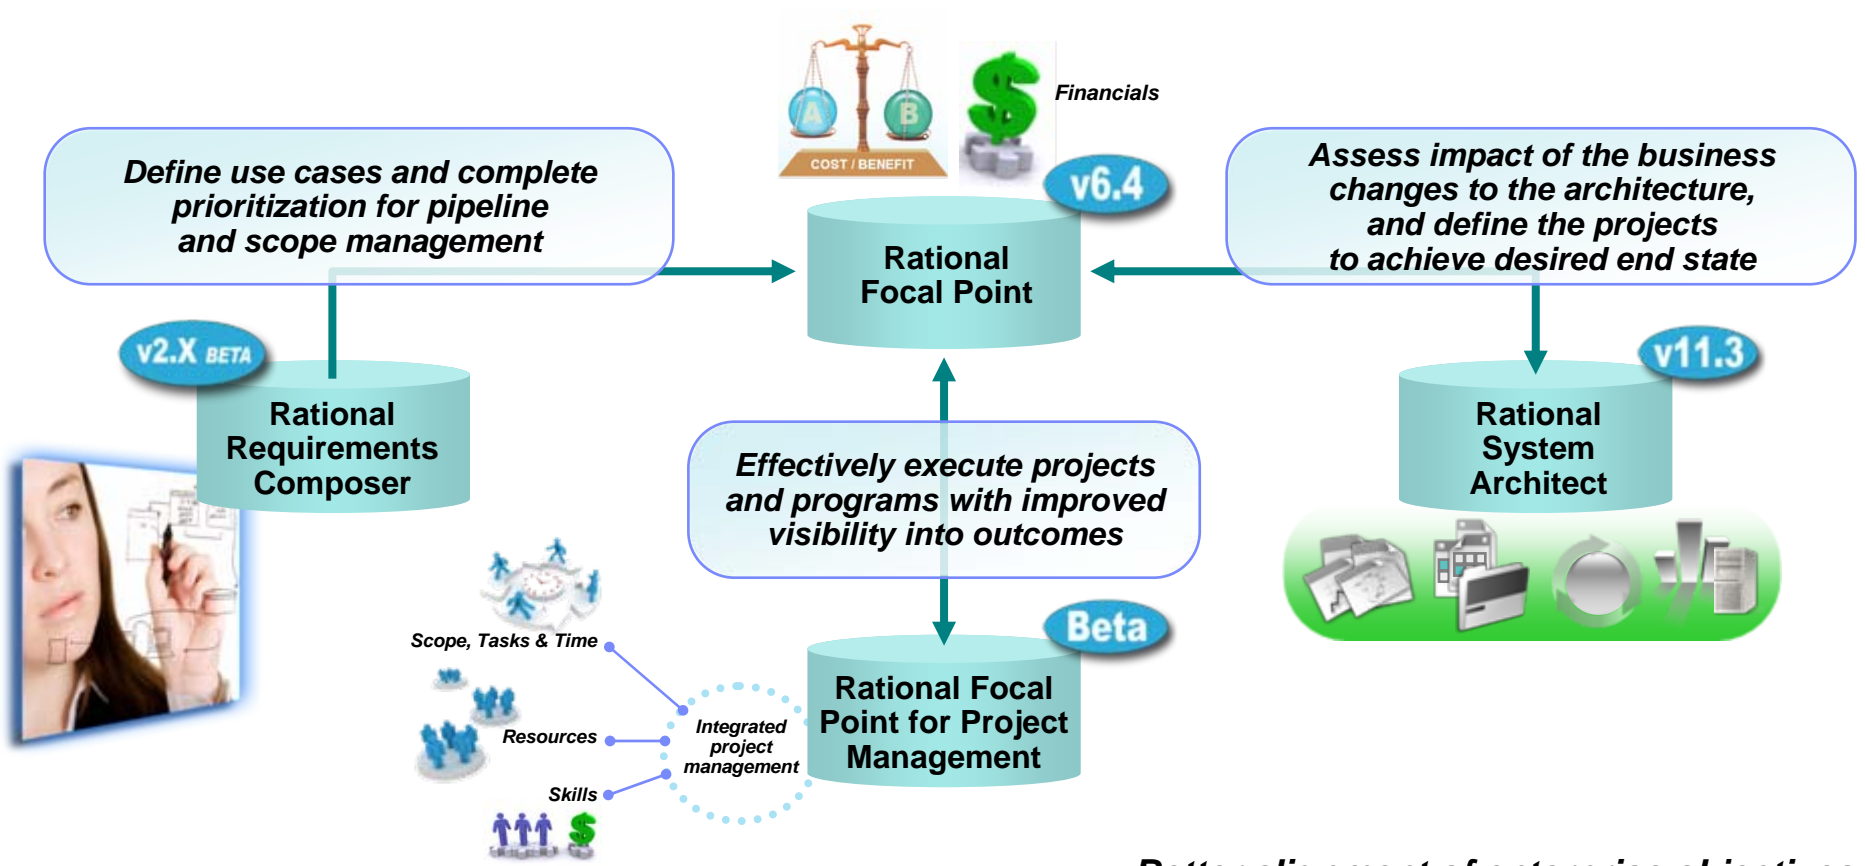

Phase 3: Deploying best practices and tools

Connecting business value to delivery outcomes

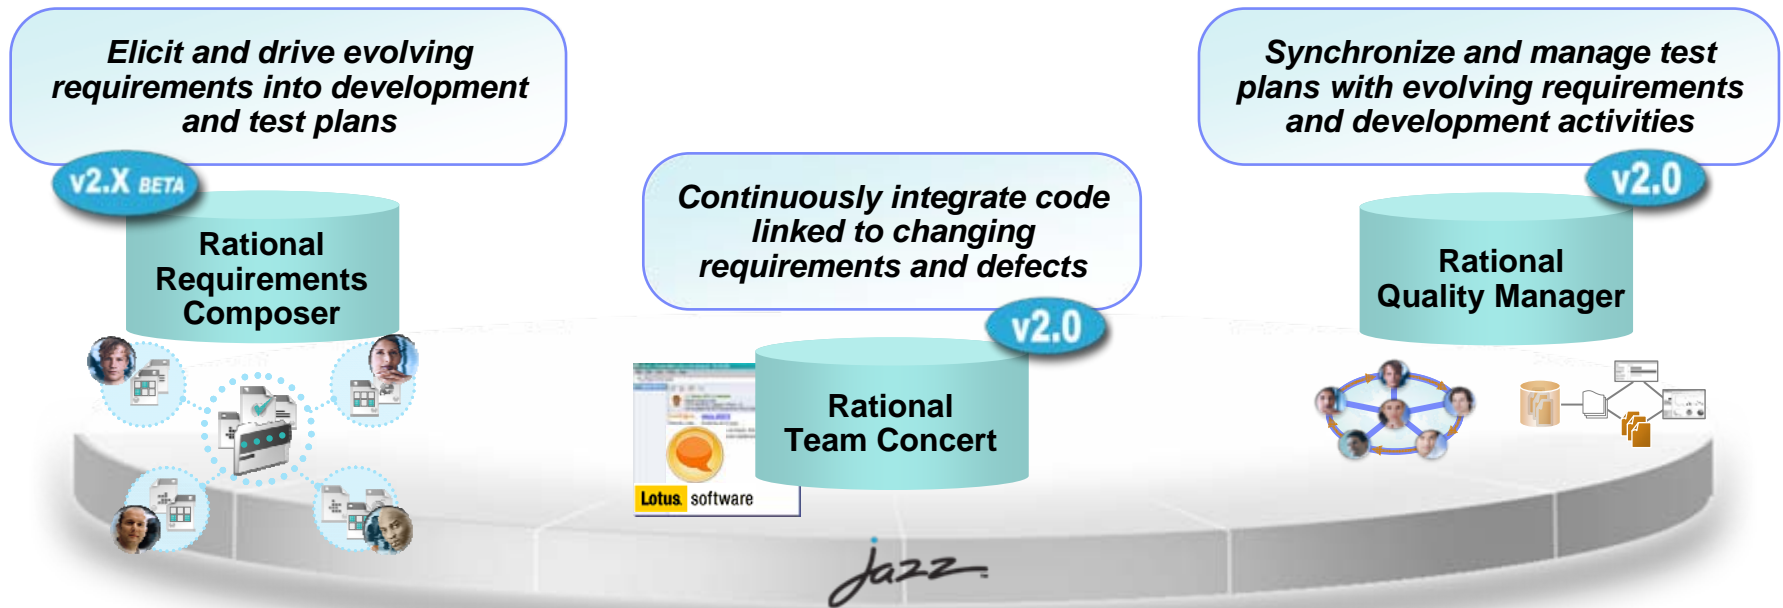

Achieving business alignment

Better alignment of enterprise objectives and solution efforts can result in a 17% productivity improvement

Making delivery outcomes real

Improving time-to-market and quality

*By reducing requirements rework,
we cut costs up to 30%*

Phase 4: Report and analyze business results

How does one change and improve?

