Including online help

Data Entry Screen

Use the *Data Entry* screen to enter actual and target data for the metric set for the current period.

Prerequisites

To view the *Data Entry* screen, you are assigned to any one of the workflow steps. The gray arrow in the *Metric Sets* table indicates that you are not assigned to the active step, but you can view it.

To enter data, you are assigned to the active Data Entry workflow step. The yellow arrow in the *Metric Sets* table indicates that you are assigned to the active step.

To see the *Download to Excel* link in the Data Entry table, you have permission to enter data using an Excel spreadsheet. Entry and Approval administrators activate this option by selecting *Enter current period data via Excel* in *Set Entry and Approval Defaults*. For information, see [Entry and Approval Default Settings](#).

Features

You can do the following in the *Data Entry* screen:

- You enter actual data in the *Actual* column. If the actual measure is not part of the metric set, the *Actual* column does not have a field for data entry.
- You enter data in the *Target* column. The *Target* column is active only if the target measure is part of the metric set and the Entry and Approval administrator selected *Input/overwrite current period target data* in *Set Entry and Approval Defaults* for this metric set. You enter data according to the following conditions:
 - If the *Target* column has a similar cell background as the *Actual* column, it means you can enter target data.
 - If the *Target* column has a gray background and is empty, it means that you do not have permission to enter target data.
 - If the *Target* column has a gray background with numbers, it means there is target data but you do not have permission to enter target data.
 - If the *Target* column is empty and does not show cells for data entry, it means that the target measure is not part of the metric set.
- You can enter data via an Excel spreadsheet using the *Download to Excel* link rather than using the table in the *Data Entry* screen.
- You can use the *Historical Data* link to see data from previous periods and the *Approval Log* link to see the progress of the metric set through the workflow process. When selected, the *Display Previous Actual* option displays the previous actual data values in the *Data Entry* table.
- Once the data entry is complete, you can submit the data by clicking *Submit for Approval* to move the data to the next step in the workflow process. If the metric set has only the Data Entry step, submitting the data completes the workflow process and the data is ready for the Entry and Approval administrator to load it into the PAS model. If there are interim approval steps, the data is forwarded to a reviewer who can either accept or reject the data.

As part of the submission, use the *Add a note* screen to capture comments for the *Approval Log*.

Once a metric set is submitted for approval, it is no longer accessible for data entry and the *Actual* and *Target* cells are inactive.

