Governance EA/PMO success ?

- ❑ ”Average lifetime of a PMO/EA ofifce is less than 3 years”

- ❑ Limited and late measurement of benefits of EA…

- ❑ ”Management still receive their overview in Excel…”

Governance EA/PMO success ?

*" An EA Office / PMO that is not resulting in better and **faster** decisions for top management – is an EA/PMO being disbanded… "*

CIO: What questions do we need to answer first?

What is the trend of applications?

How much are we spending by vendor?

What is less risky to decomission?

How critical is the application to the business?

How do we get the business involved?

How much is the savings potential?

Governance and EA/PMO: A backwards approach?

1. Forget the details. Pure '**top- down' approach.**

2. **Chock Therapy –** give top managment overivew they did not now they needed or could get. Fast.

3. Tool support **very early** (don't wait for the process to be defined)

4. **Time box** implementation – *weeks, not years*

5. **Benefit Realization first –** not last…