How do we innovate?

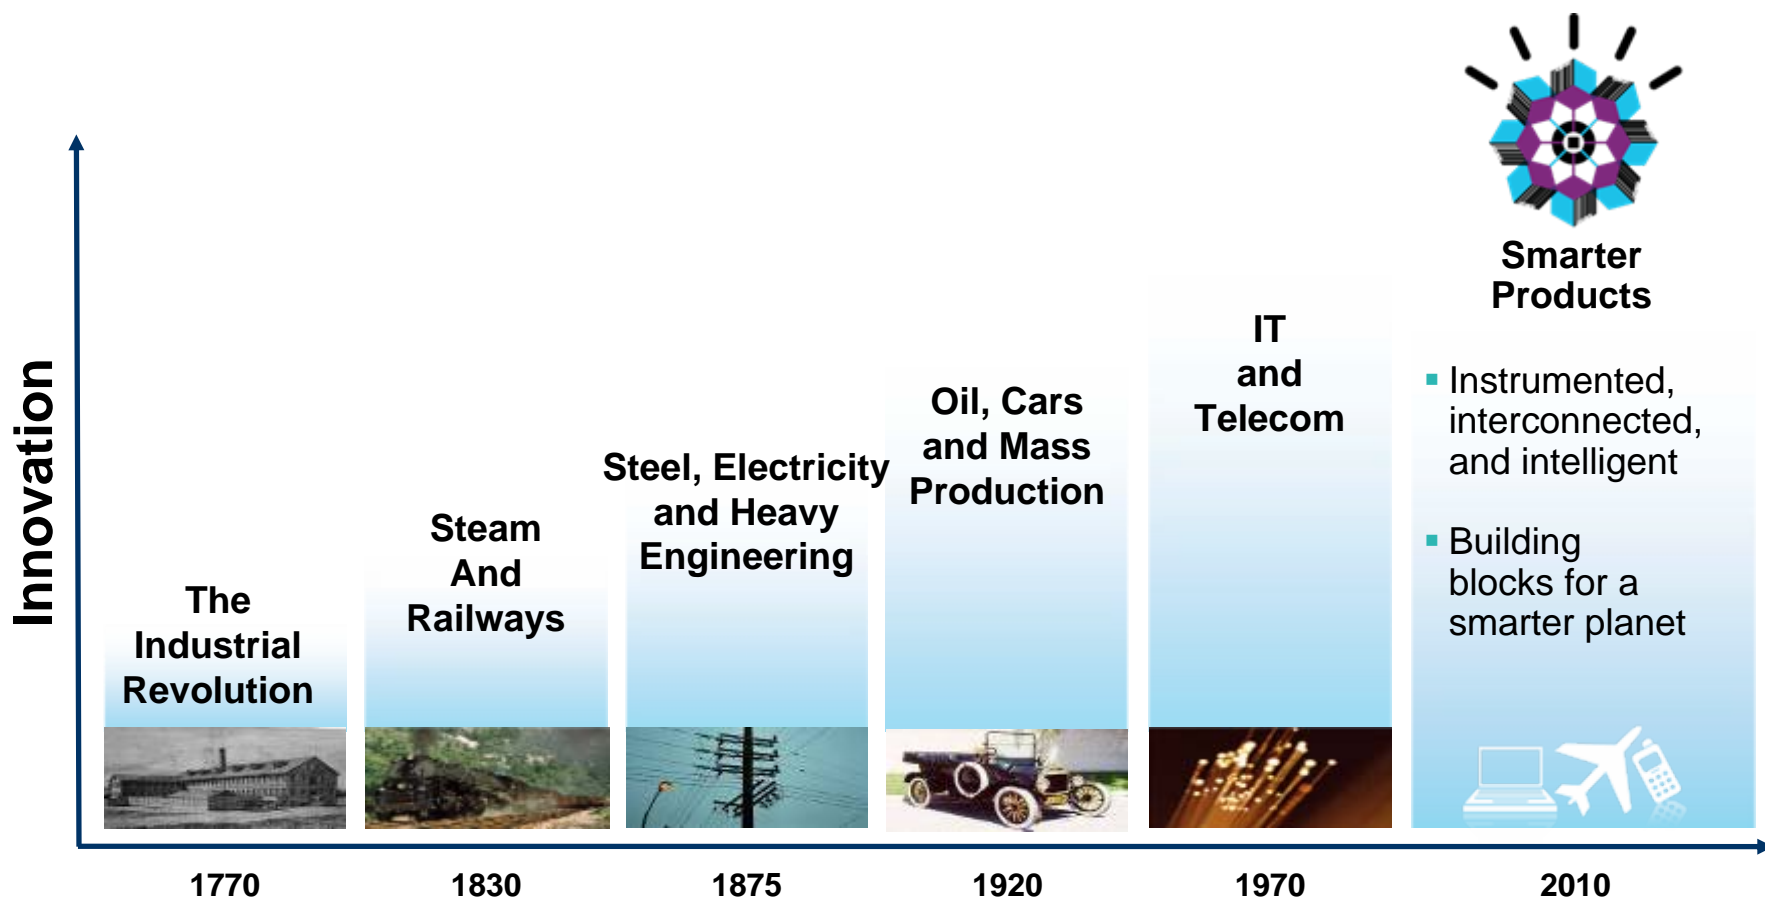

Innovation is about taking deep insight to create new value – for business and society.

Innovation resides at the intersection of invention and insight, leading to the creation of social and economic value.

National Innovation Initiative

We are on the verge of a new wave of innovation...

...where embedded software becomes even more crucial for product innovation and differentiation.

Electronics

- Apple's iPhone is **completely instrumented**, with GPS positioning software that helps the device know where you are

Automotive

- **90% of innovation** is based on electric and electronic systems
