

Want to modernize your IMS administration? We have tools for that

Teleconference – February 5, 2013

Highlights

Topics

- A single holistic, easy-to-use interface to manage IMS systems and databases
- How IMS Tools help administer and manage IMS data
- The latest developments in IMS Tools - what's next and what's planned

Speaker: *Janet Leblanc*, IMS Tools Strategist,
IBM Software Group

Broadcast date: February 5, 2013,
11:00 a.m. EST / 4:00 p.m. BST / 3:00 p.m. UTC

Developed for: IT and enterprise architects and managers; database administrators and managers; system programmers; and, operations managers

Technical level: Intermediate

IBM® IMS™ is sometimes viewed as a legacy product where nothing changes. We don't agree. IBM has moved decisively toward autonomies and modernization of the tooling that surrounds IMS. Plus, IMS is a database and transaction manager that can be extensively optimized and calibrated in order to achieve the best possible performance. However, IMS administrators today are often the graduates of schools that may not teach deeply enough about the mainframe. IMS Tools provide an easy way to get the best possible performance from the databases that house your most critical business data and processes.

Teleconference

Join us for this complimentary teleconference and hear the latest news about IBM efforts to facilitate your IMS administration. We'll discuss how to use IMS Tools to simplify ongoing database monitoring and maintenance tasks and relieve the day-to-day burden on IMS DBAs, in part by using the consolidated data found on the IMS Administration Console dashboard. You'll also learn how to reduce analysis efforts by generating recommended actions.
