# Compaq SANworks

## Secure Path Version 3.1B for Windows Workgroup Edition
## Read Me First

Your Secure Path kit contains two shrink-wrapped packages. Each shrink-wrapped package is separated by controller type and identified with a white label.

If your Microsoft Windows host is connected to MSA1000 controllers, install the Secure Path software in the shrink-wrapped package marked StorageWorks Modular Array 1000 (MSA1000).

If your Microsoft Windows host is connected to 4100 controllers, install the Secure Path software in the shrink-wrapped package marked StorageWorks RAID Array 4100.

**NOTE:** You cannot use a configuration that includes both the MSA1000 and the RA4100.

Each shrink-wrapped package includes:

*   Secure Path CD-ROM by controller type

*   Installation and Reference Guide

*   Release Notes
