

Business Analytics Live 2012

Smarter decisions for better business outcomes

WELCOME

Mark Fieldhouse

Business Unit Executive, IBM Business Analytics

Agenda

TIME	DESCRIPTION		
10.00	Welcome Mark Fieldhouse, Business Unit Executive - IBM Business Analytics		
10.15	Smarter decisions for better business outcomes Colin Shearer, Global Executive, Advanced Analytic Solutions, SPSS		
10.50	Leicester Tigers Sports Science - Injury and Performance Prediction and Influence Andy Shelton, Head of Sports Science, Leicester Tigers		
11.30	BREAK		
11.45	Better BI builds better Businesses Rob Roberts, Head of BI Product Management Practice, DHL Supply Chain, EMEA		
12.25	Panel Discussion and Q&A		
12.45	LUNCH		
13.45	Business Analytics Live - Software in Action Integrated demo and presentation of end to end solution		
15.15	Wrap up Mark Fieldhouse, Business Unit Executive - IBM Business Analytics		
15.30	BREAK		
16.00 - 16.40	Managing Sales Compensation Kevin Pilcher, Senior Manager, Corporate and Information Management Systems Infrastructure Services Unit, Colt Telecommunications	Using Analytics for Social Benefit Gary Seaman, Head of Business Analytics, Medway Youth Trust	Customer Analytics to win customers and grow your business Paul Ravenscroft, Senior Loyalty Insights Manager, Boots & Rachel Pillsbury - CRM Data Mining Manager, Boots
16.50 - 17.30	Managing Sales Compensation Kevin Pilcher, Senior Manager, Corporate and Information Management Systems Infrastructure Services Unit, Colt Telecommunications	Using Analytics for Social Benefit Gary Seaman, Head of Business Analytics, Medway Youth Trust	Customer Analytics to win customers and grow your business Paul Ravenscroft, Senior Loyalty Insights Manager, Boots & Rachel Pillsbury - CRM Data Mining Manager, Boots
17.30	NETWORKING RECEPTION		

Today's organizations are facing many **DISRUPTIVE FORCES** fueling the need for analytics

1 The emergence of a new data era

Creating new opportunities to capture meaningful information from new varieties of data and content coming at organizations in huge volumes and at accelerated velocity

2 The shift of power to the consumer

Creating the need for organizations to understand and anticipate customer behavior and needs based on customer insights across all channels

3 Accelerating pressure to do more with less

Creating the need for all parts of the organization to optimize all of their processes to create new opportunities, to mitigate risk, and to increase efficiency

Organisational pressures are at a point where analytics has evolved from business initiatives to **BUSINESS IMPERATIVES**

More organization are using analytics to create a competitive advantage

Source: The New Intelligent Enterprise, a joint MIT Sloan Management Review and IBM Institute of Business Value analytics research partnership. Copyright © Massachusetts Institute of Technology 2011

And leaders are outperforming their competitors in key financial measures

1.6x Revenue Growth

2.0x EBITDA Growth

2.5x Stock Price Appreciation

Source: *Outperforming in a data-rich, hyper-connected world*, IBM Center for Applied Insights study conducted in cooperation with the Economist Intelligence Unit and the IBM Institute of Business Value. 2012

ANALYTIC-DRIVEN ORGANIZATIONS are distinguished by their ability to leverage ...

All information

- All information
- Transaction data
- Application data
- Machine data
- Social data
- Enterprise content

All perspectives

- Past (historical, aggregated)
- Present (real-time)
- Future (predictive)

All people

- All departments
- Experts and non-experts
- Executives and employees
- Partners and customers

All decisions

- Major and minor
- Strategic and tactical
- Routine and exceptions
- Manual and automated

...focusing on high-value initiatives in core **BUSINESS AREAS**

1

Customers

Examples:

- Advanced client segmentation
- Leveraging customer sentiment analysis
- Reducing customer churn

2

Finance

- Enabling rolling plan, forecasting and budgeting
- Automating the financial close process
- Delivering real-time dashboards

3

Risk

- Making risk-aware decisions
- Managing financial and operational risks
- Reducing the cost of compliance

4

Operations

- Optimizing the supply chain
- Deploying predictive maintenance capabilities
- Transform threat & fraud identification processes

Smarter decisions for better business outcomes

Smarter Decisions for Better Business Outcomes

Colin Shearer

Global Executive, Advanced Analytic Solutions

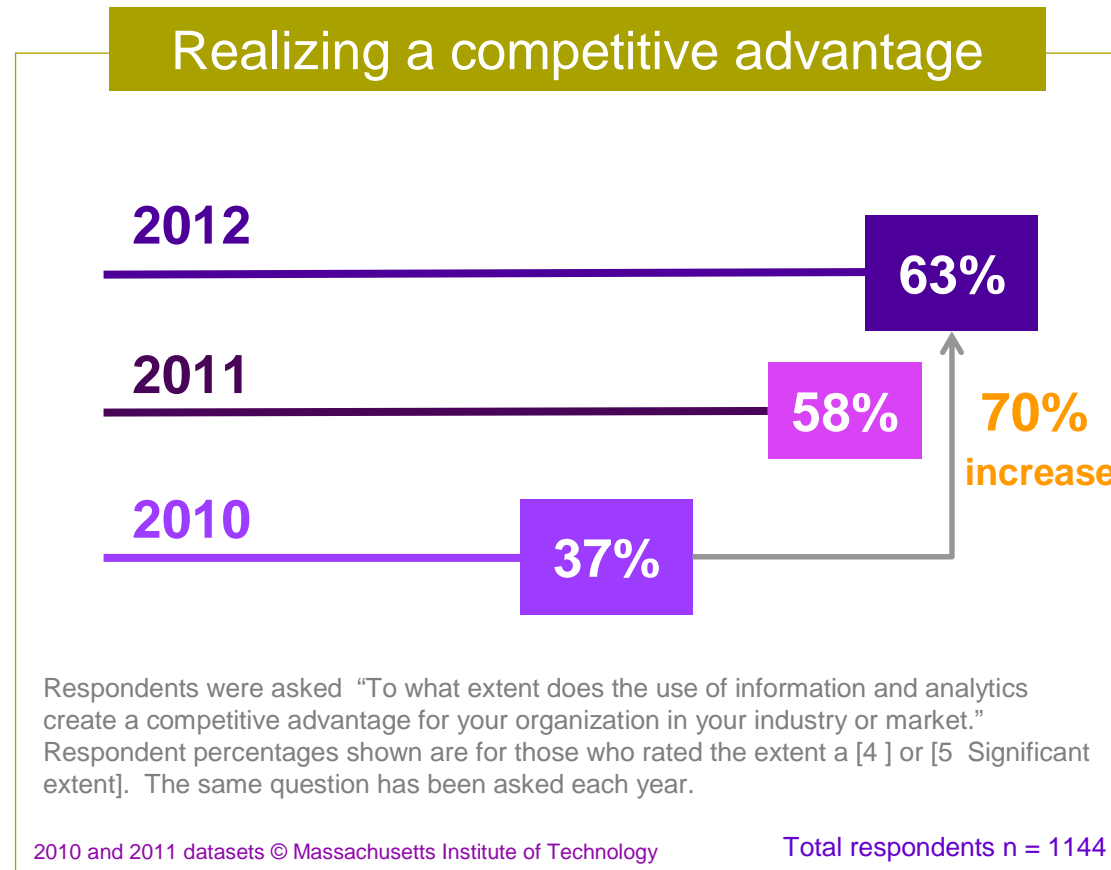

Disclaimer

Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

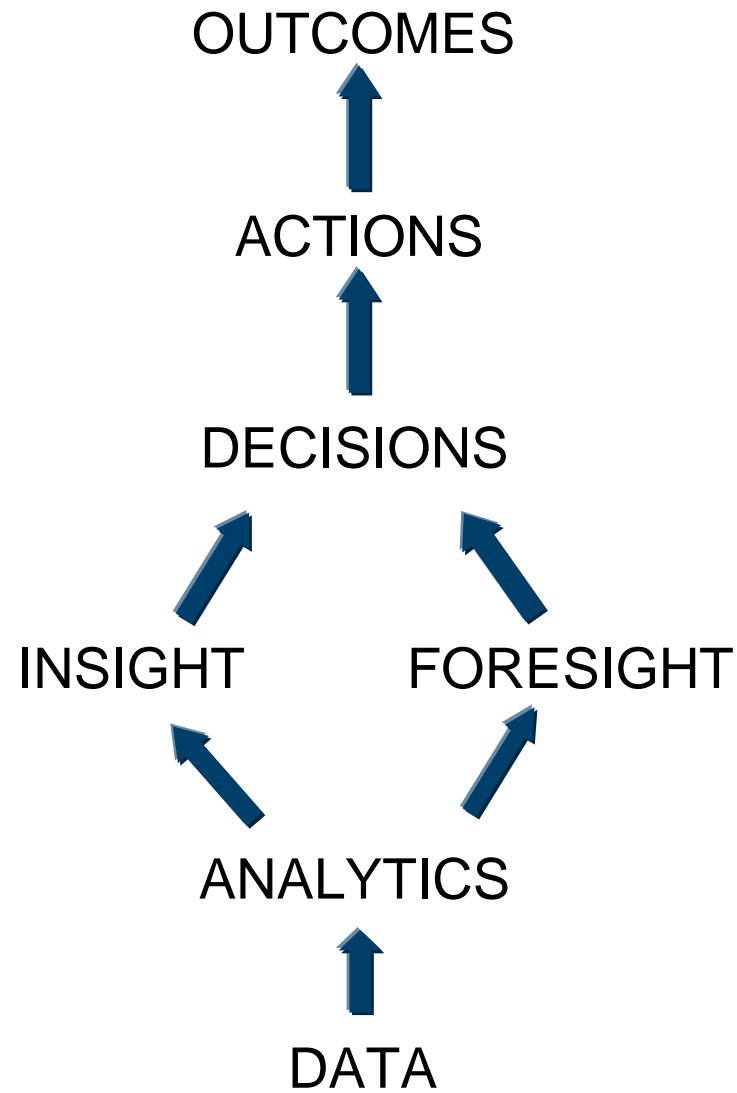

Nearly two out of three realizing a competitive advantage from information and analytics

It's all about outcomes

Organizations drive transformation by starting with one of these four high-value initiatives

Examples:

Grow, retain and satisfy customers

- Churn management
- Social media sentiment analysis
- Propensity to buy/Next best action

Increase operational efficiency

- Predictive maintenance
- Supply chain optimization
- Claims optimization

Transform financial processes

- Rolling plan, forecast and budget
- Financial close process automation
- Real-time dashboards

Manage risk, fraud & regulatory compliance

- Operational and financial risk visibility
- Policy and compliance simplification
- Real-time Fraud identification

And organizations are gaining value from working with IBM

Grow, retain and satisfy customers

60%
Improvement in billed revenue retention rate

Increase operational efficiency

50%
Increase in inventory turns

Transform financial processes

50%
Reduction in planning cycle times

Manage risk, fraud & regulatory compliance

70%
Trading decisions improved with 70% of counterparties

ANALYTIC-DRIVEN ORGANIZATIONS

Rules

Predictive Analytics

Optimization

- Smarter fraud detection
- 95% reduction in time to refer for investigation
- Up to 88% increase in pursuing fraudulent claims

DIGITAL+

Used Real-time Predictive Analytics to leverage in-bound customer interactions to drive loyalty and life time value

- *Shorter, more relevant calls led to **increased satisfaction** for customers and agents*
- ***Substantial cross-selling** through the inbound service channel*
- ***20% higher retention** in first 2 months*

The screenshot displays a customer service interface for DIGITAL+. At the top, it shows the customer's status as 'RECLAMACION ABIERTA' (Open Complaint). The main profile section includes:

- VALOR:** ORO
- PERFIL HOGAR:** FAMILIA_ADULTA (0)
- ANTIGÜEDAD:** 10 AÑOS 4 MESES
- PAQUETE:** DIGITAL+ CINE
- Nº Tarjeta:** 031230097171 Canaleón
- Orientación:** ASTRA
- Instalación:** Individual
- Terminal:** PIONEER BCT-1310

Below the profile, there are several service and risk indicators:

- Riesgo de baja:** [Progress bar]
- Solicitud de baja:** [Progress bar]
- Experiencia Negativa:** [Progress bar]
- Suspensión:** [Progress bar]
- Promocionado:** ARPU [Progress bar]
- PPV Fútbol:** [Progress bar]
- PPV Adulto:** [Progress bar]
- PPV Comercial:** [Progress bar]
- Opciones - Abonos:** [Progress bar]
- Otros Servicios:** [Progress bar]

On the right side, there is a vertical menu with categories: CINE, DEPORTES, INFANTIL, DOCUMENTALES, SERIES, and TAGULLA.

