

Release Notes

Note: Before using this information and the product it supports, read the information in “Notices” on page 38.

This edition applies to version 1, release 5, of the IBM Tivoli Netcool Service Quality Manager GSM service solution and to all subsequent releases and modifications until otherwise indicated in new editions.

1 About this documentation

The *IBM Tivoli Netcool Service Quality Manager GSM Service Solution Release Notes* guide is organized into the following chapters:

Table 1 Guide structure

Chapter	Description
About this documentation	An overview of the Tivoli Netcool Service Quality Manager GSM service solution documentation, which gives details of the intended audience and the structure of the guide.
Release details	Information on functionality provided in the release.
Hardware specification	Details of hardware required for the release.
Software requirements	Details of software required for the release.
Installation	Details on guides to be followed during the installation of the product for the release.
Known issues	Details on known issues included in the release and workarounds, if available.

1.1 Audience

The target audience of this guide is IBM® Tivoli® Netcool® Service Quality Manager GSM (Global System for Mobile Communications) service solution customers. They must be familiar with telecommunication and IT (information technology) principles and must also have a good understanding of Solaris and IBM AIX®.

IMPORTANT: Before installing the Tivoli Netcool Service Quality Manager GSM service solution, you are strongly advised to read the release notes distributed with your Tivoli Netcool Service Quality Manager GSM software. Release notes may contain information specific to your installation. Failure to consult release notes may result in a corrupt, incomplete or failed installation.

Note: Tivoli Netcool Service Quality Manager administrators must not, without prior consultation and agreement from IBM, make any changes to the index organized tables or database schema. Changes to the index organized tables or database schema can result in corruption of data and failure of the Service Quality Manager system. This applies to all releases of Tivoli Netcool Service Quality Manager using all versions of interfaces.

1.2 Required skills and knowledge

This guide assumes you are familiar with the following:

- General IT principles
- UNIX® operating systems
- IP (Internet Protocol) networking
- GSM
- Service Quality Manager modeling concepts such as service resources, KPIs (Key Performance Indicators), KQIs (key quality indicators) and SLAs (service level agreements).

This guide also assumes that you are familiar with your company's network and with procedures for configuring, monitoring, and solving problems on your network.

1.3 Guide conventions

The following command prompts can be seen throughout this guide where the user has to enter commands at the command line:

- # (hash): This prompt is displayed if the user is logged in as user `root`.
- \$ (dollar): This prompt is displayed if the user is logged in as either the `saserver` or `oracle` user.

Please note the above prompts are not part of commands. All commands must be entered after these prompts.

This guide uses the typographical conventions shown in the following table:

Table 2: General guide conventions

<i>Format</i>	<i>Examples</i>	<i>Description</i>
ALL UPPERCASE	GPS NULL MYWEBSERVER	Acronyms, device names, logical operators, registry keys, and some data structures.
<u>Link</u>	See www.ibm.com	For links within a document or to the Internet.
Bold	Note: The busy hour determiner is...	Heading text for Notes, Tips, and Warnings.

SMALL CAPS	The STORED SQL dialog box... ...click VIEW... In the main GUI window, select the FILE menu, point to NEW, and then select TRAF-FIC TEMPLATE.	Any text that appears on the GUI.
<i>Italic</i>	<i>A busy hour</i> is... A web Server <i>must</i> be installed... See the <i>User Guide</i>	New terms, emphasis, and book titles.
Monospace	<code>./wminstall</code> <code>\$ cd /cdrom/cdrom0</code> <code>/xml/dict</code> <code>addmsc.sh</code> <code>core.spec</code> Type OK to continue.	Code text, command line text, paths, scripts, and file names. Text written in the body of a paragraph that the user is expected to enter.
Monospace Bold	<code>[root] # pkginfo grep -i perl</code> system Perl5 On-Line Manual Pages system Perl 5.005_03 (POD Documentation) system Perl 5.005_03	For contrast in a code example to show lines the user is expected to enter.
<Monospace italics>	<code># cd <oracle_setup></code>	Used in code examples: command-line variables that you replace with a real name or value. These are always marked with arrow brackets.
[square bracket]	<code>log-archiver.sh [-i][-w][-t]</code>	Used in code examples: indicates options.

