

Getting the most value from your DB2 11 for z/OS Utilities

Webcast – January 14, 2014

Highlights

Topics

- Supporting core functions in DB2 for z/OS
- Early testing of new versions of DB2
- Responding quickly and accurately during ongoing DB2 maintenance
- Reducing system resources, including elapsed time, CPU usage and other system costs
- Simplifying data management

Speaker

- *Haakon Roberts*, IBM Distinguished Engineer, DB2 for z/OS Services and Development, IBM Software Group

Broadcast date: January 14, 2014,
11:00 a.m. EST / 4:00 p.m. GMT

Developed for: Application developers and managers;
database administrators and managers

Technical level: Intermediate

Today's global and non-stop availability of data requires more than support for online utility processing. Performance and administrative tasks must be completed without application outages. Scalability constraints need to give way to more automation and simplified database administration. With a solid understanding of the features available in the DB2® 11 for z/OS® Utilities, you can make important improvements to your DB2 for z/OS environments – including the use of system resources.

Webcast

In this complimentary webcast, we will share best practices for using the latest features in the DB2 11 Utilities Suite and relieving the burden of maintaining DB2 data. These utilities help minimize the downtime associated with routine DB2 data maintenance, while ensuring the highest degree of data integrity. This session covers the latest enhancements, including core version support and features that improve overall DB2 availability. We will also discuss how you can govern utilities execution by enforcing shop standards and implementing best practices.