NOTE

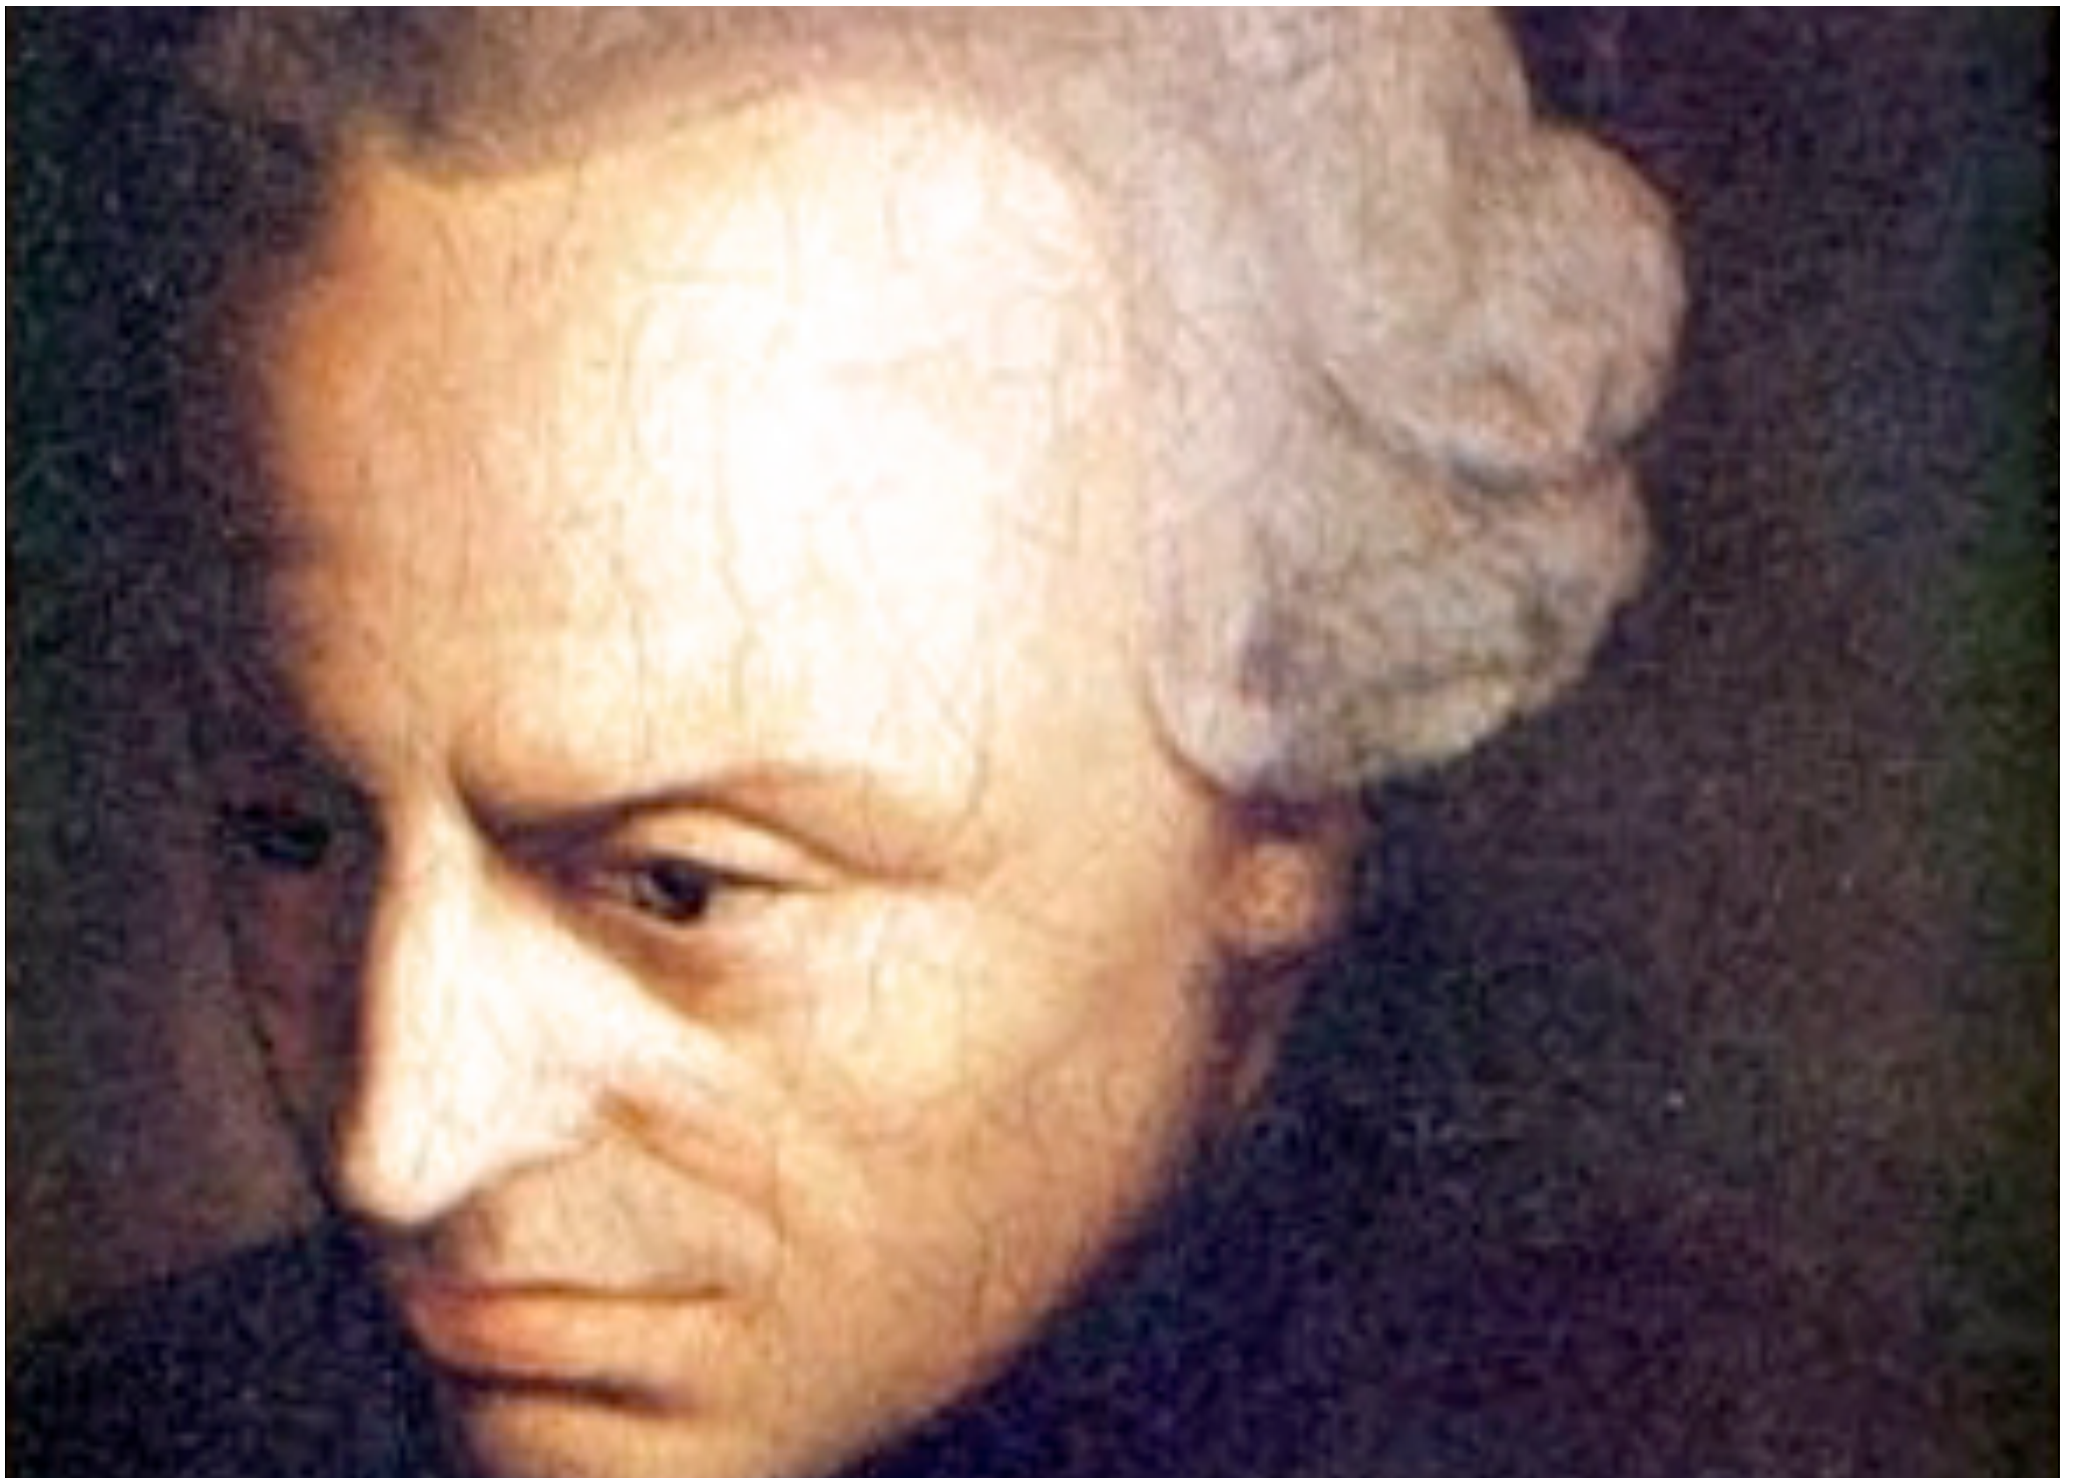

In the table, dimensions with long names are truncated to 16 characters.

With incentives

To change behaviours

20th century was about scale

**structures that dampen network effects
to get worse the more people use them**

A large flock of birds, possibly terns, is captured in flight against a clear, bright blue sky. The birds are scattered throughout the frame, with some appearing as distinct silhouettes and others as a dense, textured pattern of small dark shapes. The overall scene conveys a sense of natural order and collective movement.