1.4 User Publications

The following user publications are provided with the GSM Service Quality Manager service solution:

Table 3: GSM service solution user documentation

Document	Description
<i>Tivoli Netcool Service Quality Manager Service Solutions Installation Guide</i>	Details the generic steps required to install any Service Quality Manager service solution.
<i>Tivoli Netcool Service Quality Manager GSM MSC PM Service Solution Interface Control Guide</i>	Details the GSM MSC PM service solution input interface.

<i>Tivoli Netcool Service Quality Manager GSM Service Solution Release Notes</i>	Provides information on the GSM Service Solution release contents, platform requirements, installation and upgrade procedures, and known issues.
--	--

The following user publications are provided with the Service Quality Manager core software as Adobe® PDFs (Portable Document Format). Online help is available in HTML format.

Table 4: Service Quality Manager user documentation

Guide title	Description
<i>Release Notes</i>	Provides information on the Service Quality Manager release contents, platform requirements, installation and upgrade procedures, and known issues.
<i>Configuration Guide</i>	Describes SLA provisioning (Parties, SLAs, and SLA templates applications) and Service Quality Manager provisioning (services resources, KQI models and service models applications) in Service Quality Manager.
<i>Monitoring Guide</i>	Describes monitoring (SLA Monitor, KQI analyzer, alarm monitor, audit manager and SLA web monitor applications) in Service Quality Manager.
<i>Customer Experience Manager Monitoring Guide</i>	Describes how to use and monitor the Customer Experience Manager feature in Service Quality Manager.
<i>Customer Experience Manager Provisioning Guide</i>	Reference guide containing information for provisioning the Customer Experience Manager system.
<i>Solaris Server Installation Guide</i>	Describes how to install the Service Quality Manager server system on Solaris 10g.
<i>Client Installation Guide</i>	Describes how to install the Service Quality Manager client.
<i>AIX Server Installation Guide</i>	Describes how to install the Tivoli Netcool Service Quality Manager server system on IBM AIX® 5.3L.
<i>Solaris System Administration Guide</i>	Provides an overview of the Service Quality Manager administrative tasks, including instructions on how to complete these tasks: <ul style="list-style-type: none"> - Starting and stopping Service Quality Manager. - Running batch processes such as archiving trace files and log files. - Backing up and restoring the system.

<p><i>AIX System Administration Guide</i></p>	<p>Provides an overview of the AIX Service Quality Manager administrative tasks including instructions on how to complete these tasks:</p> <ul style="list-style-type: none"> - Starting and stopping Service Quality Manager. - Running batch processes such as archiving trace files and log files. - Backing up and restoring the system.
<p><i>Upgrade Guide</i></p>	<p>Details how to upgrade from one Service Quality Manager version to another.</p>
<p><i>BusinessObjects Installation and Configuration Guide</i></p>	<p>Provides information on the steps required to install and configure the BusinessObjects (v 6.5 or XI) server and client for use with Service Quality Manager.</p>
<p><i>Service Quality Manager Core Online Help</i></p>	<p>Provides information and procedures for using Service Quality Manager client applications.</p>
<p><i>Customer Experience Manager Online Help</i></p>	<p>Describes how to use and monitor the Customer Experience Manager feature in the Service Quality Manager.</p>
<p><i>SLA Webview Online Help</i></p>	<p>Describes how to use and monitor the SLA Webview feature in the Service Quality Manager.</p>

2 Release details

Service Quality Manager GSM v1.5 service solution provides the following data sources:

- Mobile Switching Centers – Performance Management (MSC PM)

3 Hardware specification

The Service Quality Manager GSM service solution can be installed on a Solaris system with the following configuration:

- Computer with T2/SPARC64 VI or UltraSPARC IV+ processor
- 146 GB of disk space
- 32 GB of memory
- Gigabit Ethernet

The Service Quality Manager GSM service solution can be installed on an AIX system with the following configuration:

- JS22 blade or equivalent
- 146 GB of disk space
- 32 GB of memory
- Gigabit Ethernet

4 Software requirements

The minimum prerequisite software requirements are:

- Tivoli Netcool Service Quality Manager v4.1.4 (4.1.4-TIV-TNSQM-) installed.
- Tivoli Netcool Service Quality Manager GOM v1.8 or later.

