

# Improve System z availability by becoming an OMEGAMON power user

Teleconference – December 12, 2013

---

## Highlights

### Topics

- Increasing mainframe application availability, even with reduced resources
- Simplifying operations as workloads grow increasingly complex
- Finding and fixing problems before they become outages

### Speaker

- *Ed Woods*, Tivoli Client Technical Specialist, IBM Software Group

**Broadcast date:** December 12, 2013,  
11:00 a.m. EST / 4:00 p.m. GMT / 3:00 p.m. UTC

**Developed for:** IT and enterprise architects;  
IT managers; system analysts; operations managers;  
system administrators

**Technical level:** Intermediate

---

OMEGAMON® is IBM's premier System z® monitoring and management family of products. You can manage z/OS® and all the IBM® zEnterprise® subsystems with it, including CICS®, DB2®, IMS™, WebSphere® MQ, Storage and Networks. OMEGAMON products have been essential for decades in most major enterprises and every new release makes them even more relevant. But there are many features and functionality that you might be missing – including valuable techniques to customize OMEGAMON for your environment.

## Teleconference

Join us for this complimentary teleconference as we educate and demonstrate the powerful usage, navigation, and customization techniques in each of the core OMEGAMON interfaces: Classic, Enhanced 3270UI, and Tivoli® Enterprise Portal (TEP). Learn how to optimize OMEGAMON to find and fix problems more efficiently before they become outages. You'll hear one of IBM's leading OMEGAMON technical experts as he shows how you can quickly and easily exploit more capabilities in OMEGAMON to increase availability and productivity.

## Register online right now

Register now for this teleconference by visiting