At the bottom, there are two sections:

- RETENCIÓN:** Tratamiento recomendado: Gama Digital+. Tratamiento alternativo: Nueva Temporada Otoño. Tratamiento final (en último caso): Minibásico.
- PRODUCTOS:** Le ofrecemos el Abono Fútbol+ con tránsito a Digital+ Total por 25Euros/mes, con el que disfrutaría de 1 partido por jornada de Liga, 4 canales más de deporte y Multifútbol gratis por la compra de cada partido de Liga.

Decisions on Streaming Data

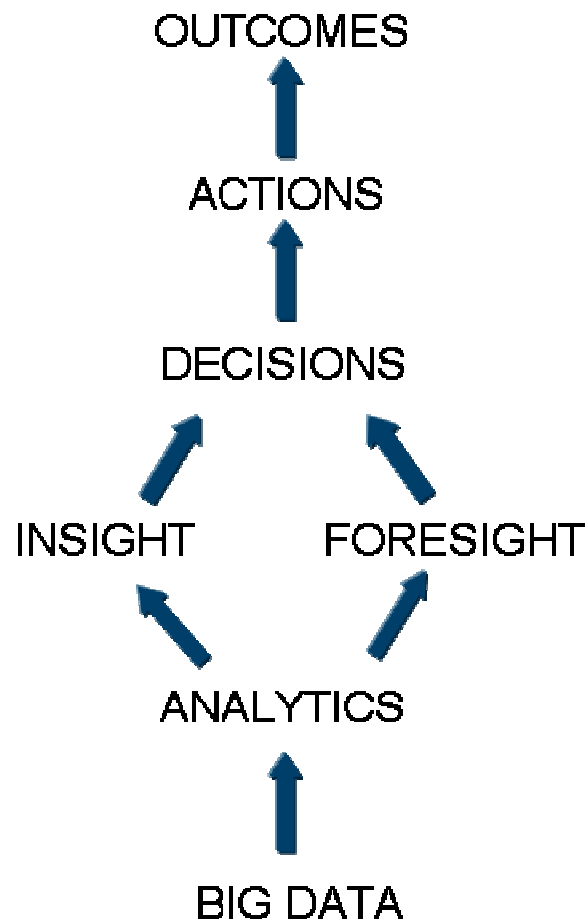

- Neonatal monitoring
 - 120 children monitored
 - 120K messages/sec (ie billions/day)
- Detect infections 24 hours sooner

IBM: A holistic and integrated approach to analytics and big data

ANALYTIC-DRIVEN ORGANIZATIONS

IBM Analytic Answers

*A portfolio of **cloud-hosted solutions** that deliver directly-actionable predictive/prescriptive information to the line of business*

- Removes barriers to adoption of advanced analytics :

Expertise

Dependence
on IT

Start-up
time

- Leverages IBM's deep analytics expertise but tailored to each client's business, using their data
- Built on IBM's analytic platform for unsurpassed scalability, analytical power, and performance
- No technical/analytical skills required
- Subscription based
- **Brings the power of advanced analytics to new users**

References to potential future products are subject to the Important Disclaimer provided earlier in this presentation

Initial areas: IBM Analytic Answers for...

Insurance Renewals

Which of my insurance policy holders are unlikely to renew next month? How could I persuade each one to stay loyal?

Purchase Analysis & Offer Targeting

Which products do my customers tend to buy together? Can I leverage that knowledge to create combination offers and promotions that increase basket size and revenue per customer visit?

Student Retention

Which of our students are performing below their predicted potential? How should we intervene to get them back on track and avoid the possibility of their dropping out?

Prioritized Collections

Which of my overdue debtors are likely to pay? How much can I recover from them, and which treatment will be most effective for each?

Providing information that is **actionable at the level of individual cases**

References to potential future products are subject to the Important Disclaimer provided earlier in this presentation

Summarising

For business success, you need to be able to:

Leverage your data assets...

...and unlock their value with smarter analytics....

...to drive better decisions and more timely and appropriate actions

...to generate improved outcomes and higher returns

- Aspire to a holistic, enterprise-scale vision
- But identify key areas where you can make initial quick wins
 - *Never let “data excitement” distract you from a focus on business goals!*

We Value Your Feedback!!

- Please complete the session survey for this session by:
- Accessing the Vision SmartSite on your smart phone or computer at: www.visionsmartsite.com
 - Go to: Surveys / My Session Evaluations
- Visit any onsite event kiosk
 - Go to: Surveys / My Session Evaluations

Note: each completed survey increases your chance to win an Apple iPod Touch with daily drawing sponsored by Alliance Tech.

Leicester Tigers Sports Science

Injury and Performance Prediction and Influence

Andy Shelton – Head of Sports Science

Introduction

Background

- What is rugby union?
- Why do we need to monitor our players?
- What do we need to measure?

What are we doing?

- What data do we collect?
- How do we manage our data?
- How do we analyze our data?
- What do we report?

What does the future hold?

- How do we move forwards?
- What else could we monitor?

Background

What is rugby union?

2 teams of 15 players (with 8 substitutes)

Aim is to score points via putting the ball over the 'try line' or kicking the ball over the posts

Run with the ball, pass backwards or kick in attack

Tackle in defence

Running and collisions

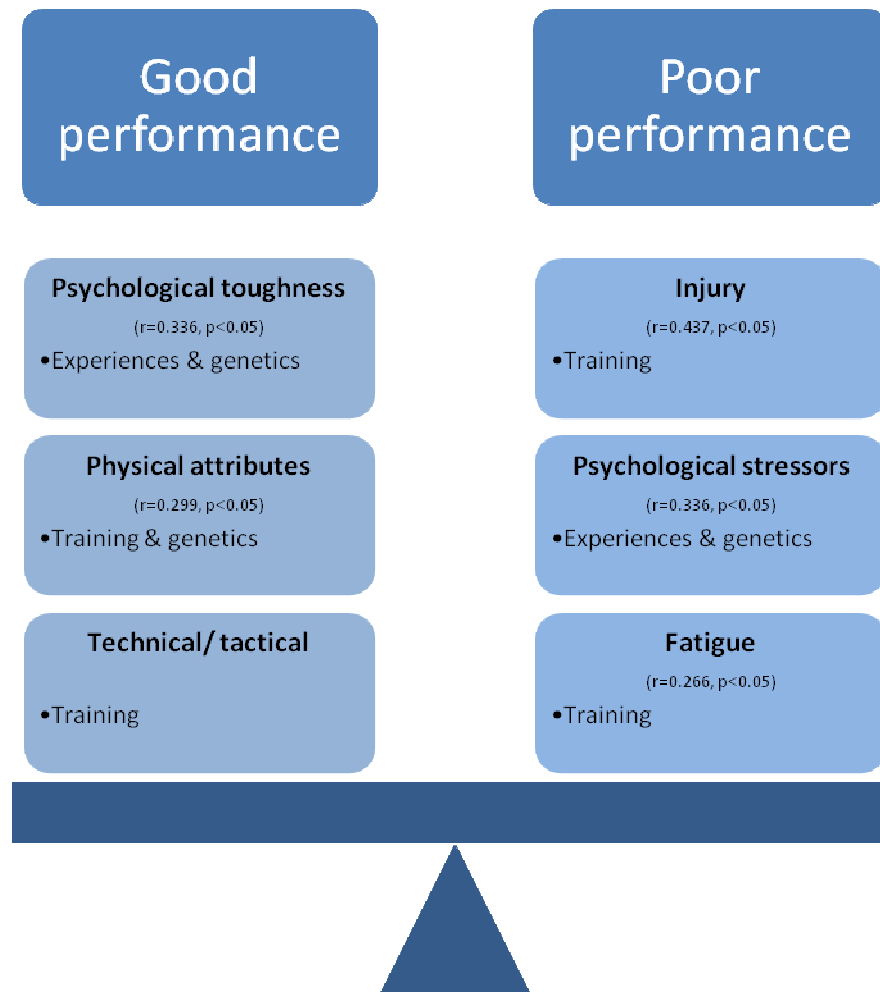

What is rugby union?

Position	Collisions					Running										Combined				Decelerations										
	Working scrums	Working tackles	Working carries	Working rucks/mauls	Line out landings	Total working collision elements	Total working collision elements per minute	Total working collision elements W:R	Frequency of total working collision elements (s)	Total distance (m)	Distance < 3.6 m.s-1 (m)	Distance 3.6-5 m.s-1 (m)	Distance 5-6.7 m.s-1 (m)	Distance > 6.7 m.s-1 (m)	Total distance >3.6 m.s-1 (m)	Time spent > 3.6 m.s-1 (min)	Maximum 10 min running intensity (m.min-1)	Total running elements > 5.6 m.s-1	Total running elements > 5.6 m.s-1 per minute	Total running elements > 5.6 m.s-1 W:R	Frequency of total running elements > 5.6 m.s-1 (s)	Total working collision and running elements > 5.6 m.s-1	Total working collision and running elements > 5.6 m.s-1 per minute	Total working collision and running elements > 5.6 m.s-1 W:R	Frequency of total working collision and running elements > 5.6 m.s-1 (s)	Mean recovery speed (m.s-1)	Decelerations from 3.6 m.s-1	Decelerations from 5 m.s-1	Decelerations from >5 m.s-1	Total Decelerations

Why do we need to collect data on players?

Team performance and psychological state

Individual performance and athletic ability

Individual performance and athletic ability

Team performance and key player availability

Matt Hampson Foundation

Matt Hampson is a former English rugby union prop who became paralysed from the neck down after a scrummaging practice accident for England under 21 on 15 March 2005.

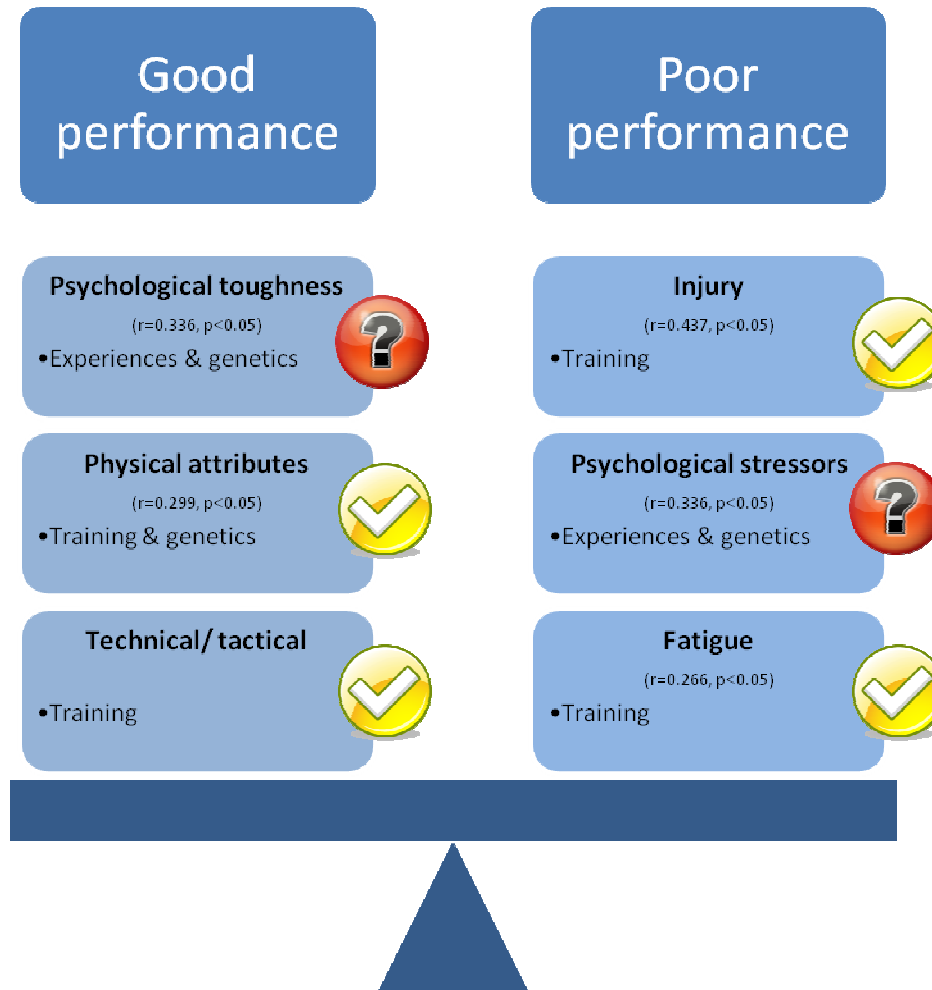

He founded the Matt Hampson Foundation in 2011 with the aim of providing advice, support, relief and/or treatment for anyone suffering serious injury or disability which has arisen from any cause, but in particular from participation in or training for any sport, sporting activity or other form of physical education or recreation.

