1. The following are needed for the CST 4th Quarter recommendation: the UR6 series:  
[http://5550.ibm.com/systems/71/s/7/s/su###rt/ser\\*test/](http://5550.ibm.com/systems/71/s/7/s/su###rt/ser*test/)

**Revised .n. untested**

The APARs listed in the table below represent the problems the CST team encountered during the month following the quarterly recommendation; however, if a problem was encountered and corrected for this recommendation, it will not be listed in the table below. The APARs listed below are either open, or their associated PTFs were not yet available for testing in the CST environment prior to this recommendation. Customers should verify APAR status through normal means.

Note: Consolidated Service Test does not replace the regular service procedure. If a problem is encountered with product code, you should report the problem to IBM support.
