

# Get a FREE Security Assessment of Your Mobile App!

Did you know that mobile apps can be hacked in as little as 3 minutes?

An unprotected mobile app exposes your business and proprietary data to risk through reverse-engineering and tampering. According to the recent 2014 Cost of Data Breach Study from the Ponemon Institute, the average total cost of a data breach is \$3.5 million! Here's how it works and what you'll get:

Arxan will analyze your mobile app's exposure to the following 9 Key Risks:

9 Key Mobile App Risks Assessed	
✓	Source Code Exposure
✓	Function Name Exposure
✓	Static Data Exposure
✓	Symbol Exposure
✓	Jailbreak Detection Exposure
✓	Authentication Exposure
✓	Cryptography Exposure
✓	Licensing Exposure
✓	Payment Exposure

## We will send you a **FREE** Personalized Report detailing:

- Your mobile app's level of exposure (high to low) in 9 key risk areas
- The likely key attack points in your app's binary
- Recommendations and best practices to secure your mobile app

That's it! It's that simple. Request your free assessment today at the URL below!