Inspiring and supporting young people seriously injured through sport.

What can we affect?

When does an injury occur?

When force exerted on a tissue is greater than that which it can withstand.

How can we affect strength and fatigue?

The purpose of any training program is to provide a stimulus for sports-specific adaptation resulting in improved skill and/ or athletic performance.

How do we adapt to the stimulus?

Figure 1 Schematic demonstrating player 1 (green) who trains at the right time, resulting in increased performance; and players 2 (red) and 3 (orange) who leave too long, and not enough time between training sessions respectively, both resulting in decreased performance.

Present

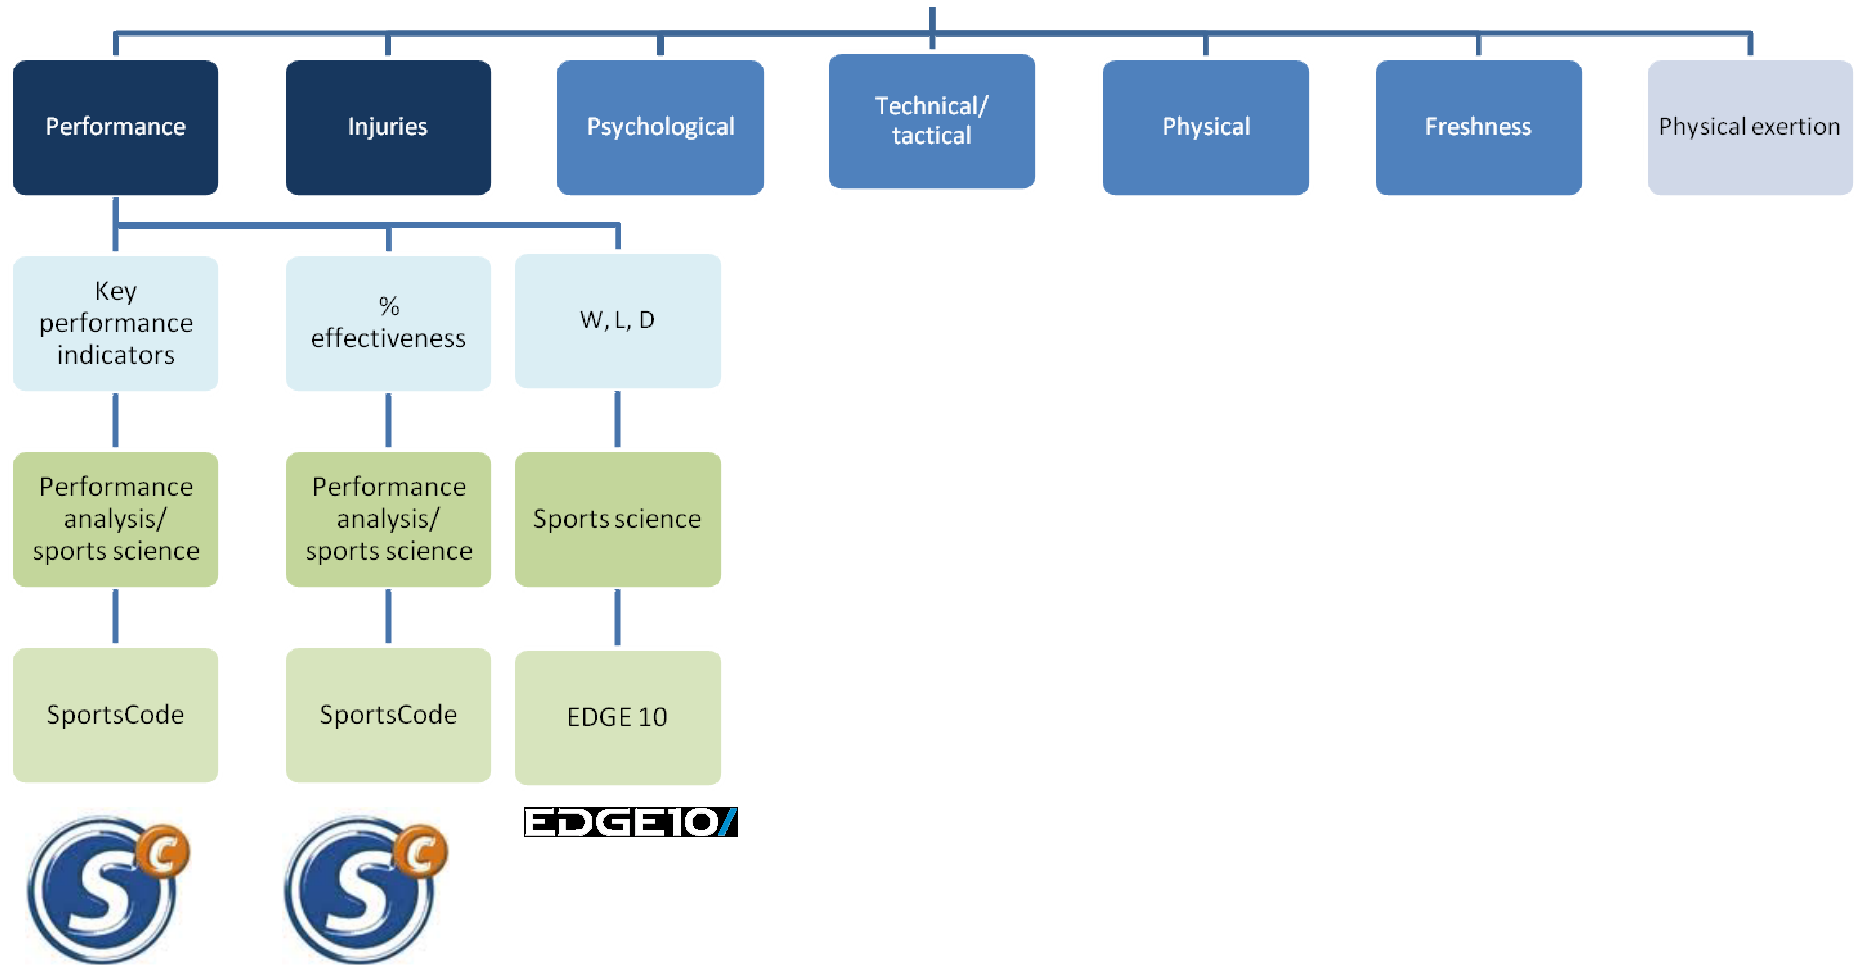

What data are we collecting now?

Information use

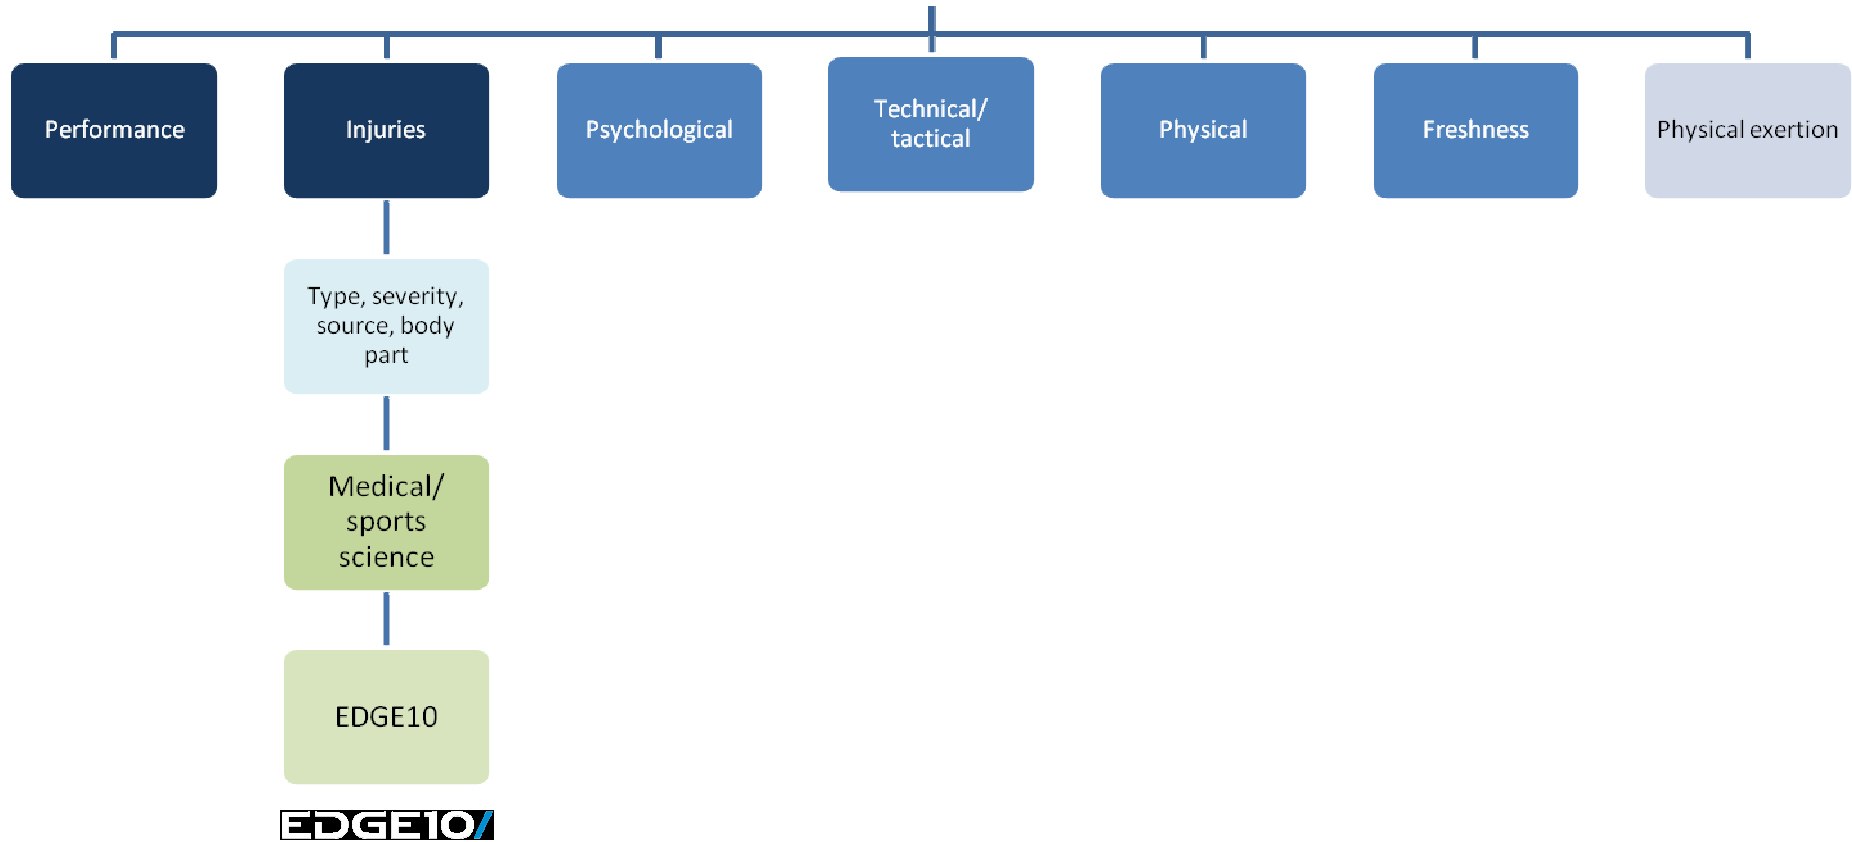

- Acquisition
 - From a host of different sources
- Management
 - Data collated in EDGE10
 - All physical exertion and monitoring information in one place
- Analysis
 - IBM's SPSS Modeller
- Reporting
 - Graphical representations of physical exertion and monitoring data