Note: See *Tivoli Netcool Service Quality Manager Version 4.1.4 Release Notes* for the minimum software required to operate this product.

5 Installation

5.1 Installation

To install the Tivoli Netcool Service Quality Manager GSM Service Solution, see the *Tivoli Netcool Service Quality Manager Service Solutions Installation Guide*.

Note: Tivoli Netcool Service Quality Manager GSM service solution depends on Tivoli Netcool Service Quality Manager GOM version v1.8 or later. Deploy this software using the instructions in chapter 3 of the *Tivoli Netcool Service Quality Manager Service Solutions Installation Guide* before installing the Tivoli Netcool Service Quality Manager GSM service solution.

5.2 Service solution model version

Note: Chapter 4 of the *Tivoli Netcool Service Quality Manager Service Solutions Installation Guide* requires the person installing the software to input the service solution name, data source name, and model version of the GSM service solution.

The service solution name, data source name, and model version of the GSM service solution are as follows:

- Solution name = GSM
- Data source name = MSC PM
- Model version = 1.5

5.3 Default resource mapping

This service solution supports Tivoli Netcool Service Quality Manager "Default Resource" instances. These instances are provided so that data with the following characteristics can be processed and stored by the service solution adapter:

- Any data row that contains Resource Type references that cannot be recognized against the provisioned resource set.
- Any data row that has missing references to one or more resource types.

In each of these cases, the reference is attributed to the "Default Resource" instance of that Resource Type. For example, if the Resource Type is "CellArea" the default resource for that Resource Type is named "unknown_CellArea". For all other purposes, the default resource can be treated the same as any other instance of the Resource Type. The service solution produces KQI values for the default resource that can be monitored for diagnostic purposes if required. The default resource metrics are also visible in the Business Objects reports.

If a customer does not want to create default resource metrics, the default resource instances can be safely deleted using the Tivoli Netcool Service Quality Manager user interface or the provisioning broker. Any data rows that match the characteristics detailed above are then not included for any KQI metrics and are also not included in metrics in the Business Objects reports.

5.4 Test data

The adapter test input files that are supplied with the GSM MSC release v1.4.3 are not compatible with 1.5. A new set of data has been provided to test this adapter.

6 Known issues

There are no known issues to report with the v1.5 release of Tivoli Netcool Service Quality Manager GSM service solution.

7 Fixed issues

The following issues were addressed with the v1.5 release of Tivoli Netcool Service Quality Manager GSM MSC service solution.

MR 1123104521: Enhancement Request

To include KPI and KQI for GSM service monitoring, where paging and Location Update is to be tracked up to LAC level.

8 Changes in this release

This release includes the following important changes, which should be noted carefully:

8.1 GSM MSC PM Data Source - New KQI metrics on LocationArea resource type

The GSM MSC PM data source was updated to provide new KQI metrics on the LocationArea resource type. These measurements are produced from existing CSV KPI fields and are available for all existing instances of the relevant resource types.

8.1.1 KPI Schema update – LAC_NAME added

The GSM MSC PM KPI database schema was updated to include the following new field

Table 5: Additional KPI table fields in GSM MSC PM

Name	Type	Description
LAC_NAME	STRING	LAC_NAME constitutes new resource type LocationArea

8.1.2 Additional KQI metrics in GSM MSC PM 1.5

Definitions for the following KQI metrics on the LocationArea resource type were added in GSM 1.5

Table 6: Additional KQI metrics in GSM MSC PM 1.5

Category	KQI Name	Description
Accessibility	GSMCORE_LocationArea_LU_SUCCESS_RATE	The percentage of periodic location updates which were successful over Location Area dimension.
Accessibility	GSMCORE_LocationArea_PAGING_SUCCESS_RATE	The percentage of paging attempts which were successful over Location Area dimension.
Accessibility	GSMCORE_LocationArea_ATT_LU_SUCCESS_RATE	The percentage of IMSI attach location update attempts which are successful over Location Area dimension.
Accessibility	GSMCORE_LocationArea_INTRA_LU_SUCCESS_RATE	The percentage of intra-VLR location update attempts which are successful over Location Area dimension.
Accessibility	GSMCORE_LocationArea_INTER_LU_SUCCESS_RATE	The percentage of inter-VLR location update attempts which are successful over Location Area dimension.