**structures that harness network effects
to get better the more people use them**

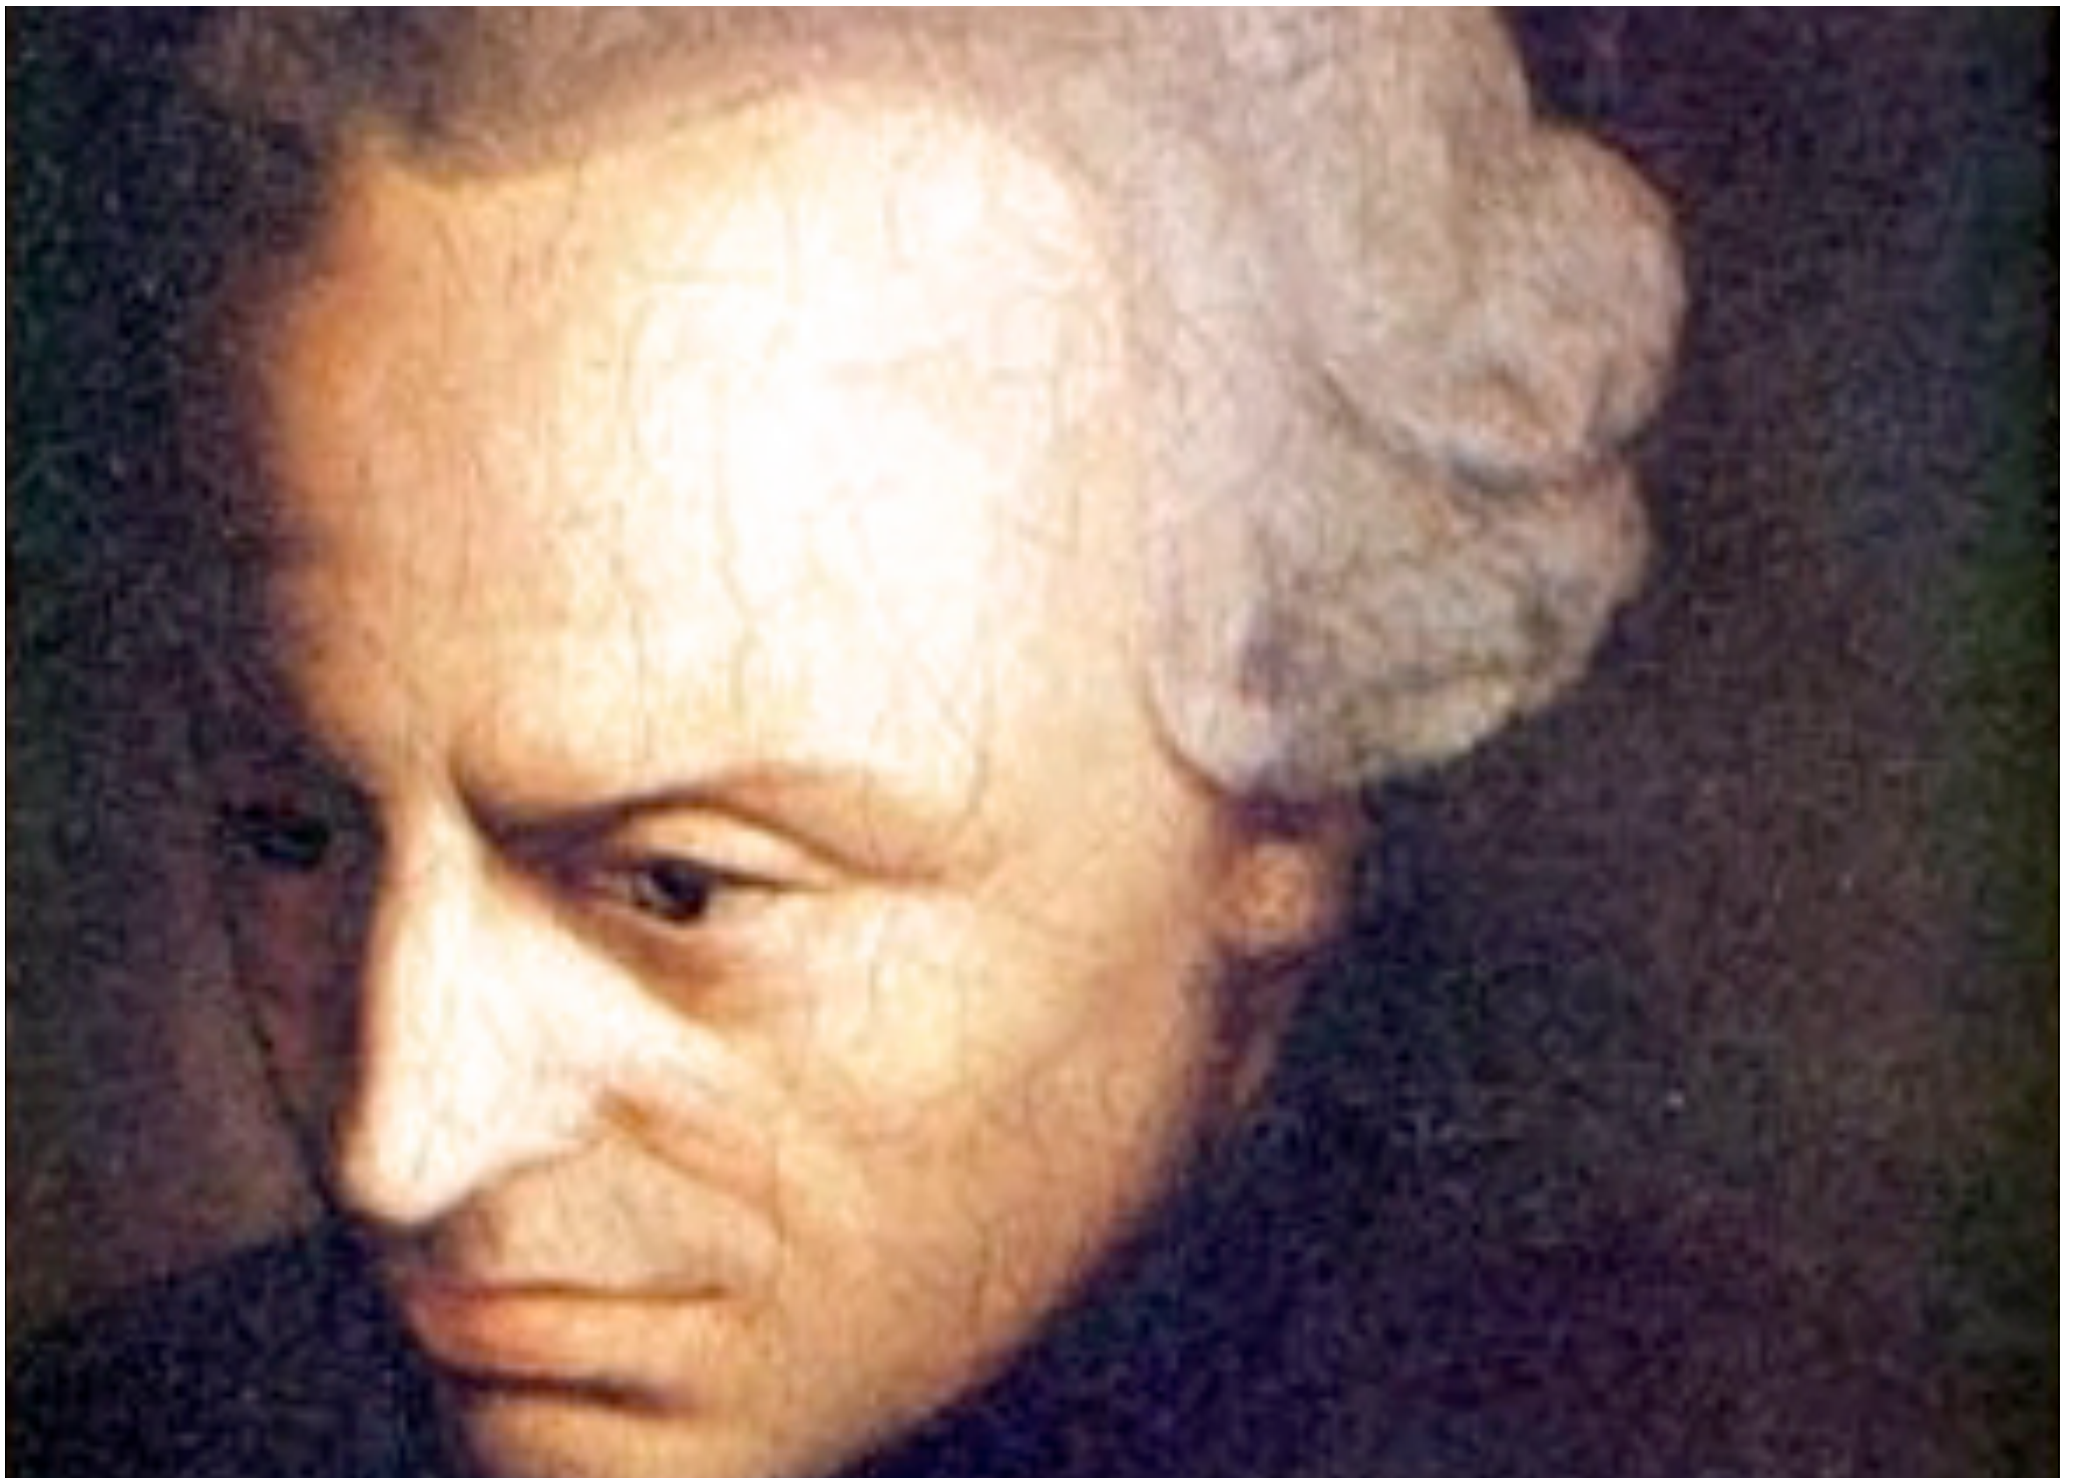

[LCTY]

headshift

In the C21st, we are able to
create new structures that
have both **intimacy** & **scale**

Turns out people
are selfish

Mercy for Madonna... adoption is to go ahead

Madonna cradles Mercy during a visit to the orphanage in

MADONNA has at last won the right to adopt a second child from Malawi, it was revealed yesterday.

