Velocity Software, Inc.

Unlocking the Mysteries of Linux

Velocity Software offers state-of-the-art monitoring and management software that will put you in control of your z/VM & Linux systems. Velocity Software is the only company that offers a complete z/VM & Linux performance solution: Products & Tools, Educational Seminars, Quarterly Newsletters and the co-author of IBM Redbooks.

Achieve the R.O.I. you Need from your IT Investment:

- **Accurate & Confident Linux Proof-of-Concepts**
- **Better Environment for Application Development and Testing**
- **Precise Server Consolidation Analysis**
- **Faster & Confident Production Deployments**
- **Optimize IT Charge-Back Accounting**

The Linux Power Suite

Hosted on IBM VM/ESA and z/VM - ESALPS: **L**inux **P**ower **S**uite can help you monitor, tune and manage your z/VM & Linux systems for optimal processing power throughout your corporation's Linux application lifecycle.

Linux Power Suite

- **Real-time Diagnoses, Trouble-shooting**
- **Historical Analysis**
- **Post-processing Report Generator**
- **TCP/IP Network monitor**
- **Single or Multi-system management**
- **Integrated Monitoring**
- **Exception Reporting**

Velocity Software wants you to be **proactive** rather than reactive. Our solution helps you exceed your customer's expectations by helping you identify z/VM Linux application and systems performance bottlenecks before they happen. Regardless if the problem lies in the Network, the Operating System, or the Subsystems, Velocity Software will render the information through an easy to use interface.

**Focusing on metrics that will measure & monitor your
z/VM & LINUX resources, Network, Linux systems and application data.**