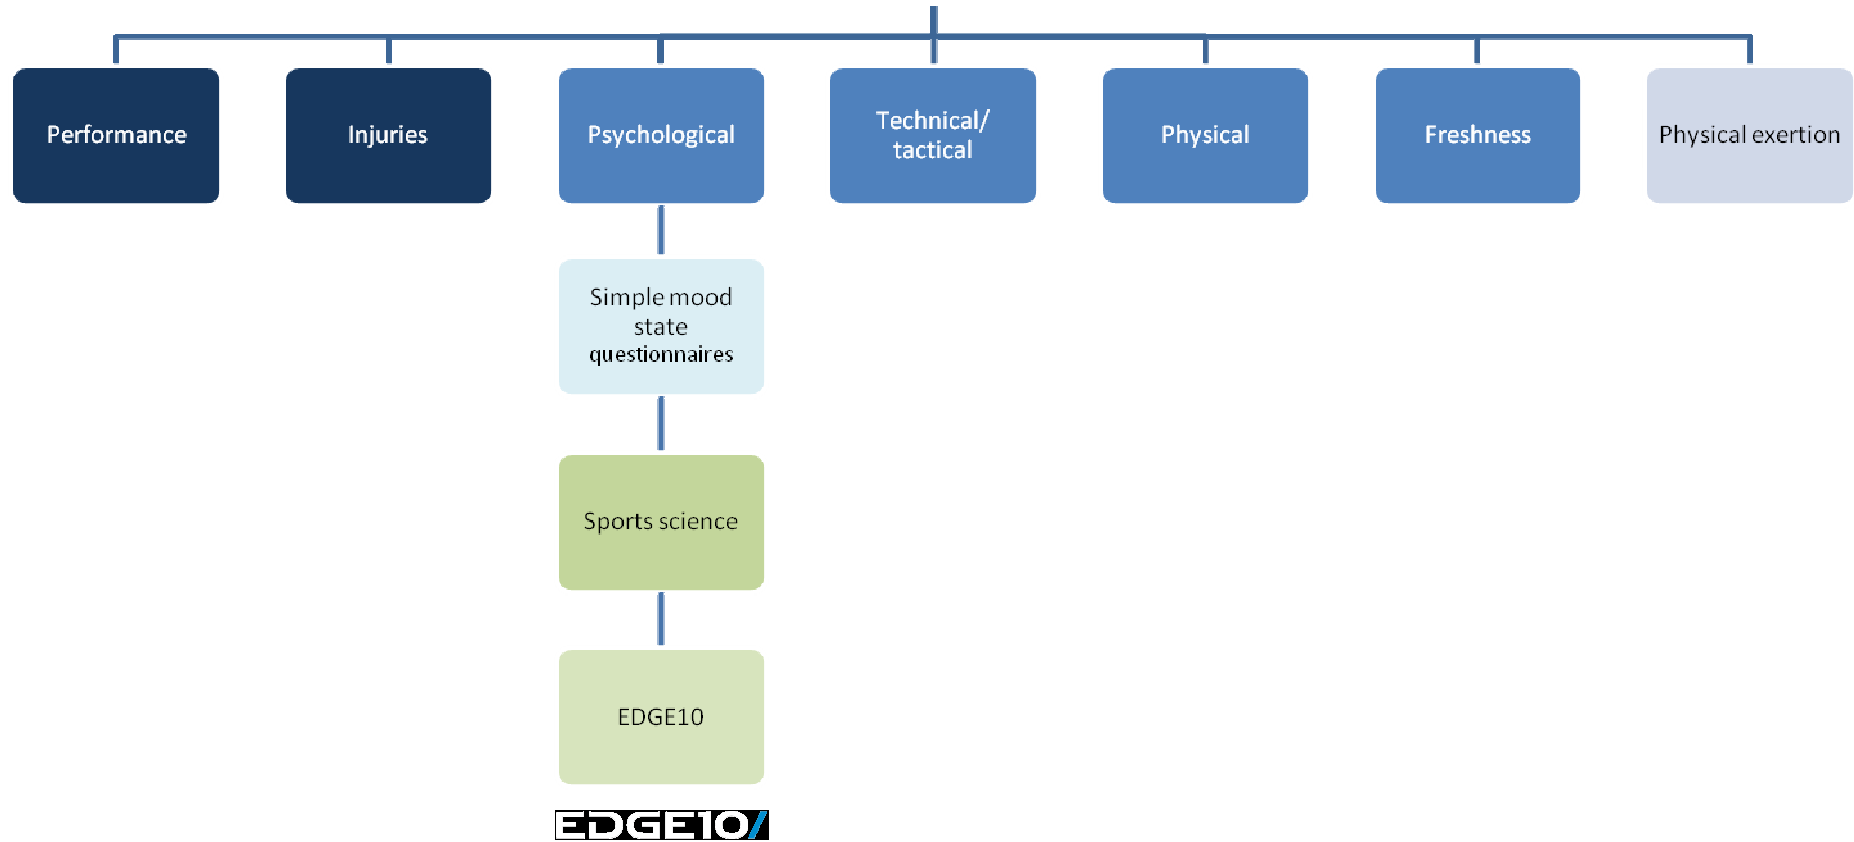

Information use – Data acquisition

Information use – Data acquisition

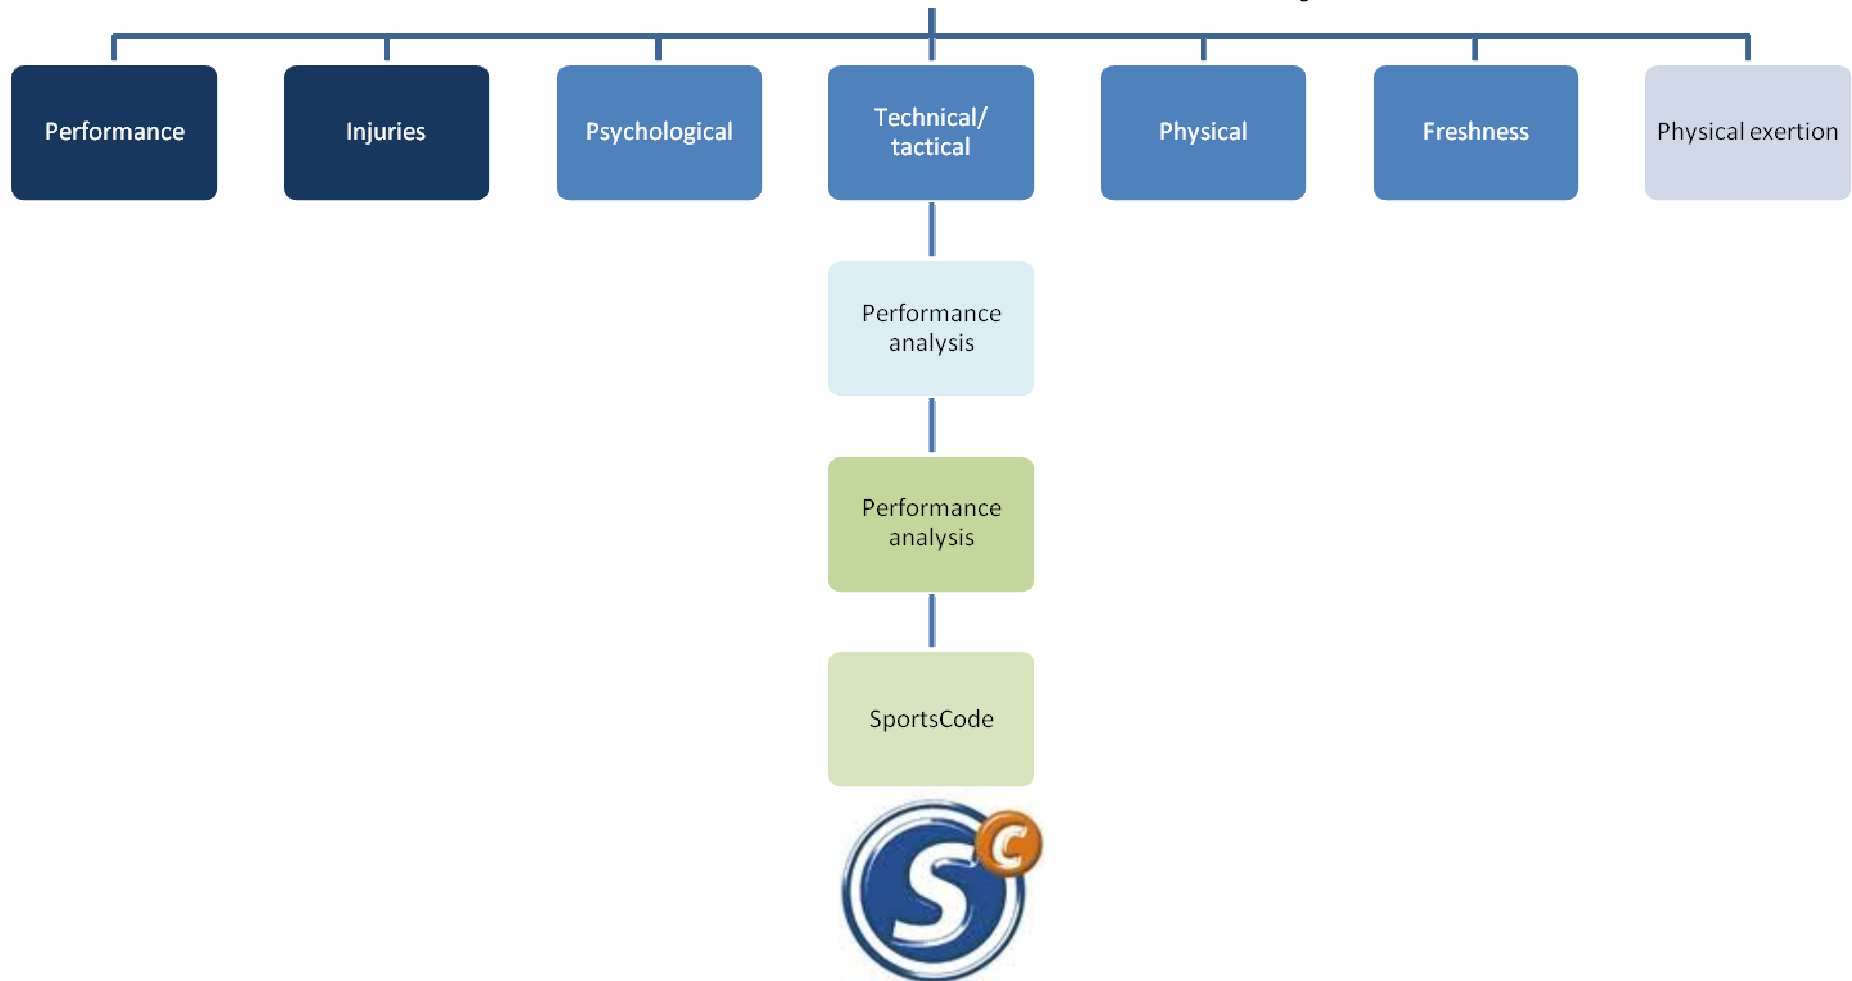

Information use – Data acquisition

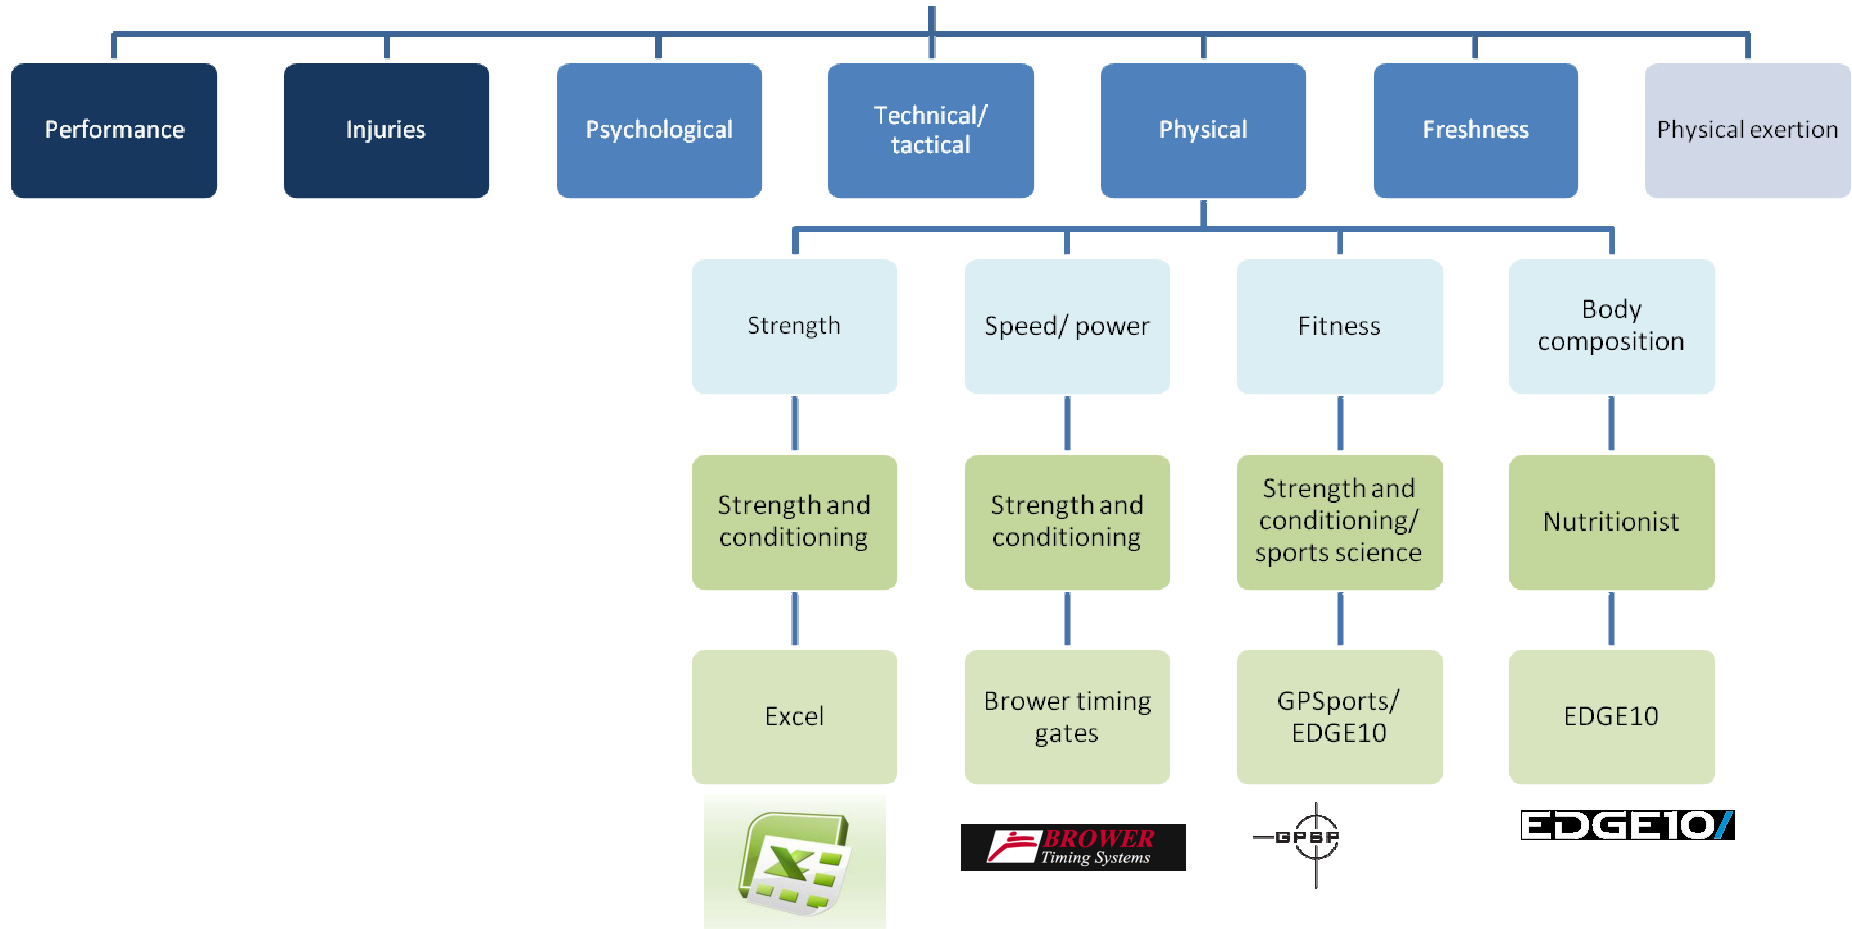

EDGE10

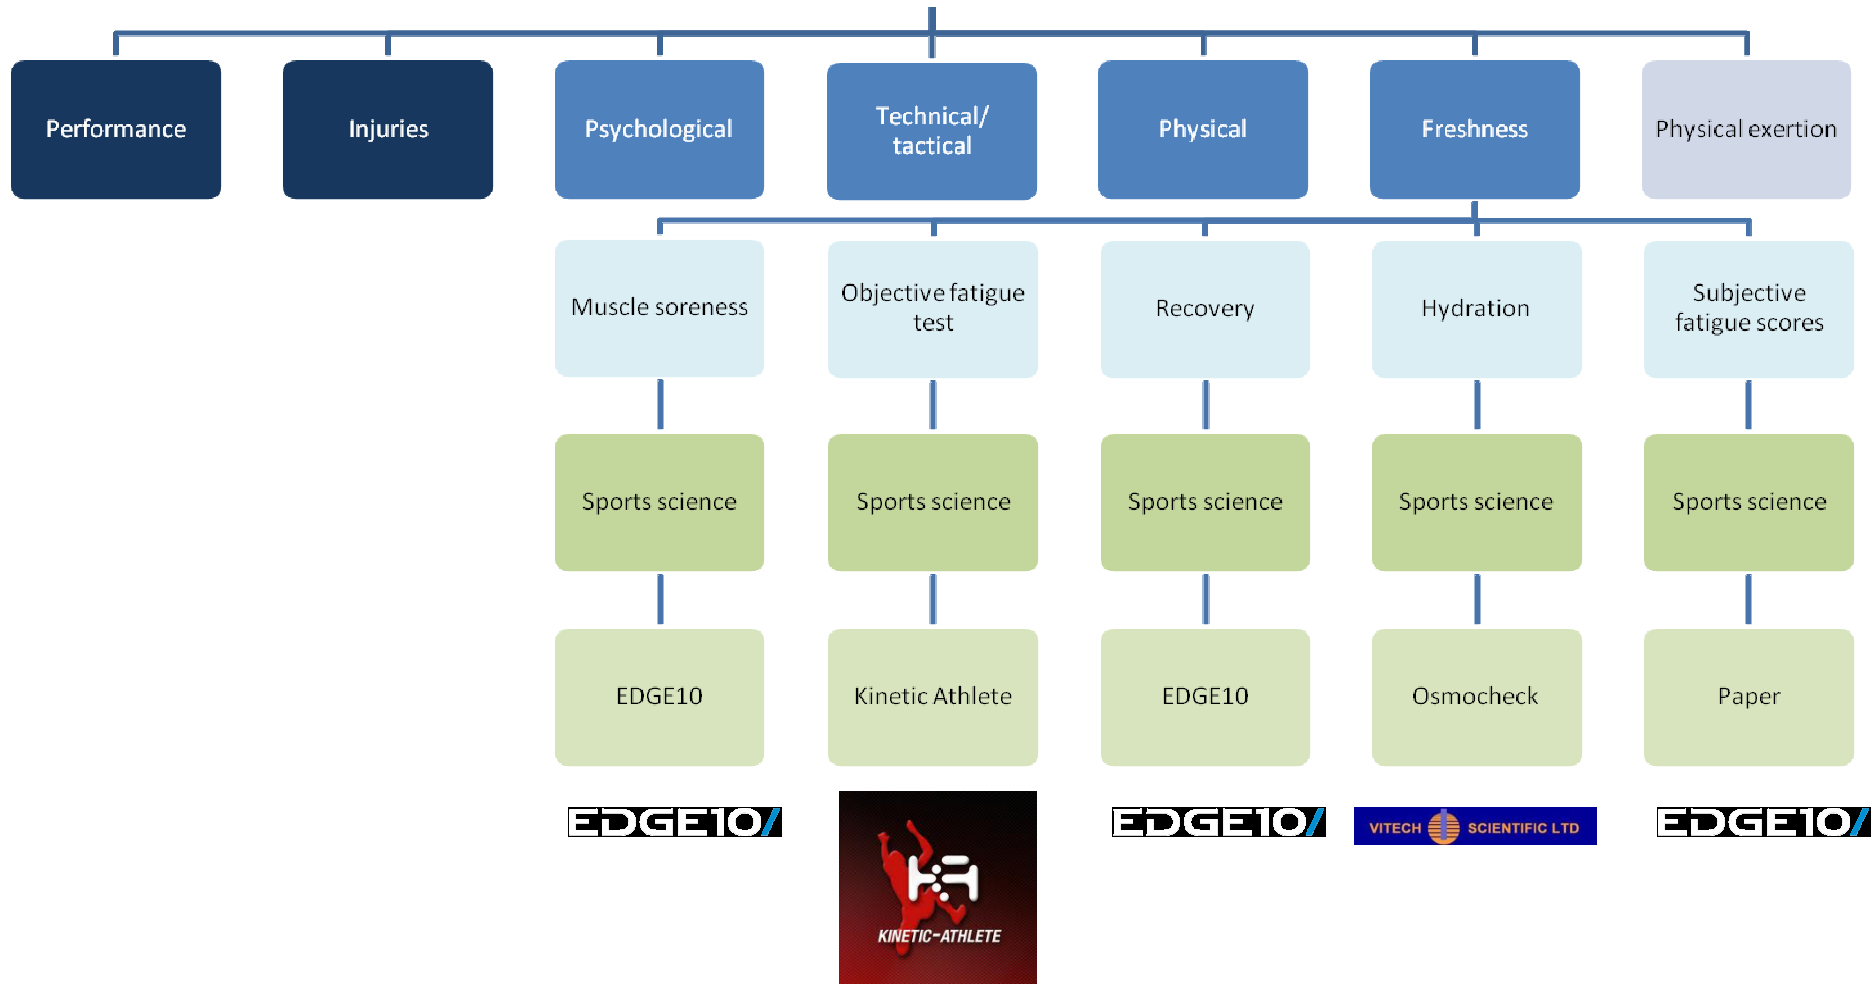

Information use – Data acquisition

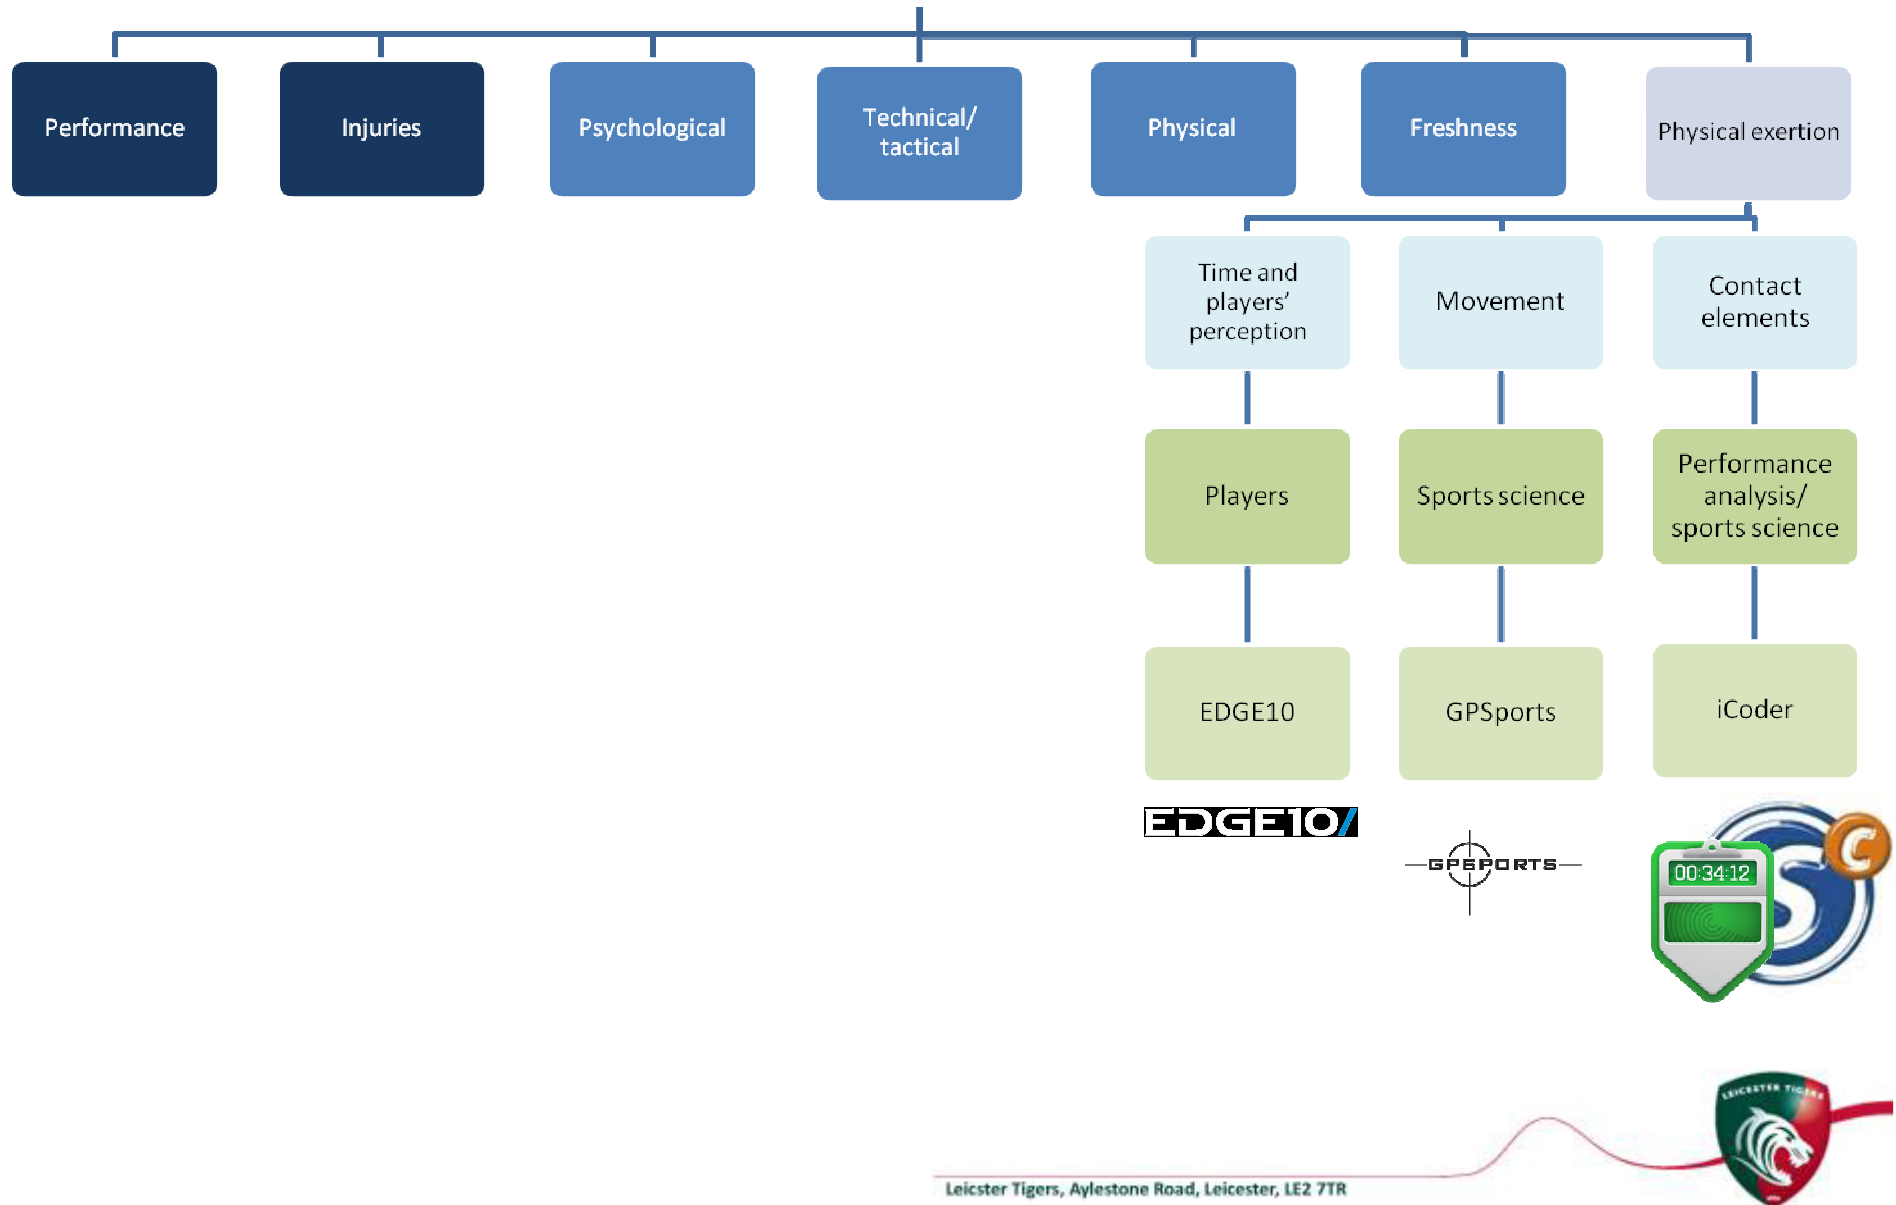

Information use – Data acquisition

Information use – Data acquisition

Information use – Data management

EDGE10/

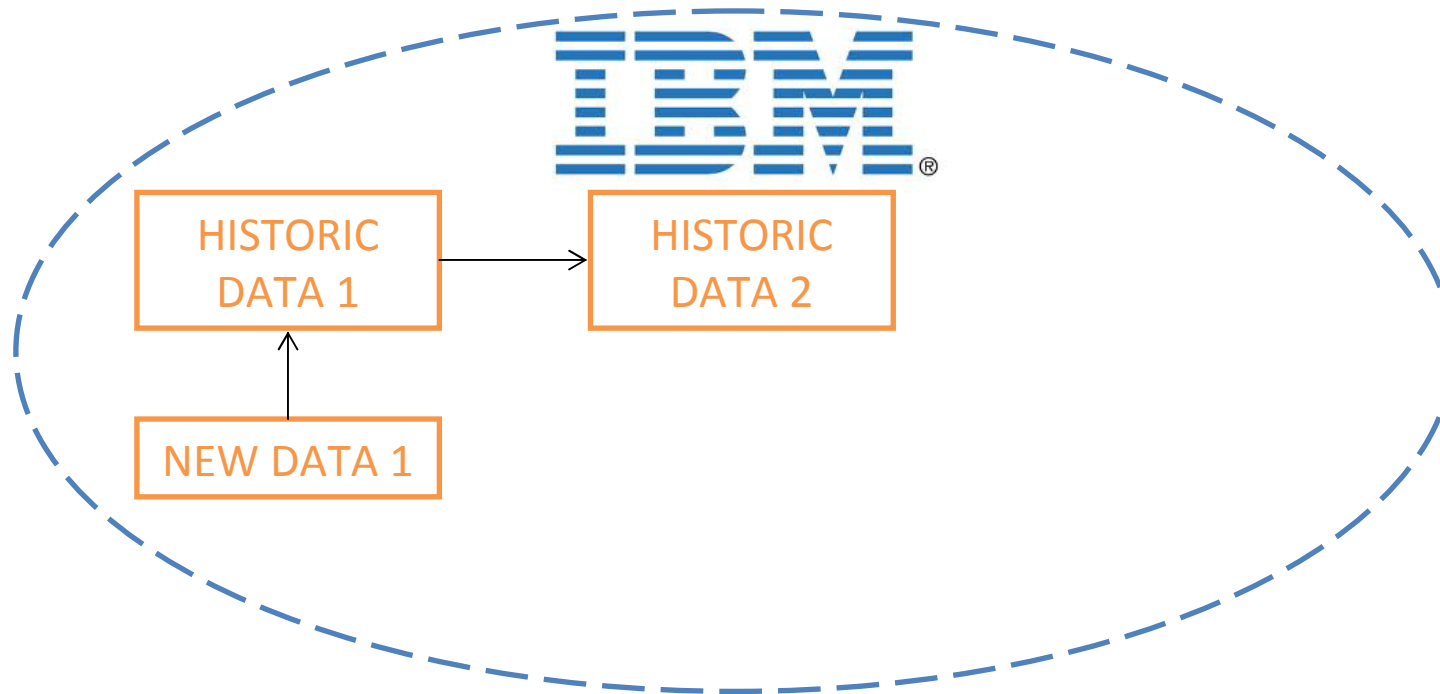

Information use – Data analysis

Information use – Data analysis

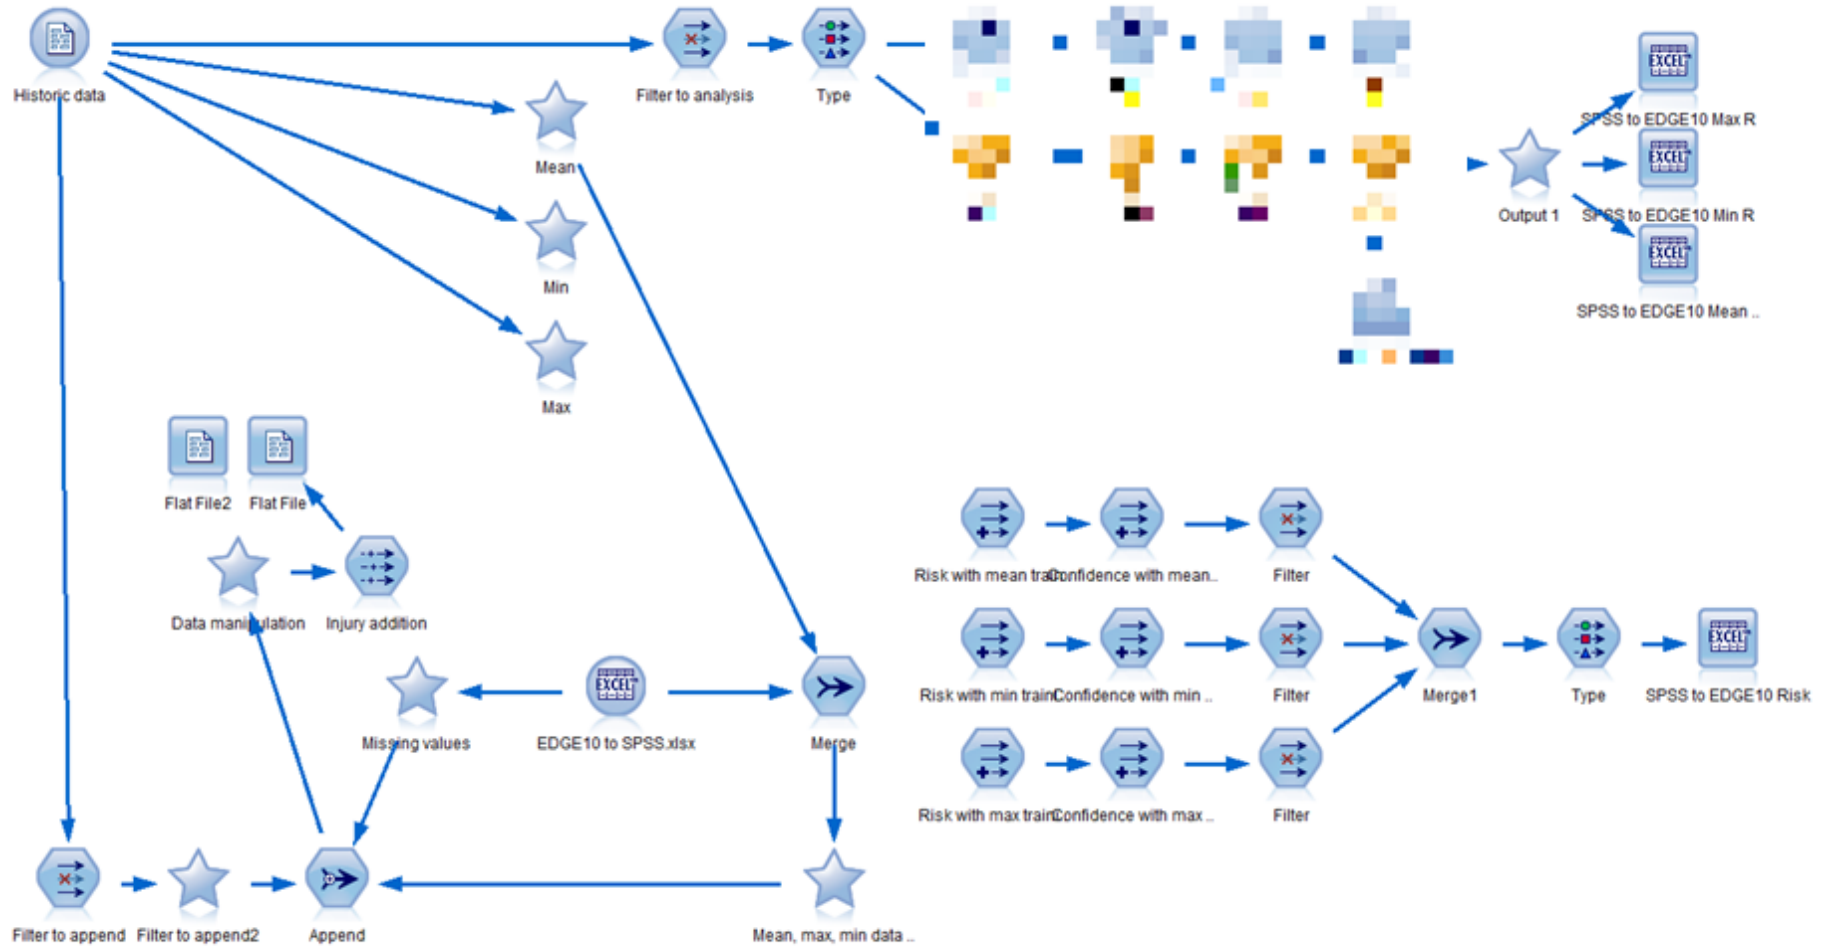

Information use – Data analysis

Information use – Data analysis

Information use – Data analysis

Information use – Model evaluation

Information use – Data reporting

Injury prediction

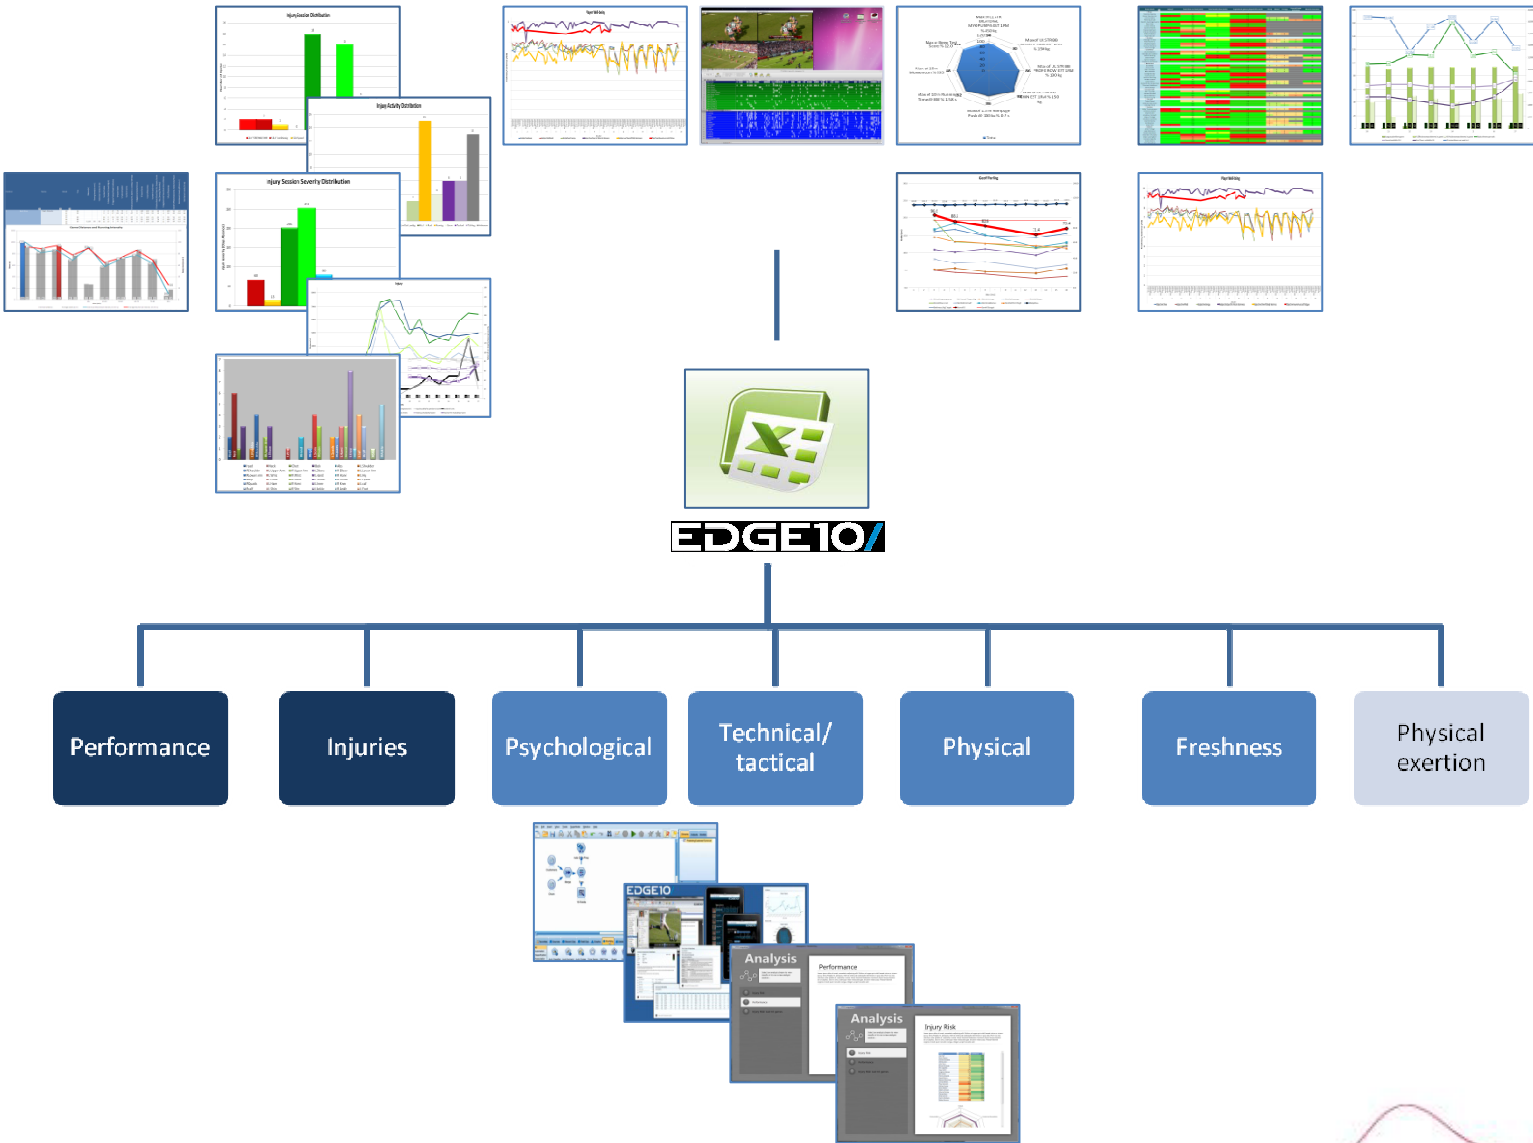

- Yes or no
- Confidence

How do we affect this?

- **Chronic**
 - Strength and tolerance of tissue
 - Gait (technique with young players only)
- **Acute**
 - Tolerance of tissue
 - Fatigue
