

## Inventory Visibility Report – Help File

The purpose of the Inventory Visibility Report is to share the inventory holding information with Albertsons' business partners. Each email includes all the GTINs from a specific supplier for which Albertsons has an inventory recording. The information is displayed in a matrix where rows consist of distinct locations - distribution centers and stores - and the columns consist of departments within the locations, i.e., Back of Store, Sales Floor.

If a GTIN is not shown on the email then either Albertsons does not have an inventory recorded for this item or it does have one but Albertsons has not been told to associate the item's company prefix to that of the supplier.

If the GTIN's Description, UPC or UDEX information are not provided then item data is not synchronized with Albertsons and we suggest you finish the procedure of data synchronization as soon as possible.

Inventory Visibility Report for **Supplier Name**  
 Reported on : **Mon, 25 Jul 2005 11:11:59 -0700**

GTIN	Description	UPC	UDEX
