## About this flash

The information is organized into general categories.

---

### Problem description

This flash addresses a problem with using the Recover command in a Global Mirror session.

**An issue was found affecting the Recover processing of ALL TotalStorage® Productivity Center for Replication sessions that use Global Mirror**

This issue might affect users who have Global Mirror sessions as part of their solution. Global Mirror sessions include the following:

- Global Mirror Single Direction
- Global Mirror Failover/Failback
- Global Mirror Failover/Failback with Practice
- Metro Global Mirror

A severe issue has been identified during the processing of a Recover command, in which consistency group formation for a Global Mirror session is stopped or abruptly terminated. This problem might result in TotalStorage Productivity Center for Replication incorrectly reverting the FlashCopy® relationships. Although this is an unusual event, it is **strongly encouraged** that all users running Global Mirror apply fix 3.3.3.8 to ensure that the Recover process provides data consistency across the session.

## Appendix. Notices

This information was developed for products and services offered in the U.S.A.

IBM® may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing  
IBM Corporation  
North Castle Drive  
Armonk, NY 10504-1785  
U.S.A.

For license inquiries regarding double-byte (DBCS) information, contact the IBM Intellectual Property Department in your country or send inquiries, in writing, to:

IBM World Trade Asia Corporation Licensing