 - Physical (training volume and recovery)
 - Psychological

Information use – Data reporting

Summary

Benefits

- Better organised scientific based data leading to predict and effect performance/ injury risk leading to:
 - Improved squad well-being
 - Improved skill acquisition
 - Stronger, faster, more powerful, fitter players
 - Fresher players
 - More effective training management
 - Fewer and less severe injuries to key players
 - Better performance
 - Marginal gains

Future

Where could we head next?

Performance

- Technical/ tactical analysis

Recruitment

- Youth player selection

Genetics

- Player development
- Training direction

Project Outcomes & Lessons Learned

Future Plans

DHL Supply Chain at a glance

DHL Supply Chain is a single source contract logistics provider that offers customers:

- Warehousing
- Distribution
- Managed Transport services
- Value added services
- Business process outsourcing: Williams Lea partnership
- Supply chain management

DHL are the worldwide Lead logistics provider

Industry sectors consist of:

- Automotive
- Consumer
- Energy & Chemicals
- Engineering & Manufacturing
- Life Sciences & Healthcare
- Retail
- Technology
- Williams Lea (BPO)
- Global Specialist Business Unit
 - Service parts logistics
 - Envirosolutions
 - NHS supply chain

Where I sit

BI Infrastructure

- **Dedicated BI product Management Practice (Centrally run)**

- Recognised practices and awareness
- Infrastructure and operational change request control
- Product maturity
- Ensure roadmap is in line with BI partner
- Project Business and IT alignment
- Ensure BI practice is in line with Business and IT strategy

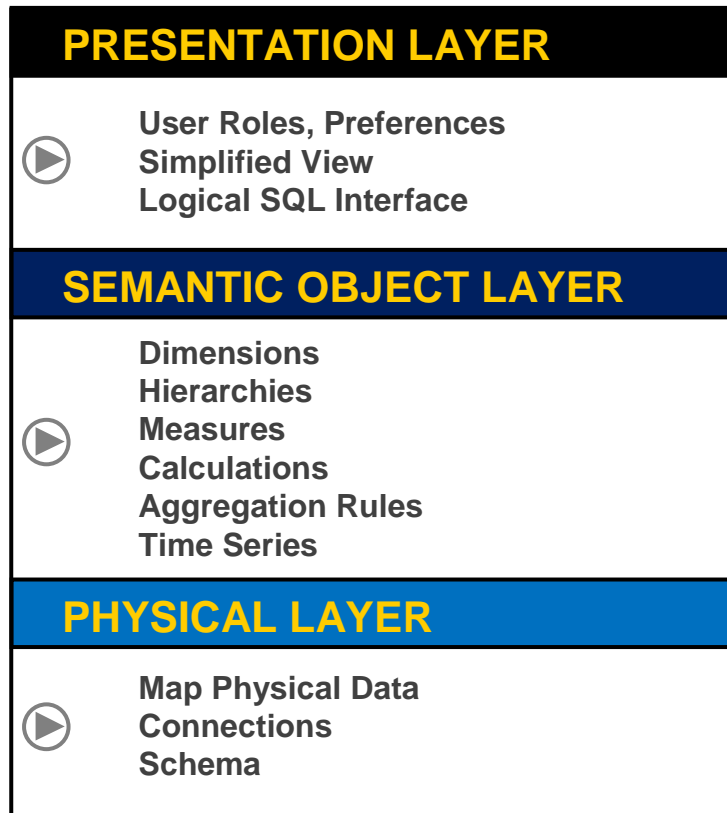

- **Specialist BI Partner**

- Requirements Gathering
- Implementation
- Project Management
- Support provider
- **Hardware & Networking – Hosted, Managed & Supported environment specifically for BI**

Architectural BI components

Structured framework for organising the data

Role-Based Views of the Information Relevant to the User

Consistent Definition of Business Measures, Metrics, Calculations, *Turning IT to Business view*