- **80% of this innovation** is based on embedded software

Aerospace and Defense

- F-22 Raptor (2003) contains **1.7 million lines of code**
- F-35 Lightning II will have **5.7 million lines of code**

Key benefits

- ✓ Create new opportunities
- ✓ Increase revenue / profit
- ✓ Enhance customer loyalty
- ✓ Faster time-to-market

These smarter products will play a major role for enabling tomorrow's ecosystems, such as for smarter transportation.

INSTRUMENTED

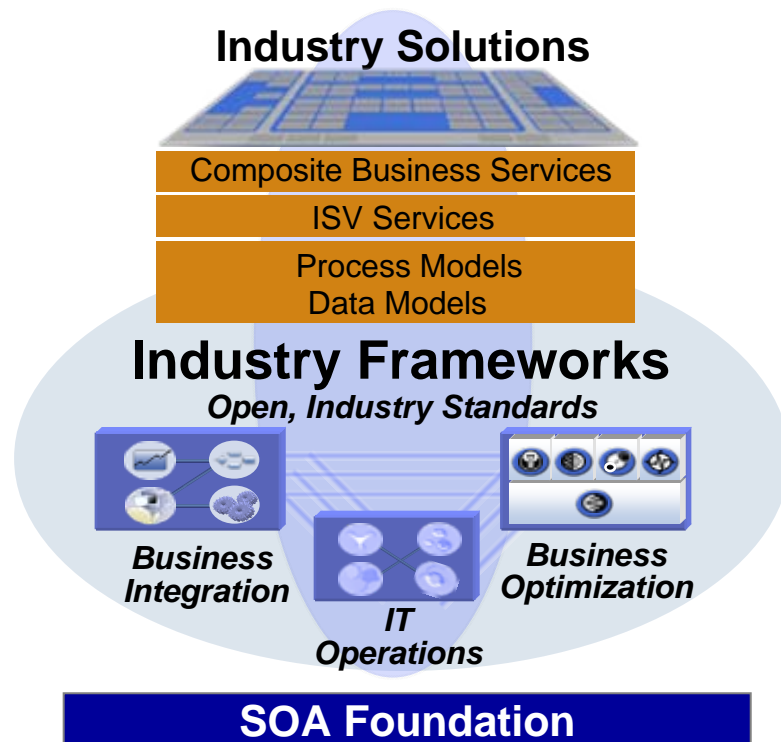

INTERCONNECTED

INTELLIGENT

IBM continues to invest in industry assets and frameworks to help develop and deploy smarter products.