A court overturned an earlier ruling banning the pop star from becoming parent to orphan Mercy James.

The four-year-old is expected to leave the African republic

By **Elisa Roche**
Showbusiness Editor

the youngster's 18-year-old unmarried mother died soon after giving birth. That same year Madonna had adopted David Banda, who was living in another orphanage in central Malawi

requirement that she had to be a resident in Malawi for at least 18 months. Judge Esmie Chombo, said the little girl should be cared for in her country of birth.

Allowing Madonna to take Mercy away could "set a dangerous precedent" for child trafficking, she said.

ity, Raising M helps some of M than one million

Mr Munlo said has been judged passionate, int articulate person Malawi family h adopt the girl. "E the right to love

Points of interest from July call

Aug 4, 2009

Here are some of the points raised in our last team call

- 1) New project won in Spain re Call Centre
- 2) New appointment within RBS - Brian to make introduction
- 3) Other items....

Re: Points of interest from July call

Aug 20, 2009 in response to [Dan Siddle](#)

It was a great call, I'd really like to understand more about the call centre project as I don't think it got the time it deserved and I'd like to understand if the team needs any further support - who's running with that?

You can —

- See people
- Show charts
- Feel important
- Point with a stick
- Eat donuts
- Impress your colleagues

All on company time!

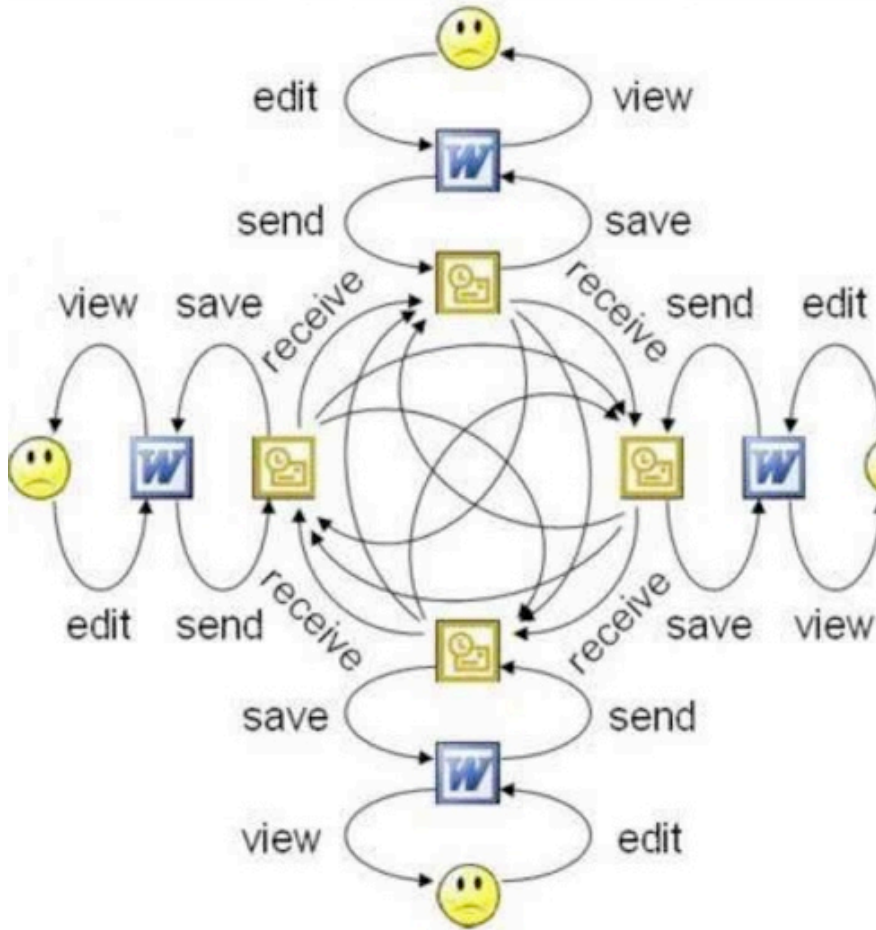

MEETINGS

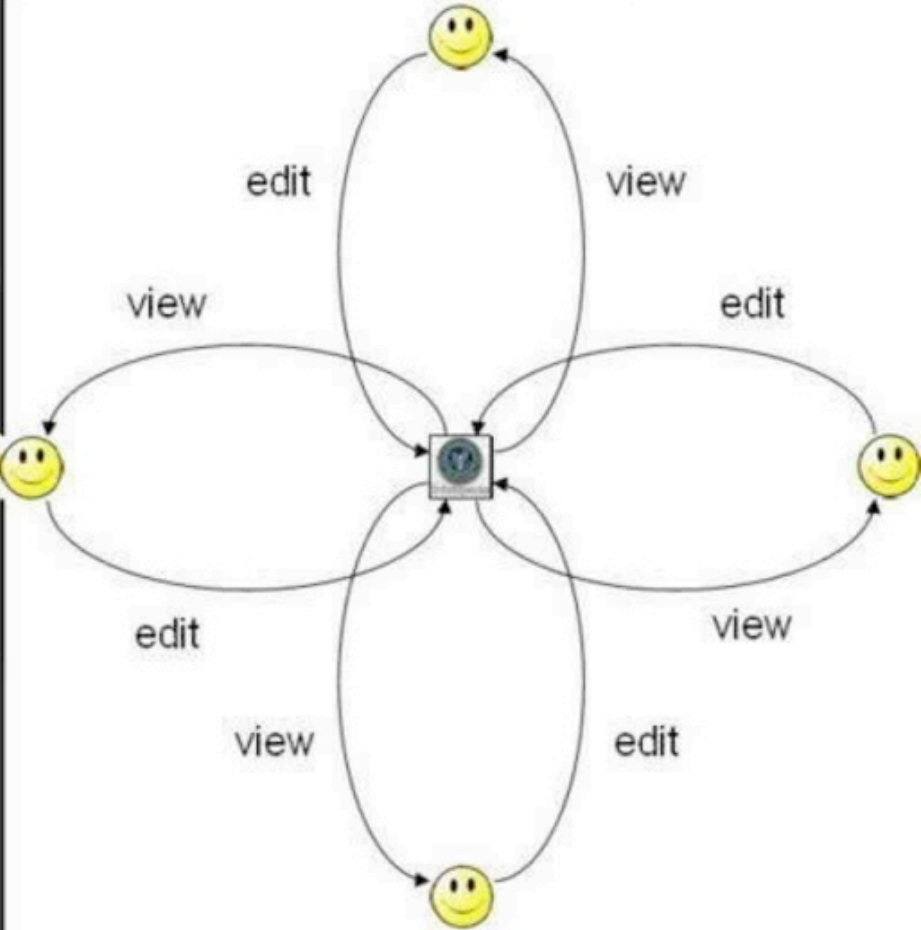

THE PRACTICAL ALTERNATIVE TO WORK

Email vs. Wiki Collaboration (U)

Email Collaboration

Wiki Collaboration

The background of the slide is a complex network diagram. It features several large, solid blue circular nodes of varying sizes, interconnected by thin, light blue lines. Some of these large nodes are further connected to smaller, semi-transparent blue nodes, which are themselves connected to even smaller, semi-transparent grey nodes. The overall structure is a dense, interconnected web of nodes and lines, suggesting a network or a system of relationships. The text "Some suggestions" is centered in the middle of the slide in a white, bold, sans-serif font.

A close-up photograph of a large number of smooth, rounded stones of various colors including white, grey, blue, and brown. Some of the stones have small numbers written on them in blue ink, such as '215', '424', '100000 #1', and '1000001'. The stones are piled together, creating a textured and colorful background.

Thank you