Model Once, Deploy Everywhere, Data Warehouse

Across Any Data Sources

Includes: WMS, TMS, T&A, CRM, Oracle Finance

DHL Supply Chain & Organisational
Background

Key Project Drivers

Project Outcomes & Lessons Learned

Future Plans

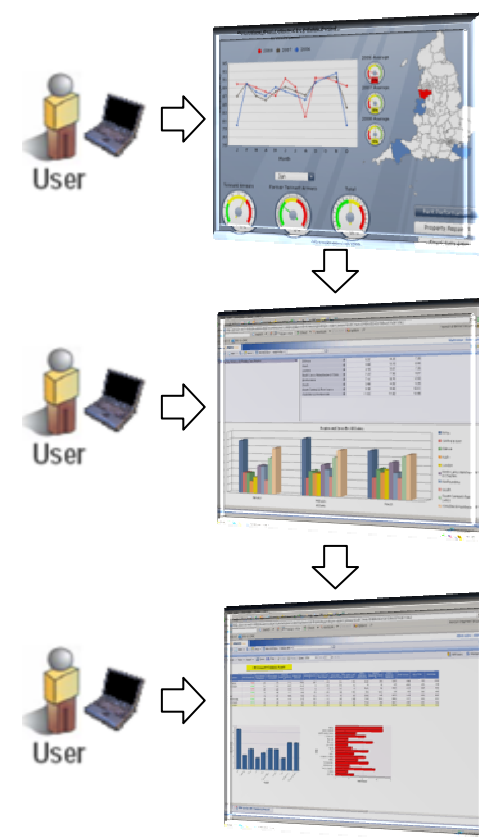

Operational Drivers

- **Prompt Delivery of Information**
 - *Reporting tools* should be easy to use with data that is up to date without the need for analysts to compile report packs
- **Dissolve 'off-Line' Data Silos**
 - Provide a *single trusted source* of business information capable of replacing duplicated, MS Excel and MS Access sources
- **Communication and Discussion**
 - Offer the ability to share findings and communicate business wide. **Devolved Report Writing**
- **Reduce Reliance on Analysts**
 - Reduce the need for highly skilled analyst involvement in the provision of management information – focus on analysing the information
- **Analyst Productivity**
 - Offer tools which allow efficient creation of complex reports, further reducing reporting time-lags