IBM Industrial Sector Industry Frameworks

- PDIF Product Development Integration Framework
- MIF Manufacturing Integration Framework
- IIF Integrated Information Framework

...with a core foundation of software delivery offerings that enable smarter products.

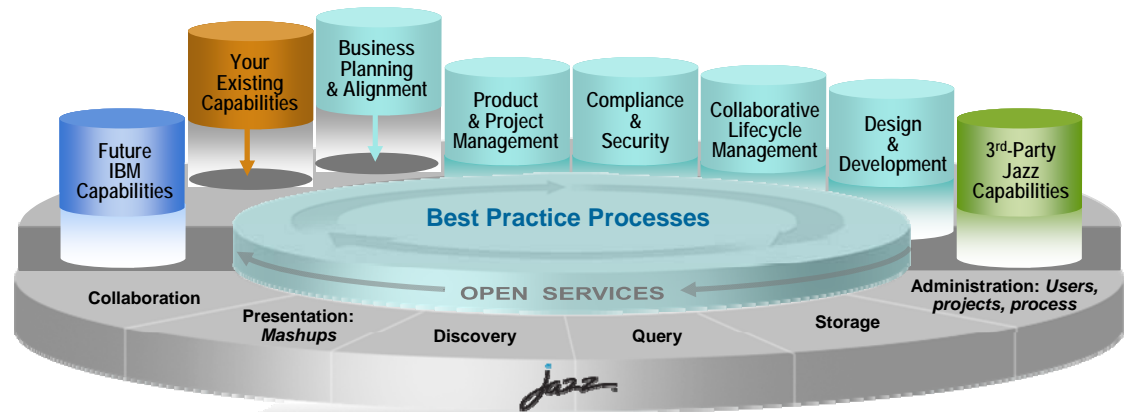

- Rational DOORS Web Access **New!**
- Rational Rhapsody **New!**
- Rational Team Webtop **New!**
- Rational MCIF for Systems **New!**
- Rational Focal Point
- Rational System Architect
- Rational Team Concert
- Rational Synergy / Change
- Rational ClearCase / ClearQuest
- Rational Quality Manager
- Rational Build Forge
- Rational Harmony

Plus... **New Integrations**

Smarter Products

The Rational Software Platform for Systems

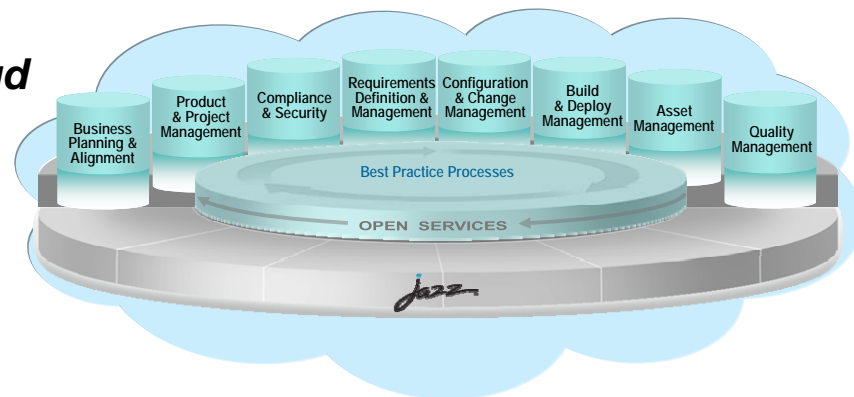

Innovation journey continues

IBM Software Delivery Services for Cloud

Rational Software Delivery Services *ON* the cloud

- Turnkey Collaborative Application Lifecycle Management solution for software and systems delivery
- Rational Team Concert, Quality Manager, Requirements Composer, Insight, and Build Forge hosted in the Cloud

Rational Software Delivery Services *FOR* the cloud

- Support IBM CloudBurst and IBM Smart Business Test Cloud
- Leverage Cloud resources with Rational Software Architect and Rational Build Forge
- Manage Cloud assets with Rational Asset Management, Quality Management and Tivoli Solutions
