About this document

This document provides details of documentation changes associated with APARs shipped for Software Configuration and Library Manager (SCLM), Version 1 Release 9.0.

The documentation changes apply to these editions of:

* The *Software Configuration and Library Manager (SCLM) Guide and Reference V1 R9 (SC34-4817-08)*.
* The *Interactive System Productivity Facility (ISPF) Messages and Codes V1 R9 (SC34-4815-07)*.

If you have applied the relative APAR to your release of SCLM, you should read these documents in conjunction with the changes described in this Addendum.

The Addendum document lists the changes to the *SCLM Guide and Reference* and *ISPF Messages and Codes* that are required to reflect new behavior resulting from the application of APAR changes.

The changes are listed by APAR number, in reverse date order, so that the most recently released change appears at the beginning of the document. Each description shows:

* The date of the PTF release
* The APARs included in the released PTF
* Details of those APAR changes that affect documentation

Notes:

1. This document does NOT describe those APAR fixes that do not have an impact upon documentation.
2. The enhancements and corrections described in this section are only available after applying the listed APARs.

PTF/APAR documentation changes

There are no PTF/APAR documentation changes contained in this Addendum.

Note however that these documents have been updated with documentation changes for the APARs shown:

SCLM Guide and Reference V1 R9 (SC34-4817-08)

OA21740   Cross-dependency database.

See changes marked with a change bar (″|″) in these sections:

Chapter 1, ″Defining the project environment″
- Section: ″Step 6: Allocate and create the control data sets″
- Section: ″Step 8: Create the Project Definition″

Chapter 9, ″Using SCLM functions″
- Section: ″Utilities (option 3)″

Chapter 17, ″SCLM services″
- GETXDEP—return cross-dependency information
- XDEPUPDT—Update Cross-dependency Information

Chapter 19, ″SCLM macros″
- FLMCNTRL macro
- FLMALTC macro

OA20514   Additional parameters for GETBLDMP SCLM service.

See changes marked with a change bar (″|″) in these sections:

Chapter 16. ″Invoking the SCLM Services″
ISPF Variables

Chapter 17. ″SCLM Services″
GETBLDMP

SCLM Messages and Codes V1 R9 (SC34-4815-07)

OA21740   Cross-dependency database.

See changes marked with a change bar (″|″) in this section:

Chapter 3, ″SCLM messages″
New messages:
- FLM398Z
- FLM399A
- FLM399B
- FLM399C
- FLM399D
- FLM399E
- FLM399F
- FLM85500
- FLM85501
- FLM85505

- FLM85506
- FLM85508
- FLM85509
- FLM85514
- FLM85515