8.2 GSM MSC PM Data Source - New SLAT

The GSM MSC PM data source was updated to provide new SLAT on the LocationArea resource type.

8.2.1 Additional SLAT on LocationArea type

The following SLAT was added in GSM MSC PM 1.5 for the LocationArea resource type.

Table 7: Additional MSC SLAT in GSM MSC PM 1.5

SLAT Name	Description
GSM_CS_Core_PM_LocationArea_SLAT	Template SLA for the all KQIs calculated on the LocationArea Resource Type

8.3 GSM MSC PM Data source - New Service Element

The GSM MSC PM data source was updated to provide a new service element for the LocationArea resource type.

8.3.1 Additional Service Element on LocationArea type

The following service element was added in GSM MSC PM 1.5 for the LocationArea resource type.

Table 8: Additional MSC Service Element in GSM MSC PM 1.5

Service Element Name	Description
GSM_LocationArea	This represents the KQI models associated with the GSM CS Core Service. It contains Location Area focused KQIs.

9 Documentation Addendums

The following addendums apply to the *IBM Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service Overview Guide*.

Applies to Chapter 1 Service Module Description

Service resource types

The Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service resource types are as follows:

- CellArea
- UMTS Terrestrial Radio Access Network (UTRAN)
- Location_UTRAN composite
- Mobile Switching Center (MSC)
- Location Area
- CircuitGroup
- CGDest
- CGDest_MSC_CircuitGroup composite

SLA templates

The Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service SLA templates are provided below.

Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service SLA templates include the following:

- UMTS_Voice_PM_CellArea_SLAT - This is the SLA template for all KQIs calculated on the CellArea resource type.
- UMTS_Voice_PM_UTRAN_SLAT - This is the SLA template for all KQIs calculated on the UTRAN resource type.
- UMTS_Voice_PM_Location_UTRAN_SLAT - This is the SLA template for all KQIs calculated on the Location_UTRAN composite resource type.
- UMTS_Voice_Core_PM_MSC_SLAT - This is the SLA template for all KQIs calculated on the MSC resource type.

- UMTS_Voice_Core_PM_LocationArea_SLAT - This is the SLA template for all KQIs calculated on the LocationArea resource type.
- UMTS_Voice_Core_PM_CIRCUITGROUP_SLAT - This is the SLA template for all KQIs calculated on the CIRCUITGROUP resource type.

Service module reports

The Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service supports several service performance reports.

Reports are produced per resource types as filters. The Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service reports include the following:

- UMTS Voice Summary report
- UMTS Voice CellArea report
- UMTS Voice Location report
- UMTS Voice UTRAN report
- Circuit group outgoing call performance report
- MSC availability and CPU usage report
- MSC MO and MT call performance report
- MSC handover performance report
- MSC location update and paging performance report
- Location Area location update and paging performance report
- M3UA link performance report
- MTP3 link performance report
- Mc interface throughput report
- Circuit group performance report

Note: SLA reports can be run at any time and can be configured with a user-defined temporal dimension.

Applies to Appendix A: Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service KPI tables

Table 2. Dimensions for the KPI_SQM_UMTS_VOICE_UTRAN KPI table

Database column name	Database field description
LOCATION_ID	The resource ID for resource instances of the market level of the Location resource type
CELLAREA_ID	The resource ID for resource instances of the CellArea resource type
NODEB_ID	The resource ID for resource instances of the NodeB level of the UTRAN resource type

Applies to Appendix B: Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service KQIs

Tables 14 and 15 include a list of the key quality indicators (KQIs) that the Tivoli Netcool Service Quality Manager Module for UMTS Voice PM Service supports.

Table 14. Tivoli Netcool Service Quality Manager Module UTRAN PM Service KQIs

Category	KQI Name	KQI Description	Unit	Operator	Violation threshold	Warning threshold
UMTS_Accessibility	RAB-CSEstSR_CellArea_UMTS_Voice_PM	RAB Establishment Success Rate for overall circuit switched traffic	%	<	95	98
