Web Application Security Don't be Tomorrow's Headlines

WEB APPLICATION SECURITY – DON'T BE TOMORROW'S HEADLINES

CHOOSE FROM AN IBM WEBINAR ON ONE OF THESE DATES:

**Monday 10th, Wednesday 12th, Wednesday 19th, Friday 21st,
Wednesday 26th or Friday 28th November**

Each seminar starts at 12:30pm and lasts for 40 minutes.

You could be one click away from making headlines....

- A glitch on the web site of hotel chain Travelodge led to names, addresses and parts of credit card numbers being accessible to other customers.
- The Foreign & Commonwealth visa application website allowed applicants personal details to be viewed.
- Credit card details were able to be accessed from the Cotton Traders website.

Even with companies making heavy investments in network security, Gartner research indicates that 75% of today's attacks occur at the application level and 80% plus of companies are likely to suffer an attack by 2010. What's more, if you trade over the web, your applications have to be protected for Payment Card Industry compliance.

IBM offers you the chance to attend one of our free 40 minute application security webinars.

Learn first hand:

- Importance of web application security
- Today's most significant on-line threats
- How they occur and what can be done to prevent them
- Manual versus automated approaches for scanning and identifying vulnerabilities
- Best practices for fixing vulnerabilities

This webinar will be hosted by a security industry expert at 12:30 pm for 40 minutes on one of the following dates: 10th, 12th, 19th, 21st, 26th or 28th November