Functional Drivers

- **KPI's and Alerts**
 - *Dashboards* need to alert decision makers to exceptions in performance
- **Trend Analysis**
 - Provide comparative data to allow effective accurate, visual benchmarking of performance
- **Ad-Hoc Analysis**
 - Fully functional query toolset to allow deep analysis and reporting answering questions arising from the business
- **Interactive Push Reporting**
 - Create a suite of interactive reports and analyses commonly required by the business on a subscription basis

Technical Drivers

- **Data Warehouse – Backbone of the solution**
 - Create a single source of accurate, timely data, to support the delivery of meaningful information drawing from many different data sources to create a single version of the truth
- **Business Continuity**
 - A solution which is portable and independent of any single operational application
 - A solution that is easily supported and uses best in class technology
- **Deployment of Management Tools**
 - Delivery of an enterprise scale platform which offers scalability and depth of functionality able to support the business moving forwards

DHL Supply Chain & Organisational
Background

Key Project Drivers

Project Outcomes & Lessons Learned

Future Plans

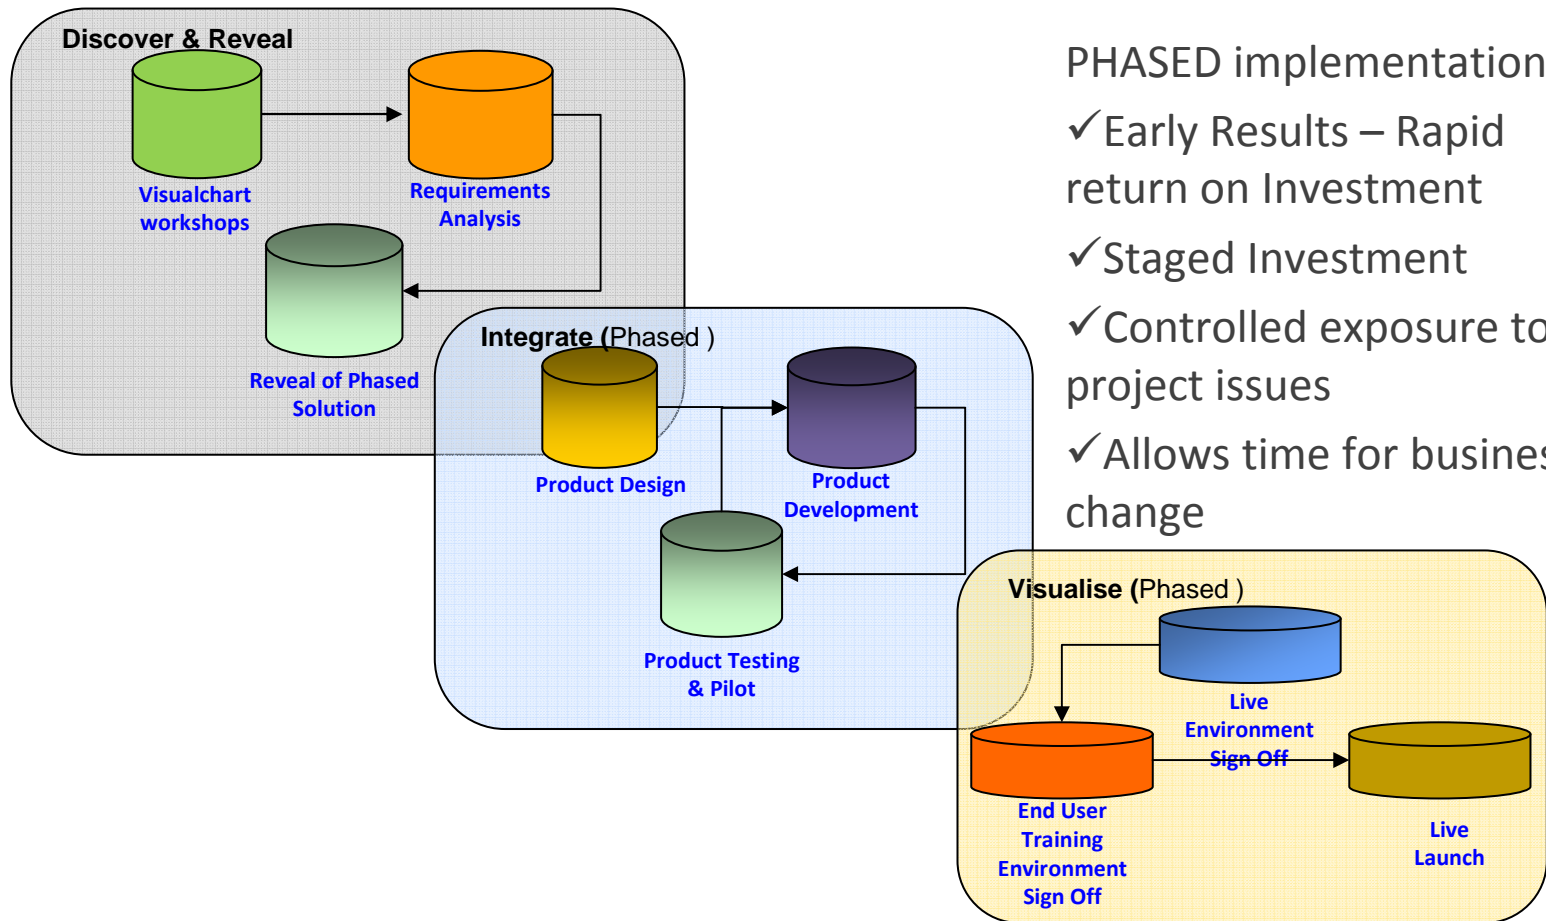

Implementation Success Factors

- Executive Sponsorship
- Data Quality
- Agreed Scope
- Program Management
- Communication
- Change Management (RIO)
- Testing & Performance
- User Training & Adoption

Solution Delivery

PHASED implementation:

- ✓ Early Results – Rapid return on Investment
- ✓ Staged Investment
- ✓ Controlled exposure to project issues
- ✓ Allows time for business change

DHL Supply Chain Current Customer Overview

- European deployment
- 300+ user base
- Various sectors & functions including:
 - Retail
 - Consumer
 - Industrial
 - Central IS
 - Transport
 - Finance
- Covering business areas:
 - Warehouse reporting
 - Transport & contract performance
 - Business performance
 - PO & financial reporting
 - KPI reporting and alignment
 - Procurement
 - Sales

Project Outcomes

DHL NHS Supply Chain – £2.4 Billion/annum 10 year contract

DHL provides logistics services for the healthcare industry. Includes temperature controlled environments for medicinal products and non temperature controlled for surgical or medical devices. Services include warehousing in an unparalleled network of GMP compliant facilities linked to managed transportation and customs clearance activities

Need for timely, automated, self service Business Information across all areas of the business:

- **Finance** – Consolidated monthly reporting against contract
 - Cash Flow from Changes in Working Capital
 - Operating Margin, Sales Growth Value
- **Sales** – Support for planning & forecasting, bid support and customer management
 - Contract Utilisation
 - At risk Business, volume & value
 - Forecast Value Accuracy, Conversion Volume Rate
 - Value of New Opportunities
- **Procurement** – Product price management and bid support
 - Operating Margin
 - Sales Frequency, Sales Volume Per Customer
 - Sales Value Per Customer
- **Delivery** – OTIF (on time in full) performance

Project Outcomes

Benefits:

- Provide NHS Supply Chain with **prompt**, reliable self served **information** on a **daily** basis.
- Enable NHS SC staff to maximise time acting on true information rather than preparing data.
- Provide a **standardised approach** to Management Information across the NHS Supply Chain.
- Deliver **Pro-active** dashboard **alerts** identifying areas that require **action**
- **Single** point access to a growing archive of NHS SC information.

Lessons learned: DHL NHS Supply Chain

- Project methodology to support business engagement, requirement definition, project delivery (timescales/cost)
- Business support and involvement throughout project delivery is key
- Reduce Complexity of project by delivering in phases
- Development of BI Competency Centre

DHL SPL (Service Parts Logistics) Global Logistics Market in High Tech Sector

One global service parts logistics network over 100 countries and for over 200 customers. DHL ensures that the right service parts are at the right place at the right time. Four key segments include:

Key business drivers for SPL were to improve report delivery time to decision makers, reduce the manual effort required to produce Management Information, provide a self-service report writing capability and introduce alerting capability based on key KPI tolerances.

- **Phase 1** - Same day delivery performance reporting
 - Delivery performance (Customer/Vendor)
 - Provide a standard offering with a single global view
 - Reduce time to action
- **Phase 2** – Build on Phase 1, adding KPIs in the following business areas:
 - Transportation, Warehouse Activity, Service Quality, Order Management
- **Phase 3** – support for more operational type reporting against the new SeLECT
 - Mobile deployment
 - Direct customer access
 - Following MDM programme

Project Outcomes

Benefits

- To provide a **standard** best practice reporting solution **globally** aligned to Business strategy.
- Reduce costs by removing the need for analysts to **manually** create performance information for **each** customer in each region
- Increase Operational efficiency by **alleviating** the impact multiple reporting processes had on existing core **applications**.
- Provide **best** in class customer reporting **experience**.
- Spend **less** time preparing reports and **more** time taking action from them.
- **Provide** single global view identifying trends from multiple view points allowing positive actions to be taken in support of customers & operations

Lessons learned: DHL SPL

- Project methodology – linking customer methodology with delivery team
- Business support and involvement throughout project delivery is key
- Reduce Complexity of project by delivering in phases
- Important to ensure momentum is maintained across delivery Phases
- Development of BI Competency Centre

Project Outcomes

DHL BA Carbon – All ‘over the wing’ replenishment for BA Short Haul Flights

Distribution of In flight airline stock for worldwide flights. Includes food, drink, cutlery, first aid boxes. This can be anything excluding plane infrastructure and furniture.

Requirement to deliver business performance (KPI) reporting across the core contract activities:

- **Transport KPIs**

- Disruptions Response Variance (DRV)
- Total Trips(TTs)
- Loading Planning Efficiency (LPE)
- Total Disruptions (TDs)
- Vehicle Arrives Late (VAL)

- **Warehouse KPIs**

- Equipment Prep Time (EPT)
- Late Load Volume (LLV)
- Late load tolerance (LLT)
- Un-catered Flights (UF), Un-catered Disruptions (UD)

- **Business KPIs**

- Serviced On Time (SOT)
- Total No Flights Against Plan (FP)
- Total No Passengers Against Plan (PP)

Project Outcomes

Benefits

- Provide **BA** with **prompt**, stunning self served **information** on the Carbon operation.
- Identify **trends** from **any** time viewpoint on which to take **action**.
- **Clear** visible day by day **performance** monitoring.
- Remove IT **Bottlenecks** and requirement on XL analysts.
- Use best of breed BI Technology to easily handle and analyse the **millions** of records Carbon will generate over time.

Lessons learned: DHL BA

- Project methodology to support business engagement, requirement definition, project delivery (timescales/cost)
- Business support and involvement throughout project delivery is key
- Reduce Complexity of project by delivering in phases
- Business sign-off and removal of old 'reporting' systems
- Development of BI Competency Centre

Project Outcomes & Lessons Learned

Future Plans

Future Plans

- Initiate a DHL Supply Chain BI User forum
 - Widen understanding of use benefits and share best practice, knowledge sharing
- Develop and deliver more 'templated' BI applications
 - Warehouse Performance Management
 - Transport Management
- Broaden the reach of BI across other areas within Deutsche Post DHL (Mail, GF&F, Express, Functional areas)
- Mobile BI deployment and consumerisation
- BIG data
